Note that with respect solely to the GPL Software, no warranty is provided. We do not offer direct support for the distribution.

1. Installation

1.1 Installation Process

Step 1: Unpack the Unit

This package contains the following items:

- The unit
- Quick Start Guide
- Screws for disk drives
- Key
- Power cord
- 19V DC power transformer
- CD with **Install Wizard, Backup, Live View, Playback, Verification Tool** and **Offline Tool** application, user manual, and quick start guide

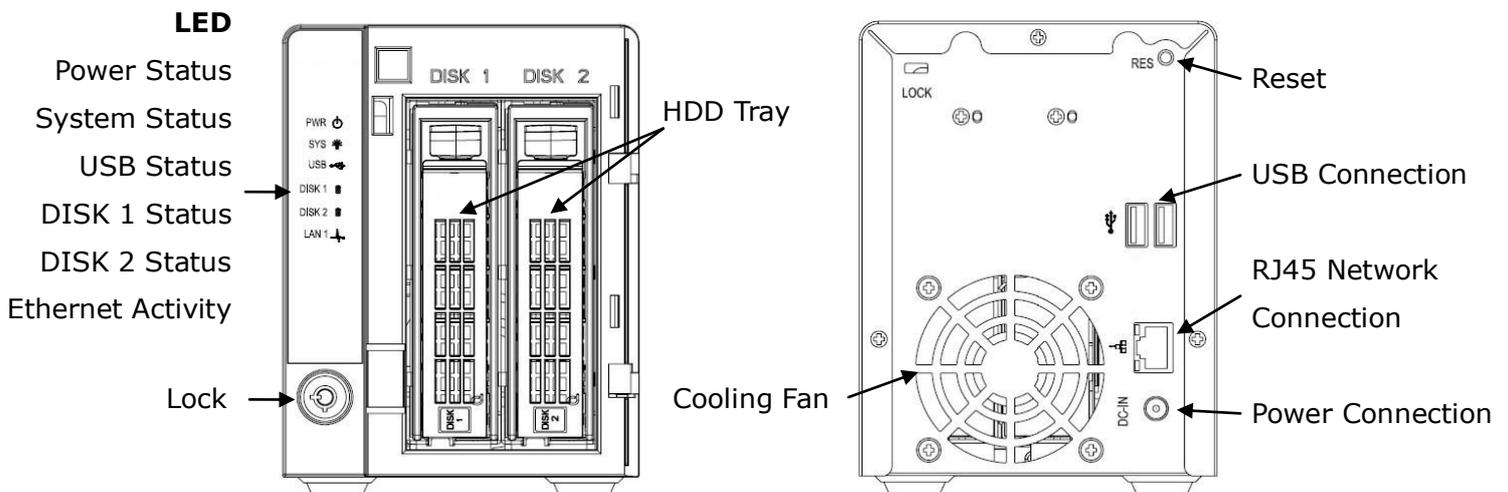

The electronic components within the unit can be damaged by Electrostatic Discharge (ESD). Please take precautions at all times when handling the unit or its sub-assemblies.

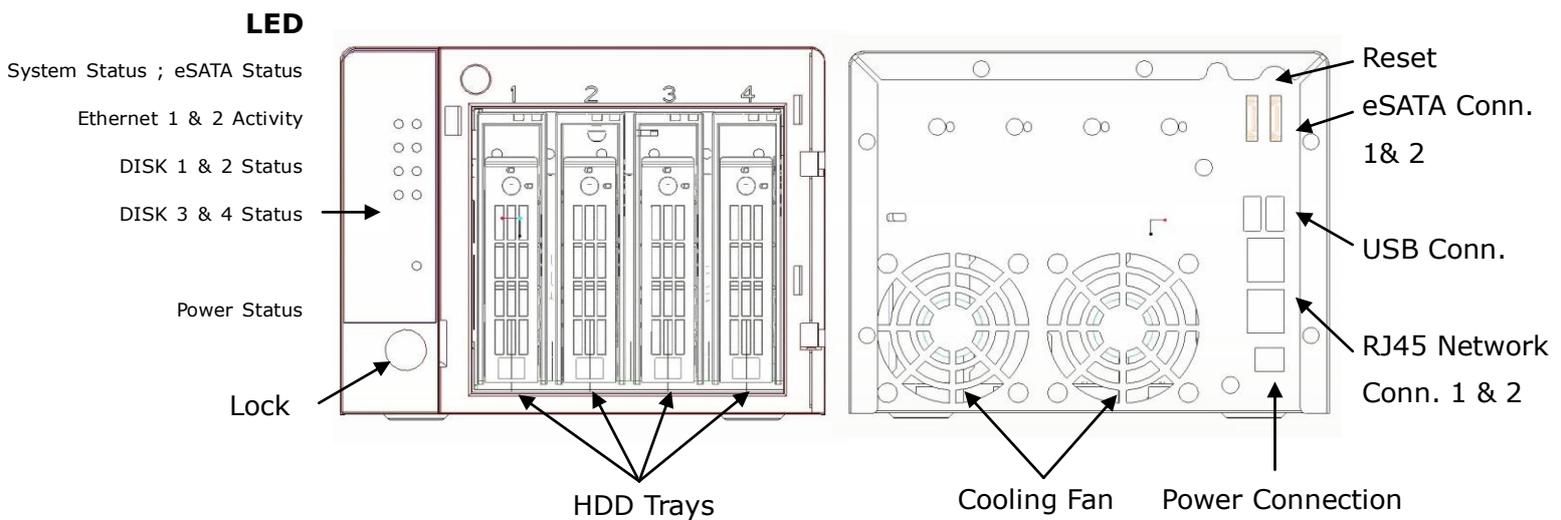

To configure the unit, you must install the software onto a desktop/ laptop running Windows XP-SP3 32bit, Windows 7 32/64bit.

2-bay unit front/rear view

4-bay unit front/rear view

Step 2: Install Hard Drives

Refer to compatibility list and install the HDDs. For optimal performance, install disks with the same model and storage capacity. The available RAID level depends on the amount of disks installed.

1. Open the lid on the front of the unit enclosure.
2. Pull an HDD tray from the enclosure. See the front view diagram.
3. Carefully lock the disks into the HDD tray with screws. 4 screws for each disk. Slide the HDD tray back in once you have finished.

Step 3: Connect to the Network

1. Attach one end of the network cable to the RJ45 network connection. See the rear view diagram.
2. Attach the other end of the network cable to your Ethernet hub or switch.

If there are multiple networks at your facility, note the network to which you connect the unit. You will need this information during the setup process. **Please also enable the DHCP function within the network, as the unit will retrieve an IP address through DHCP by default.**

Step 4: Connect the Power

1. Attach the power cord from the power source to the power adapter.
2. Connect the power adapter to the back of the unit enclosure. See the rear view diagram.
3. On the front of the unit, press the power button. See the front view diagram.

It takes about a minute for the unit to fully power up. Once it is powered up:

- The System Status LED turns blue. See the front view diagram.
- The buzzer beeps one time.

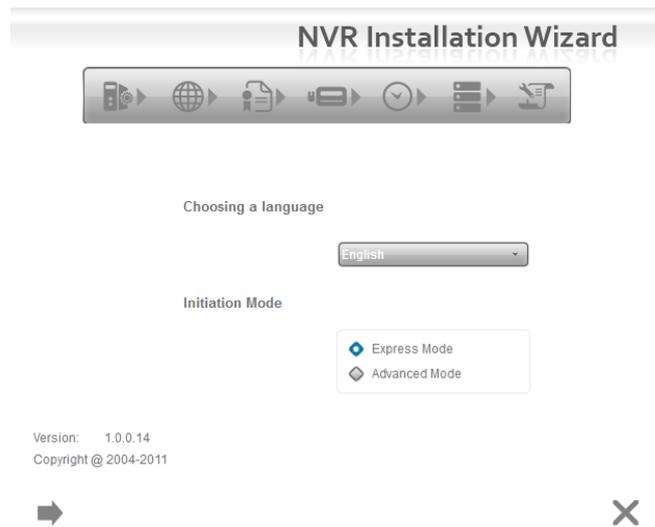

Step 5: Install the Software on your Computer

1. Insert the CD into your computer's CDROM drive.
2. Double-click the **Setup.exe** command to begin installation.
3. Follow the instruction of the **Setup.exe** program, and click the **Finish** button to close the installer.

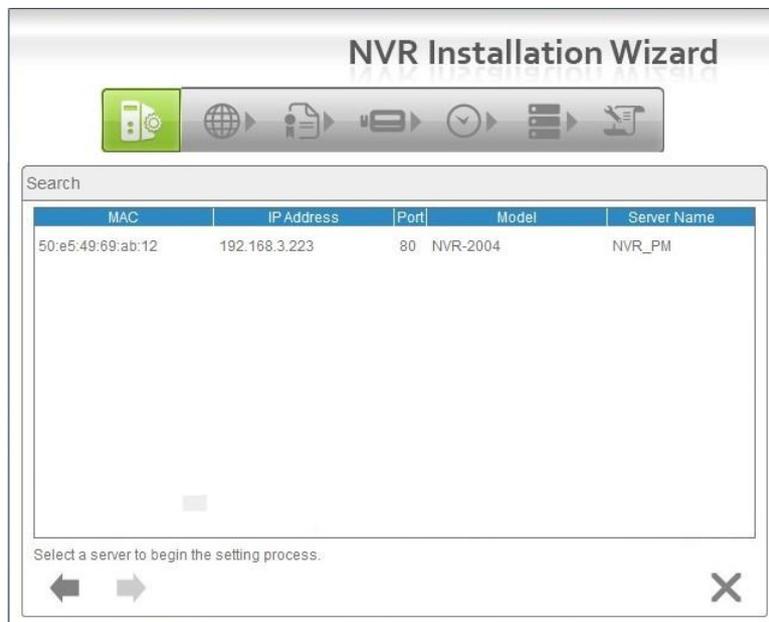

Step 6: Set up the Unit

The software **Installation Wizard** performs the setup procedures on the unit. After this procedure, you can begin using it.

1. Go to Start > NVR > NVR Install Wizard.
2. This program will show the default language setting and initiation mode.
3. Choose your preferred language and initiation mode, and then click the  button.

- **Express Mode:** In this mode, you don't need to set up the network settings, Date/Time and RAID level.
 - **Advanced Mode:** In this mode, configure all settings manually: network, license, camera, Date/Time, upgrade notification, and RAID level.
4. The **Installation Wizard** program starts searching for all the network devices on the LAN currently. Click on the newly connected NVR's field, and then click the ➔ button.

5. The NVR's login screen will appear. Type in the password (default = "admin"), and then click the **OK** button.

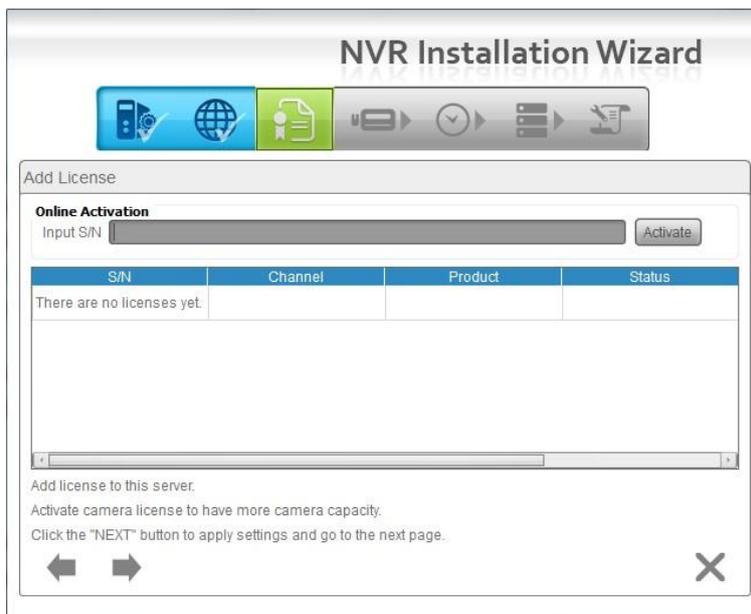

The default Administrator password is "admin".

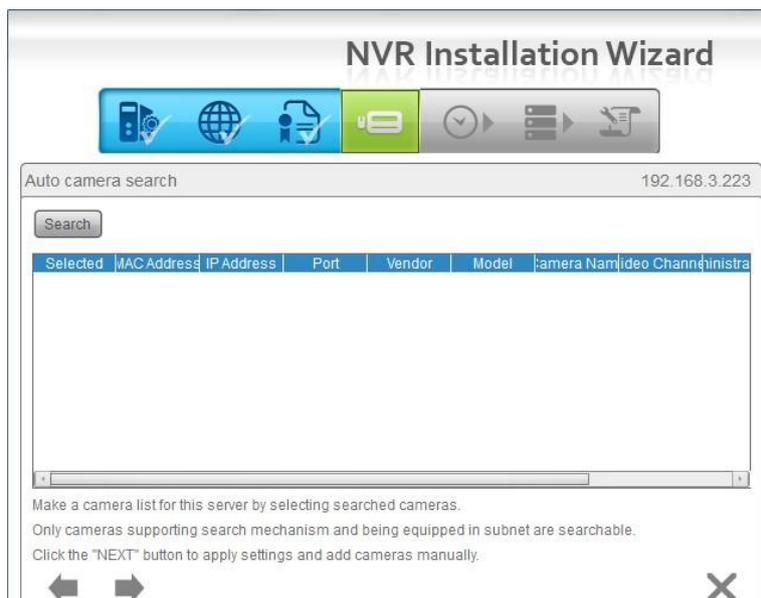

6. Name this server (the NVR) and write down its IP Address for finding it on the Internet in the future. Select the network type, and then click the ➔ button.

- **Obtain network settings automatically from external DHCP server:** This function applies all settings which are automatically generated by the DHCP server, such as IP, subnet mask, gateway, and DNS.
- **Configure network settings manually:** This function lets you configure the preferred settings one by one.

7. If you have obtained a license for additional camera channels, you should enter the Serial Number (S/N) on this screen (see below) to activate the additional channels. Click the Activate button and wait for the license to be verified online. Wait for the license to be listed and then click the ➔ button to save and proceed.

8. Add online cameras for this NVR. There are two ways of adding cameras – either click Search and select from the search list, or manually configure the cameras. Click the  button after adding your cameras to the list – this will apply the settings and take you to the Manual camera setup page.

NVR Installation Wizard

NVR Installation Wizard

Manual camera setting 192.168.3.223

Camera Name	IP Address	Port	Administrator Name	Password	Vendor
1 Camera 1	192.168.0.96	80	butter	123456	Panasonic
2 Camera 2	192.168.1.233	4088	admin	admin	Axis
3		80			-- none --
4		80			-- none --

Make a camera list for this server by adding cameras manually.
 Click the Auto Detection button to obtain vendor/model automatically after filling in other fields.
 Click the NEXT button to apply settings and go to the next page.

9. Set up the time zone, date, and time, and apply daylight saving changes if needed. Click the button.

NVR Installation Wizard

Date/Time 192.168.3.223

Time Zone: (GMT+08:00) Beijing, Hong Kong, Kuala Lumpur, Perth, Singapore, Taipei, Urumqi

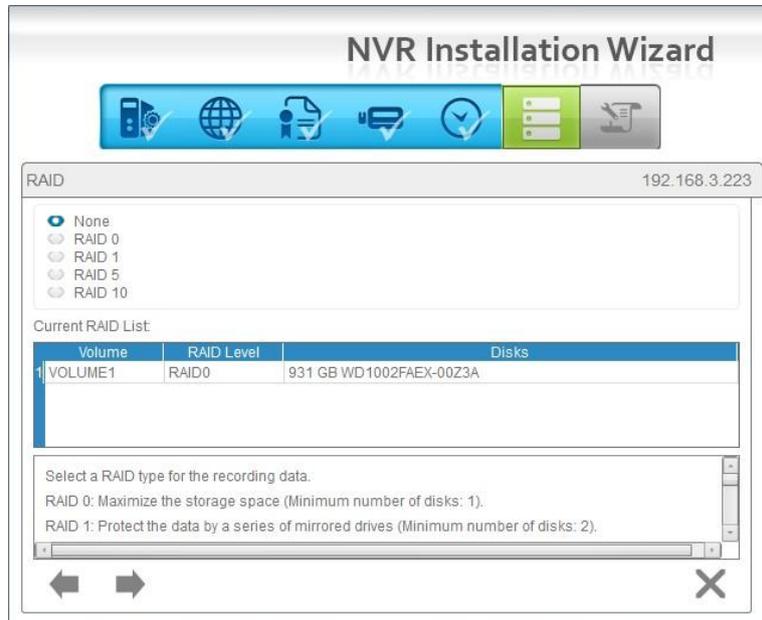

Date: 9/28/2011

Time: 6:46:56 PM

Adjust clock for daylight saving changes +2 hour(s)

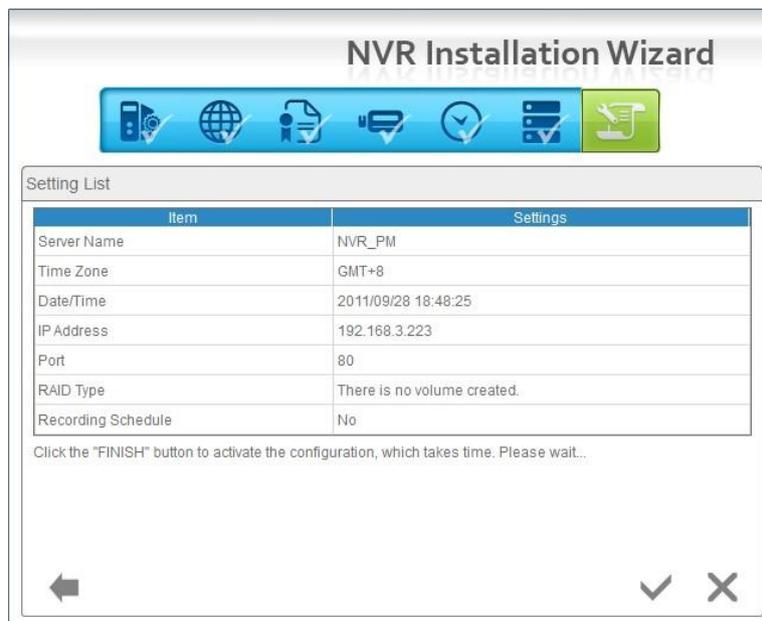

Select the time of this server.
 Click the NEXT button to apply settings and go to the next page.

10. Follow the following instructions and select the RAID type you want to create. Click the  button.

For a 2-bay unit, only RAID 0 and 1 are available.

11. Review your settings. If the settings are correct, click the **Finish**  button to exit the settings procedure and activate the system.

Once the "FINISH" button is clicked, the unit will start working. In order to ensure the stability of the unit, **never pull any disks out when the system is running.**

1.2 LED Status Definitions

Function	LED Status
Power Status	<ul style="list-style-type: none">■ Power-on: blue■ Power-off: dark

2.Settings

After setting up the unit, log into the DVR by entering its IP address in the browser (Internet Explorer 7 and later). When connecting, choose your language, enter the username and password, and then click the login icon.

There are four main menu categories in this DVR's GUI: Settings, Live View, Playback, and Logout. The shortcut buttons to these functions and their submenus will be shown on the top of the page. The current firmware version and free storage capacity are shown above the function list.

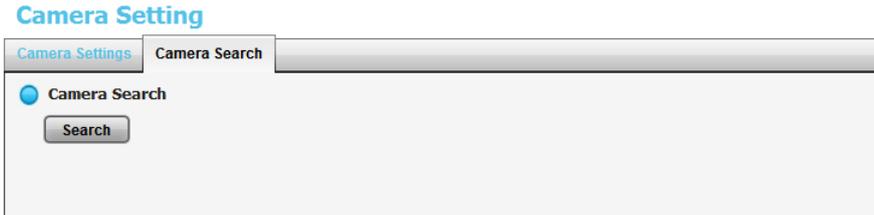

2.1 Camera Setup

2.1.1 Add Cameras by Camera Search

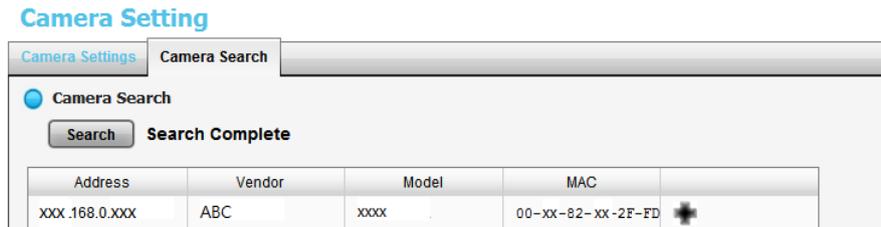

The function enables the user to automatically search and add cameras in the same network. There are two search mechanisms, one is UPnP, another is the **camera search tool**. Before searching UPnP cameras, make sure that the cameras possess UPnP functionality.

1. Open Internet Explorer and log into the unit.
2. Click **Settings/IP Camera/Camera Settings**.
3. Click the **Camera Search** tab.

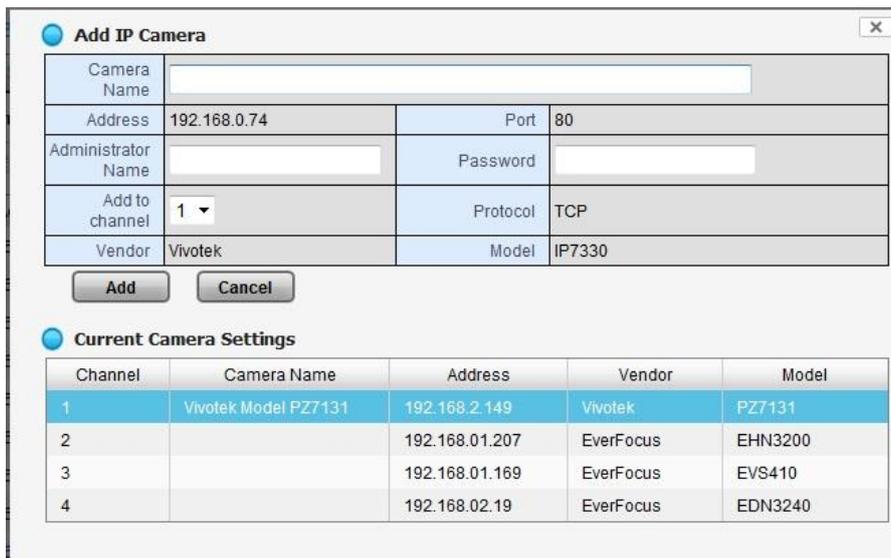

- Click the **Search** button.

- The system will list all the currently available cameras. Select a camera by clicking on it. Click the **+** icon to add that camera to your camera list.

- After clicking the camera's **+** icon, that camera's setting page will pop up. Insert the camera name, username, and password. Click on the "Add to channel" tab and select the channel that you want to add the camera to.

Note that the "username" field is called "Administrator Name" in this instance. This is because **admin-level control is required** in this setup procedure to ensure smooth interaction between the camera and the NVR.

- Click the **Add** button to add the camera.
- After clicking the **Add** button, the updated camera list will be displayed in the **Camera Settings** display.

No.	Camera Name	Address	Port	Vendor	Model
1	Camera 1	192.168.0.96	80	PPP	123
2	Camera 2	192.168.1.233	4088	AAA	214
3			80	-- none --	-- none --
4			80	-- none --	-- none --

2.1.2 Add Cameras Manually

1. Open Internet Explorer and log into the NVR.
2. Click **Settings / IP Camera / Camera Setting**.
3. Click the **Camera Settings** tab. The Camera List will be displayed on the bottom of the page.
4. On the Camera List, click on the number that you want to assign to the camera (also called the "camera channel number"). Enter the camera's information into that number's setup page by double-clicking on the number's field.

No.	Camera Name	Address	Port	Vendor	Model
1	Camera 1	192.168.0.96	80	PPP	123
2	Camera 2	192.168.1.233	4088	AAA	214
3			80	-- none --	-- none --
4			80	-- none --	-- none --

5. The camera channel number's configuration field will open:

Camera Settings

Camera Settings | Camera Search

● Camera Settings

Camera No. **Camera 3**

Camera Name

Address Port

Administrator Name Password

Video Channel Protocol TCP UDP HTTP

Vendor Model

- **Camera name:** The name of the camera channel.
- **Address:** The IP address.
- **Port:** The transmission port.
- **Administrator Name:** Login username.
- **Password:** Login password.
- **Video Channel** (feeds per channel): Select the number of analog cameras supported by one video server or select the number of IP cameras possessing multiple lens/channels.
- **Protocol:** Data transmission protocol.
- **Vendor:** Camera vendor name.
- **Model:** Camera model name.

Note that the “username” field is called “Administrator Name” in this instance. This is because **admin-level control is required** in this setup procedure to ensure smooth interaction between the camera and the NVR.

6. Click the **Save** button.

- **Save:** Save the configuration of this camera.
- **Reset:** Return to the previous saved settings of the selected camera.
- **Clear:** Set all the settings to their default values.
- **Auto Detection:** After inserting the IP address, port, username, and password, click this button to automatically detect other camera information, including the Video Channel (feeds per channel), Protocol, Vendor, and Model.

2.1.3 Modify Camera Information

1. Open Internet Explorer and log in to the unit.
2. Click **Settings / IP Camera / Camera Settings**.
3. Click the **Camera Settings** tab.
4. Click the camera which you want to modify.
5. Modify the information of this camera.
6. Click the **Save** button.
7. Use the same method to replace a camera if needed.

2.1.4 Modify Camera Parameters

1. Open Internet Explorer and log in to the unit.
2. Click **Settings / IP Camera / Camera Parameters**.
3. Click the **Camera Parameter** tab.
4. Click the camera which you want to modify on the camera list.
5. Modify the information of this camera.
6. Click the **Save** button.

Camera Parameter

The screenshot shows the 'Camera Parameter' configuration page with the 'Lens Settings' tab selected. The 'Camera Parameter' section is active, showing settings for 'Camera 1'. The 'Video Format' is set to 'Motion JPEG', 'Frame Rate' is '5', 'Resolution' is '640x480', and 'Quality' is '1 Fine'. The 'Audio' checkbox for 'Enable Audio' is unchecked. 'Save' and 'Reset' buttons are at the bottom.

- **Camera Name:** The name of the camera.
- **Video Format:** Choose the type of format which this camera supports.
- **Frame rate:** Select the frame rate of the camera.
- **Resolution:** Select the resolution of the camera.
- **Quality:** Select the image quality of the camera.
- **Audio:** Check the **Enable Audio** option to view and enable audio recording.

2.1.5 Set up Lens Settings

1. Open Internet Explorer and log in to the unit.
2. Click **Settings / IP Camera / Camera Parameters**.
3. Click the **Lens Settings** tab.
4. Click the camera which you want to modify in the camera list.
5. Modify the information of this camera.
6. Click the **Save** button.

Camera Parameter

The screenshot shows the 'Camera Parameter' configuration page with the 'Lens Settings' tab selected. The 'ImmerVision Settings' section is active for 'Camera 2'. The 'ImmerVision Lens' is set to 'Enable', and the 'Camera Position' dropdown menu is open, showing options: 'Ground', 'Wall', 'Ceiling', and 'Ground'. A 'Save' button is visible. Below is the 'Camera List' table.

No.	Camera Name	ImmerVision Lens	Camera Position
1	Camera 1	Disable	-- none --
2	Camera 2	Disable	-- none --
3		Disable	-- none --
4		Disable	-- none --

- **Camera Name:** The name of the camera.
- **ImmerVision Lens:** Enable the option if ImmerVision lens is installed.
- **Camera Position:** Select the position of the camera.

If users enable the lens while lens is not installed correctly or not even installed, a warning message will pop up as a notification if users are trying to operate lens on liveview page.

2.1.6 Set up 2nd Stream

The stream profile is designed for mobile clients and lower-fps live stream display. Without stream profile integration, users cannot watch live video on mobile clients nor select a lower fps stream for Live View. Further, for performance considerations, we fix the resolution and frame rate for each brand/series. You can refer to [appendix](#) for a supporting list.

1. Open Internet Explorer and log into the unit.
2. Click **Settings / IP Camera / Camera Parameters**.
3. Click the **2nd Stream Settings** tab.

Camera Parameter

Camera Parameter | Lens Settings | **2nd Stream Settings**

2nd Stream Settings

Channel	1
Camera Name	Camera 1
Stream Profile	<input checked="" type="radio"/> Enable <input type="radio"/> Disable

Stream Profile

Low Profile	Format	MJPEG
	Frame Rate	2
	Resolution	CIF
Minimum Profile	Format	MJPEG
	Frame Rate	1
	Resolution	CIF

Camera List

Channel	Camera Name	Camera Vendor	Camera Model	Sub-Streaming
1	Camera 1	PPP	123	Disable

- **Stream Profile**: The default status is **Disable**. If you want mobile client user to access to this camera, you can select **Enable**, and click **Save** button in the middle of the page.
- **Low Profile**: The stream profile, under 300kbps, is designed for mobile client single-view.
- **Minimum Profile**: The stream profile, under 100 kbps, is designed for mobile client multi-view.

2.1.7 View Camera Status

1. Open Internet Explorer and log into the unit.
2. Click **Settings / IP Camera / Camera Status**.

Camera Status

No.	Name	Address	Conn. Status	Rec. Status	Framerate	Bitrate
1	Camera 1	192.168.0.96	Connected <input type="button" value="Disconnect"/>	Stopped	5.0 fps	2081.5 Kbps
2	Camera 2	192.168.1.233	Connected <input type="button" value="Disconnect"/>	Stopped	9.3 fps	4010.0 Kbps
3			Disconnect <input type="button" value="Connect"/>	Stopped	0.0 fps	0.0 Kbps
4			Disconnect <input type="button" value="Connect"/>	Stopped	0.0 fps	0.0 Kbps
						6091.5 Kbps

Estimated Remaining Recording Time: **14 day(s) 11 hour(s)**

If your total bitrate becomes **red**, it means that the loading of the system is too heavy

Last Update at 2011年8月16日 下午 04:00:42

- **Conn. Status**: The status of the connection. Click the **Connect** or **Disconnect** button to change the connection status.
- **Rec. Status**: The set recording schedule of this camera in this time.
- **Framerate**: The frame rate of this camera.
- **Bitrate**: The transmission bit rate of this camera.
- **Estimated Remaining Recording Time**: Estimated remaining recording time is dividing the current free capacity by dynamic total bitrate.

If your total bitrate becomes red, it means that the loading of the system is too heavy.

2.2 Recording & Event Setup

2.2.1 Recording Mode Setup

1. Open Internet Explorer and log in to the unit.
2. Click **Settings / Recording & Event / Recording settings**.
3. Click the **Recording Mode** tab.
4. If selecting **Always Recording**, the chosen cameras will begin to record immediately.

Recording Settings

Recording Mode	Recording Schedule
Recording Mode	
Recording Mode	<input checked="" type="radio"/> No Recording <input type="radio"/> Recording by Schedule <input type="radio"/> Always Recording
Automatic Recycle	<input checked="" type="checkbox"/> Enable
Keep Video	<input type="checkbox"/> Keep Video <input type="text" value="7"/> Days
<input type="button" value="Save"/> <input type="button" value="Reset"/>	

- **No Recording**: Turn off the recording.
- **Recording by Schedule**: Recording by schedule.
- **Always Recording**: Permanently turn on the chosen cameras.

- **Automatic Recycle**: Check the **Enable** option to recycle disk space automatically when the disk space is full.
- **Keep Video**: Set a period during which the recorded video clips will be kept intact.

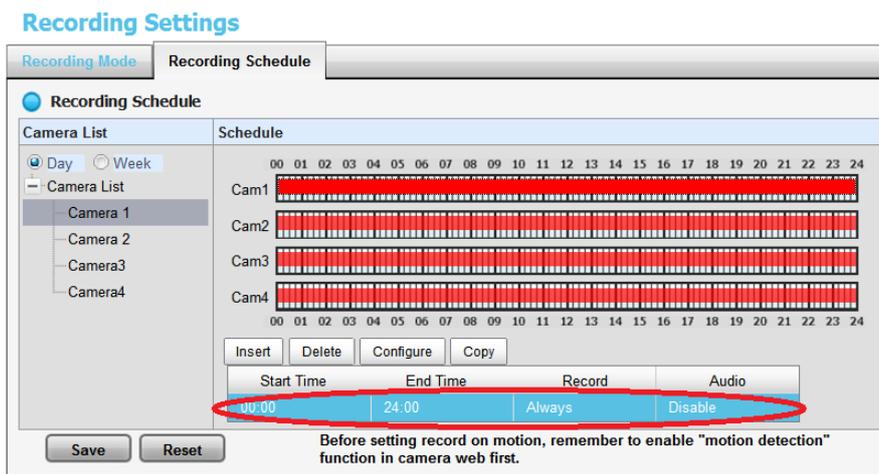

If you select both Automatic Recycle and Keep Video, Automatic Recycle will take priority. In other words, the data will only be kept until the disk space is full.

2.2.2 Recording Schedule / Event Setup

Instead of **Always Recording**, you can begin the recording by setting the **Recording Schedule**.

1. Open Internet Explorer and log in to the unit.
2. Click **Settings / Recording & Event / Recording Settings**.
3. Click the **Recording Schedule** tab.
4. Check the **Day** or **Week** mode.
 - **Day**: Schedule the recording to turn the recorder on and off at the same time every day according to your setting.
 - **Week**: Schedule the recording for each day of the week differently.
5. Click the schedule of the camera which needs to be modified.
6. Click the column at the bottom of the page.

- **Insert**: Insert new schedules.
- **Delete**: Delete the selected schedule.
- **Configure**: Modify the schedule and recording mode settings.
- **Copy**: Copy current **Day Schedule** to other channel(s); copy current **Week Schedule** to other day(s) of a week or other channel(s).

- **Always Record**: Always record.
- **Record on Event**: Record when events triggered. The event can be

triggered by **Motion** or **Digital input**.

When setting the event Motion, please first ensure that the motion detection function of the camera has been enabled.

9. If you want to add another new schedule, click the **Insert** button to add a new one.

Recording Settings

The screenshot shows the 'Recording Settings' window with the 'Recording Schedule' tab selected. On the left, there is a 'Camera List' with 'Camera 3' selected. The main area displays a 'Schedule' grid for four cameras (Cam1, Cam2, Cam3, Cam4) over a 24-hour period (00 to 24). Each camera has a red bar indicating recording time. An 'Insert' button is highlighted with a green circle and a green arrow. Below the grid, there are buttons for 'Insert', 'Delete', 'Configure', and 'Copy'. A table below these buttons shows recording settings for a selected schedule:

Start Time	End Time	Record	Audio
00:00	09:45	Always	Disable
12:00	14:00	Always	Disable

At the bottom, there are 'Save' and 'Reset' buttons, and a note: 'Before setting record on motion, remember to enable "motion detection" function in camera web first.'

10. Click the **Save** button.

When changing the motion detection settings of a camera, make sure to disconnect your unit and that camera first. Once you have finished, re-connecting them will update the settings in your unit.

When setting an event, **Motion** or **Digital input** can be triggered from other cameras. This means that if the system detects motion or digital input from other cameras or I/O Box, the camera will begin recording.

