USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.
DO NOT OPEN COVERS AND DO NOT REPAIR YOURSELF. REFER SERVICING TO QUALIFIED PERSONNEL.

WARNING:

TO REDUCE THE RISK OF FIRE, ELECTRIC SHOCK OR PRODUCT DAMAGE,
● DO NOT EXPOSE THIS APPARATUS TO RAIN, MOISTURE, DRIPPING OR SPLASHING AND THAT NO OBJECTS FILLED WITH LIQUIDS, SUCH AS VASES, SHALL BE PLACED ON THE APPARATUS.
● USE ONLY THE RECOMMENDED ACCESSORIES.
● DO NOT REMOVE THE COVER (OR BACK); THERE ARE NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

CAUTION!

DO NOT INSTALL OR PLACE THIS UNIT IN A BOOKCASE, BUILT-IN CABINET OR IN ANOTHER CONFINED SPACE. ENSURE THE UNIT IS WELL VENTILATED. TO PREVENT RISK OF ELECTRIC SHOCK OR FIRE HAZARD DUE TO OVERHEATING, ENSURE THAT CURTAINS AND ANY OTHER MATERIALS DO NOT OBSTRUCT THE VENTILATION VENTS.

Note to CATV system installer:

This reminder is provided to call the CATV system installer's attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

The socket outlet shall be installed near the equipment and easily accessible. The mains plug of the power supply cord shall remain readily operable. To completely disconnect this apparatus from the AC Mains, disconnect the power supply cord plug from AC receptacle.

FCC Note:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: To assure continued compliance, follow the attached installation instructions and use only shielded interface cables when connecting to peripheral devices.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

IMPORTANT SAFETY INSTRUCTIONS

Read these operating instructions carefully before using the unit. Follow the safety instructions on the unit and the applicable safety instructions listed below. Keep these operating instructions handy for future reference.

- 1) Read these instructions.
- 2) Keep these instructions.
- 3) Heed all warnings.
- 4) Follow all instructions.
- 5) Do not use this apparatus near water.
- 6) Clean only with dry cloth.
- 7) Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
- 8) Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- 9) Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding-type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- 10) Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
- 11) Only use attachments/accessories specified by the manufacturer.
- 12) Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over. 
- 13) Unplug this apparatus during lightning storms or when unused for long periods of time.
- 14) Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

Unit Care

The precision parts in the unit are readily affected by the environment, especially temperature, humidity, and dust. Cigarette smoke also can cause malfunction or breakdown.

To clean the unit, wipe with a soft, dry cloth.

- Never use alcohol, thinner or benzene to clean the unit.
- Before using chemically treated cloth, carefully read the instructions that came with the cloth.

Observe the following points to ensure continued listening and viewing pleasure.

Dust and dirt may adhere to the unit's lens over time, possibly making it impossible to record or play discs.

Use the DVD lens cleaner about once every year, depending on frequency of use and the operating environment.

Carefully read the lens cleaner's instructions before use.

Lens cleaner: RP-CL720PP

- Do not place the unit on amplifiers or equipment that may become hot. The heat can damage the unit.
 - The unit should not be installed or operated near large magnets or electromagnetic devices. Such devices can damage pre-recorded VHS recordings.
 - Do not place any heavy objects on top of the unit.
 - The unit should not be mounted in a vertical position. It's designed to operate in the horizontal position.
- 

Before moving the unit, ensure the disc tray and cassette compartment are empty. Failure to do so will risk severely damaging the disc, tape and the unit.

Maintenance (Cleaning the video heads)

Dirt on the video heads can cause poor recording and play. If the picture does not improve, use an optional head-cleaning cassette. If the problem persists, seek advice from a qualified service person.

Head-cleaning cassette: NV-TCL30PT

Cautions about condensation

Condensation can cause unreliable playback of VHS recordings. Condensation may form in the following cases,

- The unit is brought from cold surroundings into a well-heated room.
 - The unit is suddenly brought from cool surroundings, such as an air-conditioned room or car, to a place which is hot and humid.
 - During rainy seasons.
- In any of the above-mentioned conditions, do not operate the unit for at least 2 hours. The unit is not equipped with a moisture sensor.

