Installation Tips

This product is electrically conductive, be sure to insulate any terminals or circuits that may come in contact with this product.

Installation Tips

1. Put on gloves and safety glasses
2. Gently push the tail of the Thermal-Tie through the slot in the head (Figure A)
3. Use your fingers to pull tail through the head so it is snug (Figure B).
4. Use needle nose pliers to coil the tail back into itself. To get a better idea do a web search for Howard Hughes fingernail (Figure C).
5. Use the diagonal pliers to trim off the excess of the tail (Figure D)
6. Grab the needle nose pliers and turn the remaining sharp edge down back into the ties as before