There is another way to set the schedule. If you want to change the recording time length, drag the end of the time bar from 24:00 back to the length you wish, and then drag the beginning of the time bar to the point at which you would like it to commence recording. (You may also click the **Insert** button to add new schedules.)

Recording Settings

The screenshot shows the 'Recording Schedule' tab in the 'Recording Settings' window. On the left, under 'Camera List', 'Camera 1' is expanded to show a tree view of days from Sunday to Saturday. The 'Week' radio button is selected. The 'Schedule' area on the right displays a 24-hour grid for each day of the week. A red bar on the Sunday row indicates a recording schedule from 00:00 to 21:00. A black arrow labeled 'Drag' points to the end of this bar at 21:00. Below the grid are buttons for 'Insert', 'Delete', 'Configure', and 'Copy'. A table below these buttons shows the current settings: Start Time: 00:00, End Time: 21:00, Record: Always, Audio: Disable. At the bottom are 'Save' and 'Reset' buttons, and a note: 'Before setting record on motion, remember to enable "motion detection" function in camera web first.'

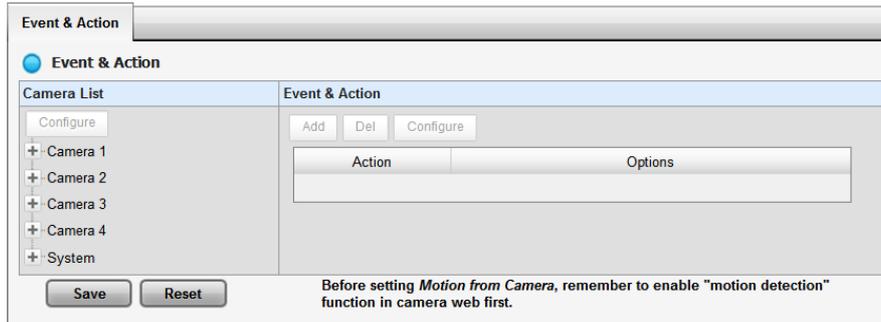

Recording Settings

This screenshot is similar to the one above, but the recording schedule for Sunday is adjusted. The red bar now starts at 01:30 and ends at 22:30. A black arrow labeled 'Drag' points to the start of the bar at 01:30. The table below the buttons shows the updated settings: Start Time: 01:30, End Time: 22:30, Record: Always, Audio: Disable. The 'Save' and 'Reset' buttons and the note at the bottom are also present.

2.2.3 Camera Events and Responding Actions Setup

1. Open Internet Explorer and log in to the unit.
2. Click **Settings / Recording & Event / Event & Action Management.**
3. Choose the camera, and then select one of the events. The event list depends on camera its own ability.

Event & Action Management

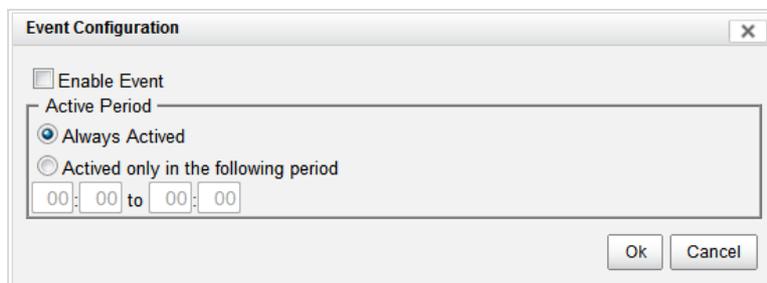

- **Connect lost**: When a connection between the camera and this unit is lost, the system will trigger an action.
- **Motion from Camera**: When video motion is detected, the camera triggers an action.
- **Input**: Any external input can trigger an action.

When setting the event **Motion from Camera**, make sure to set up the camera's motion detection function first. Besides, event log will be recorded only if event is selected on this page.

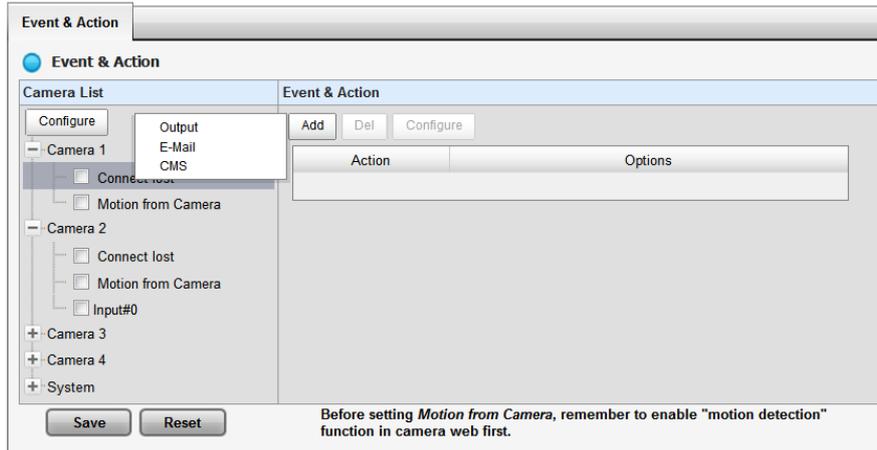

4. Click the **Configure** button to enable the event and select the active period.

- **Always Activated**: The selected event is always active.
- **Activated only in the following period**: The selected event is only active in the designated time, which able to cover two days e.g. from 18:00 to 09:00.
- **I/O Type**: Check one of the options of I/O type. N/O means normal open, while N/C means normal close.

5. Click the **Add** button to set up the responding actions of this event.

Event & Action Management

- **Output:** When an event occurs, the system will send an output signal to other connected devices.
- **E-Mail:** When an event occurs, the system will send e-mail notifications. Make sure to add an e-mail address first.
- **CMS:** When an event occurs, the system will send out a signal to CMS. CMS will highlight this event.

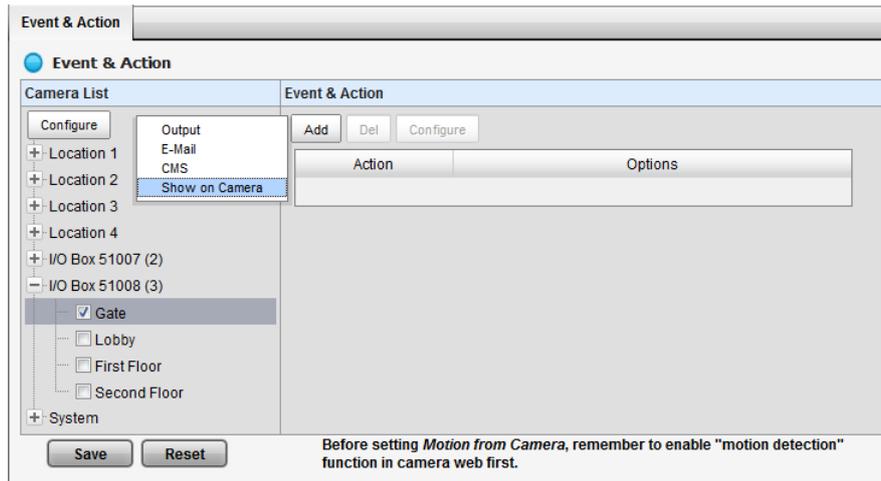

6. Click the action, and then click the **Configure** button to modify the details of that action if necessary.
7. Click the **Save** button.

After selecting camera events, the event information will display on the screen when it's triggered.

2.2.4 I/O Box Input and Responding Action Setup

1. Open Internet Explorer and log in to the unit.
2. Click **Settings / Recording & Event / Event & Action Management**.
3. Click the **Event & Action** tab.
4. Select an input of I/O Box from list.
5. Click the **Add** button to set up the responding actions of this event.
6. Click the action, and then click the **Configure** button to modify the details of that action if necessary.

- **Output:** When an input is triggered, the system will send an output signal to other connected devices.
- **E-Mail:** When an input is triggered, the system will send e-mail notifications. Make sure to add an e-mail address first.
- **CMS:** When an input is triggered, the system will send out a signal to CMS. CMS will highlight this event.
- **Show on Camera:** When an input is triggered, the system will show an alert message on selected camera(s) of screen.

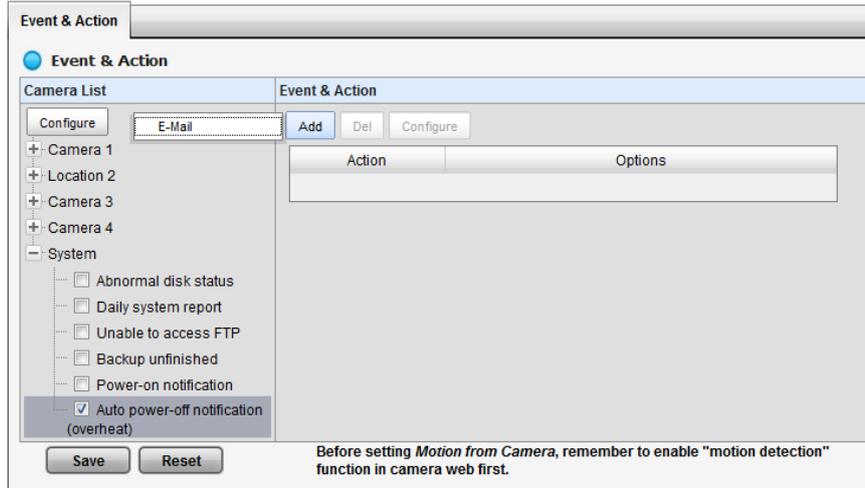

7. Click the **Save** button.

2.2.5 System Events and Responding Actions Setup

1. Open Internet Explorer and log in to the unit.
2. Click **Settings / Recording & Event / Event & Action Management**.
3. Click the **Event & Action** tab.
4. Click **System** to unfold the list of system events, and then select one of the five events.

Event & Action Management

Event & Action

 Auto power-off notification (overheat)

Save Reset

Action Options

Before setting *Motion from Camera*, remember to enable "motion detection" function in camera web first.

- **Abnormal disk status**: When there is no enough disk space for recording or when disk is abnormal for accessing, the system will trigger an action.
 - **Daily System Report**: Enable users to know the system information, HDD usage, and Disk status everyday through E-mail without accessing to the unit to check.
 - **Unable to access FTP**: The action will be triggered when the connection between the unit and FTP server is lost.
 - **Backup unfinished**: If there is any file which the system didn't complete the backup process, the file(s) name will be listed and send out through E-mail after finishing the last file of this backup schedule.
 - **Power-on Notification**: Record the time as power was turning on.
 - **Auto power-off Notification**: If overheat was happened, users will be notified that power is auto off via E-mail.
5. Click the **Add** button to set up the responding actions of this event. Follow the steps in the previous section.
 6. Click the **Save** button.

E-Mail is the only one action to the event **Daily System Report**, **Unable to access FTP**, **Backup unfinished**, **Power-on Notification** and **Auto power-off Notification**. In addition to select a contact, remember to insert the time of sending daily system report.

2.2.6 SMTP Server Setup

1. Open Internet Explorer and log in to the unit.
2. Click **Settings / Recording & Event / E-Mail**.
3. Click the **SMTP Server** tab.

- **Server Address:** SMTP (Simple Mail Transport Protocol) server IP address.
- **Port:** SMTP port.
- **Sender:** Sender information.
- **Subject:** The subject of the mail.
- **Body:** E-Mail content.
- **SMTP Authentication:** Before sending out an E-Mail, enter the user name and password for SMTP authentication.
- **Username**
- **Password**

4. Click the **Send Test Mail** button and the system will send a test mail to the sender. Check it after testing.
5. Click the **Save** button.

2.2.7 Add Event Contacts

1. Open Internet Explorer and log in to the unit.
2. Click **Settings / Recording & Event / E-Mail**.
3. Click the **Contactors** tab.

The screenshot shows the 'E-Mail' configuration page with the 'Contactors' tab selected. It features a 'Contactor' section with input fields for 'Name' and 'E-Mail', an 'Add Contactor' button, and a table listing existing contacts. The table has columns for 'Name', 'E-Mail', and 'Delete'. A single contact 'Test1' with email 'test@nuuo.com' is listed. 'Save' and 'Reset' buttons are located at the bottom of the contact list.

- **Add Contactor**: Add this new contact into the contact list.
- **Reset**: Return to the latest saved settings of the contact list.
- **Save**: Save this time modification of the contact list.

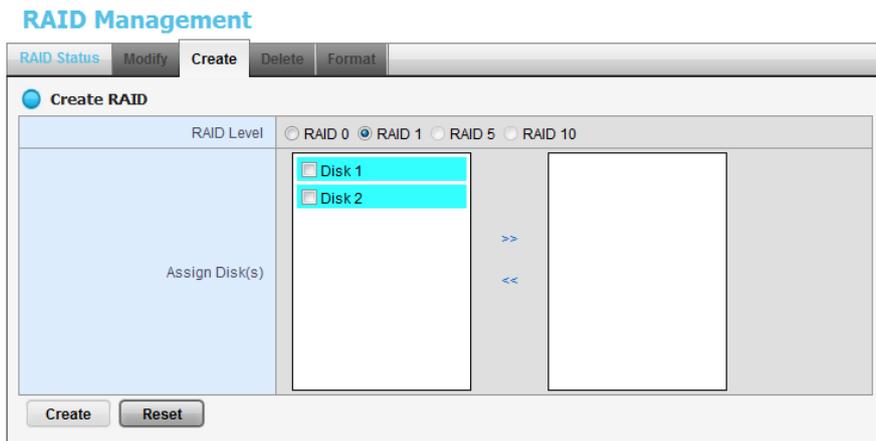

4. Insert the name of a new contact.
5. Insert the e-mail address of this new contact.
6. Click the **Add Contactor** button.
7. Click the **Save** button to save this modification of the contact list.

2.3 RAID & File Settings

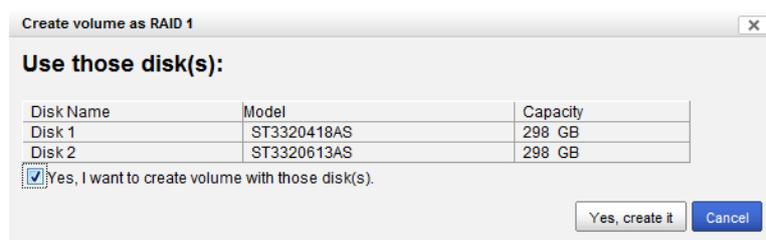

2.3.1 Create a RAID Volume

In this system, the term RAID volume refers to one or more disk drives working together as a RAID logical drive. You must create a RAID volume before starting to record.

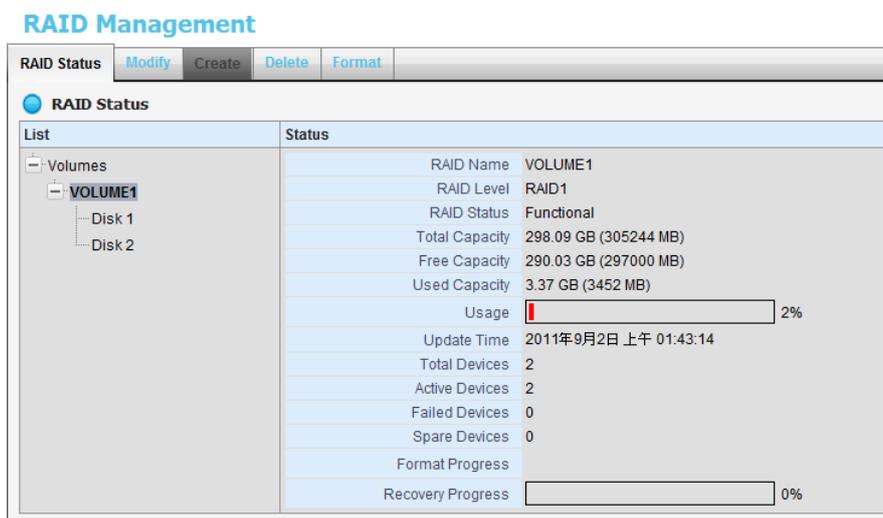

1. Open Internet Explorer and log in to the unit.
2. Click **Settings / RAID & File System / RAID Management**.
3. Click the **Create** tab.

4. Choose the RAID level you prefer for your disk array.
5. Check boxes of disks and click the >> button to assign disk drives for this volume.
6. Click the **Create** button.
7. A confirmation dialog pops up. Check the **Yes, I want to create volume with those disk(s)** box, and click the **Yes, create it** button.

8. Creating RAID volume takes a while, depending on the size of disks and the RAID level you choose. You can start recording during RAID creation.

The RAID Volume will be functional on another unit if all disks of this volume are moved to the unit.

After setting RAID level, you are not allowed to change neither the RAID level nor the number of disks containing in this volume.

To reduce the possibility of having problems to access public folder via My Network Places, before creating new disk volume or modifying volume, please delete the invalid volume if any.

If you choose Express Mode when using the **Installation Wizard**, the disk(s) will be set to RAID 1 (2 bay) or RAID 5 (4 bay) automatically unless the number of disks is not enough for this RAID level.

2.3.2 View RAID Volume Status

RAID status refers to the disk drives on your unit and how they are arranged into a RAID volume.

1. Open Internet Explorer and log in to the unit.
2. Click **Settings / RAID & File System / RAID Management**.
3. Click the **RAID Status** tab to view the status of your RAID Volume.

RAID Management

RAID Status Modify Create Delete Format

● RAID Status

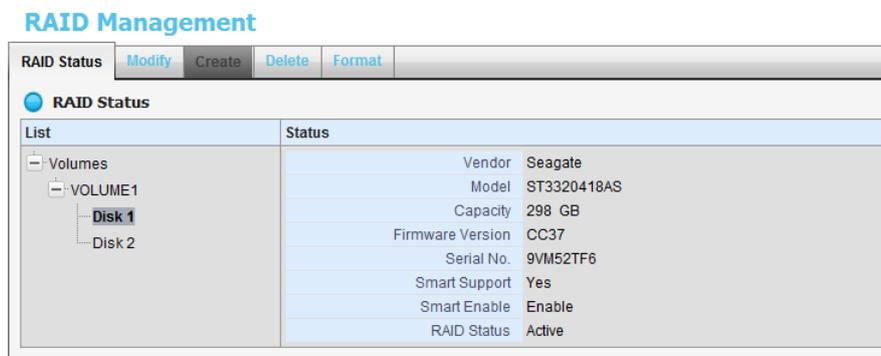

List	Status
Volumes	RAID Name VOLUME2
VOLUME2	RAID Level RAID0
Disk 2	RAID Status Functional
VOLUME1	Total Capacity 298.08 GB (305244 MB)
Disk 1	Free Capacity 289.87 GB (296832 MB)
	Used Capacity 3.53 GB (3620 MB)
	Usage  2%
	Update Time 2011年9月2日 下午 06:34:32
	Total Devices 1
	Active Devices 1
	Failed Devices 0
	Spare Devices 0
	Format Progress
	Recovery Progress

- **RAID Name**: Name of your RAID, automatically assigned when it was created.

- **RAID Level:** RAID 0, 1, 5, or 10, specified when it was created.
- **RAID Status:** **Functional** is normal. **Critical** means there are some problems on RAID volume, but the recording status is normal. **Offline** means that no volume is found, so recording is stopped and you cannot access your data either. **File system error** means that RAID volume is existed but unmounted, so recording is stopped and you cannot access your data either.
- **Capacity:** Total, free, used data capacity of the RAID volume.
- **Update Time:** The time of volume created/updated.
- **Devices:** Total number of disks and the number of active, failed, spare disks.
- **Format Progress:** The status of RAID format
- **Recovery Progress:** The status of RAID recovery

2.3.3 View Disk Drive Information

1. Open Internet Explorer and log in to the unit.
2. Click **Settings / RAID & File System / RAID Management**.
3. Click the **RAID Status** tab.
4. Click on a disk directly to view the information.

2.3.4 Modify RAID Volume

This function is designed for replacing a broken hard drive with a new one, instead of modifying RAID level.

In the condition of critical RAID status, it's a warning to show that one of disks of this RAID volume may be damaged. Even though it's no impact on the recording function, you'd better to replace a new disk to make sure the volume with data protection mechanism.

This function is not applied to RAID 0, since there is no data protection mechanism by its nature.

In case of any unexpected damage, we recommend users to unplug running HDD by this method, which can be viewed as security hard drive remove.

1. Open Internet Explorer and log in to the unit.
2. Click **Settings / RAID & File System / RAID Management**.
3. Click the **Modify** tab.

RAID Management

RAID Status **Modify** Create Delete Format

5. After removing the damaged disk. Add a free disk to replace the damaged, and click the **Modify** button.
6. A confirmation dialog pops up. Check the **Yes, I want to modify this volume** box, and click the **Yes, modify it** button.

Modify Volume

Are you sure to modify this volume?

RAID Name	VOLUME1
RAID Level	RAID1
Capacity	298.09 GB
RAID Status	Functional
Assigned Disks	Disk 1 298 GB ST3320418AS Disk 2 298 GB ST3320613AS

Action for modifying volume:

Remove Disk

Disk 2 298 GB ST3320613AS SD22 9SZ0KN70 Active

Yes, I want to modify this volume.

Yes, modify it Cancel

7. Modifying RAID volume takes a while, depending on the size of disks you choose. Recording won't be stopped during the modification, and the data of this RAID volume is fully accessible.

RAID Management

The screenshot shows the RAID Management interface with the 'RAID Status' tab selected. The 'RAID Status' section displays the following information:

Property	Value
RAID Name	VOLUME1
RAID Level	RAID1
RAID Status	Functional
Total Capacity	298.09 GB (305244 MB)
Free Capacity	289.87 GB (296832 MB)
Used Capacity	3.53 GB (3620 MB)
Usage	2%
Update Time	2011年9月2日 下午 06:26:54
Total Devices	2
Active Devices	1
Failed Devices	0
Spare Devices	1
Format Progress	
Recovery Progress	8%

2.3.5 Delete a RAID Volume

1. Open Internet Explorer and log in to the unit.
2. Click **Settings / RAID & File System / RAID Management**.
3. Click the **Delete** tab.

RAID Management

The screenshot shows the RAID Management interface with the 'Delete' tab selected. The 'RAID List' section displays the following information:

Volume	RAID Level	RAID Capacity	RAID Status	Details
VOLUME2	RAID0	298.08 GB	Functional	Details
VOLUME1	RAID0	298.08 GB	Functional	Details

Buttons: Delete, Reset

4. Click the option button beside the RAID Volume you want to delete.
5. Click the **Delete** button.
6. A confirmation dialog pops up. Check the **Yes, I want to delete this volume** box, and click the **Yes, delete it** button.

The screenshot shows a 'Delete Volume' confirmation dialog box. The dialog asks: 'Are you sure to delete this volume?'. It displays the following information:

Volume	VOLUME1		
Assigned Disks	Disk Name	Model	Capacity
	Disk 1	ST3500514NS	465 GB

Yes, I want to delete this volume.

Buttons: Yes, delete it, Cancel

7. System will restart automatically after RAID volume is deleted

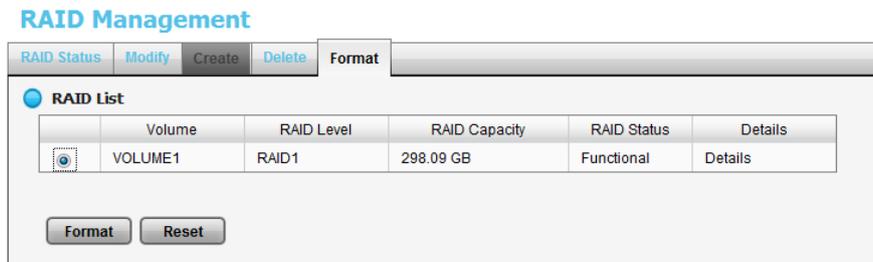

When you delete a RAID Volume, all the folders in the RAID volume and all the data saved in the folders will be deleted. Backup any important data before deleting a RAID Volume.

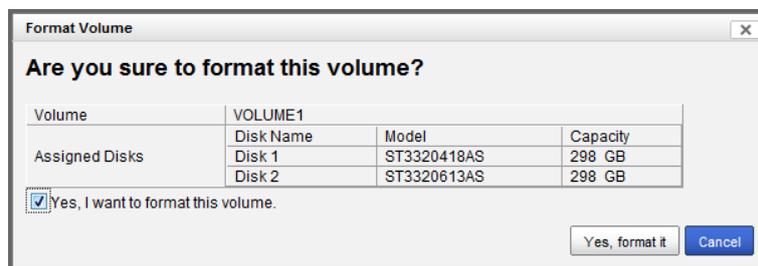

2.3.6 Format

Neither pressing reset button nor loading default setting, the data of RAID volume won't be deleted, which implies that format is the only way to clean the RAID information from disks.

1. Open Internet Explorer and log in to the unit.
2. Click **Settings / RAID & File System / RAID Management**.
3. Click the **Format** tab.

4. Click the option button beside the RAID Volume you want to format.
5. Click the **Format** button.
6. A confirmation dialog pops up. Check the **Yes, I want to format this volume** box, and click the **Yes, format it** button.

7. System will restart automatically after volume format is complete.

2.3.7 Modify the "My Network Places" Protocol Settings

There are another two ways to access the recorded data in the unit: through Workgroup or through FTP.

1. Open Internet Explorer and log in to the unit.
2. Click **Settings / RAID & File System / Protocol Control**.
3. Click the **Windows** tab.
4. Check and enter the unit's information.
5. Click the **OK** button.

The screenshot shows the 'Protocol Control' dialog box with the 'Windows' tab selected. The 'FTP Sharing' sub-tab is active. Under 'Windows Settings', the 'Services' section has 'Enable' selected. The 'Server Name' is 'NVR_PM', 'Server Description' is 'Room 1', and 'Domain or Workgroup Name' is 'WORKGROUP'. 'OK' and 'Cancel' buttons are at the bottom.

Windows Settings	
Services	<input checked="" type="radio"/> Enable <input type="radio"/> Disable
Server Name	NVR_PM
Server Description	Room 1
Domain or Workgroup Name	WORKGROUP

- **Services:** Enable to let users access this unit through Windows Explorer.
- **Server Name:** The name of this unit, which is set in the **Setup** tab of the **Network Setup** function.
- **Server Description:** The name which will be displayed in Windows Explorer.
- **Domain or Workgroup Name:** The name of this unit's workgroup.

2.3.8 Modify the FTP Protocol Settings

1. Open Internet Explorer and log in to the unit.
2. Click **RAID & File System / Protocol Control**.
3. Click the **FTP Sharing** tab.
4. Check and enter the settings of this unit.
5. Click the **OK** button.

The screenshot shows the 'Protocol Control' dialog box with the 'FTP Sharing' sub-tab active. Under 'FTP Settings', the 'Services' section has 'Enable' selected. The 'Command Port' is '21' and 'Passive Ports' are '1024 ~ 65535'. 'OK' and 'Cancel' buttons are at the bottom.

FTP Settings	
Services	<input checked="" type="radio"/> Enable <input type="radio"/> Disable
Command Port	21
Passive Ports	1024 ~ 65535

- **Services:** Whether users can access this unit through FTP or not.
- **Command Port:** The port for commands between a server and a client.

- **Passive Ports:** The data transmission port of passive mode.

2.4 Auto Backup

This feature enables you to automatically backup the recorded video of the previous date to FTP site. There are two steps to enable the function, one is **Set up Backup Schedule**, another is **Set up Backup Server**.

2.4.1 Set up Backup Schedule

1. Open Internet Explorer and log in to the unit.
2. Click **RAID & File System / Auto Backup Management**.
3. Click the **Backup Schedule** tab.
4. Set up backup schedule, select the backup channels, and check the **Enable** option to enable **Auto Backup**.

Auto Backup Management

Backup Schedule | Backup Server

Backup Schedule

Auto Backup	<input checked="" type="checkbox"/> Enable
Daily Backup Time	15 : 00
Start Time	00 : 00
End Time	12 : 00
Camera	select: all / none <input type="checkbox"/> Camera 1 <input checked="" type="checkbox"/> Camera 2 <input type="checkbox"/> Camera 3 <input type="checkbox"/> Camera 4

Current Event Settings

Unable to access FTP	disable
Backup unfinished	disable

Save Reset

- **Auto Backup:** Check the **Enable** option to enable this function.
 - **Daily Backup Time:** The daily scheduled time to start backup process.
 - **Start Time:** The start time of recorded video of the previous date.
 - **End Time:** The end time of recorded video of the previous date.
 - **Camera:** Select the channel(s) to backup.
5. **Current Event Settings** shows the condition of the events of auto backup – enable or disable. Follow the steps of **System Events and Responding Actions Setup** to configure the event & action.

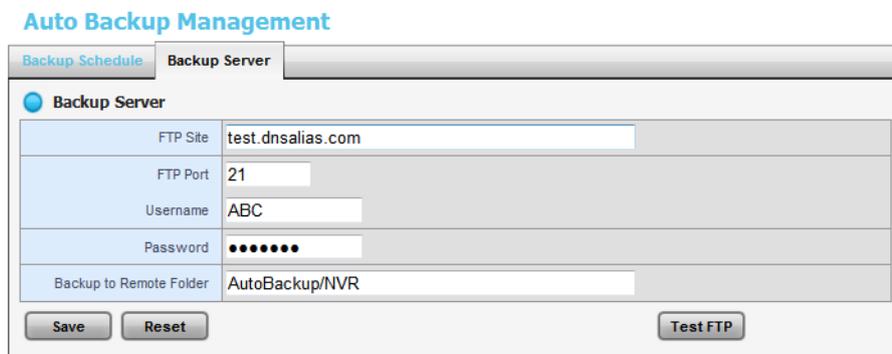

The system backups recorded video files one by one. If the connection between the unit and FTP server is normal, but some problems of FTP causes the system unable to write files on FTP, the system would try each file three times before starting to backup

the next file. If the connection is lost, the system would wait for the connection, so no file would be skipped.

2.4.2 Set up Backup Server

1. Open Internet Explorer and log in to the unit.
2. Click **RAID & File System / Auto Backup Management**.
3. Click the **Backup Server** tab.
4. Set up the FTP server and create a folder for backup files. The folder format is "FolderName", "FolderName/SubFolderName", and so on.

For example: AutoBackup/NVR

Auto Backup Management

Backup Schedule | **Backup Server**

Backup Server

FTP Site	test.dnsalias.com
FTP Port	21
Username	ABC
Password	••••••
Backup to Remote Folder	AutoBackup/NVR

Save Reset Test FTP

5. After setting up all the information, click the **Test FTP** button and the system will create a folder to FTP. Check it after testing. In this case, the route of the tested file will be:
ftp://test.dnsalias.com/AutoBackup/NVR/test

6. Click the **Save** button.

Make sure the FTP account with privileges of administrator who is able to upload, rewrite, delete files, and create new folder. Besides, make sure the FTP server has enough space for auto backup.

To avoid the failure of auto backup, please check the normality of FTP server regularly (e.g., enough space for video, system conditions.)

2.5 Network Setup

2.5.1 View Network Status

1. Open Internet Explorer and log in to the unit.
2. Click **Network Setup / Network Setup**.
3. Click the **Information** tab to view the unit's network information.

Network Setup

5160	192.168.8.82	5160
5170	192.168.8.82	5170

For security reason, the privilege of UPnP port-forwarding is LOWER than port-forwarding configured on router. Therefore, if the ports have been used on router, we are unable to know before finding out access failure.

UPnP port-forwarding is for temporarily use only. Most of UPnP router will clean up all UPnP ports after router reboots. Furthermore, for some routers, if the port you want to add has already been used for other devices in the same way (UPnP port forwarding), this “enable” action will cover over the settings.

2.5.4 Network Service Setup

1. Open Internet Explorer and log in to the unit.
2. Click **Network Setup / Network Service**.
3. Click the **Web Service** tab
4. Set up a port for this unit and click the **Save** button.

Network Service

Web Service | **Live View & Playback Service** | CMS Service

Web Server

Management Port: 80

Save Reset

5. Click the **Live View & Playback Service** tab.

Network Service

Web Service | **Live View & Playback Service** | CMS Service

- **Maximum Connections**: The maximum number of allowed CMS connections.

2.6 Management

2.6.1 View the List of Users

1. Open Internet Explorer and login the unit.
2. Click **Management/ User Management**.
3. Click the **Create New Users** tab.

4. The list will be displayed on the bottom of the page.

No.	Name	Group	Live View	PTZ	IO	E-Map	Playback	Backup Data
1	abc	power user	1,2,3,4	0	0	0	1,2,3,4	0
2	cba	power user	1,2,3,4	0	0	0	1,2,3,4	0
3	stan	user	1,2,3,4	0	0	X	1,2,3,4	X
4	aaa	power user	1,2,3,4	0	0	0	1,2,3,4	0

2.6.2 Create New Users

1. Open Internet Explorer and login the unit.
2. Click **Management/ User Management**.
3. Click the **Create New Users** tab.

The screenshot shows the 'User Management' interface with three tabs: 'Create New Users', 'Modify Users', and 'Change Password'. The 'Create New Users' tab is active, displaying a 'Create User' form. The form includes fields for 'User Name', 'Password', and 'Group' (set to 'power user'). Below these are sections for 'Live View Access' and 'Playback Access', each with checkboxes for 'All', 'Channel 1', 'Channel 2', 'Channel 3', and 'Channel 4'. The 'Live View Access' section also includes checkboxes for 'PTZ Control', 'IO Control', and 'E-map Settings'. The 'Playback Access' section includes checkboxes for 'Backup Data' and 'Delete Data'. At the bottom of the form are 'Create New User' and 'Clear' buttons.

4. Insert the username of this new user.
5. Insert the password of this new user.
6. Choose the group of this user.
 - **Power user**: Power user can do all the settings except the **Network Settings, RAID Settings, and Management function**.
 - **User**: User just can change his/her password and do the live view and playback functions.
 - **Guest user**: User can do live view and playback function only.
7. Select the live view cameras which this user can access.
8. Select the playback channels which this user can access.
9. Check whether this user can backup or delete recorded data.
10. Click the **Create New User** button to finish it.

The Administrator will be the only user who can use all of the functions. There is a default administrator account in the system, and you cannot create neither another

"Administrator" account, nor another username named "admin".

2.6.3 Modify User Information

1. Open Internet Explorer and log in to the unit.
2. Click **Management / User Management**.
3. Click the **Modify Users** tab.
4. Click one of the users in the User List on the bottom of this page.

User Management

Create New Users | **Modify Users** | Change Password

Modify Users

User Name: _____

Group: power user

Live View Access: All Channel 1 Channel 2 Channel 3 Channel 4
 PTZ Control IO Control E-map Settings

Playback Access: All Channel 1 Channel 2 Channel 3 Channel 4
 Backup Data Delete Data

Modify User Clear

User List

No.	Name	Group	Live View	PTZ	IO	E-Map	Playback	Backup Data
There are no accounts yet...								

5. Change the group of this user.
6. Select the live view cameras which this user can access.
7. Select the playback channels which this user can access.
8. Check whether this user can backup or delete recorded data.
9. Click the **Modify User** button to finish it.

2.6.4 Change a User's Password

1. Open Internet Explorer and log in to the unit.
2. Click **Management / User Management**.
3. Click the **Change Password** tab.