When the unit is not to be used for a long time

To save power, unplug the AC power supply cord from the household AC outlet. The unit consumes a small amount of power even when it is turned off.

Remote Control Information

About batteries

- Insert so the poles (+ and -) match those in the remote control.
- Do not use rechargeable type batteries.

R6/LR6, AA

- Do not mix old and new batteries.
- Do not use different types at the same time.
- Do not heat or expose to flame.
- Do not take apart or short circuit.
- Do not attempt to recharge alkaline or manganese batteries.
- Do not use batteries if the covering has been peeled off.

Mishandling of batteries can cause electrolyte leakage which can damage items the fluid contacts and may cause a fire.

Remove if the remote control is not going to be used for a long period of time. Store in a cool, dark place.

Using the remote control

Aim at the sensor, avoiding obstacles, up to a maximum range of 7 m (23 feet) directly in front of the unit.

Watching Television

This DVD recorder has a tuner which allows it to directly receive and record analog and terrestrial digital channels. High Definition (HD) programming is “down-converted” and recorded in Standard Definition (SD).

Preparation:

Turn on the television and select the appropriate video input to suit the connections to this unit.

1  to turn the unit on.

If you connected this unit and a TV without an audio/video cable

2  to watch the video from this unit (VCR mode).

–When in VCR mode, the TV indicator on this unit's display does not light up.

–By pressing [VCR/TV] again, the TV indicator on this unit's display will light up, and you can watch TV directly without passing the signal through this unit (TV mode).

3  to select desired channel.

You can also select channels with the numbered buttons.

•To directly enter channels for analog and digital broadcasts:

Antenna Mode:

e.g., “3”: [0] → [3] → [ENTER]

“13”: [1] → [3] → [ENTER]

Cable TV Mode:

e.g., “5”: [0] → [0] → [5] → [ENTER]

“15”: [0] → [1] → [5] → [ENTER]

•To enter the sub channel number for a digital broadcast:

Antenna Mode:

e.g., “3-1”: [3] → [-] → [1] → [ENTER]

“13-1”: [1] → [3] → [1] → [ENTER]

Cable TV Mode:

e.g., “1-1”: [1] → [-] → [1] → [ENTER]

“15-1”: [1] → [5] → [-] → [1] → [ENTER]

The hyphen appears automatically on “Antenna Mode” if you enter two numbers.

Notes

- This unit can receive free cable television but it cannot receive paid services.
- This unit can receive music channels from digital broadcasters, but you cannot record them. Data broadcasts are not for viewing or recording.
- Multi-channel surround broadcast is output in stereo (on 2 channels).

Playback

Preparation:

Turn on the television and select the appropriate video input to suit the connections to this unit.

Playing Discs

Refer to “Advanced Disc Playback” (→ 19–20) for detail information on playback of discs.

Playback starts from the most recent recording.
- **DVD-V** **CD**
Playback starts from the beginning of the disc.
- The unit takes some time to read the disc before play starts.
- Discs continue to rotate while menus are displayed. Press [**■** STOP] when you finish to preserve the unit’s motor and your television screen.

Notes

- Tapes are automatically rewind once they reach the end (except during scheduled recording or fast forwarding).
- Viewing pause or using slow playback in VP mode may result in a distorted image.
- You may have to adjust the tracking for tapes recorded on other VCRs (→ 25). In some cases, the picture quality may still be inferior; this is due to format constraints.

Recording Television Programs

Refer to “Important Notes for Recording” (→ 13) and “Advanced Recording” (→ 14 to 17) for detail information on recording.

Tips

Icons such as “**RAM**” indicate usable discs. Refer to pages 62 and 63.

