Although they have been around for many years now transparent LCD displays remain one of the most exciting and WOW-factor innovations in LCD technology, opening up a wide range of new opportunities in retail, marketing and many more interesting applications. Even gaming and industrial solutions have optimised the benefits of this incredible technology.

Here at CDS we have our own range of transparent displays manufactured for us, and as we control the manufacturing, we can not only offer more sizes than anyone else in the world, but also guarantee stable supply, long term availability and LCDs with amazing quality. The technology allows you to display information / promotions on the digital display, whilst allowing you to see through it.

This integration kit is designed to be built into an enclosure produced by the buyer/integrator with the help and experience from our amazing team!