User Management

Create New Users | Modify Users | **Change Password**

Change Password

User Name: admin

New Password: _____

Retype Password: _____

OK Clear

4. Choose the user.
5. Enter a new password.
6. Enter this new password again.
7. Click the **OK** button.

2.6.5 Delete Users

Except for the administrator, you can delete any users with the following steps.

1. Open Internet Explorer and log in to the unit.
2. Click **Management / User Management**.
3. Click the **Modify Users** tab.
4. Click the Delete icon of the user you want to delete.

User List									
No.	Name	Group	Live View	PTZ	IO	E-Map	Playback	Backup Data	
1	abc	power user	1,2,3,4	O	O	O	1,2,3,4	O	
2	cba	power user	1,2,3,4	O	O	O	1,2,3,4	O	
3	stan	user	1,2,3,4	O	O	X	1,2,3,4	X	
4	aaa	power user	1,2,3,4	O	O	O	1,2,3,4	O	
5	bbb	user	1,2,3,4	O	O	O	1,2,3,4	O	
6	timchang	power user	1,2,3,4	O	O	O	1,2,3,4	O	

5. In the confirmation box, click the **OK** button.

2.6.6 Online License Activation

There are two types of license currently, camera license for 2/8ch-device and POS license for all series. With the camera license upgrade, the 2ch-device will possess up to 4ch capacity, while 8ch-device will possess up to 16ch capacity. With the POS license upgrade, users can use **POS function**.

There are two ways to activate license, online and offline.

1. Open Internet Explorer and log in to the unit.
2. Click **Management / License Management**.

License Management

Activate

Online Activation

S/N Type Input S/N:

Offline Activation

Step 1: Export server information file

Step 2: Copy exported offline.reg to PC connected to the Internet, and execute "OffLineTool.exe" to activate license and get the offline license file

Step 3: Import offline license file

S/N Type Import license file:

License List

S/N	Channel	Product	Status
There are no licenses yet.			

3. Select **Online** as the Activation Type, input serial number, and click the **Activate** button.
4. The license will be updated in License List if activated successfully. System will reboot automatically.

License List

S/N	Channel	Product	Status
2EAB-B1D4-4AB6-7916	1	POS	Activated

2.6.7 Offline License Activation

If the device is set up in Intranet (Local LAN) without Internet connection, there is another way to activate license.

1. Open Internet Explorer and log in to the unit.
2. Click **Management / License Management**.

License Management

Activate

Online Activation

S/N Type Input S/N:

Activate

Offline Activation

Step 1: Export server information file

Export

Step 2: Copy exported offline.reg to PC connected to the Internet, and execute "OffLineTool.exe" to activate license and get the offline license file

Step 3: Import offline license file

S/N Type Import license file: **Import**

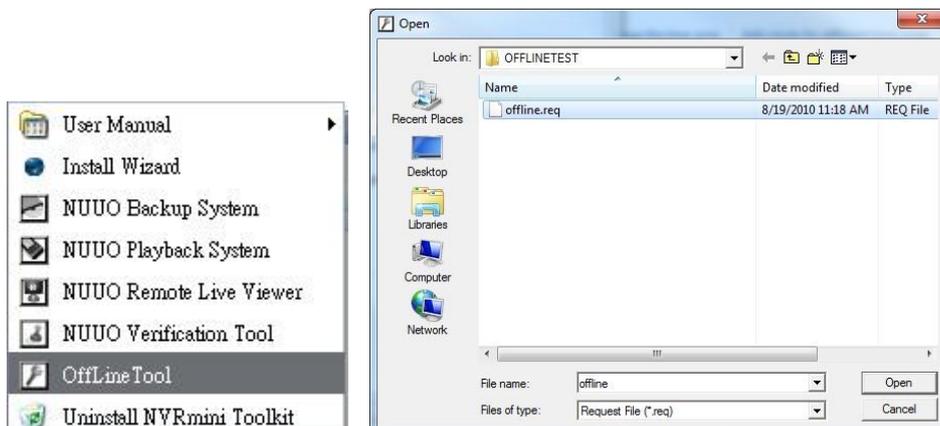

License List

S/N	Channel	Product	Status
There are no licenses yet			

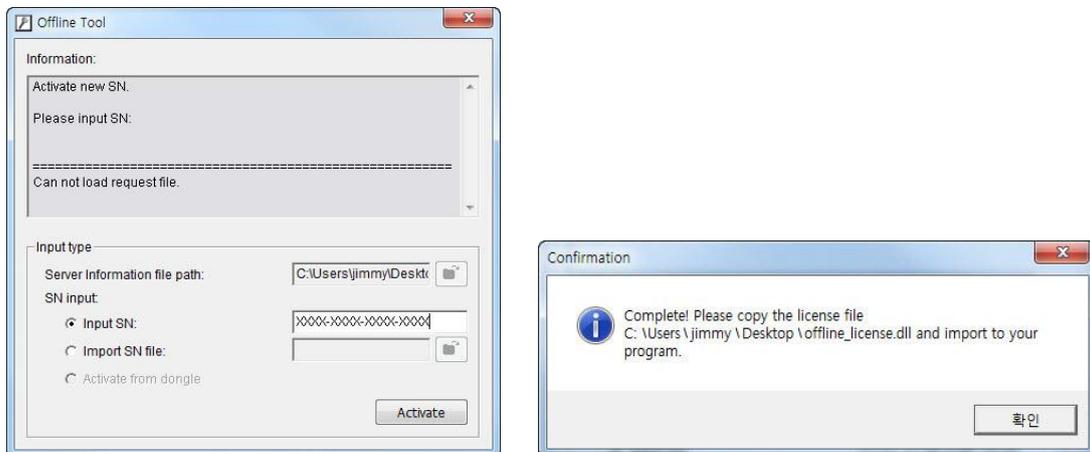

3. Click the **Export** button under the section of **Offline** Activation to export the information of this unit.
4. Download dialog pops up. Save the request file and take it to other PC which is connected to the Internet. Furthermore, the PC should be installed **OffLineTool.exe** which can be found from NVR toolkit.

5. Execute the OffLineTool.exe in that PC with Internet connection, and select the request file **offline.req**.

- Input the serial number, click the **Activate** button, and save the .dll file **offline_license.dll**.

- Import the license file to the unit.

- The license will be updated in License List if activated successfully. System will reboot automatically.

License List			
S/N	Channel	Product	Status
XXXX-XXXX-XXXX-XXXX	1	POS	Activated

2.6.8 View the Event Log

- Open Internet Explorer and log in to the unit.
- Click **Management / Log System** to find the event list of your unit.

Log System

Hardware Log	NVR Log	NVR Event Log	Export and Backup Log
Hardware Log List			
Last 20 100 500 1000 all logs			
<< < 1 > >>			
Date / Time	Level	Message	
2011/08/25 (Thu) 05:16:51	info	Time zone settings has been changed	
2011/08/25 (Thu) 05:16:51	info	Date/time settings has been changed	
2011/08/22 (Mon) 18:38:56	info	NVR system starts	
2011/08/22 (Mon) 18:38:56	info	VOLUME1 is ready	
2011/08/22 (Mon) 18:38:55	info	RAID info of Disk1: level 0, uuid b4de1c93:f0169959:af6a7864:2c28b940, 1 device(s)	
2011/08/22 (Mon) 18:38:55	info	Disk1 is found	

There are four kinds of event which will be listed on this page.

- **Hardware Log**: The log information of the operations to your unit, such as reboot or shutdown.
- **NVR Log**: The log information of the NVR system, such as system, recording, user access information, POS and auto backup.
- **NVR Event Log**: The log information of the "Event & Action Management", such as motion detection or camera connection lost.
- **Backup and Export Log**: The log information of the track of video data exported and backup.

The NVR Event Log will be recorded only if event is selected on **Event & Action Management** page. As for user access information, please go to **Network Service** to check **Log Access** box to enable this function.

2.6.9 Save Unit Configuration

Save configuration can let you save the settings of this unit. These settings can be applied to other units, which will let you set other units more easily.

1. Open Internet Explorer and log in to the unit.
2. Click **Management / Save / Load Configuration**.
3. Click the **Save Configuration** tab.

Save/Load Configuration

The screenshot shows the 'Save Configuration' tab of the 'Save/Load Configuration' dialog. It features a 'Save Configuration' radio button, a 'Save' button, and two optional checkboxes: 'E-Map Settings' and 'POS Settings'. The text below the radio button reads: 'Click the Save button to save the configuration of Camera Settings, Recording Settings, Event & Action Settings, E-Mail Settings and Server Settings.'

4. Check the box of **E-Map Settings** or **POS Settings** if you want to keep the configuration.
5. Click the **OK** button.
6. The configuration file will be generated into the chosen folder.

2.6.10 Load Unit Configuration / Default Settings

Load configuration can let you apply another unit's settings to the current unit; Load Default Settings will revert all of the unit's settings back to the default factory settings.

1. Click **Management / Save / Load Configuration**.
2. Click the **Load Configuration** tab.

Save/Load Configuration

The screenshot shows the 'Load Configuration' tab of the 'Save/Load Configuration' dialog. It features a 'Load Configuration' radio button, a 'Load' button, and two optional checkboxes: 'E-Map Settings' and 'POS Settings'. The text below the radio button reads: 'Click the Load button to save the configuration of Camera Settings, Recording Settings, Event & Action Settings, E-Mail Settings and Server Settings.' Above this, the 'Load Default Settings' section is visible, with a 'Load' button and a checked 'Network Settings' checkbox. The text above the 'Load Default Settings' section reads: 'Click the Load button to load default factory settings. Uncheck the following box if you want to keep the network settings.'

3. Follow the direction to **Load Default Settings** or **Load Configuration**. For the former, uncheck the box of **Network Settings** to keep the IP address; for the latter, check the box of **E-Map Settings** or **POS Settings** if you want to restore the configuration.
4. Click the **Load** button.
5. A confirmation dialog pops up. Click the **OK** button to begin to load the settings into your unit.

If there is POS database existed in the unit, loading configuration with different POS application config is likely to make the original POS data unsearchable.

If the saved configuration is without E-map or POS settings, selecting loading configuration with E-map/POS settings will lead you get the default. The original E-map/POS settings (if any) are covered and untraceable.

User account and privilege will be kept even if loading default settings, while camera settings, recording schedule, event & action settings, E-mail setting and server settings won't be. **RAID information** will always be kept whether loading default settings or loading configuration.

2.7 System

2.7.1 View System Information

1. Open Internet Explorer and log in to the unit.
2. Click **System / System Information**.

System Information

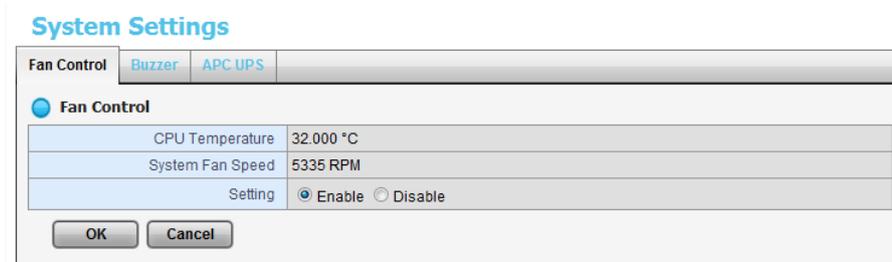

System Information	
● Information	
Operating System	Linux
NVR Version	01.01.0104.0054
Camera package version	01.01.0100.0054
CPU	Feroceon 88FR131 rev 1 (v5l)
MAC Address	50:E5:49:69:AB:12
CPU Temperature	37.000 °C
System Fan Speed	3325 RPM
Locate	<input type="button" value="Locate"/>

The system information includes the following items.

- **Operating System**: Embedded Linux
- **NVR Version**: NVR system version
- **Camera package version**: Camera package version
- **CPU**: CPU model number
- **MAC Address**: MAC address of this unit
- **CPU Temperature**
- **System Fan Speed**
- **Locate**: Click to trigger the buzzer to let you know where the unit is

2.7.2 Smart Fan Control

1. Open Internet Explorer and log in to the unit.
2. Click **System / System Settings**.
3. Click the **Fan Control** tab.

4. Check the **Enable** or **Disable** option.
5. Click the **OK** button.

2.7.3 Buzzer Configuration

There is a buzzer in the unit. When the unit finishes booting or when a problem is detected, this buzzer will sound. This buzzer is enabled by default. You can disable/enable this buzzer with the following steps. (We recommend that this buzzer should be enabled.)

1. Open Internet Explorer and log in to the unit.
2. Click **System / Settings**.
3. Click the **Buzzer** tab.

4. Check the **Enable** or **Disable** option.
5. Click the **OK** button.

2.7.4 UPS Setup

This feature enables you to tell your unit how long to run on APC Uninterruptable Power Supply (UPS) battery power and when to shutdown,

after power failure.

1. Attach the APC UPS to one of the unit's USB ports.
2. Open Internet Explorer and log in to the unit.
3. Click **System / Settings**.
4. Click the **APU UPS** tab.
5. Check one of the options:

System Settings

Fan Control Buzzer **APC UPS**

Information

Manufacturer	APC
Product Name	Smart-UPS 3000 FW:655.18.D USB FW:7.4
Serial Number	JS0939022759
Service Status	ON

Power Failure Action

Disable

System shutdown as power of the UPS remains ___ %

System shutdown as power of the UPS remains ___ Min

OK Cancel

- **Disable**: Run until the UPS battery is depleted
- **System shutdown as power of the UPS remains ___ %**: Run until the UPS battery remains this percentage.
- **System shutdown as power of the UPS remains ___ min.:** Run until the UPS battery remains the certain period of time.

6. Fill in the specific value if you choose the last two options.
7. Click the **OK** button.

2.7.5 Upgrade the System

1. Open Internet Explorer and log in to the unit.
2. Click **System / Upgrade**.
3. Click the **Firmware Upgrade** tab.

System Upgrade

Firmware Upgrade

Upgrade

Current NVR version	01.01.0104.0054
Current Device Pack version	01.01.0100.0054
Select file	<input type="text"/> Browse...

OK Cancel

4. Browse the FW for upgrading and click the **OK** button.
5. A confirmation dialog pops up. Click the **OK** button to start upgrade process.
6. After upgrade, the system will restart. You need to re-access the unit again after this.

2.7.6 System Date and Time Setup

1. Open Internet Explorer and log in to the unit.
2. Click **System / Date/Time**.
3. Click the **Setup** tab.

The screenshot shows a web-based configuration interface for 'Date/Time'. At the top, there are two tabs: 'Setup' and 'Time Zone'. The 'Setup' tab is active. Below the tabs, there is a radio button labeled 'Date/Time List' which is selected. The main area contains four rows of dropdown menus: 'Year' set to 2011, 'Month' set to 9, 'Day' set to 2, and 'Time' set to 1:33:23. At the bottom of the form are two buttons: 'OK' and 'Cancel'.

4. Choose the year, month, day and time.
5. Click the **OK** button to restart the system to activate the changes.

When you modify the date or time of the system, the system may find the wrong data when searching the recorded data. Backup the recorded data before changing the time.

2.7.7 Daylight Saving Time Setup

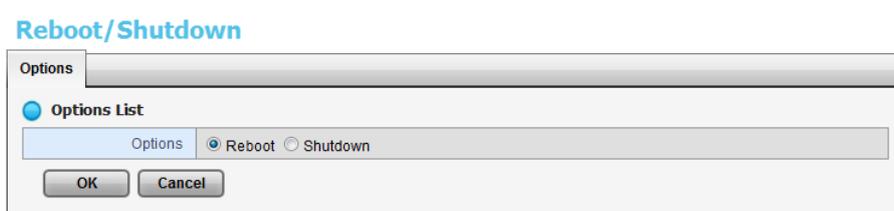

1. Open Internet Explorer and log in to the unit.
2. Click **System / Date/Time**.
3. Click the **Time Zone** tab.

The screenshot shows the 'Time Zone' tab selected in the 'Date/Time' setup interface. The 'Time Zone' dropdown menu is set to '(GMT-08:00) Baja California, Pacific Time(US & Canada)'. Below it, there is a checkbox labeled 'Adjust clock for daylight saving changes' which is unchecked, followed by a dropdown menu showing '+2 hour(s)'. At the bottom are 'OK' and 'Cancel' buttons.

4. Check the **Adjust clock for daylight saving changes** option and select the time change of daylight saving time in your location.
5. Click the **OK** button.

2.7.8 Restart the Unit

1. Open Internet Explorer and log in to the unit.
2. Click **System / Reboot/Shutdown**.

3. Check the **Reboot** option.
4. Click the **OK** button.
5. A confirmation dialog pops up. Click the **OK** button to reboot the unit.

The restart procedure runs automatically. When the unit is fully online:

- The System Status LED turns blue.
- The buzzer beeps one time (if the buzzer is enabled).

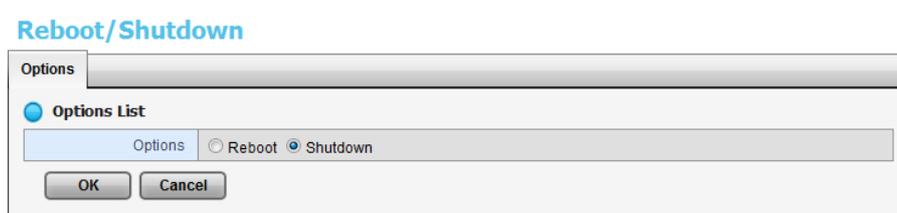

During system restart, none of your files will be accessible from your desktops/laptops.

2.7.9 Shut Down the Unit

The only time you need to shut down the unit is to replace the disk drive cooling fan or the power supply. During and after the shutdown, none of your files will be accessible from your desktops/laptops. There are two ways to shutdown the unit.

- **Shutdown by Software**

1. Open Internet Explorer and log in to the unit.
2. Click **System / Reboot / Shutdown**.

3. Check the **Shutdown** option.
4. Click the **OK** button.
5. A confirmation dialog pops up. Click the **OK** button to shutdown the unit.

- **Direct Shutdown**

1. Open the lid of the unit.
2. Press and hold the power button for 2 seconds and release your hands when the buzzer is beeping once.
3. System will begin the shutdown process, which takes about 30 seconds to few minutes depends on number of recording channels and other factors.

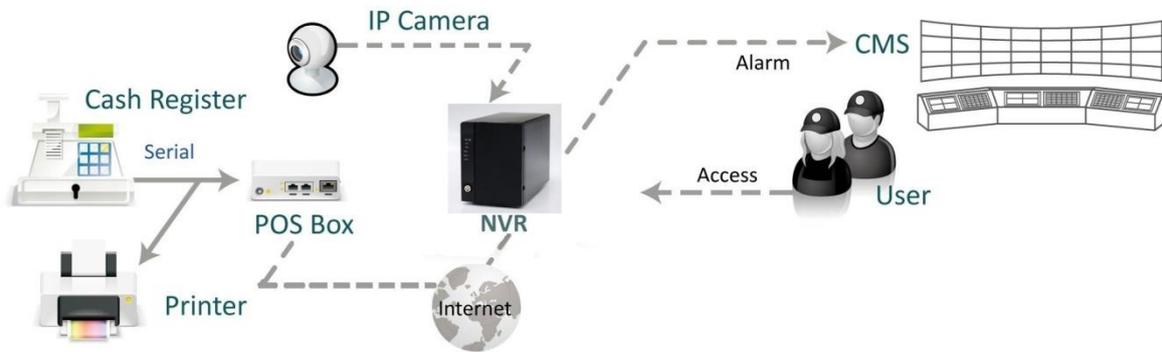

If the system is crashed and stocked, you can press the power button and hold it for 10 seconds to force to cut off the power directly. We don't recommend to do it if the system work properly.

3.POS

3.1 Introduction

3.1.1 System Introduction

POS, a Point of Sales Systems based on NVR, provides financial transaction's surveillance solution in one central system. The architecture is as below; POS transaction data flows to NVR by Ethernet. Each Cash Register with an external receipt printer is connected by DB9 cable. The transaction information delivered in R232 format can be converted to Ethernet through SCB-C31A POS data capture converter.

Definition of Terms

Terms	Definition
POS Original Data	Original data from POS. Usually with a lot of symbols and no line feed.
POS Transaction	Filtered result by user-defined tag-filter.

Product Specification

POS Box SCB-C31A	
Input	RS232
Output	Ethernet
DC In	DC +10V to +15V
Power consumption	500 mA
Operating Temperature	-20 to 65°C
Operating Humidity	0-90 % Non-Condensing

Baud Rate	110 bps to 230.4 kbps
Data Bits	5, 6, 7 or 8
Stop Bits	1, 1.5 or 2
Parity	None, Even, Odd, Mark, Space
Flow Control	None, RTX/CTS, XON/XOFF, DTR/DSR

3.1.2 Hardware Installation – SCB-C31A

To connect Cash Register, Printer, and SCB-C31A POS data capture converter together, please follow below steps:

Step 1: Please refer the user manual to setup Cash Register and printer.

Step 2: Using a “Y-shape” DB-9 cable, one DB-9 female connect to POS system and one DB-9 male connect to the receipt printer Y-shape (provided by Printer vendor).

Step 3: Using another DB-9 female connect to SCB-C31A POS Data Capture R232/Ethernet converter with Null modem.

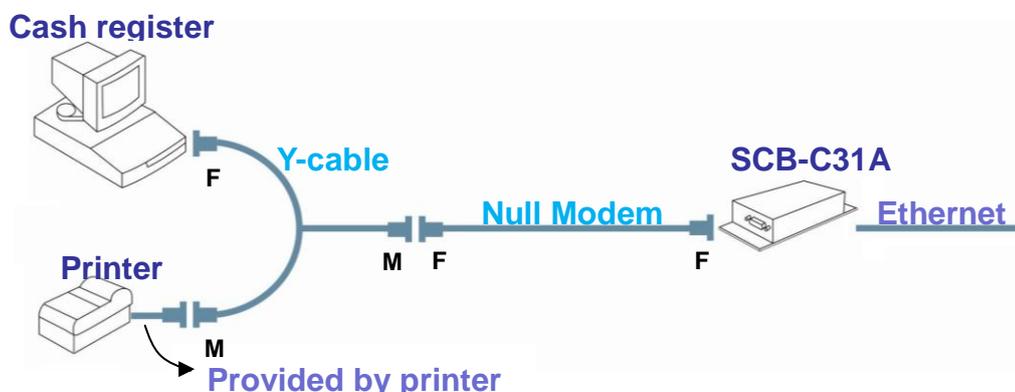

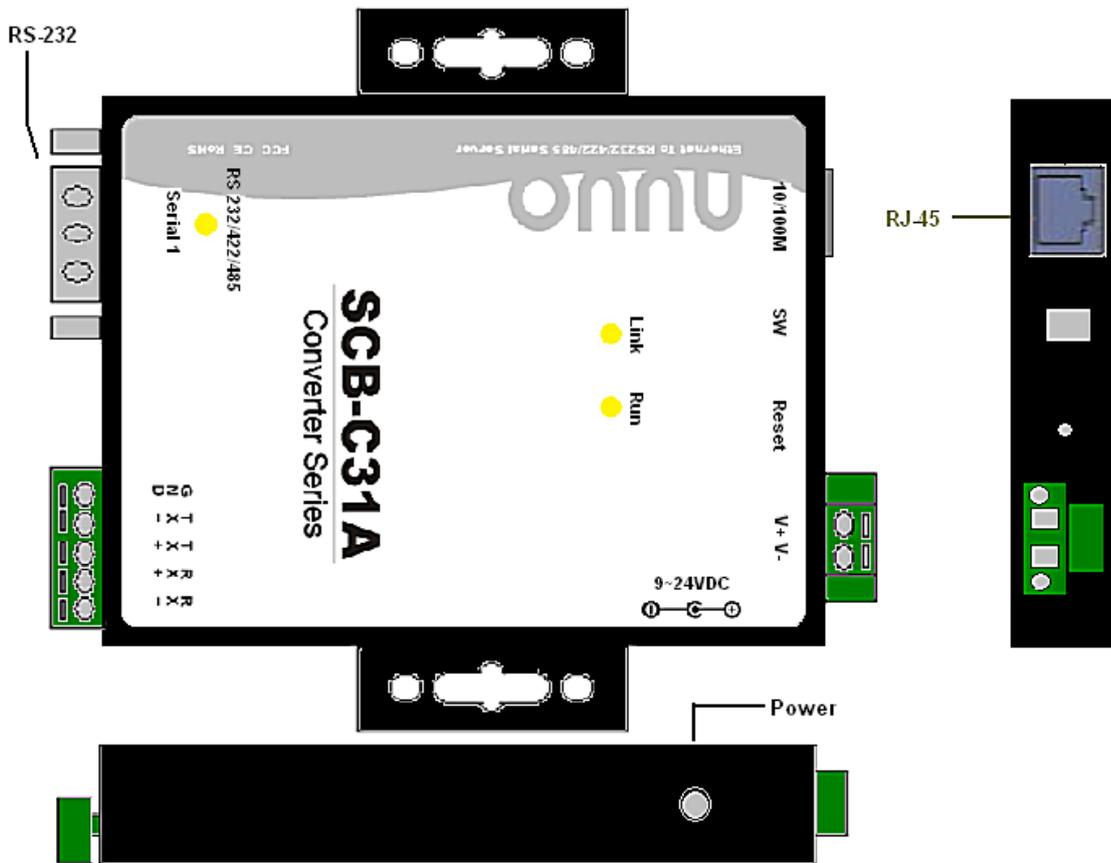

There are two kinds of serial cable: Straight pass-through and Null-Modem. The connection between SCB-C31 POS Data capture box and Y-cable must be null modem (in package).

Step 4: Check the system switch of the SCB-C31A is switched to OFF-OFF position.

Step 5: Connect SCB-C31A with power source.

Step 6: Connect SCB-C31A with internet port by RJ45 LAN cable.

The LED Indicators:

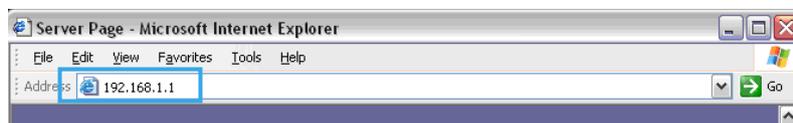

LINK LED: Ethernet cable connection and data active.

RUN LED: System is ready (Blinking).

Serial 1: Transmitting/Receiving Indicator.

3.1.3 Software Installation – SCB-C31A

Step 1: Use IE-browser to setup SCB-C31A, the default IP address is **192.168.1.1**

Step 2: Setup IP address and password in **Server** page, and click the **Save** button.

Each time you switch the page of the web, please click Save at first. If you leave this page without saving, all changes will be ignored.

Step 3: Setup Password if needed. Password is only using to activate a security feature on the serial server. Once a password is entered it will be required to access the menu and make change of configuration when access.

Please write down the Serial number and MAC address, these two parameters are necessary when user forget your password.

SCB-C31A Web Configuration - SCB-C31A

Note: If you leave this page without saving, all changes will be ignored!

Server	Server name:	SCB-C31A
Serial Port	Serial number:	00814
Operation	Version & Date:	1.8.30 & 050910
	Password:

Save Default Running Reset

Step 4: Setup according to your POS or Cash Register. Usually all devices are default setting, you can reserve your time to pass this step.

Step 5: Please **restart/reset** the box after changing configurations to active setup.

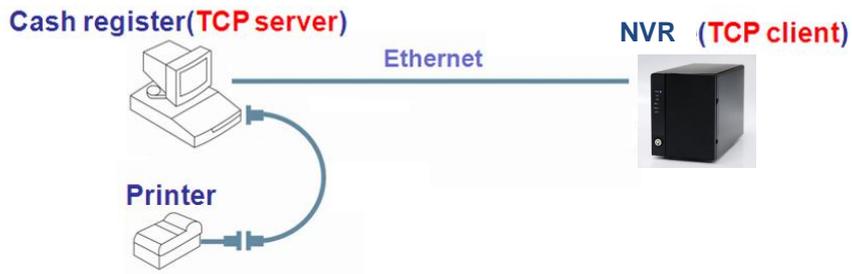

To reset the unit manually apply power, insert a small plastic tool, and press lightly depressing reset located between the switch. Hold for 3 seconds and release. The Link and Run light will go out and turn back on. The SCB-C31A will revert to the last setting.

Every time you change the configuration of SCB-C31, please check above setting, especially maximum connection and Remote IP address to avoid connection fail.

3.1.4 Connection via TCP Client

If the cash register possess network, please install system according to following diagram and purchase a POS license to activate this function.

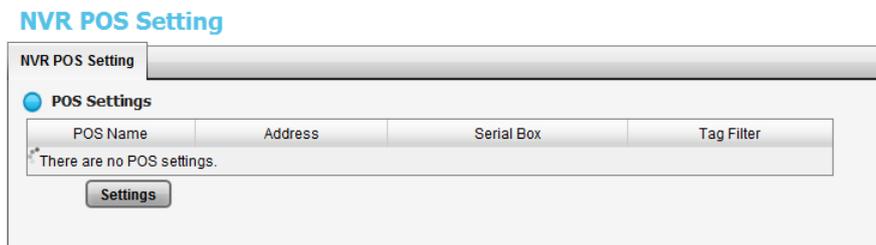

3.2 Software Setup

3.2.1 Activate POS License

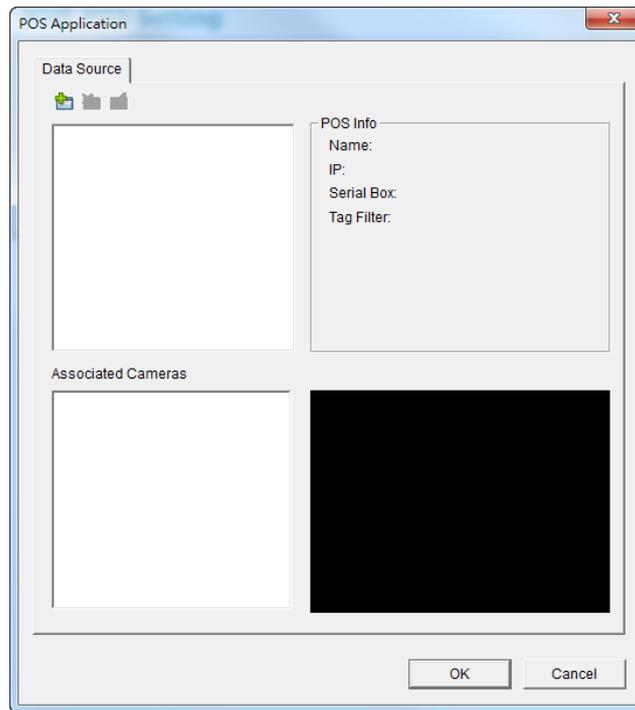

If you are not the SCB-C31 user, you need to activate POS license before starting the following settings, please refer to **License Activation** for details.

3.2.2 NVR POS Setting

1. Open Internet Explorer and log in to the unit.
2. Click **POS & I/O / POS Settings**.

3. Click the **Settings** tab to set POS application.

- **Data Source:** List of all the data sources.
 -  **Insert:** Click to insert POS and do the POS settings. See **Insert POS Setting** for details.
 -  **Delete:** Click to remove the selected POS from the list. See **Delete POS Device** for details.
 -  **Configure:** Click to configure the selected POS and modify the POS settings. See **Configure POS Setting** for details.
- **POS info:** The setting information of the selected POS on this window.
 - **Name:** Name of the POS data source.
 - **IP:** IP of the POS data source.
 - **Serial Box:** The serial box data source used.
 - **Tag Filter:** Tag type to filter the data from POS. See **Tag Filter** for details.
- **Associated Cameras:** List of all the associated cameras of the selected POS.

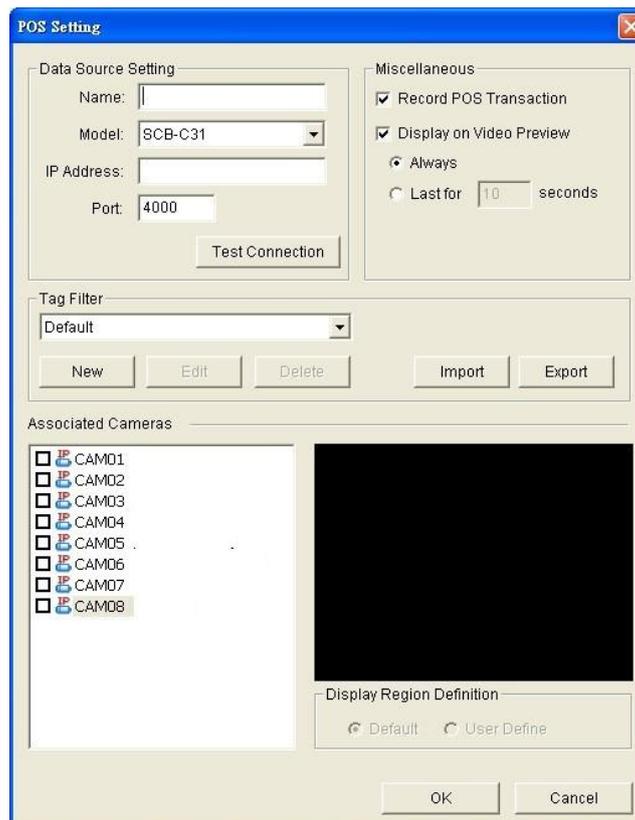

4. Click the OK button to finalize the modification.

3.2.3 Insert POS Setting

1. Click  **Insert** button to open the **POS Setting** window.
2. Set up basic data source, including **Name, Model, IP address,** and **Port**. There are three types of models.

- **SCB-C31**: The device possesses one POS license, and should be equipped with the cash register not working as TCP server.
- **SCB-C31A**: The difference from SCB-C31 is not possessing one POS license, so user should activate POS license.
- **TCP Client**: Cash register possesses with network, so no need to have SCB-C31A as a converter. POS license is needed.

3. After setting, click **Test Connection** to test POS device connection.

4. Set up Miscellaneous options, including **Record POS Transaction** and **Display on Video Preview**.

- **Record POS Transaction**: Select this checkbox to record POS transaction data. Users are allowed to search the POS data.
- **Display on Video Preview**: Select this checkbox to display POS transaction overlay on associated camera live video. Two types of transaction data display time:
 - **Name**: Name of the POS data source.
 - **Always**: Keep transaction data on video until receiving next transaction date.
 - **Last for ___ seconds**: Each transaction data only lasts on video for ___ seconds after receiving the last data of transaction.

5. Select **Tag Filter**. See **Tag Filter** for details.
6. Select the camera of **Associated Cameras** to display POS transaction data overlay on live video.
7. Set up display area for each camera video in **Display Region Definition**.
 - **Default**: The default display area is in the upper left corner of video image.
 - **User Define**: Enable **User Define**, and define display area by dragging rectangle
8. Click the **OK** button to save.

3.2.4 Delete POS Device

1. Choose POS device.
2. Click  **Delete** button to remove this POS device from the system.

3.2.5 Configure POS Setting

1. Choose POS device.
2. Click  **Configure** button to open the POS Setting window.
3. Refer to **Insert POS Setting** to modify configuration.

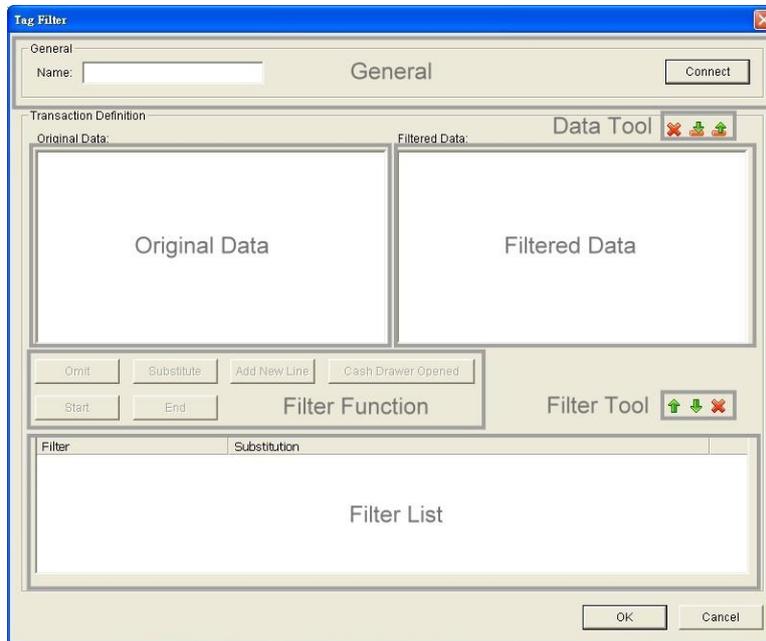

3.3 Tag Filter

The original transaction data from POS system is hard to read. Users can define filters to make the POS strings meaningful. The system also provides a simple default tag filter to filter out same common EPSON commands, users can base on this default tag filter to edit their customized filters.

3.3.1 Add New Tag Filter

1. Click  **Insert** button or choose a device and click  **Configure** button to open the **POS Setting** window.
2. Click **New** to open tag filter window.
 - **General**: Name of Tag Filter and Connect button.
 - **Original Data**: Original transaction data from POS device.
 - **Filtered Data**: Filtered data after definition.
 - **Filter Function**: Tool used for defining filter type.
 - **Filter List**: List of all filters.

- **Data Tool:** Clear/import/export buttons to clear/import/export the original and filtered data.
- **Filter Tool:** Upper/down buttons to arrange the priority of each filter; remove button to remove the filter from list.

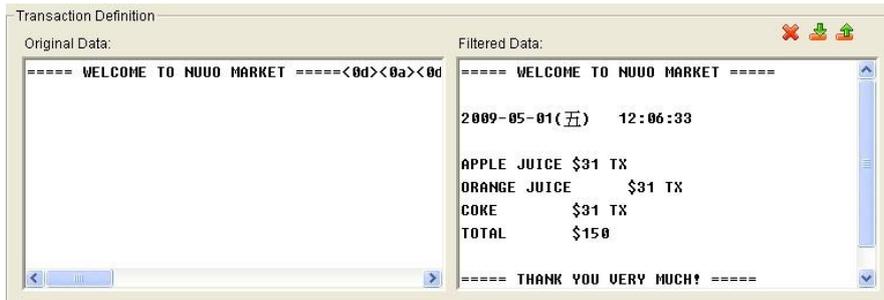

3. Enter name of this tag filter.
4. Click **Connect** button to capture POS transaction data from POS device. The original transaction data will be shown on the left window.

If you don't want the data keep importing when editing filter, click **Disconnect** button to stop connecting.

5. Data Tools

- **Clear:** Remove data from Original Data window and Filtered Data window.
 - **Import:** Reload exported binary data.
 - **Export:** Capture and export original binary data.
6. Start to edit tag filters. Click and drag to select text from Original Data window, and then use the below six buttons to define filters. The filtered transaction data will be shown on the right window.

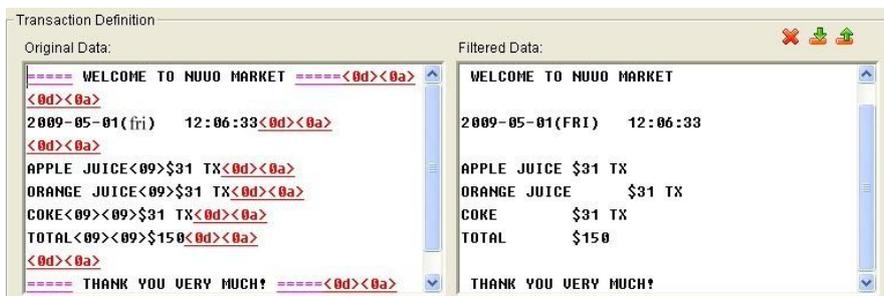

- **Omit:** Neglect the selected text which is meaningless or not important. The text will disappear on the right window.

- **Substitute:** Use another word(s) to replace the selected text. The system will pop up a substitution panel for replacing word(s) users want. The replaced text will be shown on the right window.

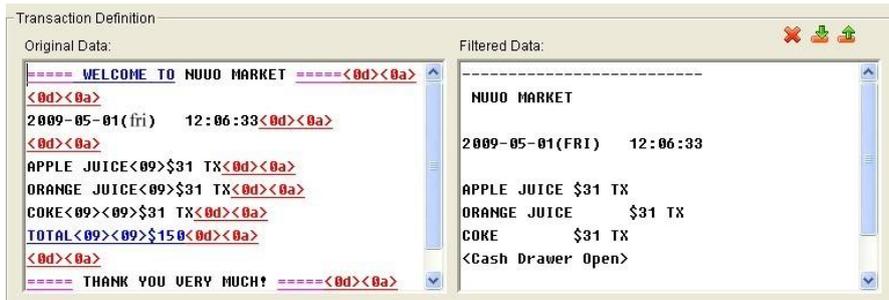

- **Add New Line:** Define the selected text as the symbol for changing to new line. The result will be shown on the right window.

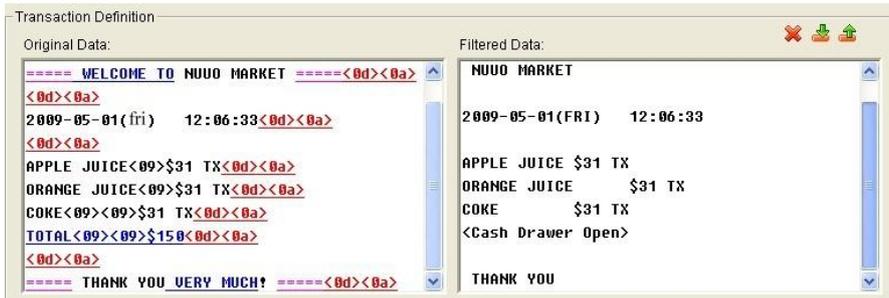

- **Start:** Define the selected text as the symbol for transaction beginning. The filtered data will be separated line as below.

- **Cash Register Opened:** Define the selected text as the symbol for opening cash register. The filtered data will be shown the **<Cash Drawer Open>** mark as below.

- **End**: Define the selected text as the symbol for transaction ending. The filtered data will be separated line as below.

7. Filter Tools

- **Up**: Move a tag filter up; the upper filter will be operated earlier.
- **Down**: Move a tag filter down; the lower filter will be operated later.
- **Delete**: Remove a filter from this tag filter list.

Filter	Substitution
=====	
fri	FRI
<0d><0a>	<New Line>
WELCOME TO	<Transaction Start>
TOTAL<09><09>\$150	<Cash Drawer Open>
VERY MUCH	<Transaction End>

8. Click the **OK** button to save.

3.3.2 Edit Tag Filter

1. Select Tag Filter name from drop-down menu.
2. Click **Edit** button.
3. Configure the Tag Filter window.
4. Click the **OK** button to save.

3.3.3 Delete Tag Filter

1. Select Tag Filter name from drop-down menu.
2. Click **Delete** button to delete it.

3.3.4 Import/Export Tag Filter

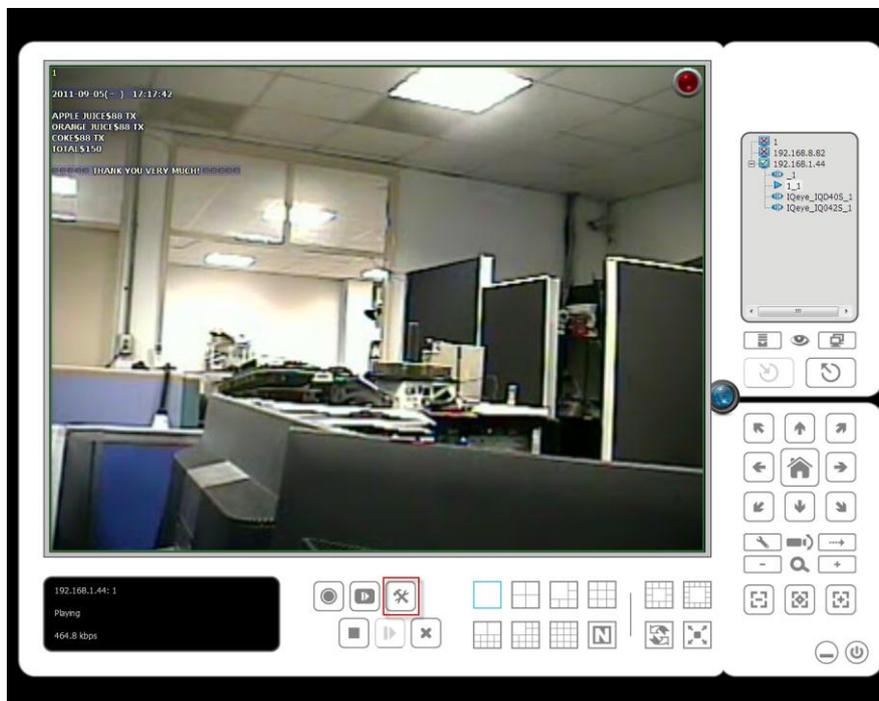

1. Click **Import/Export** button and select Import/Export URL.
2. Click **Open/Save** to Import/Export Tag Filter.
3. After importing tag filters, users can simply select tag filter from drop-down menu without editing new tag filter.

3.4 POS Display Font

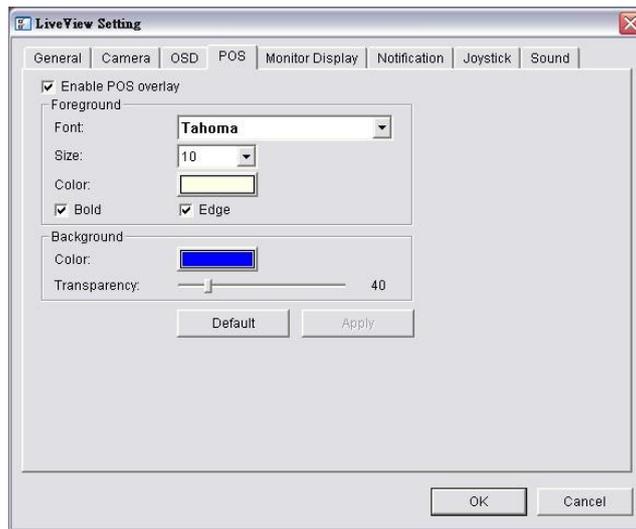

The system allows users to set up the fonts of POS transaction data on live view video and playback video.

3.4.1 Live View

1. Open Internet Explorer and log in to the unit.
2. Click the **Live View**.
3. Click the **General Setting** button to open **Live View Setting** window.

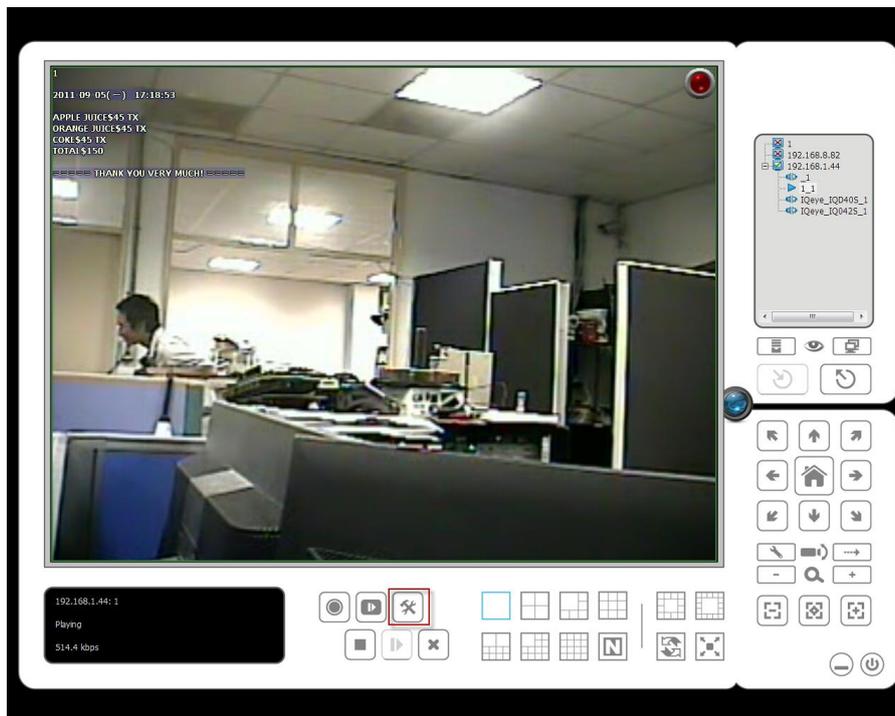

4. Select the font, font size, font color and background for the POS transaction data overlaid the video.

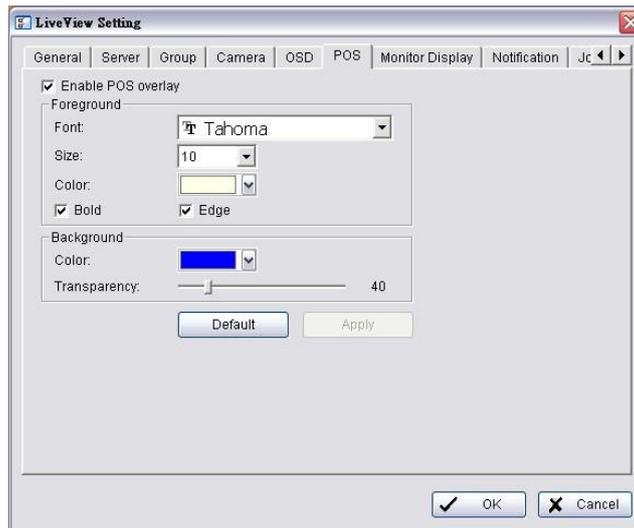

5. Click the **OK** button to save.

3.4.2 Remote Live Viewer

1. Startup > NVR > Remote Live Viewer
2. Click the **General Setting** button to open **Live View Setting** window.

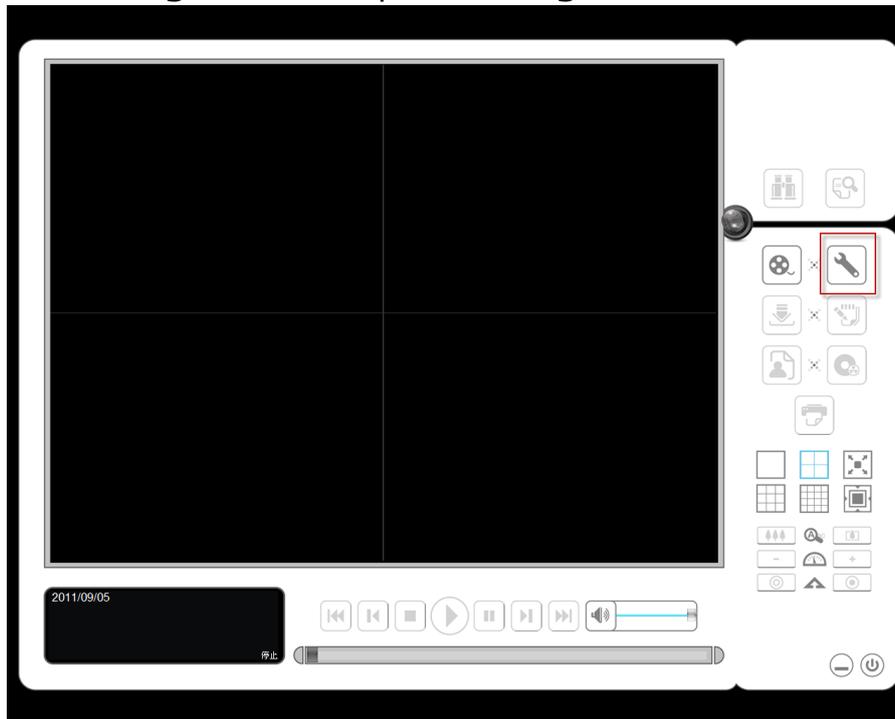

3. Select the font, font size, font color and background for the POS transaction data overlaid the video.

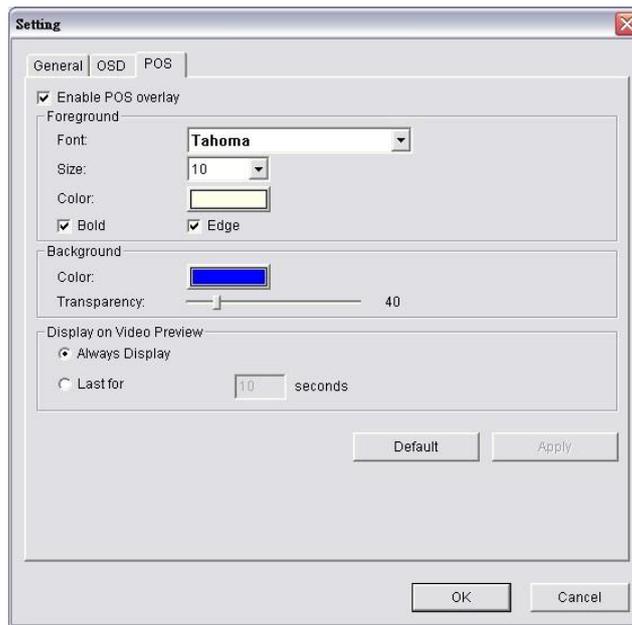

4. Click the **OK** button to save.

3.4.3 Playback

1. Open Internet Explorer and log in to the unit.
2. Click the **Playback** button.
3. Click the **Setting** button to open **Setting** window.

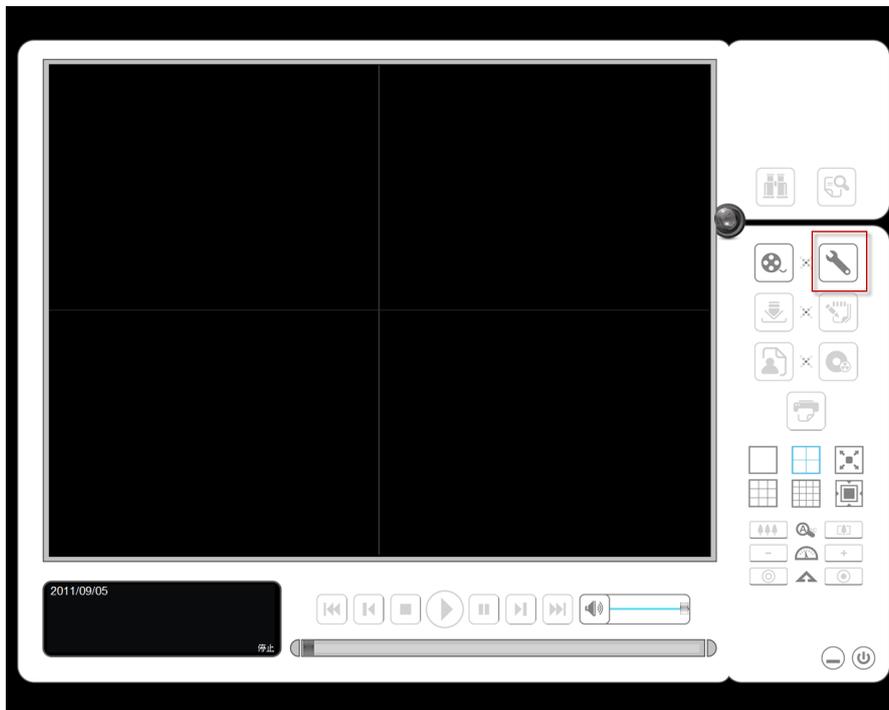

4. Select the font, font size, font color and background for the POS transaction data overlaid the video. Also, select the type of transaction data display time.

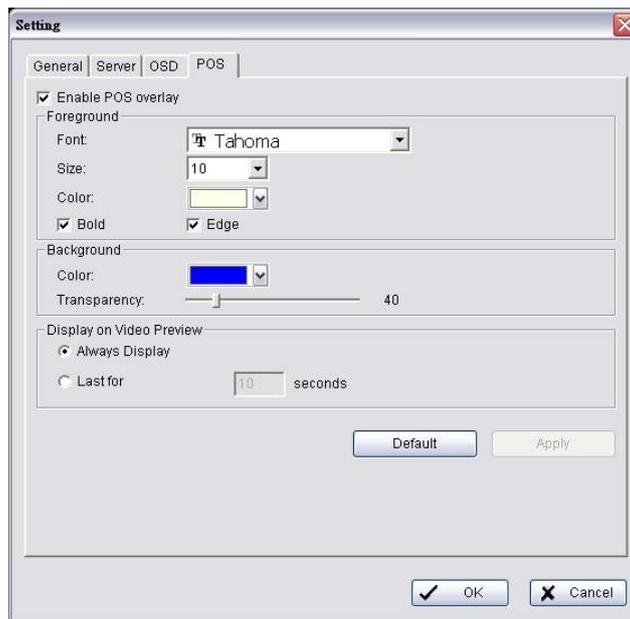

3.4.4 Playback System

1. Startup > NVR > Playback System
2. Click the **Setting** button to open **Setting** window.

3. Select the font, font size, font color and background for the POS transaction data overlaid the video. Also, select the type of transaction data display time.

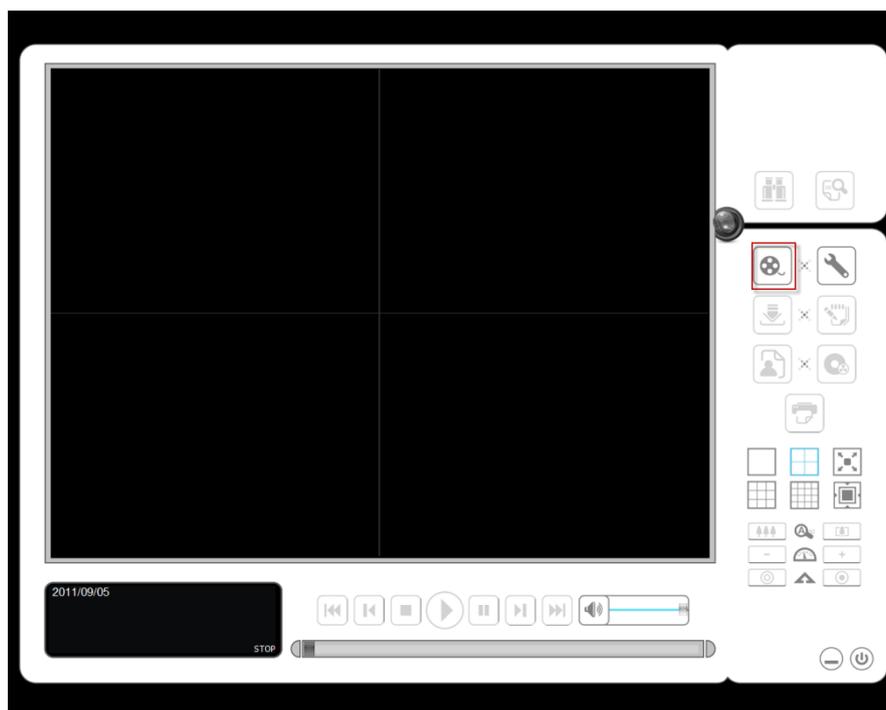

3.5 POS Transaction Data Search

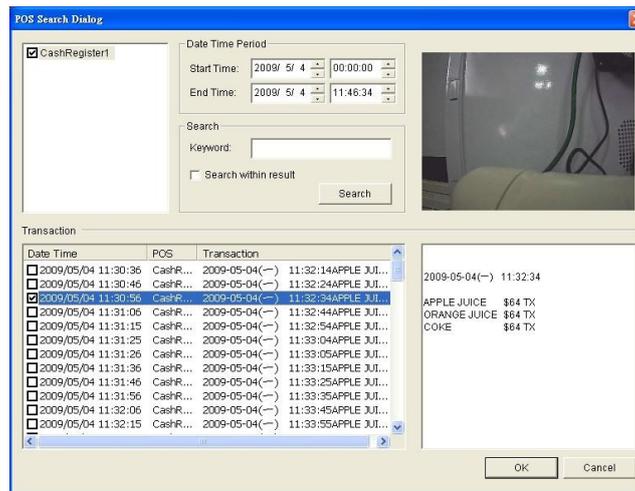

POS Search tool is used to search key word of all transaction data.

3.5.1 Search POS Transaction Data through Playback

1. Open Internet Explorer and log in to the unit.
2. Click the **Playback** button.
3. Click the **Open Record** button to open **Data Time Search Dialog** window.

- Click the **POS Search** button  to open **POS Search Dialog** window.

- Select a POS device(s) from the POS list.
- Set up Start Time and End Time in **Data Time Period** section.
- Enter the keyword you want to search.
- Click the **Search** button, the results will be shown in Transaction table.
- Select an item from Transaction table, the transaction detail will be shown in the table of lower right corner, and the recorded video of associated camera will be shown in the upper right corner.
- Select the checkbox of **Search within result**, and enter a keyword, you can search the data within the results.

3.5.2 Search POS Transaction Data through Playback System

- Startup > NVR > Playback System.
- Click the **Open Record** button to open **Data Time Search Dialog** window.
- Click the **Remote Server Site**  icon on the top of the window to select the server users want to access.
- Follow the step 4 through 10 of **Search POS Transaction Data by Playback** to search the data.

3.6 Playback Video with POS Data

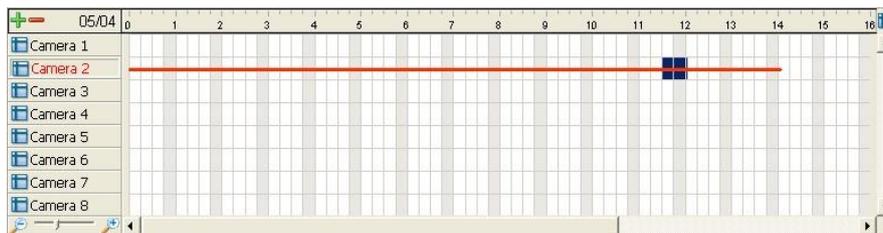

Enable POS overlay in **Setting** window to view recorded video with POS transaction data (Refer to **POS Display Font**). If the option is enabled, the system will auto display transaction data when playing recorded video. There are two modes to select video period.

3.6.1 Select Period by POS Search

1. Refer to **POS Transaction Data Search**.
2. Select the transaction data from the result list, and click **OK**.

Date Time	POS	Transaction
<input type="checkbox"/> 2009/05/04 11:30:36	CashR...	2009-05-04(←) 11:32:14APPLE JUL...
<input type="checkbox"/> 2009/05/04 11:30:46	CashR...	2009-05-04(←) 11:32:24APPLE JUL...
<input checked="" type="checkbox"/> 2009/05/04 11:30:56	CashR...	2009-05-04(←) 11:32:34APPLE JUL...
<input type="checkbox"/> 2009/05/04 11:31:06	CashR...	2009-05-04(←) 11:32:44APPLE JUL...
<input type="checkbox"/> 2009/05/04 11:31:15	CashR...	2009-05-04(←) 11:32:54APPLE JUL...
<input type="checkbox"/> 2009/05/04 11:31:25	CashR...	2009-05-04(←) 11:33:04APPLE JUL...
<input type="checkbox"/> 2009/05/04 11:31:26	CashR...	2009-05-04(←) 11:33:05APPLE JUL...
<input type="checkbox"/> 2009/05/04 11:31:36	CashR...	2009-05-04(←) 11:33:15APPLE JUL...
<input type="checkbox"/> 2009/05/04 11:31:46	CashR...	2009-05-04(←) 11:33:25APPLE JUL...
<input type="checkbox"/> 2009/05/04 11:31:56	CashR...	2009-05-04(←) 11:33:35APPLE JUL...
<input type="checkbox"/> 2009/05/04 11:32:06	CashR...	2009-05-04(←) 11:33:45APPLE JUL...
<input type="checkbox"/> 2009/05/04 11:32:15	CashR...	2009-05-04(←) 11:33:55APPLE JUL...

3. The period you select from POS search results will be selected automatically.

4. Click **OK** to playback videos.

3.6.2 Select Period by Data & Time through Playback

1. Open Internet Explorer and log in to the unit.
2. Click the **Playback** button.
3. Click the **Open Record** button to open **Data Time Search Dialog** window.
4. Highlight the video clip you want to review by left-clicking and dragging the time period. You may also utilize the Start Time and End Time in **Date Time Period** section after choosing cameras.
5. Click **OK** to playback videos.

3.6.3 Select Period by Data & Time through Playback System

1. Startup > NVR > Playback System.
2. Click the **Open Record** button to open **Data Time Search Dialog** window.
3. Click the **Remote Server Site**  icon on the top of the window to select

the server users want to access.

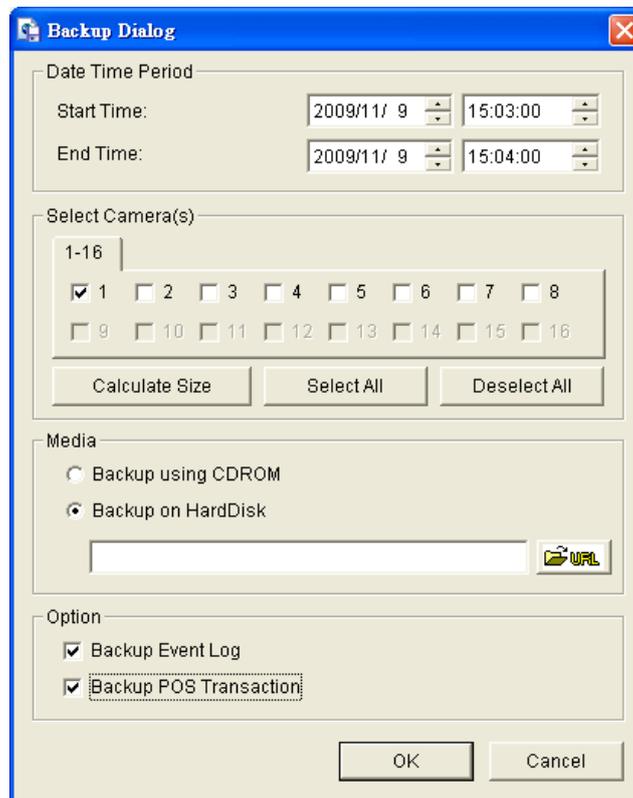

4. Highlight the video clip you want to review by left-clicking and dragging the time period. You may also utilize the Start Time and End Time in **Date Time Period** section after choosing cameras.
5. Click **OK** to playback videos.

3.7 Backup Video with POS Data

There are three ways to backup video with POS transaction data.

3.7.1 Backup through Internet Explorer

1. Open Internet Explorer and log in to the unit.
2. Click the **Open Record** button to select data.
3. Click the **Backup** button.

4. Check the **Backup POS Transaction** option.
5. Set the Start Time and End Time you want to backup.
6. Select the cameras you want to backup.
7. Select the directory you want to save the backup data.
8. Click the **Backup** button.
9. The system will then begin backup process automatically.

3.7.2 Backup through Playback System

1. Startup > NVR > Playback System.
2. Click the **Open Record** button to select data.
3. Click the **Backup** button.
4. Check the **Backup POS Transaction** option.
5. Set the Start Time and End Time you want to backup.
6. Select the cameras you want to backup.
7. Select the directory you want to save the backup data.
8. Click the **Backup** button.

3.7.3 Backup through Backup System

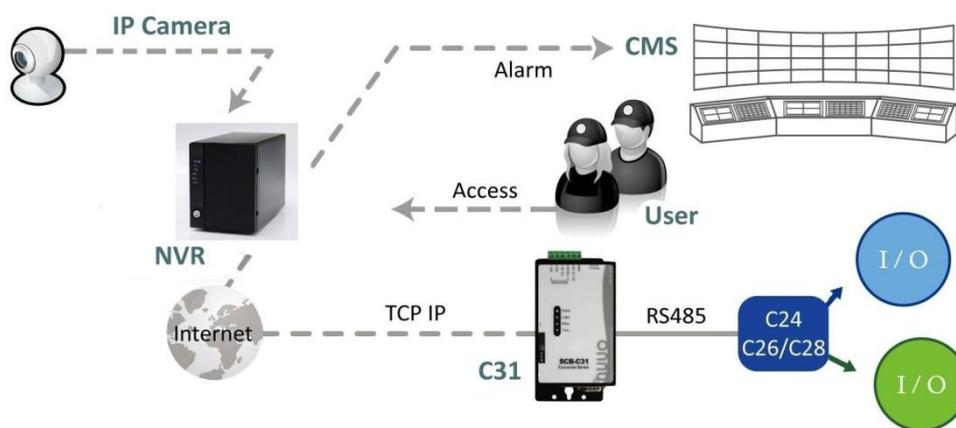

Please refer to step 1 to 14 of the content of **Backup and Delete Records**, and check the **Backup POS Transaction** option.

4.I/O

4.1 Introduction

4.1.1 System Introduction

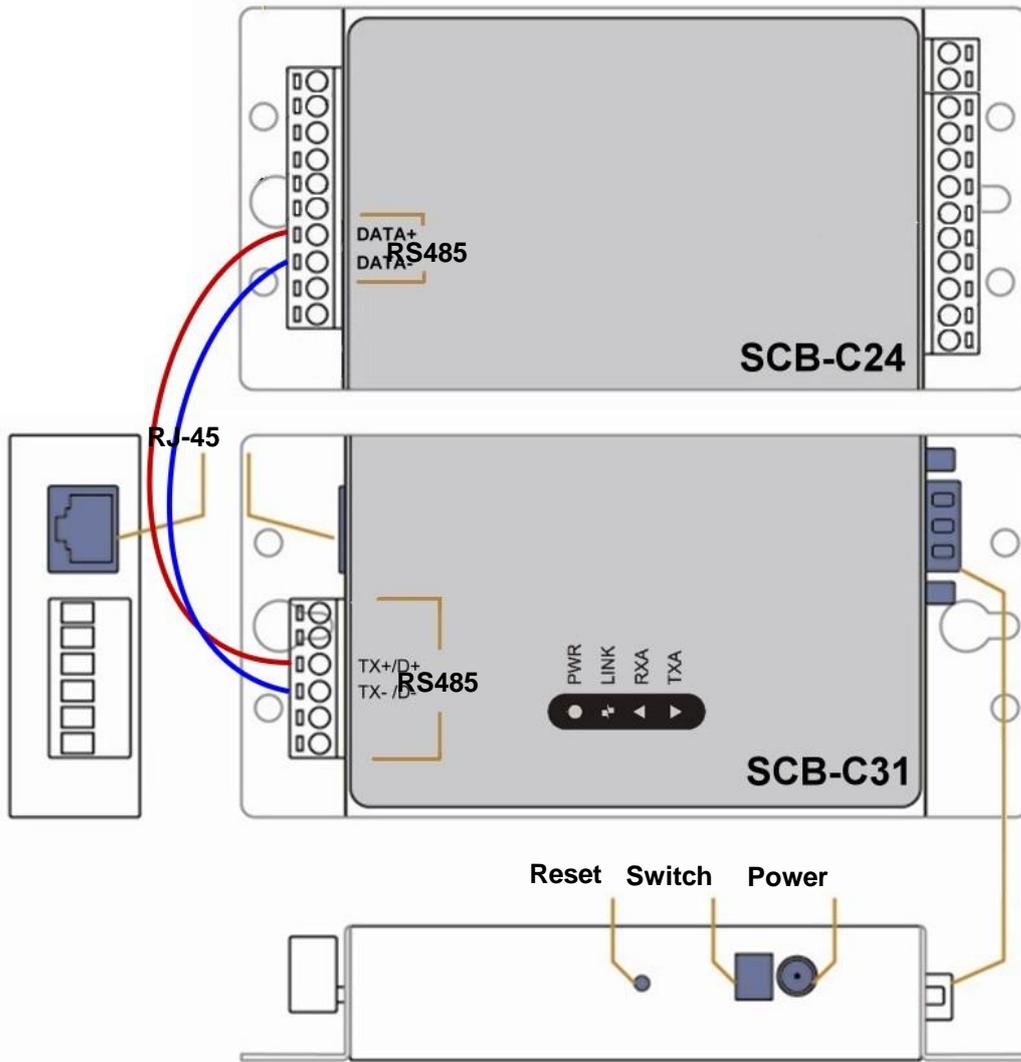

We provides remote I/O solution for NVR by connecting SCB-C31 with I/O Box SCB-C24/26/28. Refer to the below architecture, I/O device is connected directly with I/O Box, and input/output signal delivered in RS485 format are converted to Ethernet through SCB-C31. NVR can use the signals to do more sophisticated setup, such as starting recording when input triggered, triggering output as an event happened, and much more.

4.1.2 HW Installation

SCB-C24/26/28 must work with SCB-C31 (Ethernet-RS485 converter). Further, **the C31 Box cannot be used for POS and converter at the same time, and one C31 Box can be paired with one NVR unit only.** Please follow the steps below to configure the devices.

- Step 1: Check the system switch of SCB-C31 is switched to OFF-OFF position.
- Step 2: Connect SCB-C31 with power source.
- Step 3: Connect SCB-C31 with internet by RJ45 LAN cable.
- Step 4: Connect I/O Box with power source.
- Step 5: Connect SCB-C31 and I/O Box with cable, positive connection (TX+/D+ and DATA+) and negative connection (TX-/D- and DATA-). Take SCB-C31 with I/O Box SCB-C24 for example as below.

Multiple I/O Boxes can be connected to a single SCB-C31. However, series connection of I/O boxes is forbidden. Furthermore, the default ID for each I/O Box is the same. Please follow the direction to setup I/O Box one by one.

4.1.3 Software Installation – SCB-C31

Step 1: Open Internet Explorer to setup SCB-C31. The default IP address is 192.168.1.1.

Step 2: Setup IP address and port.

1. Static IP Address

2. **Server Listening Port:** The default port is 4000, which is not the port for setting page, but for signal transmission.

Serial Settings	
Data Baud Rate	9600
Data Bits	8
Data Parity	None
Stop Bits	1
Flow Control	None
Network Settings	
	<input checked="" type="checkbox"/> Enable DHCP
Static IP Address	192.168.1.1
Static Subnet Mask	255.255.255.0
Static Default Gateway	192.168.1.3
Static DNS Server	168.95.1.1
Connection Type	TCP
Transmit Timer	30
Server/Client	Server
Server:	
Server Listening Port	4000
Client:	
Destination IP	192.168.1.2
Destination Port	4000
	<input type="checkbox"/> Enable Reboot
	<input type="button" value="Apply"/> <input type="button" value="Reset"/>
	<input type="button" value="Firmware Upgrade"/>

Step 3: Click the **Apply** button to activate configuration.

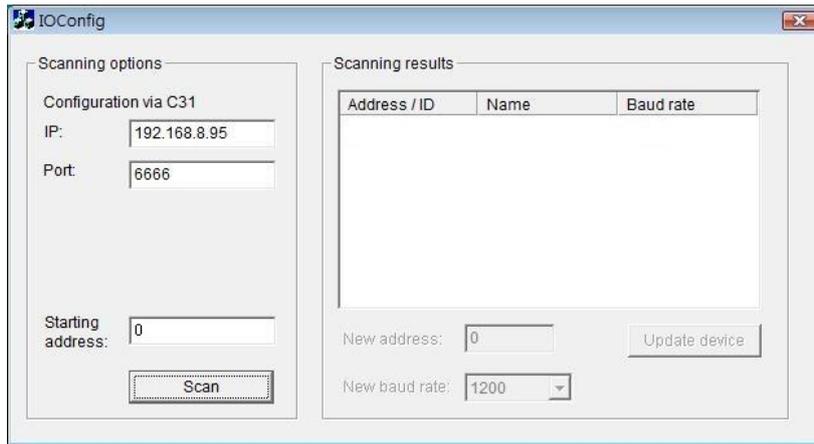

Due to the stability of data transmission, one SCB-C31 can be paired with one NVR unit only.

4.1.4 Software Installation – SCB-C24/26/28

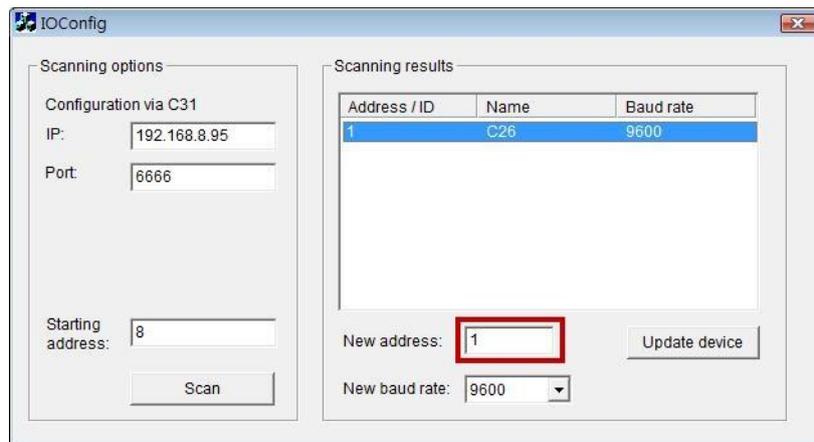

The default ID of I/O Box is identical. To avoid the conflict between Boxes, please connect only one Box with SCB-C31 and execute the setup application to change the ID from the default value (1).

1. Execute IOConfig.exe, type in the IP address and port of SCB-C31, and click the **Scan** button.

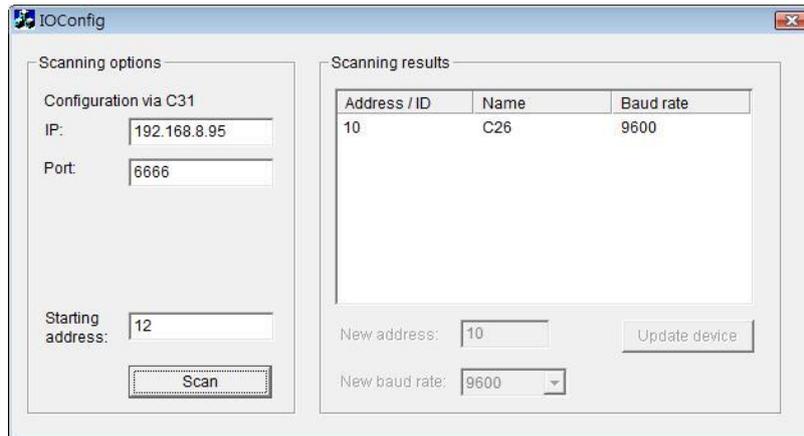

IOConfig.exe starts scanning the ID from 0 to 255, and it may take around a minute to finish scan.

- When the I/O Box is discovered, click on the item and change the ID from the **New Address** field. Click the **Update device** button to activate the settings.

- Scan again to make sure the configuration is validated. In this case, we changed the ID to 10, so we can modify the number of "Starting address" to 10 to save the searching time.

4. Refer to the **HW Installation** section to connect other I/O Box and repeat the steps 1 through 3 above to configure more I/O Boxes.

4.2 Software Setup

4.2.1 Add I/O Box

1. Open Internet Explorer and log in to the unit.
2. Click **POS & I/O / I/O Settings / I/O Box Settings**.
3. Enter the information of I/O box.

I/O Settings

I/O Box Settings | I/O Pin Settings

I/O Box Settings

Device No: []

Device Name: []

Device Type: SCB-C31 + SCB-C24

IP Address: [] Port: []

ID: Addr:000

[Create] [Modify]

I/O Box List

No.	Name	Type	IP Addr.	Port	ID	Delete

51008	3	SCB-C28	192.168.3.197	4011	Addr:005	⊘

[Save] [Reset]

- **Device No:** The unique ID system distributes in sequence automatically.
- **Device Name:** The name of the I/O box.
- **Device Type:** The types of I/O box, including SCB-C24, SCB-C26, and SCB-C28.
- **IP Address:** The IP Address of SCB-C31.

- **Port:** The transmission port of SCB-C31.
- **ID:** The ID of the I/O box.

4. Click the **Create** button, and the information will be updated in I/O Box List.
5. Repeat steps 3 and 4 to add more I/O boxes in the list.
6. Click the **Save** button to activate the settings. Meanwhile, system will distribute an unique ID to each device.

4.2.2 Modify I/O Box Information

1. Open Internet Explorer and log in to the unit.
2. Click **POS & I/O / I/O Settings / I/O Box Settings**.
3. Click the I/O box which you want to modify from the list.
4. Modify the information of this I/O box, and click the **Modify** button.
5. Click the **Save** button to activate the settings.

4.2.3 I/O Pin Setting

1. Open Internet Explorer and log in to the unit.
2. Click **POS & I/O / I/O Settings / I/O Pin Settings**.
3. All input and output pins are shown in this page, including the ones from cameras and I/O boxes. Check the box to enable a pin (defaulted), and type a name in the field for each I/O pin.

I/O Settings

[I/O Box Settings](#) | [I/O Pin Settings](#)

I/O Pin Settings

Device Name	I/O Pin	Name
Location 1	<input type="checkbox"/> Input #0	
	<input checked="" type="checkbox"/> Output #0	
Location 2	<input checked="" type="checkbox"/> Input #0	
	<input checked="" type="checkbox"/> Output #0	
	<input checked="" type="checkbox"/> Input #0	
I/O BOX 51008(3)	<input checked="" type="checkbox"/> Input #0	Gate
	<input checked="" type="checkbox"/> Input #1	Lobby
	<input checked="" type="checkbox"/> Input #2	First Floor
	<input checked="" type="checkbox"/> Input #3	Second Floor
	<input type="checkbox"/> Output #0	
	<input type="checkbox"/> Output #1	
	<input type="checkbox"/> Output #2	
	<input type="checkbox"/> Output #3	

4. Click the **Save** button.

If the box of I/O pin is unchecked, this pin won't be shown on relative application pages. In other words, you cannot do any setting/operation with this pin. See details in next section.

4.3 Relative Configuration and Application

4.3.1 Record on Input Trigger

Refer to **Recording Schedule / Event Setup**.

4.3.2 Input and Responding Actions

Refer to **I/O Box Input and Responding Action Setup**.

4.3.3 I/O Control Panel in Live View

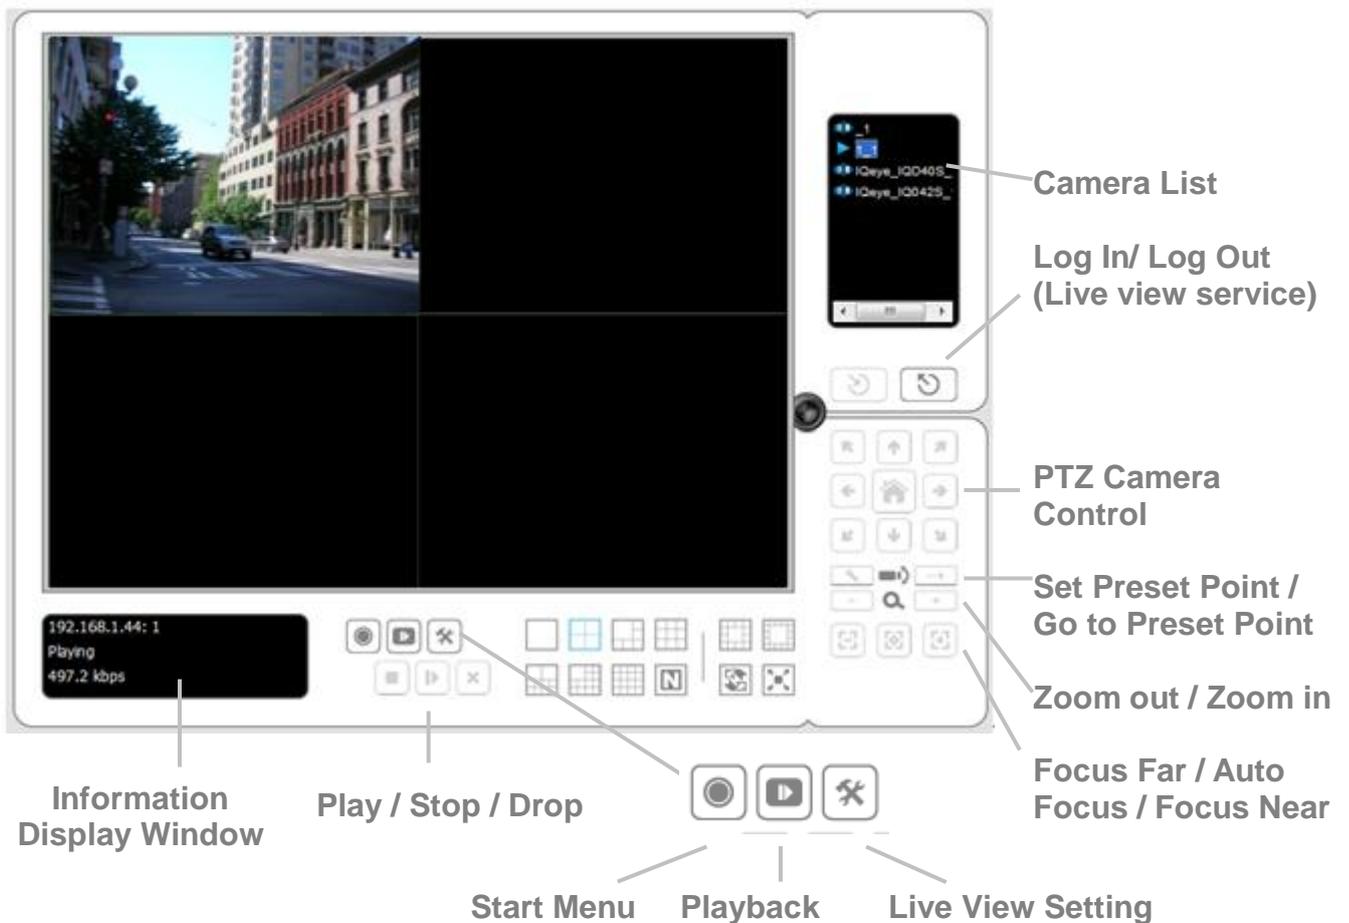

Refer to **Live View Control Panel**.

5. Live view

There are two ways to execute the live view function: with Internet Explorer or with the **Remote Live Viewer** application.

5.1 Internet Explorer

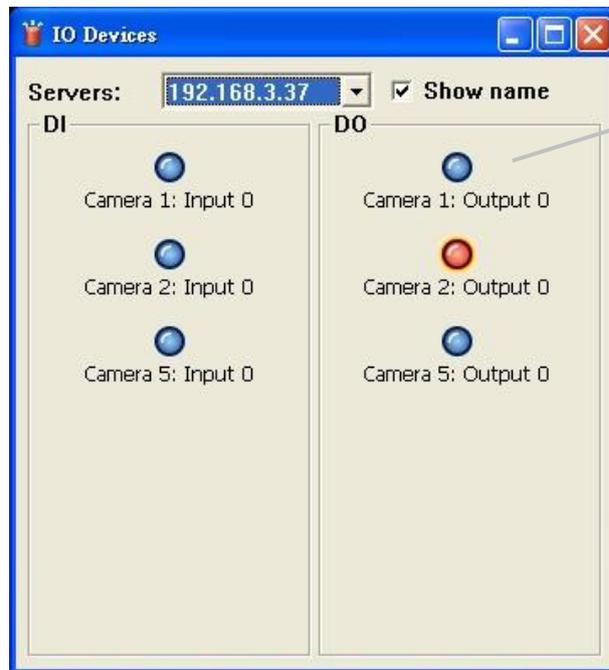

5.1.1 Live View Control Panel

- **PTZ Camera Control:** You may control the camera view by using the PTZ camera control panel to adjust the camera's view. This is only available with cameras that support the PTZ function.
- **Set Preset Point / Go to Preset Point:** Adjust the camera view and click the  button to set up this view as preset point. Repeat the process to add more preset points. Click the  button to see the preset view.
- **Zoom:** Click the **+** or **-** button to zoom in or zoom out the view.
- **Play / Stop / Drop:** Select a camera / video and click this button to play/stop/disconnect a particular channel.
- **Information Display Window:** Display video information including

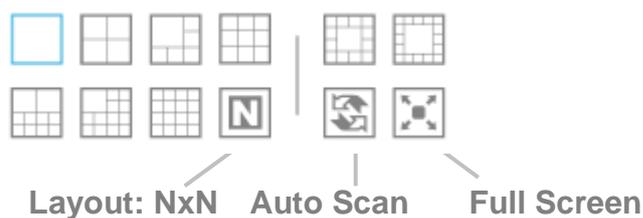

server name, video current status, and bit rate for a selected channel.

- **Start Menu > E-Map**: Upload map and drag camera or I/O on it to track device location and alarm status with instant response when an event occurred. See details in the chapter of **E-Map**.
- **Start Menu > I/O Control Panel**: Utilize I/O device function remotely. User can remotely adjust the Output Pins by turning it on or off.

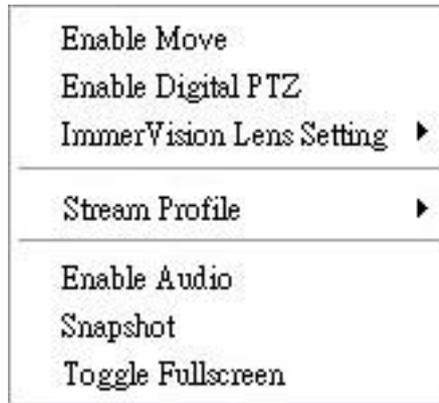

Click to turn on/off the "Output" pins

- **Auto Scan**: Activate auto scan to rotate the channels on the display screen. For instance, you may select to show only 4-split screen on the liveview, while connecting 16 channels to the system. With auto scan function, you are able to see all 16 channels by turns.
- **Layout**: Click to change the multiple-split layout.

You can right click on the camera screen to enable the following function.

- **Enable Move**: Adjust the current view of camera which supports PT function by dragging the  button on the display screen.
- **Enable Digital PTZ**: Click the + or – button to zoom in or zoom out the view. The lower right square flashing on the video grid indicates the correspondent view of the camera.
- **ImmerVision Lens Setting**: Select the mode of lens, original, PTZ mode, Quad mode and Perimeter mode.
- **Stream Profile**: Select the stream profiles, original, low, minimum.
- **Enable Audio**: Enable audio on active channel(s).
- **Snapshot**: Select the snapshot function to capture a specific video image immediately.
- **Toggle Fullscreen**: Select it to view cameras with full screen. Press “Esc” or right click un-select full screen to go back to the original view.

Also, right click on camera list to duplicate and connect/disconnect designate cameras, and do other functions.

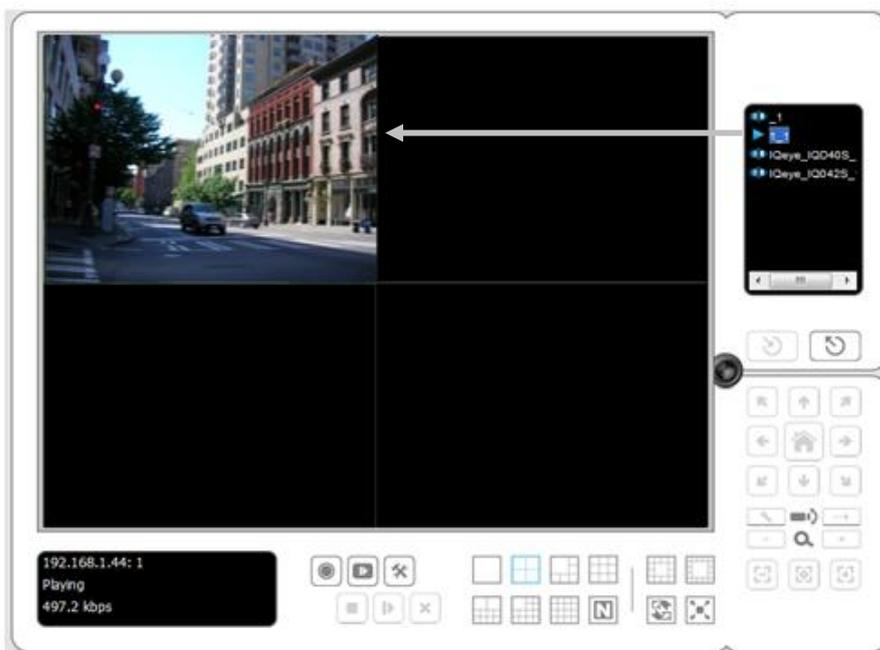

- **Duplicate Camera**: Select the duplicate camera function to create multiple views. The duplicated camera will be shown with green indicator as the right picture. Combine this function with digital PTZ, users are allowed to enlarge different spots and view them in different channels

without failing to record the whole view.

- **Connect / Disconnect:** Click to connect or disconnect the designate camera.
- **Login / Logout Server:** Click to login or logout.
- **Connect All / Disconnect All:** Click to connect or disconnect all cameras.

5.1.2 Live View Setting

1. Open Internet Explorer and log in to the unit.
2. Set the cameras.
3. Click the **Live View** button on the top of the page.
4. Select a camera(s) from the camera list on the right and then drag it to where you wish the image to be displayed.

When running Internet Explorer, do not use the function "Open in New Window". Using this function may cause Internet Explorer to become unstable.

5.1.3 General Setting

1. Open Internet Explorer and log in to the unit.
2. Click the **Live View** button on the top of the page.
3. Click the **General Setting** button.
4. Click the **General** tab.

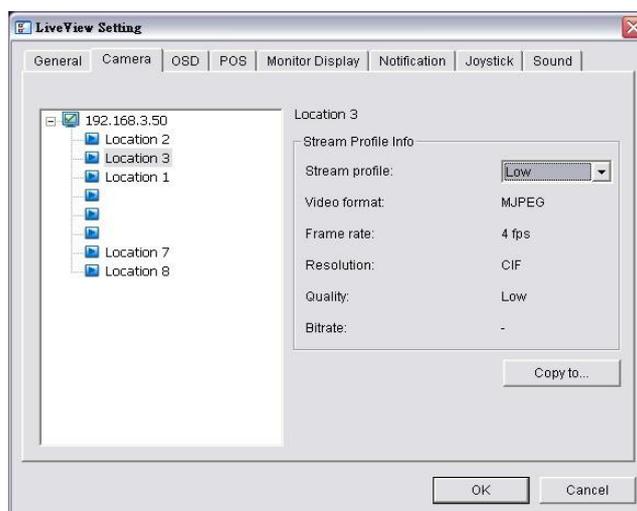

5. Check the **Enable audio on active channel** option to enable audio streaming on active channel. This function synchronizes with right click on camera to enable audio.
6. Check **Synchronize video frames** to avoid the tearing problem occurring in video display while increasing the CPU loading.
7. Click the **OK** button.

5.1.4 Stream Profile Setting

Select the preferred stream type of each camera as default live view profile.

1. Open Internet Explorer and log in to the unit.
2. Click the **Live View** button on the top of the page.
3. Click the **General Setting** button.
4. Click the **Camera** tab.

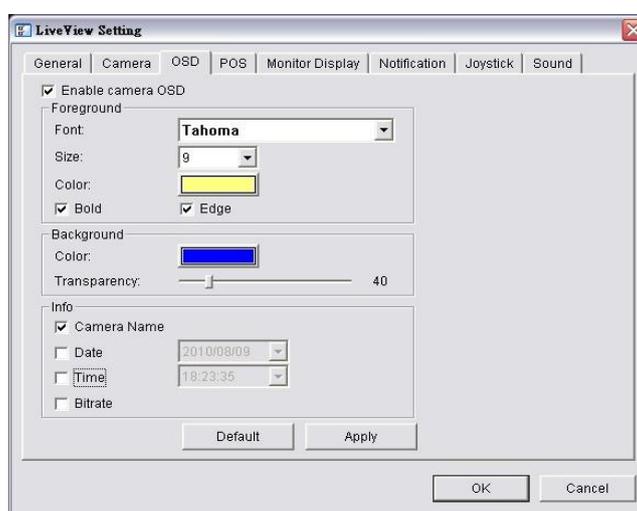

5. Adjust the stream profile of every camera with stream profile enabled in the

setting page.

6. Click a camera and select its stream profile, and click the **Copy to...** button to apply this profile to other channels.
7. Click the **OK** button.

5.1.5 OSD (On-screen display) Setting

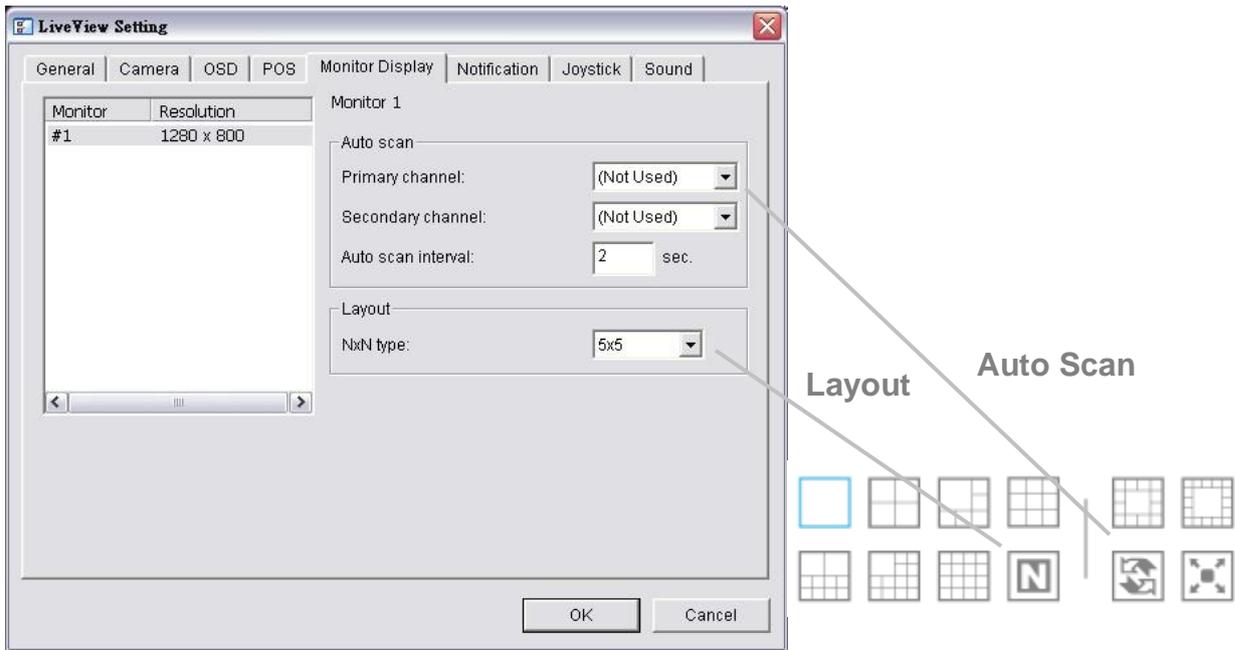

1. Open Internet Explorer and log in to the unit.
2. Click the **Live View** button on the top of the page.
3. Click the **General Setting** button.
4. Click the **OSD** tab.

5. Check the **Enable camera OSD** option.
6. Set the foreground and background settings of the OSD.
7. Select which kinds of information will be displayed on the screen.
8. Click the **Apply** button to preview the result.
9. Click the **Default** button to back to the default settings if necessary.
10. Click the **OK** button.

5.1.6 Monitor Display Setting

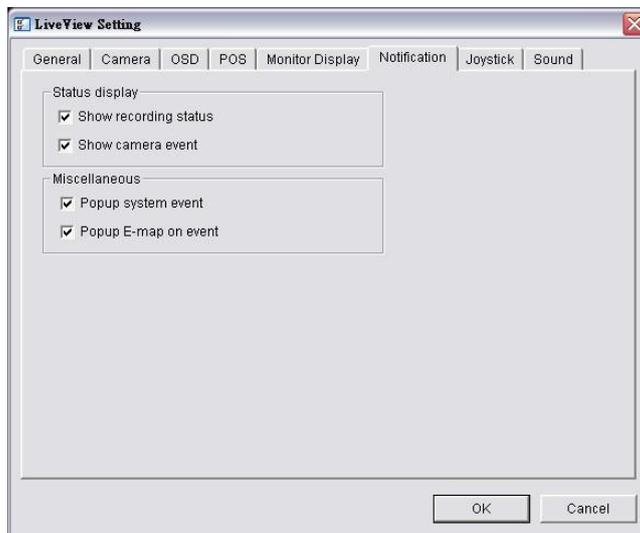

1. Open Internet Explorer and log in to the unit.
2. Click the **Live View** button on the top of the page.
3. Click the **General Setting** button.
4. Click the **Monitor Display** tab.

5. Select **Primary channel** which will always be on the screen when activating auto scan; while select **Secondary channel** which has second priority when activating auto scan. Enter the time interval for auto scan.
6. Select the screen division of NxN type.
7. Click the **OK** button.

5.1.7 Notification

1. Open Internet Explorer and log in to the unit.
2. Click the **Live View** button on the top of the page.
3. Click the **General Setting** button.
4. Click the **Notification** tab.

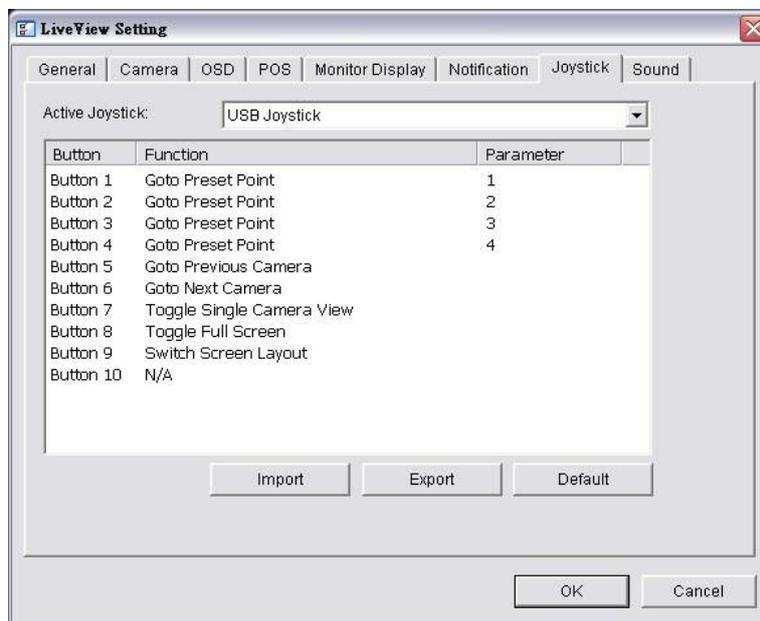

5. Check **Show recording status** to show the crystal ball with recording status on monitor display.
6. Check **Show camera event** to display the words of detected camera event on the correspondent screen.
7. Check **Popup system event** to pop up system event message dialog as a warning when a system event occurred.
8. Check **Popup E-map on event** to pop up E-map with event indicator when camera or I/O Box event occurred.
9. Click the **OK** button.

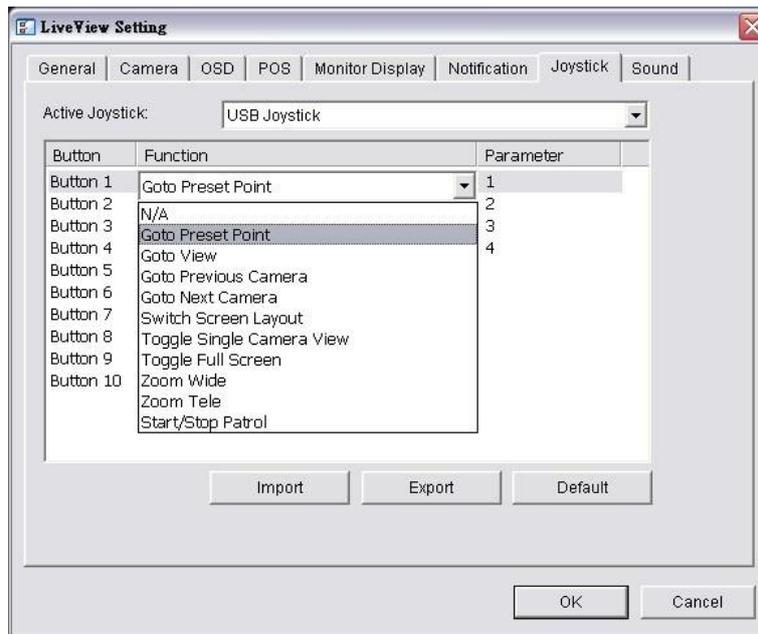

“Popup E-map on event” only activates on event, which means that you should not only edit camera and I/O on E-map but setup camera motion, camera input and I/O Box input as an event. Refer to **Event & Action Management** to do the settings.

5.1.8 Set up Joystick Control

1. Open Internet Explorer and log in to the unit.
2. Click the **Live View** button on the top of the page.
3. Click the **General Setting** button.
4. Click the **Joystick** tab.

- **Function:** You can choose the function from the drop-down menu for the button of the joystick.

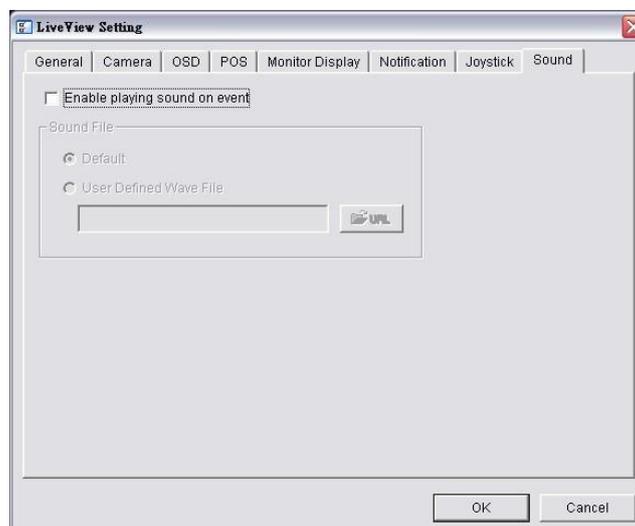

- **Parameter:** Choose the preset point from the drop-down menu.
- **Default:** Click to back to default setting.
- **Import:** Click to import the settings.
- **Export:** Click to export the settings.

5. Click the **OK** button.

5.1.9 Set up Live View Sound on Event

1. Open Internet Explorer and log in to the unit.
2. Click the **Live View** button on the top of the page.
3. Click the **General Setting** button.
4. Click the **Sound** tab.

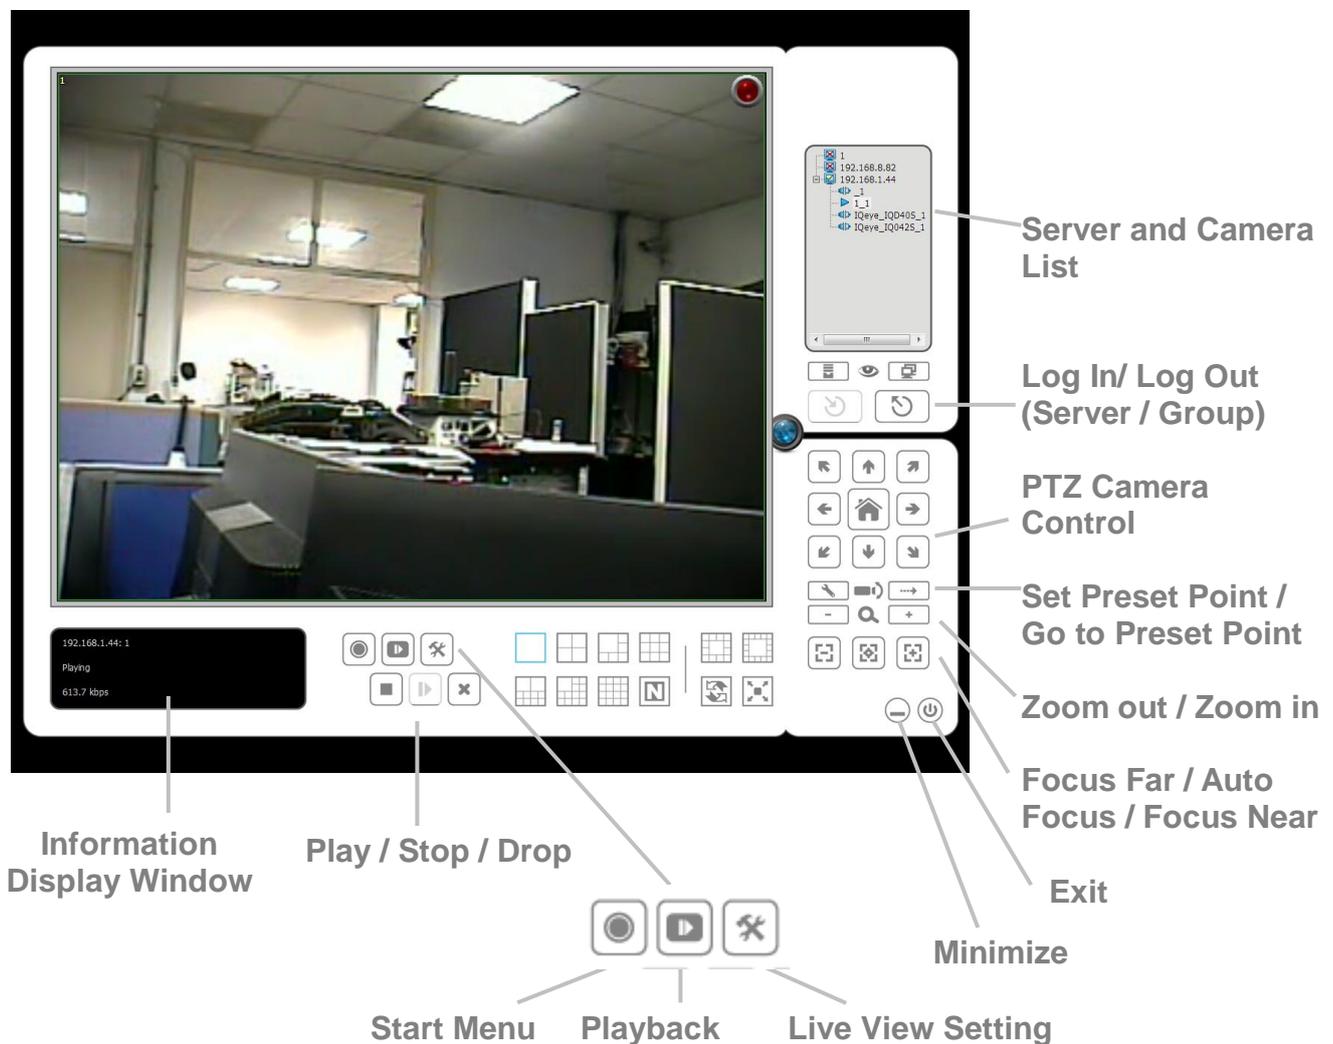

5. Check the **Enable playing sound on event** option.
6. Select sound file, default sound or user defined sound (.wav).
7. Click the **OK** button.

The function only activates on event, which means you have to setup camera motion, camera I/O and I/O Box I/O as an event. Refer to **Event & Action Management** to do the setting.

5.2 Remote Live Viewer Application

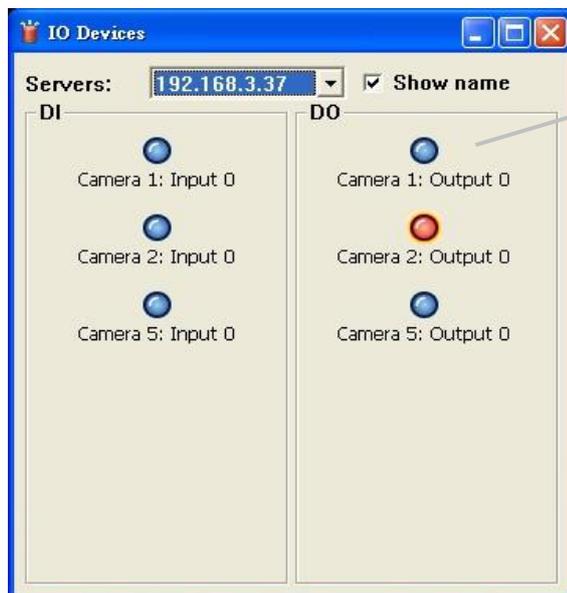

5.2.1 Remote Live Viewer Application Control Panel

- **PTZ Camera Control:** You may control the camera view by using the PTZ camera control panel to adjust the camera's view. This is only available with cameras that support the PTZ function.
- **Set Preset Point / Go to Preset Point:** Adjust the camera view and

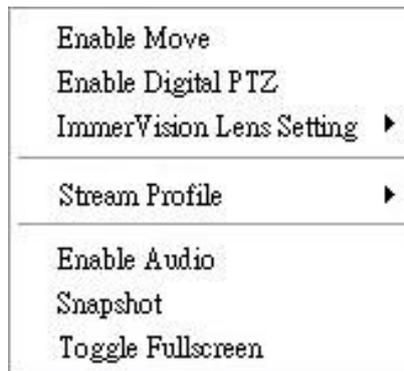

click the  button to set up this view as preset point. Repeat the process to add more preset points. Click the  button to see the preset view.

- **Zoom**: Click the + or – button to zoom in or zoom out the view.
- **Minimize**: Minimize the Remote Live Viewer window.
- **Exit**: Shut down the application.
- **Play / Stop / Drop**: Select a camera/ video and click this button to play/stop/disconnect a particular channel.
- **Information Display Window**: Display video information including server name, video current status, and bit rate for a selected channel.
- **Start Monitor > E-Map**: Upload map and drag camera or I/O on it to track device location and alarm status with instant response when an event occurred. See details in the chapter of **E-Map**.
- **Start Monitor > Remote I/O**: Select Open Monitor to append monitor to view more live videos on multiple monitors. Utilize I/O device function remotely. - User can remotely adjust the Output Pins by turning it on or off.
- **Playback**: View playback video remotely.

Click to turn on/off the "Output" pins

You can right click on the camera screen to enable the following function.

- **Enable Move:** Adjust the current view of camera which supports PT function by dragging the  button on the display screen.
- **Enable Digital PTZ:** Click the + or – button to zoom in or zoom out the view. The lower right square flashing on the video grid indicates the correspondent view of the camera.
- **ImmerVision Lens Setting:** Select the mode of lens, original, PTZ mode, Quad mode and Perimeter mode.
- **Stream Profile:** Select the stream profiles, original, low, minimum.
- **Enable Audio:** Enable audio on active channel(s).
- **Snapshot:** Select the snapshot function to capture a specific video image immediately.
- **Toggle Fullscreen:** Select it to view cameras with full screen. Press “Esc” or right click un-select full screen to go back to the original view.

Also, right click on camera list to duplicate and connect/disconnect designate cameras, and do other functions.

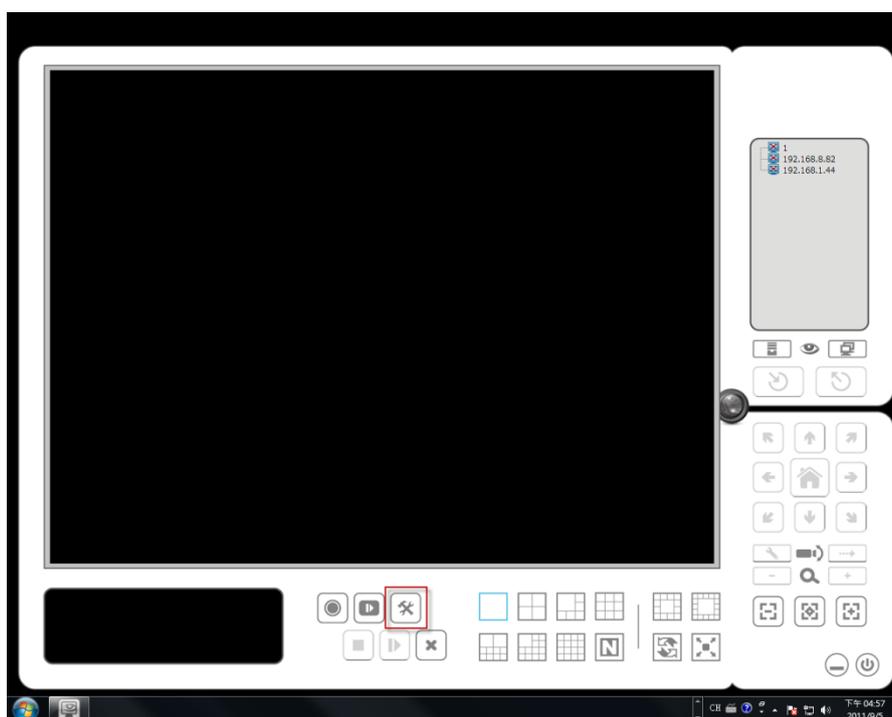

- **Duplicate Camera:** Select the duplicate camera function to create multiple views. The duplicated camera will be shown with green indicator as the right picture. Combine this function with digital PTZ, users are allowed to enlarge different spots and view them in different channels without failing to record the whole view.

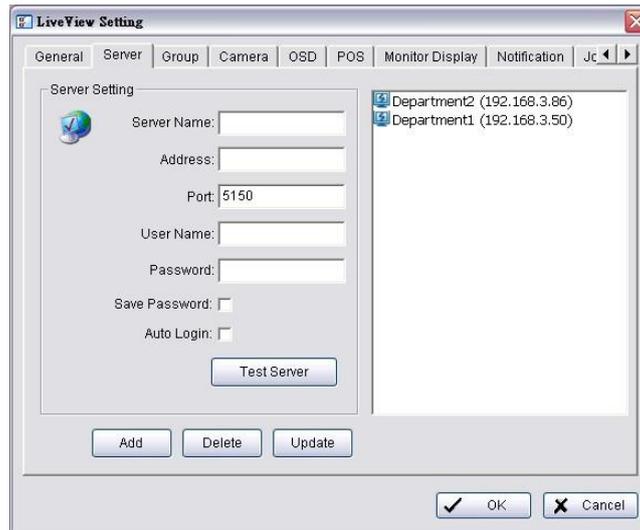

- **Connect / Disconnect**: Click to connect or disconnect the designate camera.
- **Login / Logout Server**: Click to login or logout.
- **Connect All / Disconnect All**: Click to connect or disconnect all cameras.

5.2.2 Unit Connection Setting

1. Startup > NVR > Remote Live Viewer.
2. Click the **General Setting** button.

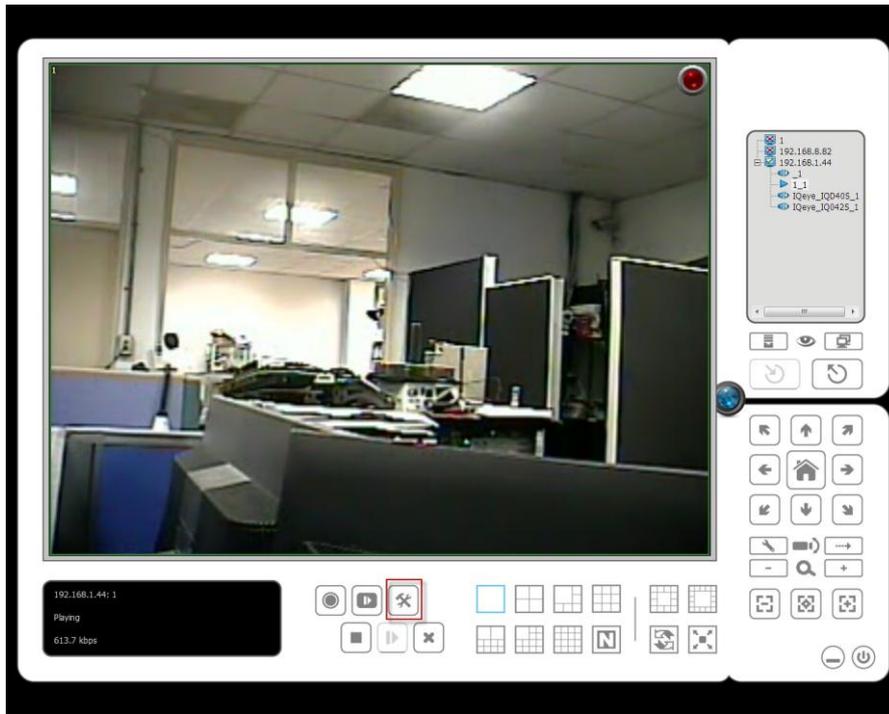

3. Click the **Server** tab.
4. Insert the unit name.

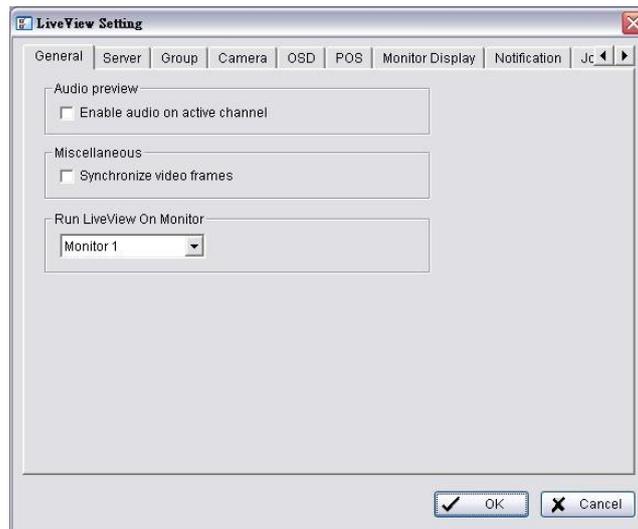

5. Insert the IP address.
6. Modify the port if necessary.
7. Insert the user name.
8. Insert the password.
9. Check the **Save Password / Auto login** option.
10. Click the **Test Server** button to test the connection between the local application and the remote unit.
11. Click the **Add** button to add this unit into your remote server list.
12. Click the **OK** button.

5.2.3 General Setting

1. Startup > NVR > Remote Live Viewer.
2. Click the **General Setting** button.

3. Click the **General** tab.

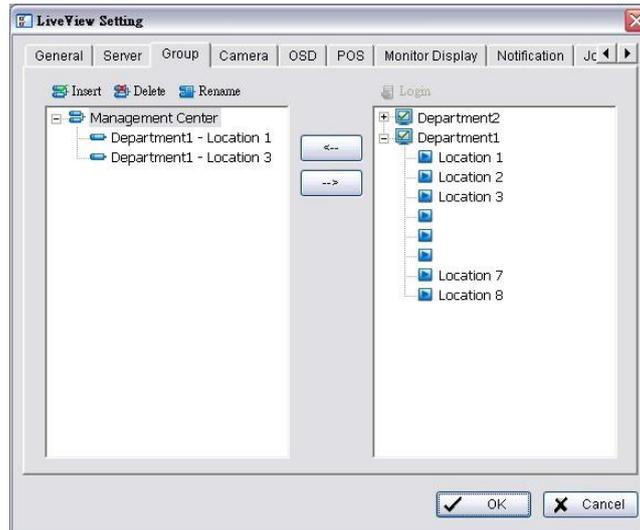

4. Check the **Enable audio on active channel** option to enable audio streaming on active channel. This function synchronizes with right click on camera to enable audio.
5. Check **Synchronize video frames** to avoid the tearing problem occurring in video display while increasing the CPU loading.
6. Select monitor(s) to run LiveView.
7. Click the **OK** button.

5.2.4 Camera Group Setting

You can put different cameras into the same group.

1. Startup > NVR > Remote Live Viewer.
2. Click the **General Setting** button.
3. Click the **Group** tab.

4. Log in to all the servers that contain the camera(s) you would like to put into the group(s).
5. Click the **Insert** button to create a new group.
6. Name this group.
7. Highlight the camera(s) that you would like to add into this group and then click the **<--** button.
8. Repeat step 6 to establish the group.
9. Repeat steps 3 through 7 to establish other groups.
10. Click the **OK** button.

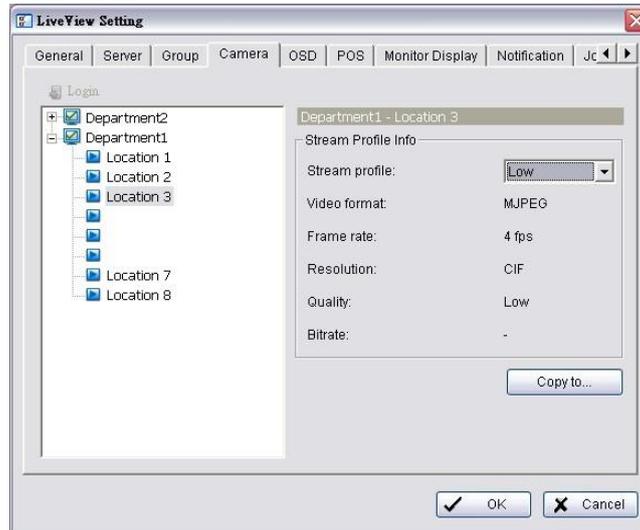

5.2.5 Delete/ Rename Camera Groups

1. Startup > NVR > Remote Live Viewer.
2. Click the **General Setting** button.
3. Click the **Group** tab.
4. Click the group which you want to modify.
5. Click the **Delete** or **Rename** button to remove or rename that group.
6. Repeat steps 3 and 4 to modify other groups.
7. Click the **OK** button.

5.2.6 Stream Profile Setting

Select the preferred stream type of each camera as default live view profile.

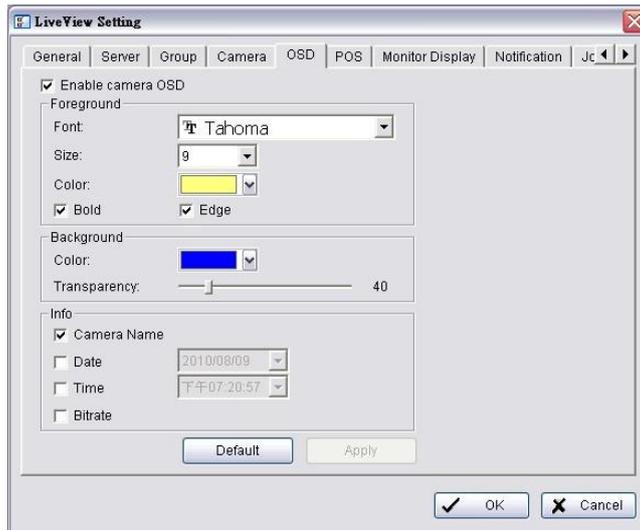

1. Startup > NVR > Remote Live Viewer.
2. Click the **General Setting** button.
3. Click the **Camera** tab.

4. Adjust the stream profile of every camera with stream profile enabled in the **setting page**.
5. Click a camera and select its stream profile, and click the **Copy to...** button to apply this profile to other channels.
6. Click the **OK** button.

5.2.7 OSD (On-screen display) Setting

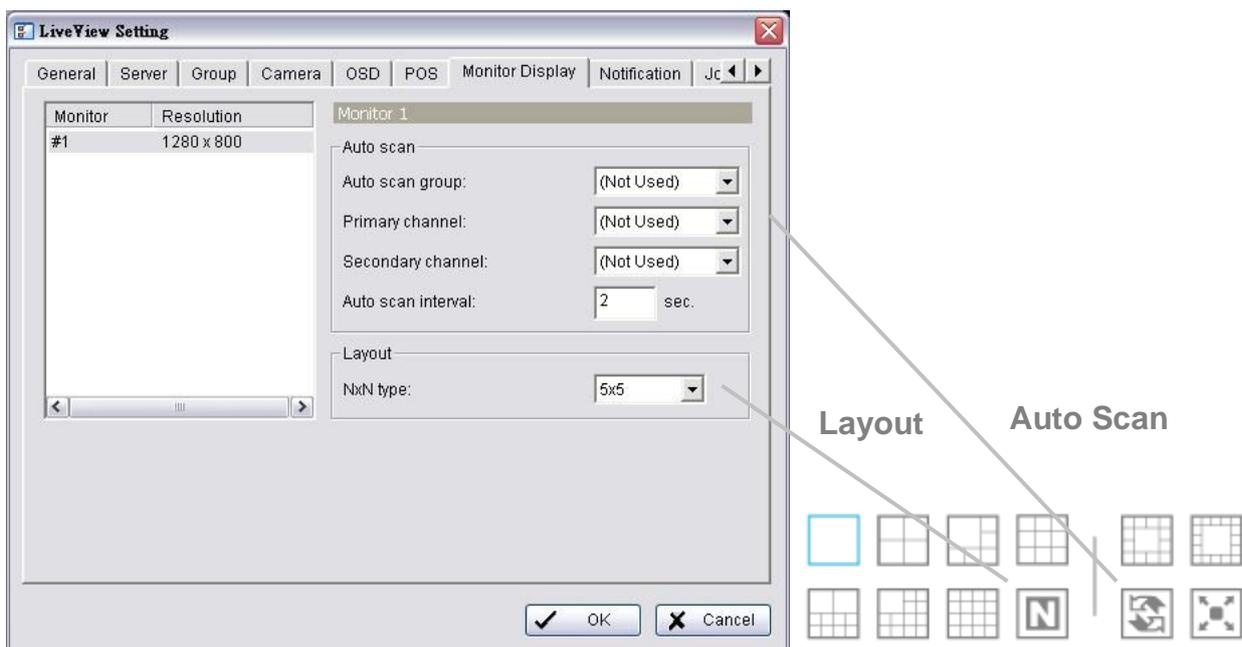

1. Startup > NVR > Remote Live Viewer.
2. Click the **General Setting** button.
3. Click the **OSD** tab.

4. Check the **Enable camera OSD** option.
5. Set the foreground and background settings of the OSD.
6. Select which kinds of information will be displayed on the screen.
7. Click the **Apply** button to preview the result.
8. Click the **Default** button to back to the default settings if necessary.
9. Click the **OK** button.

5.2.8 Monitor Display Setting

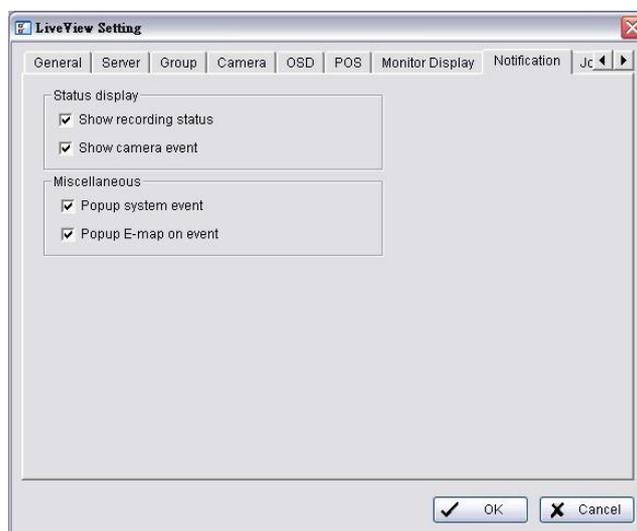

1. Startup > NVR > Remote Live Viewer.
2. Click the **General Setting** button.
3. Click the **Monitor Display** tab.

4. Select appointed server group to activate auto scan.
5. Select **Primary channel** which will always be on the screen when activating auto scan; while select **Secondary channel** which has second priority when activating auto scan. Enter the time interval for auto scan.
6. Select the screen division of NxN type.
7. Click the **OK** button.

5.2.9 Notification

1. Startup > NVR > Remote Live Viewer.
2. Click the **General Setting** button.
3. Click the **Notification** tab.

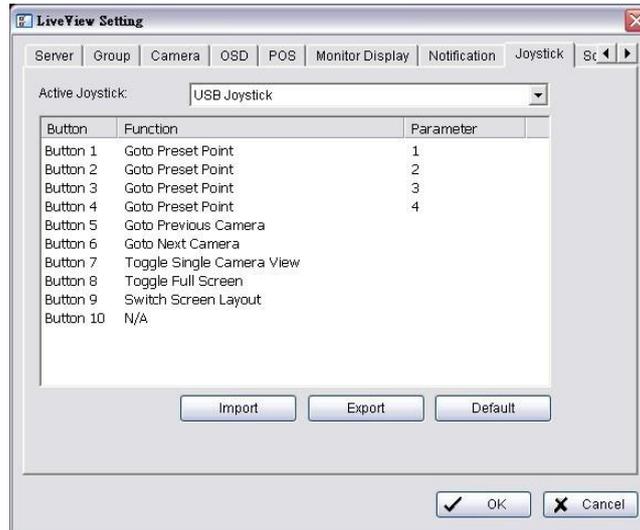

4. Check **Show recording status** to show the crystal ball with recording status on monitor display.
5. Check **Show camera event** to display the words of detected camera event on the correspondent screen.
6. Check **Popup system event** to pop up system event message dialog as a warning when a system event occurred.
7. Check **Popup E-map on event** to pop up E-map with event indicator when camera or I/O Box event occurred
8. Click the **OK** button.

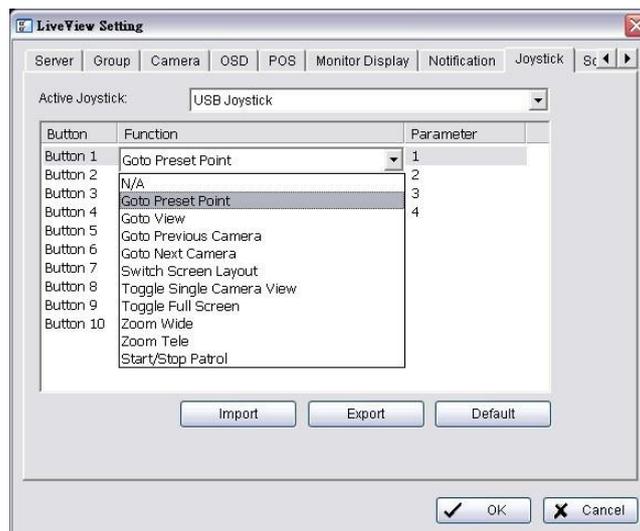

“Popup E-map on event” only activates on event, which means that you should not only edit camera and I/O on E-map but setup camera motion, camera input and I/O Box input as an event. Refer to **Event & Action Management** to do the settings.

5.2.10 Set up Joystick Control

1. Startup > NVR > Remote Live Viewer.
2. Click the **General Setting** button.
3. Click the **Joystick** tab.

- **Function:** You can choose the function from the drop-down menu for the button of the joystick.

- **Parameter:** Choose the preset point from the drop-down menu.
- **Default:** Click to back to default setting.
- **Import:** Click to import the settings.
- **Export:** Click to export the settings.

4. Click the **OK** button.

5.2.11 Set up Live View Sound on Event

1. Startup > NVR > Remote Live Viewer.
2. Click the **General Setting** button.
3. Click the **Sound** tab.

4. Check the **Enable playing sound on event** option.
5. Select sound file, default sound or user defined sound (.wav).
6. Click the **OK** button.

The function only activates on event, which means you have to setup camera motion, camera I/O and I/O Box I/O as an event. Refer to **Event & Action Management** to do the setting.

5.2.12 Set up Remote Live Viewer

1. Startup > NVR > Remote Live Viewer.
2. Click the unit you wish to access in your remote server list.
3. Click the **LOG IN** button to access your unit.
4. Select a camera(s) from the camera list on the right and then drag it to where you wish the image to be displayed.

6.E-Map

There are two ways to execute the live view function: by Internet Explorer or by **Remote Live Viewer** application.

With E-map, user can easily track the device location and alarm status with instant response when an event occurs. The arrows and lightning icon on E-map represent cameras and I/O devices. These icons will turn red as being triggered by alarms.

There are two modes in E-map application, Edit Mode and Browse Mode.

-  **Edit Mode**: The function buttons on the bottom of this E-map dialog will be active. Users can add/edit/delete maps and indicators of devices.
-  **Browse Mode**: Users are not allowed to do any configuration but check the map hierarchies and device list to see indicators and related information.

6.1 Internet Explorer

1. Open Internet Explorer and log in to the unit.
2. Click the **Live View** button on the top of the page.
3. Click the **Start Menu** button and select **Open E-Map**.

6.1.1 E-Map Control Panel

-  **Map**: Select a map you want to show on E-map Window.
-  **Camera**: Select the camera to see preview video or mark indicator on

- E-map.
-  **Digital Input:** Select it to highlight the device with green ring on map and show status on Information Window. If the Digital Input is from IP camera, the preview window will display live video of the camera.
 -  **Digital Output:** Select it to highlight the device with green ring on map and show status on Information Window. If the Digital Output is from IP camera, the preview window will display live video of the camera.
 -  **Map Indicator:** Clicking the indicator will lead to the next map layer. If you want to move to the upper layer, select it by mouse directly or click  icon on the map.
 -  **Camera Indicator:** The indicator of cameras dragged from Device and Map Tree List to show preview video and related information. When event occurs, the color of indicator will turn red.
 -  **Digital I/O Indicator:** The indicator of I/O devices dragged from Device and Map Tree List to show related information. When event occurs, the color of indicator will turn red.
 - **Information Window:** The window shows the related information of each indicator.
 - **Map:** Show map name.
 - **Camera:** Show camera name and connecting status.
 - **Digital Input:** Show Digital Input name and status (0 or 1).
 - **Digital Output:** Show Digital Output name and status (0 or 1).

6.1.2 Add Map

1. Make sure being in "Edit Mode" and all devices are inserted and connected.
2. Right click on the Map icon  in Device and Map Tree List to obtain the option menu to add map, or just click the **Add Map** button to configure.

3. Select a map file and insert a name. Click the **OK** button, and then the map you added appears in the Device and Map Tree List.
4. The map indicator  appears on the upper left of map. Drag it to the position you want on appointed map.

5. Repeat steps 2 through 4 to add more maps.
6. Click the **Upload** button to activate all the settings.

The maximum file size of each map is 500KB. There are 10 layers of map, and the map capacity of each layer is 10.

6.1.3 Edit Map

1. Make sure being in "Edit Mode" and all devices are inserted and connected.
2. Right click on the Map icon  in Device and Map Tree List to obtain the option menu to edit map, or just click the **Edit Map** button to configure.
3. Repeat step 2 to edit more maps.
4. Click the **Upload** button to activate all the settings.

6.1.4 Delete Map

1. Make sure being in "Edit Mode" and all devices are inserted and connected.
2. Right click on the Map icon  in Device and Map Tree List to obtain the option menu to delete map, or just click the **Delete** button.
3. Repeat step 2 to delete more map.
4. Click the **Upload** button to activate all the settings.

6.1.5 Add/Rotate Device Indicator

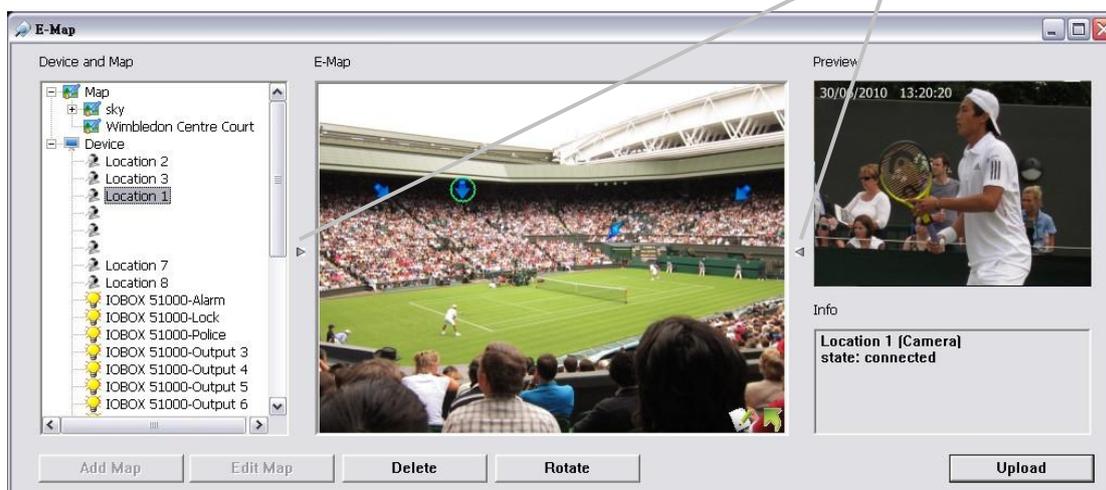

1. Make sure being in "Edit Mode" and all devices are inserted and connected.
2. Select the map which you want to add device indicator on.
3. Select a device from list and directly drag it to the desired location on the map.
4. Select a camera indicator and right click on the indicator or click the **Rotate** button to adjust the direction of camera indicator if needed.
5. Repeat steps 2 and 4 to add more indicators on.
6. Click the **Upload** button to activate all the settings.

6.1.6 Delete Device Indicator

1. Make sure being in "Edit Mode" and all devices are inserted and connected.
2. Select the indicator and right click on the indicator or click the **Delete** button.
3. Repeat step 2 to delete more indicators.
4. Click the **Upload** button to activate all the settings.

6.1.7 Layout Adjustment

Adjust the Layout

- ▶ ◀ **Adjust the Layout:** Click the triangular indicator to hide the Device and Map Tree List / Preview and Information Window on right and left side of the window. Click the indicator again to back to the default.
- ◻ **Maximize the Map:** Click the icon on the upper right to get the full screen display of E-map.

6.1.8 Relative Configuration and Application

When an event occurs, related E-map pops up to indicate the location of this event. Please check the **Notification** function for details.

6.2 Remote Live Viewer Application

1. Startup > NVR > Remote Live Viewer.
2. Click the **Start Monitor** button and select Open E-Map.

6.2.1 E-Map Control Panel

Edit Mode /
Browse Mode
Switch Button

Device and Map Tree List

E-Map Picture

Preview Window and Information

- **Server List:** Select a server to display the E-map of the server.

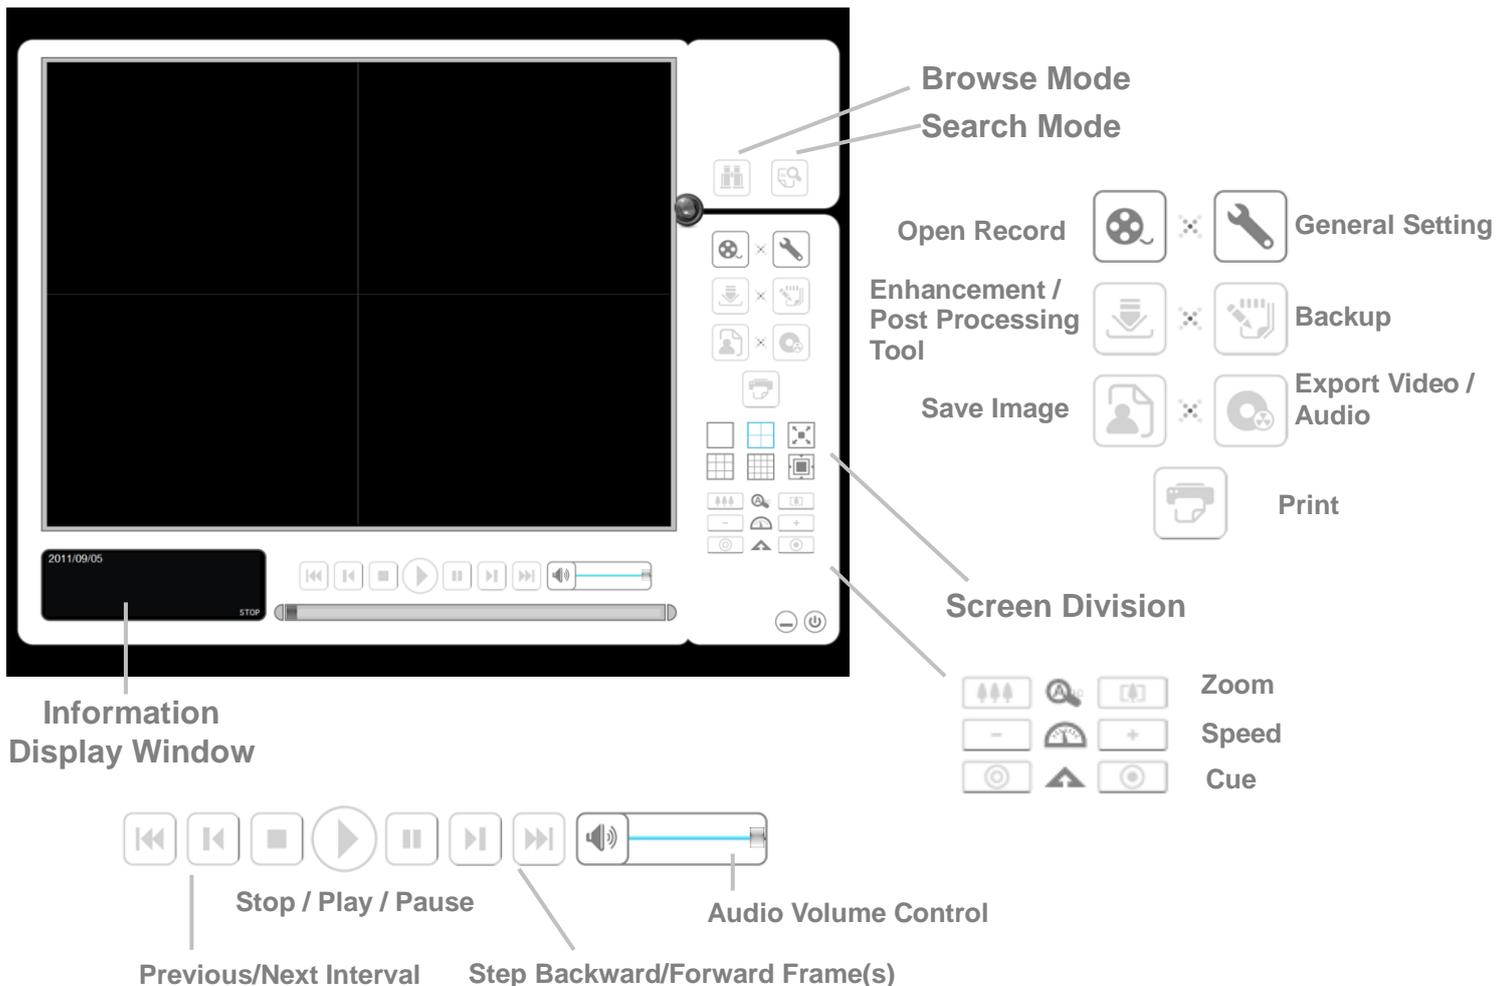

The E-Map function of Remote Live Viewer is quite similar with the one in Internet Explorer, so you can refer to the section of **Internet Explorer** for the details.

7. Playback

There are two ways to execute the playback function: with Internet Explorer or with the **Playback System** application.

7.1 Internet Explorer

7.1.1 Playback Control Panel

- **Information Display Window:** Displays video date and time, cue-in / cue-out point times, and speed.
- **Audio Volume Control:** Adjust the sound level.
- **Screen Division:** Allocate the sub-screen display by clicking on the desired layout icon. To switch to single camera display, double click a particular sub-screen. Double click the screen again to regain previous screen division layout.
- **Browse Mode:** Play the recorded video when in Search Mode.

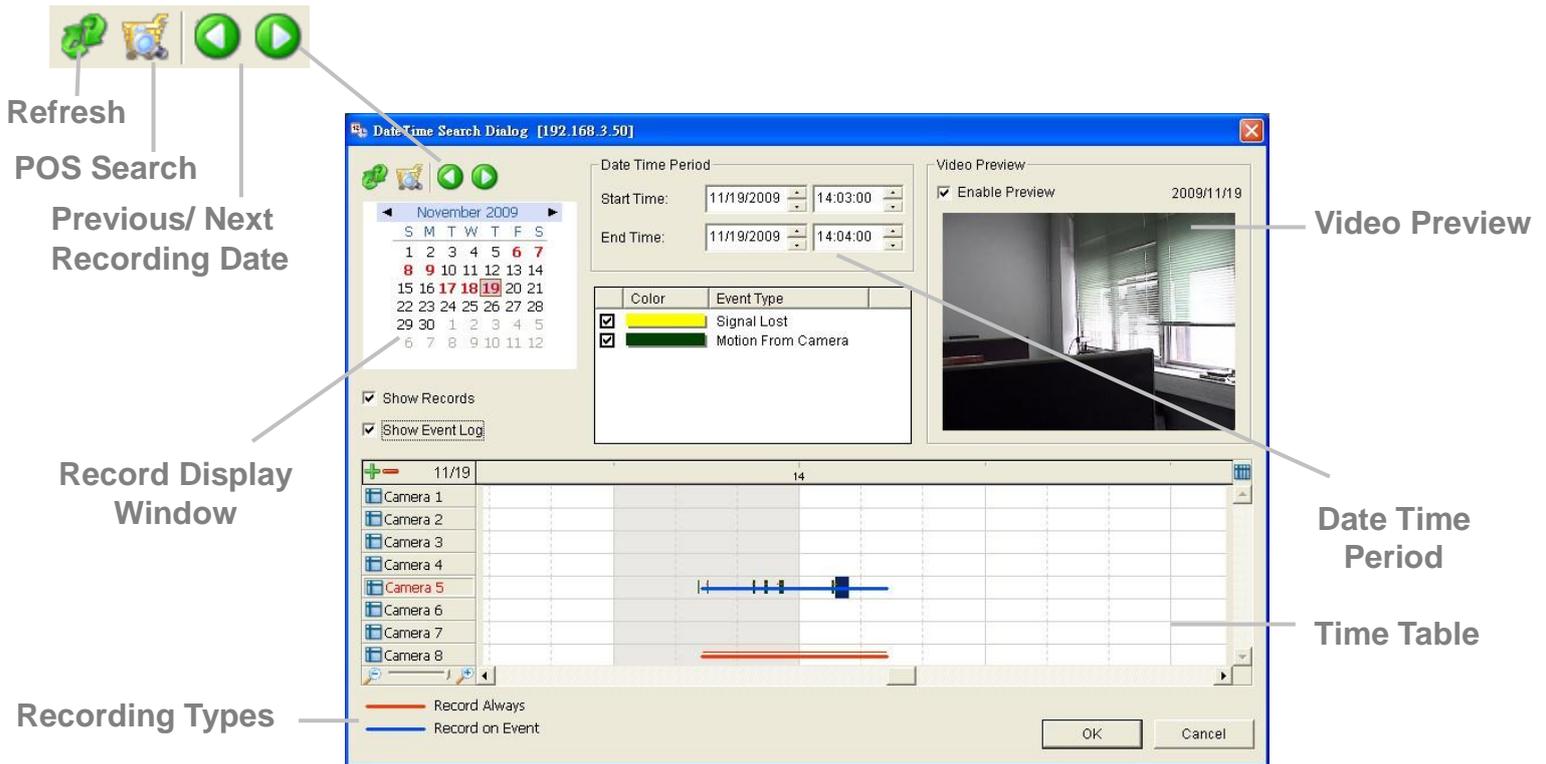

- **Open Record**: Click the **Open Record** button to access the Date-Time Panel and select the video records which you want to review.
- **General Setting**
 - **Record Display**
 - Calendar View: view the Record Display Window as a calendar.
 - List Control: view the Record Display Window as a list control.
 - **Play**
 - Play when open: check this option to set the system to start playing the video clip every time a record is withdrawn.
 - Auto-skip when recording in motion-only mode: check this option to set up the system to automatically skip to the points where there were motions recorded.
 - Next interval: set the interval with which the video goes forward when you click the **Next** button on the control panel.
 - Previous interval: set the interval with which the video goes backward when you click the **Previous** button on the control panel.
 - **Capture Image**
 - Save in clipboard: the image will be saved in the clipboard and can be pasted to other application software.
 - Manually save the image file: you can manually select where you want to save the image, name the saved file, and choose the format you want to save the image.
 - Automatically save the image file: by presetting a path/URL and the image format, the system will automatically save the image accordingly when you click the **Save Image** button on the control panel.

You can right click on the camera screen to enable the following function.

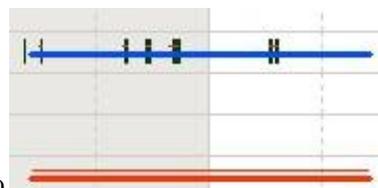

- **Toggle Fullscreen**: Select it to view cameras with full screen. Press "Esc" or right click un-select full screen to go back to the original view.
- **Enable ImmerVision PTZ**: Adjust PTZ in PTZ mode.
- **ImmerVision Lens Setting**: Select the mode of lens, original, PTZ mode, Quad mode and Perimeter mode.

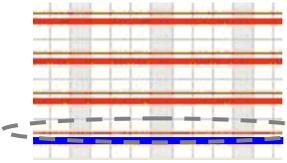

7.1.2 Search the Recorded Video

- : refresh the Record Display Window.
- : go to previous or next recording date.
- **Record Display Window**: Display the available recorded video records.
- **Date Time Period**: Select the start and end time points that indicate the time period you would like to view after choosing cameras.
- **Video Preview**: Check the **Enable Preview** option to view the selected video.
- **Time Table** (preset recording schedule): Click the icon to select all channels; click the icon to deselect all channels. Finally, use the scale bar to modify the scale of the time table. There are two recording modes: **Record Always** and **Record on Event**. The Time Table will display these two modes in different colors.
- **Show Records**: Show the period of recording data in the Time Table.
- **Show Event Log**: Show Event Log makes Time Table show the time of event detection. Color of event type can be defined by preference.

	Color	Event Type
<input checked="" type="checkbox"/>		Signal Lost
<input checked="" type="checkbox"/>		Motion From Camera

1. From the Record Display Window at the top Date Time Panel, select the date you want to the record from. The red lines shown on the table indicate available recorded video  left of the search time records.
2. Use color bars to differentiate recording types from each other. This will help you select video clips.
3. Highlight the video clip you want to review by left-clicking and dragging the time period. You may also utilize the Start Time and End Time in Date Time Period Section after choosing camera. In addition, modify the scale of the time table with the  or  icon on the bottom left.
4. Check the **Enable Preview** option to get the preview of the video you select.
5. Click the camera name to increase or decrease cameras you want to playback.
6. Click the **OK** button.

The Record Display Window can be shown in (a) calendar view or (b) list control view. To modify the settings of the record display window, click the **General Setting** button at the right of the page.

7.1.3 Play the Recorded Video

1. Be sure that you have set the schedule / recording event first.
2. Open Internet Explorer and log in to the unit.
3. Click the **Playback** button on the top of the page.
4. Click the **Open Record** button.
5. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from.
6. Highlight the video records that you want to review.
7. Click the **OK** button.

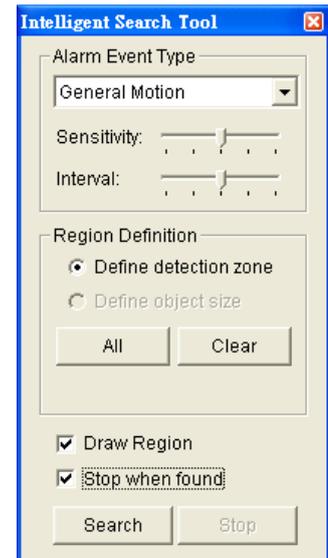

7.1.4 Intelligent Search

After opening the recorded video, click the **Search Mode** button to obtain the Intelligent Search Tool panel. You can search for unusual events during the recording period.

There are 5 types of unusual events: **General Motion**, **Foreign Object**, **Missing Object**, **Focus Lost**, and **Camera Occlusion**.

- **General Motion:** Detect all movements in the defined area.

1. Define detection zone by dragging to draw a detection zone. You may define more than one zone by repeating this step.
2. Modify the sensitivity setting by changing the slider control. Moving toward the right will increase the sensitivity level, which means a relatively small movement will trigger the alarm.
3. Set the interval. Moving toward right will increase time interval so that the alarm will only be triggered when the movement lasts longer.
4. Check the **Stop when found** option. If unchecked, the search tool will list all the events it found, instead of stopping at the moment the event found.
5. Click the **Search** button.

- **Foreign Object:** Alarm is set on when any additional object appears in the defined area on the screen.

1. Define detection zone by dragging to draw a detection zone.
2. Modify the sensitivity setting.
3. Set the Interval.
4. Check the **Stop when found** option. If unchecked, the search tool will list all the events it found, instead of stopping at the moment the event found.
5. Click the **Search** button.

- **Missing Object:** Alarm is set on when the selected object is removed from the defined area on the screen.

1. Define detection object by dragging to draw a detection zone.
2. Modify the sensitivity setting.
3. Set the Interval.
4. Check the **Stop when found** option. If unchecked, the search tool will list all the events it found, instead of stopping at the moment the event found.
5. Click the **Search** button.

- **Focus Lost:** System will inform you when the camera(s) lose its focus.
- **Camera Occlusion:** Alarms when the camera is blocked.

7.1.5 Recorded Video Enhancement

1. Open Internet Explorer and log in to the unit.
2. Click the **Playback** button on the top of the page.
3. Click the **Open Record** button.
4. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from.
5. Highlight the video clip you want to review, and then click the **OK** button.
6. Click the **Enhancement** button.
7. Check the General Setting.

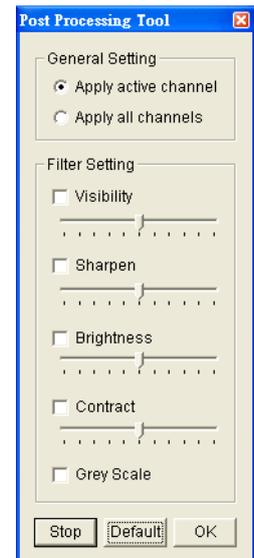

- **Apply active channel:** The settings will only be applied to the selected channel.
- **Apply all channels:** The settings will be applied to those currently shown on the screen.

8. Set the Filter Setting.

- **Visibility:** Check the option and adjust the gamma value of the image to enhance the image and make it cleaner.
- **Sharpen:** Check the option to activate the function. Move the slider control to the right to sharpen the image, to the left to soften it.
- **Brightness:** Check the option to activate the function. Move the slider control to the right to make the image brighter.
- **Contrast:** Check the option to activate the function. Move the slider control to the right to increase contrast.
- **Grey Scale:** Check the option to show the record in gray-scale mode so the image displays in black and white.

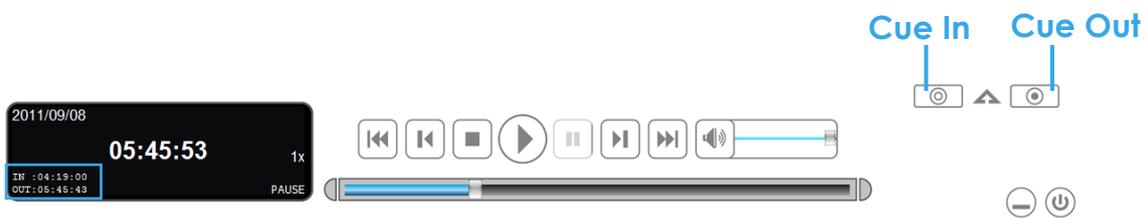

9. Click the **OK** button.

- **Stop:** Stop the enhancement function and close the enhancement tool. (The system will automatically back to the default settings.)
- **Default:** Back to the default settings, however, the enhancement tool still works.
- **OK:** Apply the modifications of the settings.

7.1.6 Save a Video

1. Open Internet Explorer and log in to the unit.
2. Click the **Playback** button on the top of the page.
3. Click the **Open Record** button.
4. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from.
5. Highlight the video clip you want to review, and then click the **OK** button.
6. Choose the camera display that you want to save as a video clip.
7. Set up the cue in and cue out points; the cue in and cue out time will be shown on the information window.

8. Click the **Save Video** button.

9. Choose the folder where you want to save the file.
10. Insert the file name and click the **Save** button.
11. Choose the export format.
12. Choose the use profile.

13. Check to export the recorded video with Audio, OSD and POS Transaction.
14. Click the **OK** button.

We recommend that you export to the .asf format when saving video. In exporting to the .avi format, the frame rate will be increased when playing in the video player, causing the video to run faster than normal.

7.1.7 Save an Image

1. Open Internet Explorer and log in to the unit.
2. Click the **Playback** button on the top of the page.
3. Click the **Open Record** button.
4. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from.
5. Highlight the video clip you want to review, and then click the **OK** button.
6. Choose the camera display that you want to save pictures.
7. Click the **Save Image** button when the image you want is shown on the screen.
8. Choose the folder where you want to save the file at.
9. Choose the folder and the image format (BMP or JPEG) you prefer.
10. Insert the file name.
11. Click the **Save** button.

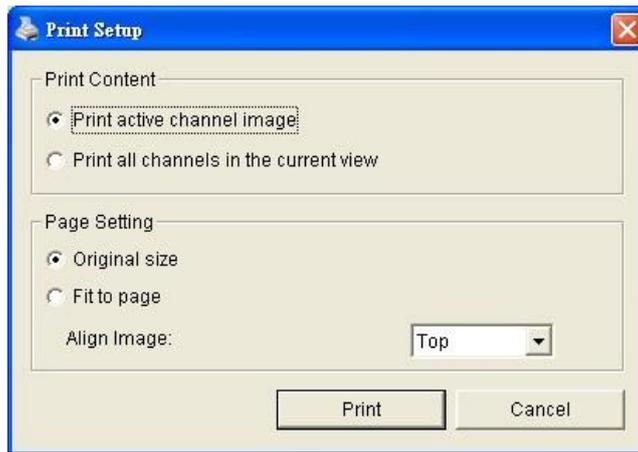

You may skip step 3 by presetting the folder where you want to save the images and the format you want to save them in.

7.1.8 Print an Image

Print the current image of the video you choose.

1. Open Internet Explorer and log in to the unit.
2. Click the **Playback** button on the top of the page.
3. Click the **Open Record** button.
4. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from.
5. Highlight the video clip you want to review, and then click the **OK** button.
6. Choose the camera display from which you want to print pictures.
7. Click the **Print** button when the image you want is shown on the screen.
8. Set print settings.

- **Print Content:** Print the image from currently selected channel or all the channels shown on the screen.
- **Page Setting**
 - **Print in original size:** Check to have the image print in original size.
 - **Fit the page:** Check to have the image fit the page.
 - **Align Image:** Top, center, or bottom

9. Click the **Print** button.

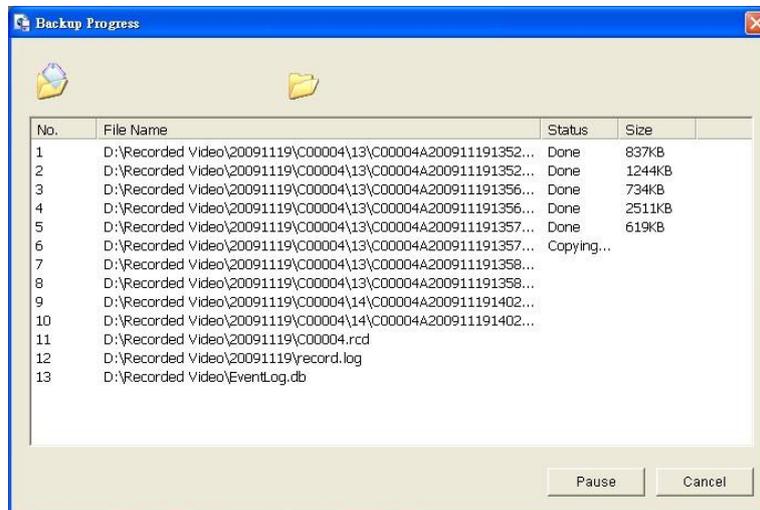

7.1.9 Backup the Recorded Video

Different from Save Video, the Backup function will save all the recorded videos which belong to the time slot you set, instead of the clips.

1. Open Internet Explorer and log in to the unit.
2. Click the **Open Record** button to select data.
3. Click the **Backup** button.

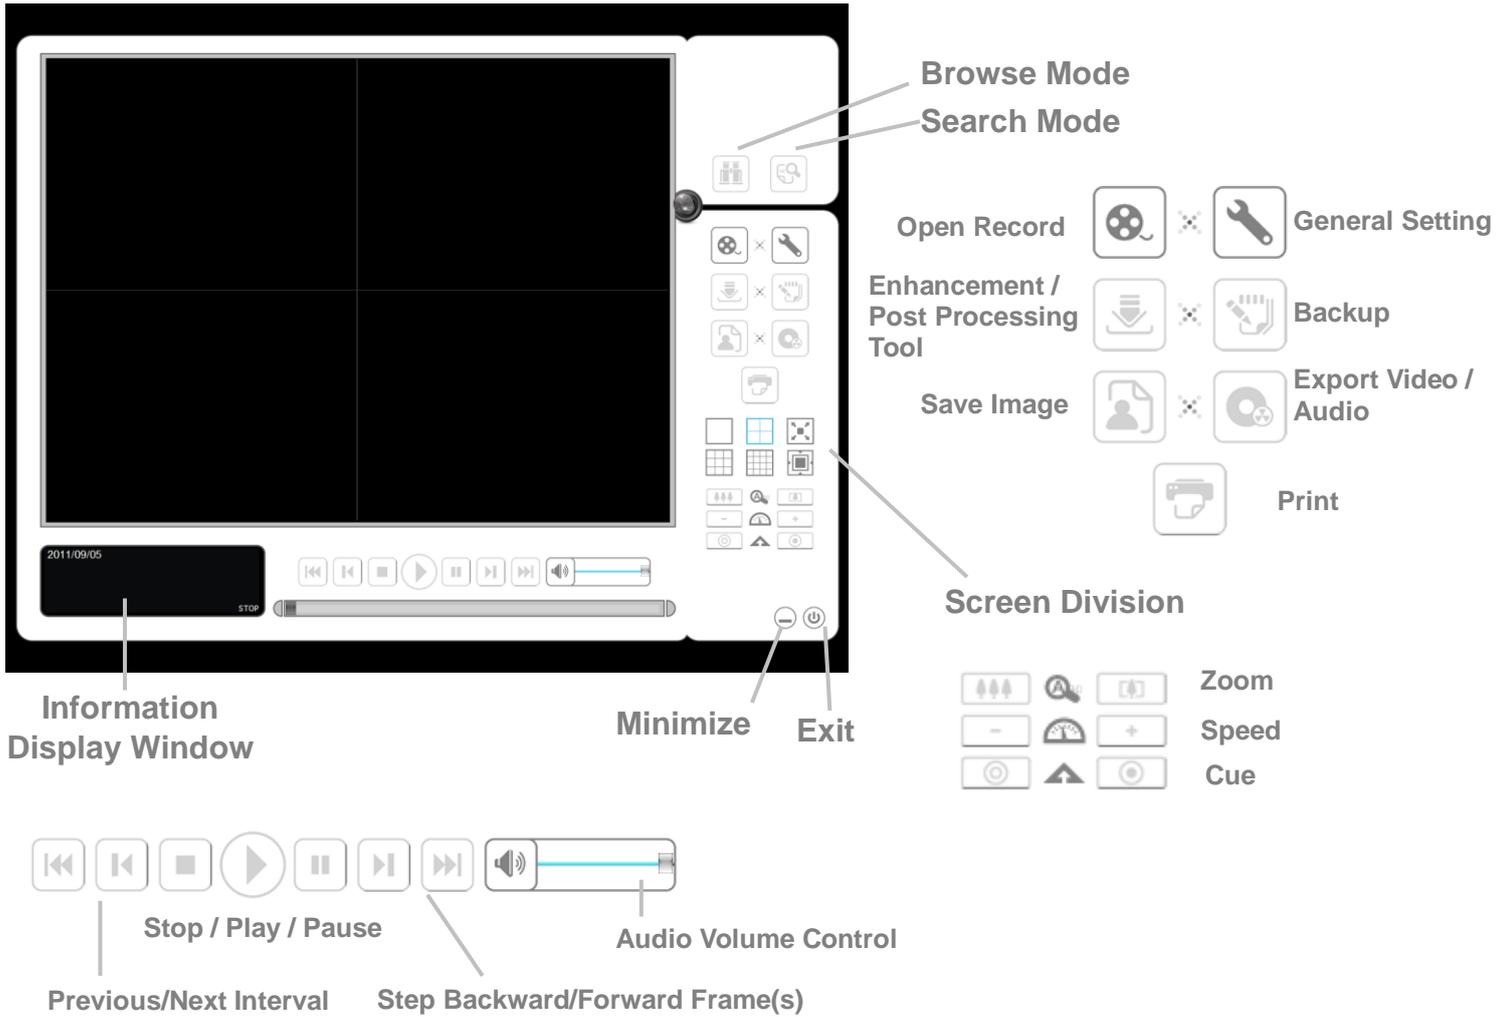

4. Set the Start Time and End Time you want to backup.
5. Select the cameras you want to backup.
6. Select the directory you want to save the backup data.
7. Click the **Backup** button.
8. The system will then begin backup process automatically.

7.2 Remote Playback System Application

7.2.1 Playback System Application Control Panel

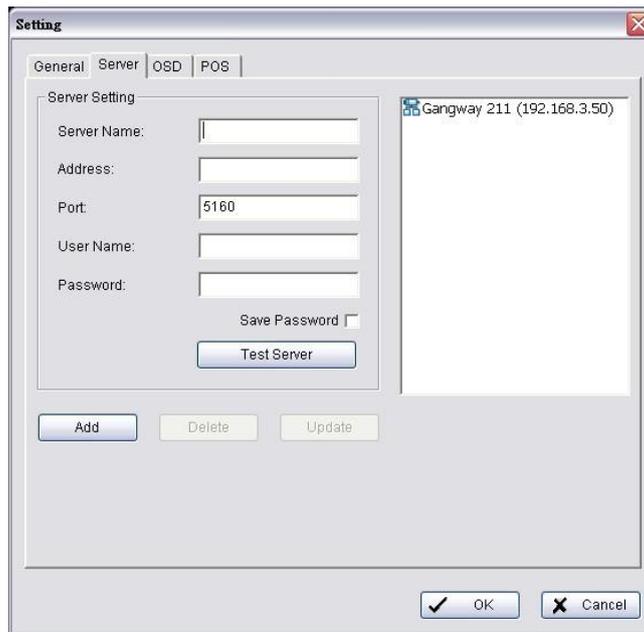

The **Playback System** control panel is similar to the playback panel in Internet Explorer. Check **Playback Control Panel** for more details about those buttons.

7.2.2 Set up Unit Connections

Before using the **Playback System** application, you need to set a connection to your unit first.

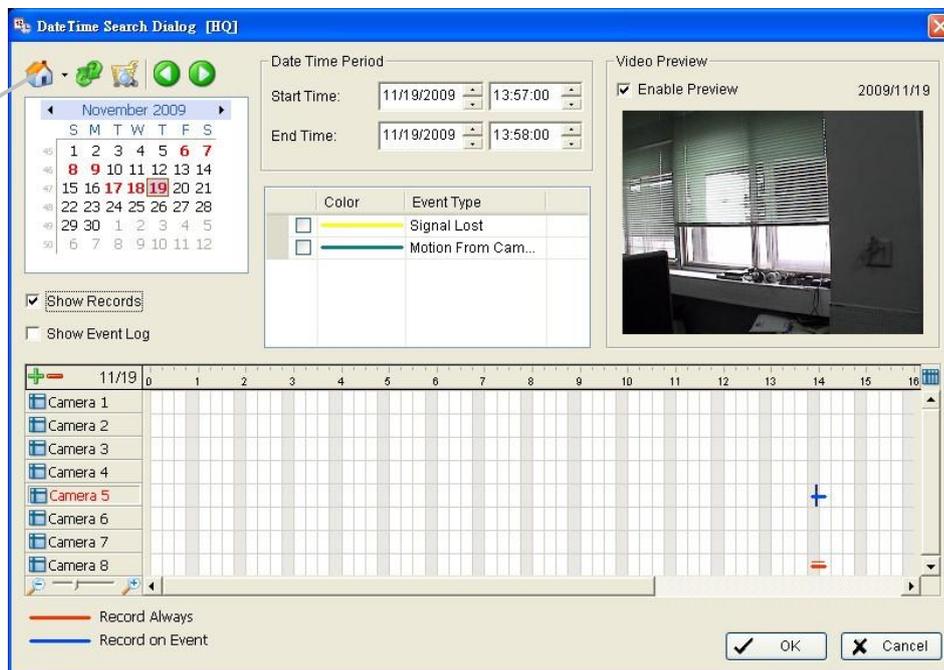

1. Startup > NVR > Playback System.
2. Click the **General Setting** button.
3. Click the **Server** tab.

4. Insert the name of your unit.
5. Insert the IP address of that unit.
6. Modify the port if necessary.
7. Insert the user name.
8. Insert the password.
9. Check the **Save Password** option.
10. Click the **Test Server** button to test the connection between the local application and the remote unit.
11. Click the **Add** button to add this unit into the remote server list.
12. Click the **OK** button.

7.2.3 Search the Recorded Video

Remote Playback
Site Management

1. Startup > NVR > Playback System.
2. Click the **Open Record** button.
3. Click the  icon on the top of the Date-Time Panel to obtain the Remote Playback Site Management dialog, and then select the server you want to access.
4. Highlight the records you want to view in the Time Table.
5. Set the Date Time Period.

The search process in the **Playback System** application is similar to that of Internet Explorer. Check **Search the Recorded Video** for more details about the setting process.

7.2.4 Play the Recorded Video

1. Be sure that you have set up the recording schedule / response first.
2. Startup > NVR > Playback System.
3. Click the **General Setting** button and the **Server** tab to set connections to your unit. See **Set up Unit Connections** for more details.
4. Click the **Open Record** button.
5. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from. Check **Search the Recorded Video** for more details.
6. Highlight the video records that you want to review.
7. Select the start and end points in Date Time Period to adjust the time slot.
8. Click the **OK** button.

7.2.5 Intelligent Search

1. Startup > NVR > Playback System.
2. Click the **Open Record** button.
3. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from. Check **Search the Recorded Video** for more details.
4. Highlight the video records that you want to review.
5. Choose the camera display for which you want to implement smart search.
6. Click the **Search Mode** button to open the Intelligent Search Tool panel.
7. Set up unusual events here to detect abnormalities occurring during the recording period. Check **Intelligent Search** for more details.

8. The searched events will be listed. Click to find that event.

There are 5 types of unusual events: **General Motion**, **Foreign Object**, **Missing Object**, **Focus Lost**, and **Camera Occlusion**.

- **General Motion**: Detect all movements in the defined area.
- **Foreign Object**: Alarm when any additional object appears in the defined area on the screen.
- **Missing Object**: Alarm when the selected object is removed from the defined area on the screen.
- **Focus Lost**: System will inform you when the camera(s) lose focus.
- **Camera Occlusion**: Alarm when the camera is blocked.

The intelligent search in the **Playback System** application is similar to that of Internet Explorer.

7.2.6 Recorded Video Enhancement

1. Startup > NVR > Playback System.
2. Click the **Open Record** button.
3. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from. Check **Search the Recorded Video** for more details.
4. Highlight the video records that you want to review.
5. Choose the camera display that you want to implement video enhancement.
6. Click the **Enhancement** button.
7. Check the General Setting.
 - **Apply active channel**: The settings will only be applied to the selected channel.
 - **Apply all channels**: The settings will be applied to those currently shown on the screen.
8. Set the Filter Setting.
 - **Visibility**: Check the option and adjust the gamma value of the image to enhance the image and make it cleaner.
 - **Sharpen**: Check the option to activate the function. Move the slider control to the right to sharpen the image, to the left to soften it.

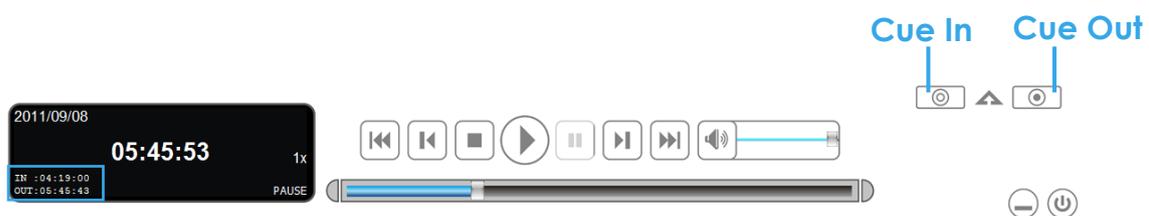

- **Brightness:** Check the option to activate the function. Move the slider control to the right to make the image brighter.
- **Contrast:** Check the option to activate the function. Move the slider control to the right to increase contrast.
- **Grey Scale:** Check the option to show the record in gray-scale mode so the image displays in black and white.

9. Click the **OK** button.

- **Stop:** Stop the enhancement function and close the enhancement tool. (The system will automatically revert back to the default settings.)
- **Default:** Back to the default settings, however, the enhancement tool still works.
- **OK:** Apply the modifications of the settings.

7.2.7 Save a Video

1. Startup > NVR > Playback System.
2. Click the **Open Record** button.
3. The Record Display Window will show the information of the available video clips. Select the date from which you want to search the record. Check **Search the Recorded Video** for more details.
4. Highlight the video records that you want to review.
5. Choose the camera display that you want to save as a video clip.
6. Set up the cue in and cue out points; the cue in and cue out time will show on the information window.

7. Click the **Save Video** button.
8. Choose the folder where you want to save the file.
9. Insert the file name and click the **Save** button.
10. Choose the export format.
11. Choose the use profile.
12. Check the **Export Audio** option.
13. Click the **OK** button.

7.2.8 Save an Image

1. Startup > NVR > Playback System.
2. Click the **Open Record** button.
3. The Record Display Window will show the information of the available video clips. Select the date from which you want to search the record. Check **Search the Recorded Video** for more details.
4. Highlight the video records that you want to review.
5. Choose the camera display from which you want to save pictures.
6. Click the **Save Image** button when the image you want is shown on the screen.
7. Choose the folder where you want to save the file at.
8. Choose the format of image (BMP or JPEG) you prefer.
9. Insert the file name.
10. Click the **Save** button.

You may skip step 7 by presetting a folder where you want to save the images and a format which you want to save the images in.

7.2.9 Print an Image

Print the current image of the video you choose.

1. Startup > NVR > Playback System.
 2. Click the **Open Record** button.
 3. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from. Check **Search the Recorded Video** for more details.
 4. Highlight the video records that you want to review.
 5. Choose the camera display that you want to print pictures.
 6. Click the **Print** button.
 7. Set the print settings.
- **Print Content:** Print the image from currently selected channel or all the channels shown on the screen.
 - **Page Setting**
 - **Print in original size:** Select to have the image print in original size.
 - **Fit the page:** Select to have the image fit the page.
 - **Align Image:** Top, center, or bottom

7.2.10 Backup the Recorded Video

Different from Save Video, the Backup function will save all the recorded videos which belong to the time slot you set, instead of the clips.

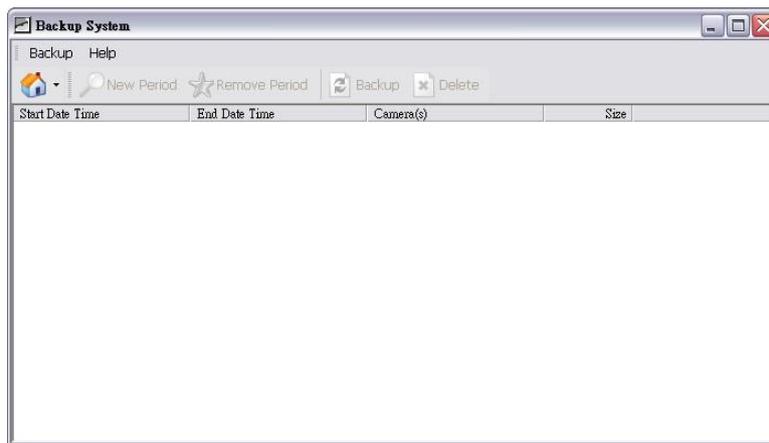

1. Startup > NVR > Playback System.
2. Click the **Open Record** button to select data.
3. Click the **Backup** button.
4. Set the Start Time and End Time you want to backup.
5. Select the cameras you want to backup.
6. Select the directory you want to save the backup data.
7. Click the **Backup** button.

8.Backup and Delete Records

8.1 The Backup System Application

In addition to the ways mentioned in the previous chapters, you can apply the application to backup your files.

1. Startup > NVR > Backup System.

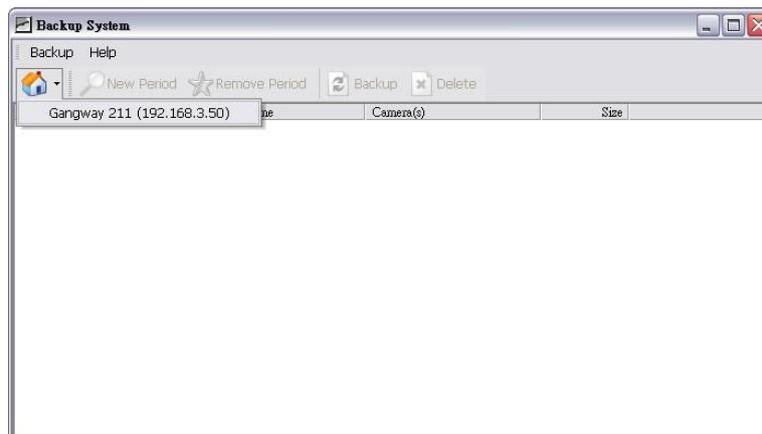

2. Click the **Remote Server Site**  button to set up remote server.

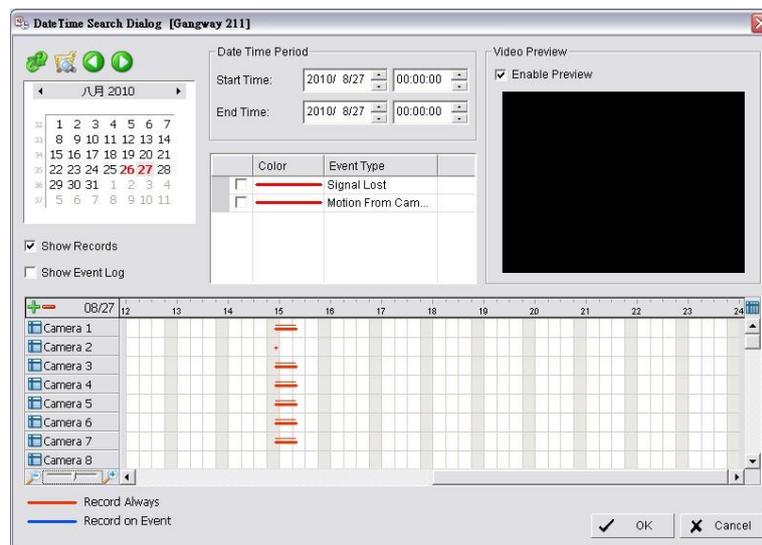

3. Insert the name of your unit.
4. Insert the IP address of that unit.
5. Modify the port if necessary.

6. Insert the user name.
7. Insert the password.
8. Check the **Save Password** option.
9. Click the **Test Server** button to test the connection between the local application and the remote unit.
10. Click the **Add** button to add this unit into the remote server list.
11. Click the **OK** button.
12. Click the ▼ button next to **Remote Server Site** button, and select one of servers you added.

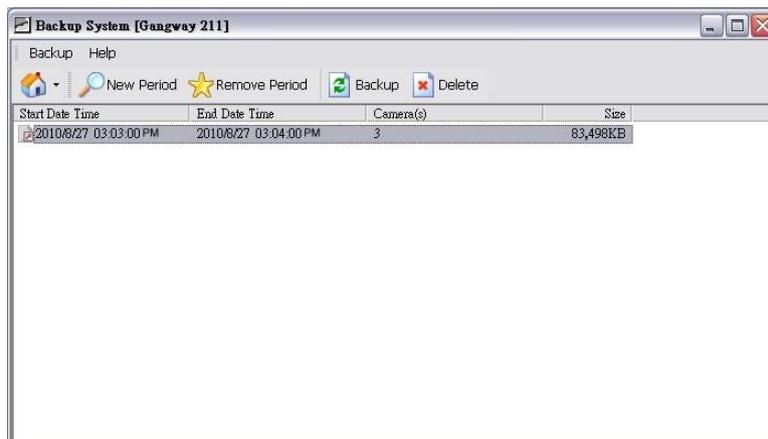

13. Click the **New Period** button to select the record date.

14. Set the Start Time and End Time you want to backup. (or highlight the video records which you want to backup)
15. Select the cameras you want to backup.
16. Click the **OK** button.

17. Select the time slot which you want to backup.

18. Click the **Backup** button.

19. Select the way and directory you want to save the backup data.

20. Check the **Include Playback application** option, which will add **Playback** application into the backup folder.

21. Click the **OK** button.

8.2 Backup the Recorded Video through Windows Explorer

1. Find your unit through Windows Explorer (insert "\\\" plus the IP address of your unit)
2. Open the "public" folder.
3. Insert the name and password of the administrator.

4. Select the volume and open the "VIDEODATA" folder.
5. Copy the date folder which you want to backup to your desktop / laptop.

8.3 Backup the Recorded Video through FTP

1. Find your unit through Windows Explorer (insert "ftp://" plus the IP address of your unit)
2. Insert the name and password of the administrator.
3. Select the volume and open the "VIDEODATA" folder.
4. Copy the date folder which you want to backup to your desktop / laptop.

8.4 Playback the Backup Records

8.4.1 With Playback Application

1. Use the Backup System application to backup your records.
2. Check the **Include Playback application** option, which will add the **Playback** application into the backup folder.
3. Open that folder.
4. Double-click the Playback application icon.
5. Select the recorded data to play back.

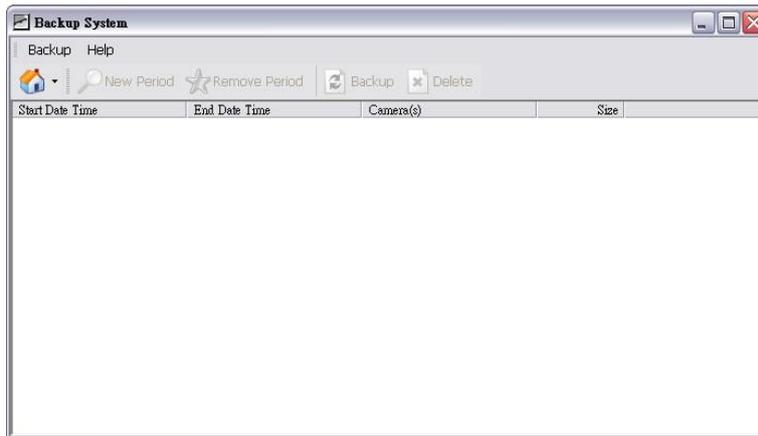

8.4.2 Without Playback Application

1. Use the Playback function to backup your records.
2. Put your backup folder into the program folder of NVR. (Default directory is "C:\Program Files\NVR".)
3. Startup > NVR > Playback System.
4. Click the **Open Record** button.
5. Select the recorded data to play back.

8.5 Delete the Recorded Video

8.5.1 With Backup Application

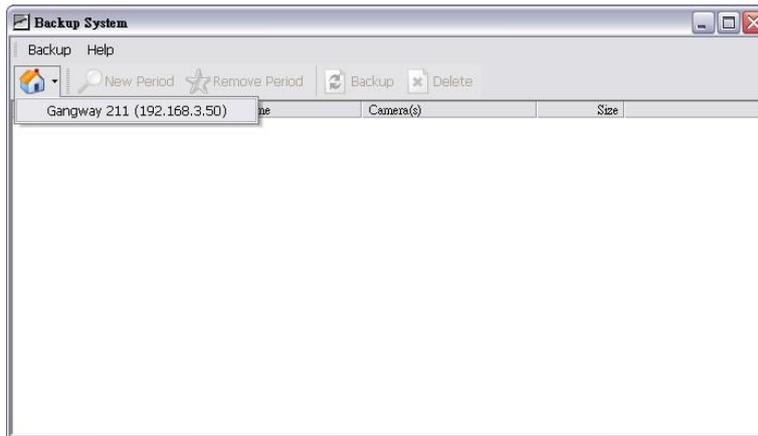

1. Startup > NVR > Backup System.

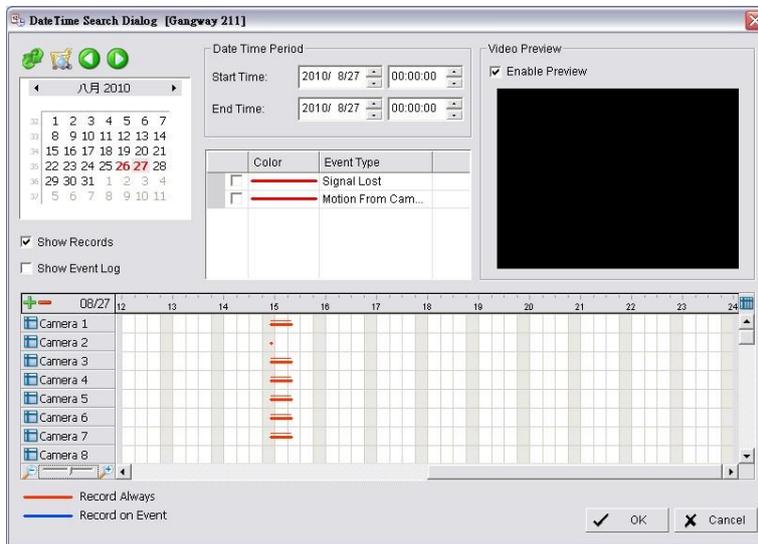

2. Click the **Remote Server Site**  button to set up remote server.

3. Insert the name of your unit.
4. Insert the IP address of that unit.
5. Modify the port if necessary.
6. Insert the user name.
7. Insert the password.
8. Check the **Save Password** option.
9. Click the **Test Server** button to test the connection between the local application and the remote unit.
10. Click the **Add** button to add this unit into the remote server list.
11. Click the **OK** button.
12. Click the ▼ button next to **Remote Server Site** button, and select one of servers you added.

13. Click the **New Period** button to select the record date.

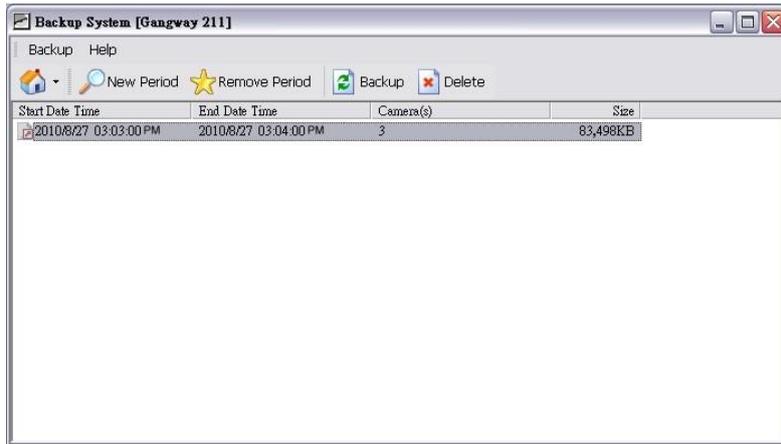

14. Set the Start Time and End Time. (or highlight the video records which you want to delete)

15. Select the cameras you want to delete the records.

16. Click the **OK** button.

17. Select the time slot which you want to delete.

18. Click the **Delete** button.
19. Confirm the check dialog.

8.5.2 Without Backup Application

1. Find your unit through Windows Explorer (insert "\\\" plus the IP address of your unit).
2. Open the "public" folder.
3. Insert the name and password of the administrator.
4. Select the volume and open the "VIDEODATA" folder.
5. Select the date folder which you want to delete.
6. Delete the folder.

In order to keep the system stable, do not delete recorded data from the day in which you do the delete process.

9.Verification Tool

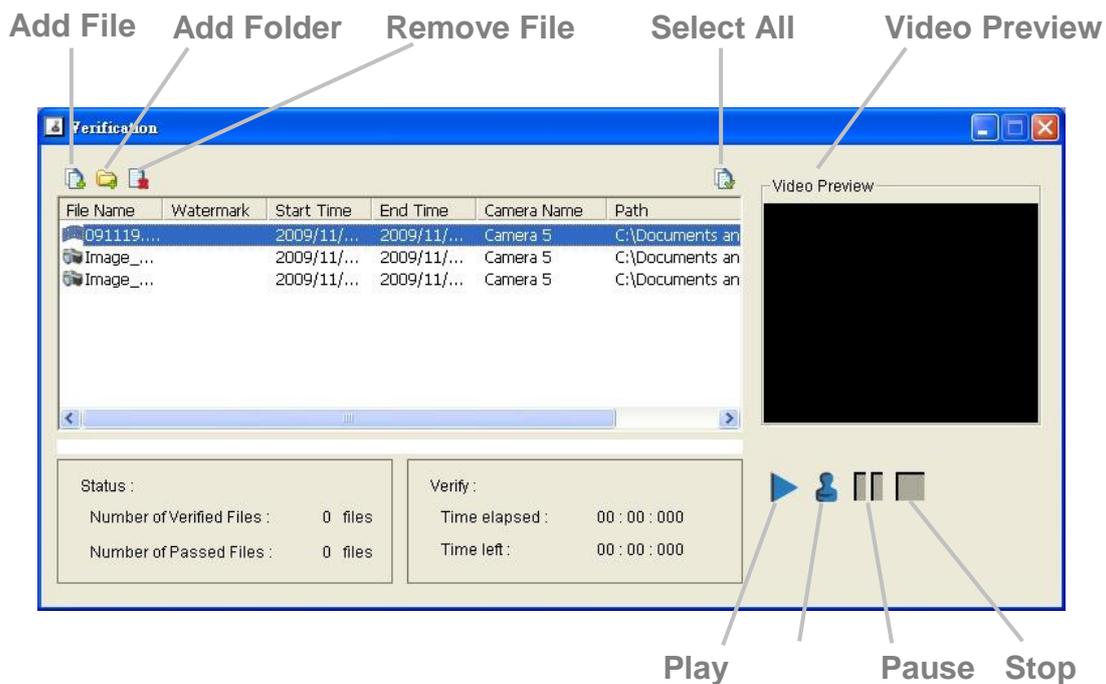

The Verification Tool verifies whether the data created by the system has been tampered with. It's the process by which a digital watermark (a digital signature) is added to each recorded video frame to ensure its authenticity.

There are three types of data could be verified by Verification Tool:

1. File in (.dat) (.264) format will be displayed as .
2. File in (.avi) (.asf) format will be displayed as .
3. File in (.bmp) (.jpg) format will be displayed as .

9.1 Execute Verification Tool

1. Startup > NVR > Verification Tool.
2. Verification Tool Overview

- **Add File**: Insert the single file to list for verification.
- **Add Folder**: Choose the folder with multiple files to list for verification.
- **Remove File**: Remove indicated file(s) from list.
- **Select All**: Select all files in list for verification.

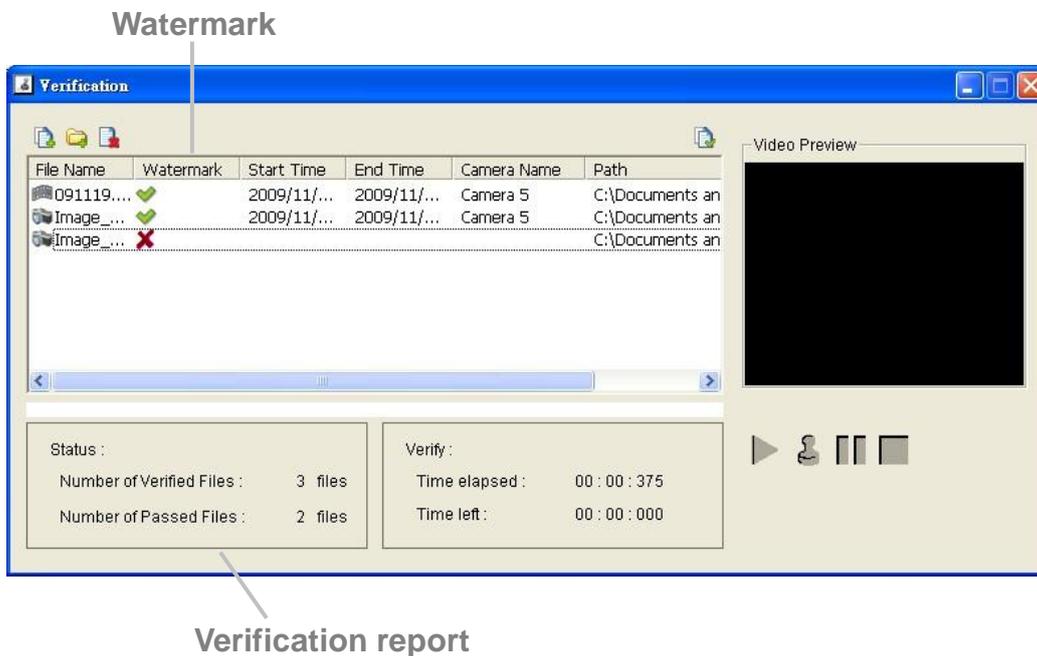

Choose the file type first before selecting files. Only (.dat) (.264) (.avi) (.asf) (.bmp) (.jpg) are available to open.

- **Video Preview:** Preview designate file in verification list. Select the buttons below to play ▶, pause ||, and stop ■ the video file.

9.2 Verify Image / Video

1. Select single or multiple files for verification.
2. Click the **Verify**  button to start verification.
3. The verification result will show on watermark column. If a file was tampered with, it will show ; if a file passed verification, it will show .

4. The verification report will indicate the information related to the verification.

10. Log out

Click the **Logout** button on the top of the page to log out of the system. If there is no action in 10 minutes, the system will log out automatically to avoid unauthorized access.

11. Remote PC System Requirements

Remote PC Minimum Requirements	
Model	2/4 bay
OS Supported	Windows XP 32 bit, Windows 7 32/64 bit
CPU	Intel Core 2 Duo, 2.6GHz
RAM	1GB
User Interface	1. HTTP Web browser - Internet Explorer 7 and later 2. NVR Client application program

12. Troubleshooting

12.1 Replace a Failed Disk Drive

If a disk drive fails, the Disk Status LED becomes orange. If the disk drive belongs to a RAID Volume, the Volume goes Critical or Offline, depending on RAID level. See **Check RAID Volume Status** for details.

Replace the failed disk drive with a new disk drive of the same or slightly greater capacity. You do not have to power down the unit. Refer to **Modify RAID Volume** to remove the failed disk and replace it with a new one.

12.2 Respond to a Critical RAID Volume

How the unit responding to a Critical RAID Volume depends on the RAID level of your Volume:

- For **RAID 1, 5, and 10** volumes, you must replace the failed disk drive with a new one. The RAID Volume will begin rebuilding itself when you install the new disk drive. See **Replace a Failed Disk Drive** for details.
- **RAID 0** volumes go offline after a disk drive failure. A **RAID 0** Volume cannot be recovery. All data of the volume is lost.

12.3 Respond to a File System Error RAID Volume

When encountering file system error, you are unable to keep the data anymore. It's likely due to abnormal usage and disk damage. In this case, if you want to keep recording, we suggest replacing new disks, or try the following methods.

1. Format this volume, and check if the status becomes **functional**. If yes, you can start recording. If it doesn't, try the second method.
2. Delete this volume, and create volume again to see if the status is **functional**.

12.4 Restore the Default Administrator's Password

If you forget the password, and want to reset the Administrator's password to the default password: **admin**, follow the following steps.

1. Verify that the system is fully booted.
2. Insert your reset tool into the reset button hole on the back of the device.
3. Press and hold the reset button for 8 seconds, release your hands until the

- buzzer beeps one time and the System Status LED flashes in blue.
4. System will restart and the Administrator's password is now reset to **admin**.

12.5 Restore All Default Configuration

If you want to restore all configurations to default setting, follow the following steps.

1. Verify that the system is fully booted.
2. Insert your reset tool into the reset button hole on the back of the device.
3. Press and hold the reset button for 14 seconds, release your hands until the buzzer beeps twice and the System Status LED flashes in orange.
4. System will restart and all settings are reset to default.

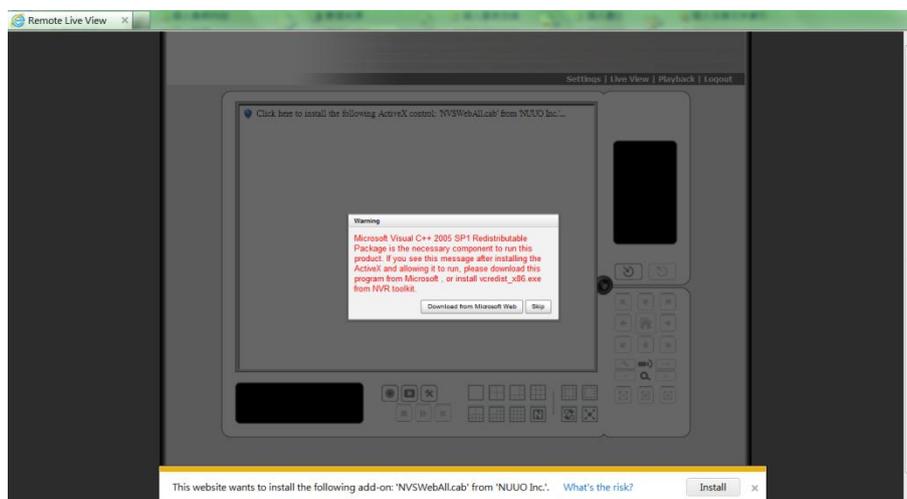

RAID volume and data within the volume won't be reset to default. Refer to **Format** for the details.

12.6 Install ActiveX

If you cannot see the complete page of the system when using Internet Explorer, it may be because the ActiveX installation process is not completed.

1. Open Internet Explorer and log in to the unit.
2. Click the **Live view / Playback** button on the top right.
3. The browser will ask whether to install ActiveX.

4. Click the upper bar to begin the installation process.

5. Click the **Install** button to complete the process.

12.7 Cannot Log in to the Unit with Internet Explorer

1. Check the settings of your antivirus software.
2. Change to appropriate settings or turn off this antivirus software.

Appendix – RAID System

Introduction to RAID

RAID (Redundant Array of Independent Disks) allows multiple disk drives to be combined together into a RAID Volume. You will create a RAID Volume on your unit when you perform the setup procedure.

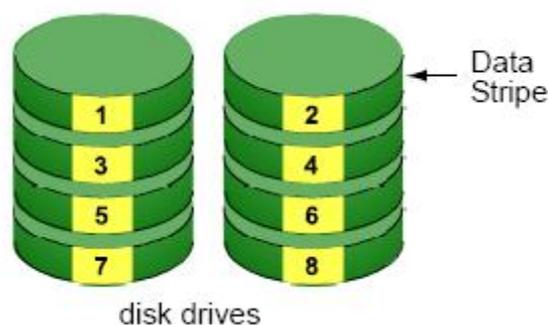

The benefits of a RAID can include:

- Higher data transfer rates for increased server performance
- Increased overall storage capacity for a single Volume
- Data redundancy/fault tolerance for ensuring continuous system operation in the event of a disk drive failure

Different RAID levels use different organizational models and have varying benefits. The following outline breaks down the properties for each RAID level supported on this unit:

RAID 0 – Stripe

When a RAID Volume is striped, the read and write blocks of data are interleaved between the sectors of multiple disk drives. Performance is increased, since the workload is balanced between drives or “members” that form the RAID Volume. Identical drives are recommended for performance as well as data storage efficiency.

The RAID Volume’s data capacity equals the capacity of the smallest disk drive times the number of disk drives. For example, one 100 GB and three 120 GB drives will form a 400 GB (4 x 100 GB) RAID Volume instead of 460 GB.

If disk drives of different capacities are used, there will also be unused capacity on the larger drives.

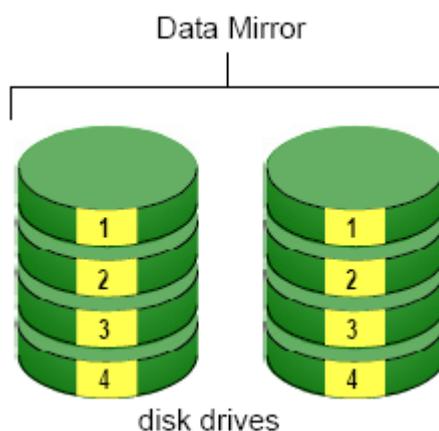

Because RAID 0 does not offer Fault Tolerance, meaning that you cannot recover your data after a disk drive failure, we do not recommend a RAID 0 Volume for your unit.

RAID 0 Volumes on this unit consist of one or more disk drives.

RAID 1 – Mirror

When a RAID Volume is mirrored, identical data is written to a pair of disk drives, while reads are performed in parallel. The reads are performed using elevator seek and load balancing techniques where the workload is distributed in the most efficient manner. Whichever drive is not busy and is positioned closer to the data will be accessed first.

With RAID 1, if one disk drive fails or has errors, the other mirrored disk drive continues to function. This is called Fault Tolerance. Moreover, if a spare disk drive is present, the spare drive will be used as the replacement drive and data will begin to be mirrored to it from the remaining good drive.

The RAID Volume's data capacity equals the smaller disk drive. For example, a 100 GB disk drive and a 120 GB disk drive have a combined capacity of 100 GB in a mirrored RAID Volume.

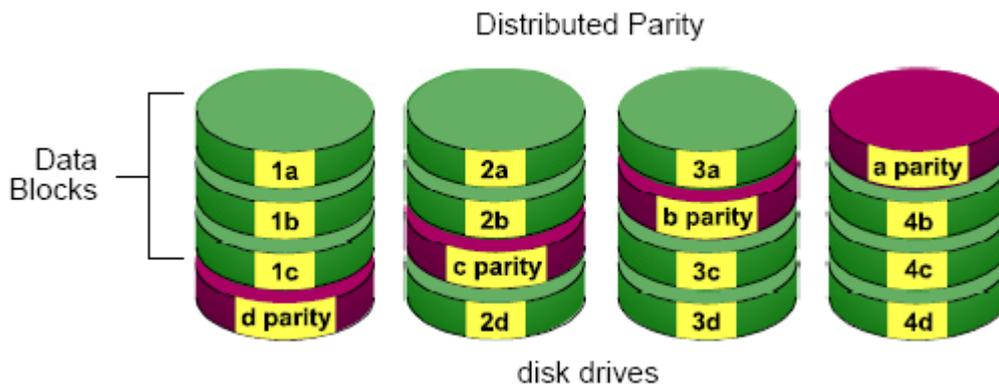

If disk drives of different capacities are used, there will also be unused capacity on the larger drive.

RAID 1 Volumes on this unit consist of two disk drives.

If you want a mirrored RAID Volume with more than two disk drives, see **RAID 10 – Mirror / Stripe** for details.

RAID 5 – Block Striping with Distributed Parity

RAID 5 organizes block data and parity data across the disk drives. Generally, RAID level 5 tends to exhibit lower random write performance due to the heavy workload of parity recalculation for each I/O. RAID 5 works well for file, database, application and web servers.

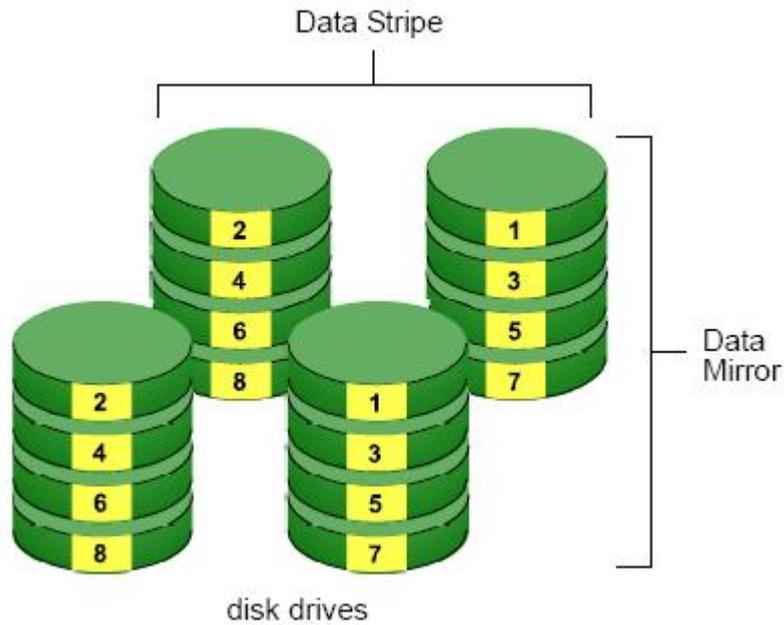

The capacity of a RAID 5 Volume equals the smallest disk drive times the number of disk drives, minus one. Hence, a RAID 5 Volume with four 100 GB disk drives will have a capacity of 300 GB. A RAID Volume with two 120 GB disk drives and one 100 GB disk drive will have a capacity of 200 GB.

RAID 5 is generally considered to be the most versatile RAID level.

RAID 5 requires a minimum of three disk drives.

RAID 10 – Mirror / Stripe

Mirror/Stripe combines both of the RAID 0 and RAID 1 types. RAID 10 can increase performance by reading and writing data in parallel while protecting data with duplication. At least four disk drives are needed for RAID 10 to be installed. With a four-disk-drive RAID Volume, one drive pair is mirrored together then striped over a second drive pair.

The data capacity RAID 10 Volume equals the capacity of the smallest disk drive times the number of disk drives, divided by two.

In some cases, RAID 10 offers double fault tolerance, depending on which disk drives fail.

RAID 10 Volumes on this unit consist of four disk drives.

Because all of the available disk drives are used for the RAID Volume, you cannot set up a spare drive with RAID 10.

Choosing a RAID Level

There are several issues to consider when choosing the RAID level. The following summarizes some advantages, disadvantages and applications for each choice.

- **RAID 0**

Advantage	Disadvantage
<ul style="list-style-type: none"> ● Implements a striped disk RAID Volume, the data is broken down into blocks and each block is written to a separate disk drive ● I/O performance is greatly 	<ul style="list-style-type: none"> ● Not a true RAID because it is not fault tolerant ● The failure of just one drive will result in all data in a RAID Volume

<p>improved by spreading the I/O load across many channels and drives</p> <ul style="list-style-type: none"> ● No parity calculation overhead is involved 	<p>being lost</p> <ul style="list-style-type: none"> ● Should not be used in mission critical environments
--	---

- **RAID 1**

Advantage	Disadvantage
<ul style="list-style-type: none"> ● Simplest RAID storage subsystem design ● Can increase read performance by processing data requests in parallel since the same data resides on two different drives 	<ul style="list-style-type: none"> ● Very high disk overhead - uses only 50% of total capacity

- **RAID 5**

Advantage	Disadvantage
<ul style="list-style-type: none"> ● High Read data transaction rate ● Medium Write data transaction rate ● Good aggregate transfer rate ● Most versatile RAID level 	<ul style="list-style-type: none"> ● Disk failure has a medium impact on throughput

- **RAID 10**

Advantage	Disadvantage
<ul style="list-style-type: none"> ● Implemented as a mirrored RAID ● Volume whose segments are RAID 0 RAID Volumes ● High I/O rates are achieved thanks to multiple stripe segments 	<ul style="list-style-type: none"> ● Very high disk overhead – uses only 50% of total capacity