Notes

- Be sure to perform step 5 before the scheduled recording time. Scheduled recording will work only if “Ⓞ” is displayed.
- “Ⓞ” flashes when the unit cannot go to scheduled recording standby. (e.g., a recordable disc is not in the disc tray) It does not flash if Quick Start is off.
- When scheduled recordings are set to start one immediately after another, the unit cannot record the beginning of the later program.
- If two scheduled recording times overlap, the first recording always has priority. The second recording will start only after the first recording has finished.
- Scheduled recording cannot be executed on both DVD and VHS drives at the same time.
- When starting time for a scheduled recording is the same, the recording that you programmed later has priority.
- If you set DST (Daylight Saving Time) to On when manually setting the clock, scheduled recording may be affected when summer time switches to winter time and vice versa.

Copying

Copying (VHS → DVD)

Programs are automatically copied onto the disc from the location of playback at the time when the copying of the tape starts.

*¹ It is not possible to record or play continuously from one side of a double sided disc to the other.

*² When "Recording Time in EP Mode" has been set to "EP-Extended Play (6H)" in the Setup menu (→ 41).

The sound quality is better when using "EP-Extended Play (6H)" than when using "EP-Extended Play (8H)".

*³ Refer to "Recording to DVD-R DL and +R DL" (→ 13).

Notes

- This unit uses variable bit rate (VBR) recording which varies the amount of data recorded to suit the images, so actual recording times and remaining recording times shown by the unit will be different. (-R DL +R DL) The difference will be especially noticeable.) Use a disc with plenty of remaining time to be sure.
- When recording to DVD-RAM using EP (8H) mode, play may not be possible on DVD players, even if they are compatible with DVD-RAM. In this case use EP (6H) mode.

Notes

- A tape recorded in VP mode by the unit cannot be played back by other VCRs.
- It takes more time for automatic tracking to work when playing tapes recorded with VP mode, and it may not work at all with some tapes. Do tracking manually if this is the case (→ 25).

Tips

- **To prevent recording errors:**
Set a scheduled recording period slightly longer than the actual program (to make sure the program is recorded in full).

Basic Connection

Connecting to a Television with Direct Cable or Antenna (No Cable Box or Satellite Receiver)

Note: The terminals on the rear of your TV may not appear as shown below. Please read terminal labels carefully to ensure correct connections.

If your television does not have Audio/Video IN terminals, step ③ may be disregarded, although the use of AV connections is recommended for improved picture quality.

- ① 75 Ω coaxial cable from the wall or antenna signal to the “RF IN” on the unit.
- ② 75 Ω coaxial cable (*included*) from the “RF OUT” on the unit to the “VHF/UHF RF IN” on the TV.
- ③ Audio/video cable (*included*) from the “DVD/VHS COMMON OUT” on the unit to the “AV IN” on the TV.
- ④ AC power supply cord (*included*) from the “AC IN ~” on the unit to a household AC outlet.

Basic Connection

Connecting to a Television and a Cable Box

- Consult your cable service provider about the appropriate cable box to use.
- Additional coaxial cable and audio/video (AV) cable are required.

Note: The terminals on the rear of your TV and cable box may not appear as shown below. Please read terminal labels carefully to ensure correct connections.

- 1 75 Ω coaxial cable from the wall to the "RF IN" on the unit.
- 2 75 Ω coaxial cable (included) from the "RF OUT" on the unit to the "RF IN" on the cable box.
- 3 75 Ω coaxial cable from the "RF OUT" on the cable box to the "VHF/UHF RF IN" on the TV.
- 4 Audio/video cable (included) from the "DVD/VHS COMMON OUT" on the unit to the "AV IN" on the TV.
- 5 Audio/video cable from the "AV OUT" on the cable box to the "IN1" on the unit.
- 6 AC power supply cord (included) from the "AC IN" on the unit to a household AC outlet.

Connecting to a Television and a Satellite Receiver

- Additional coaxial cable and audio/video (AV) cable are required.

Note: The terminals on the rear of your TV and satellite receiver may not appear as shown below. Please read terminal labels carefully to ensure correct connections.

To a household AC outlet
(AC 120 V, 60Hz)

- 1 75 Ω coaxial cable from the satellite antenna to the “**SATELLITE IN**” on the satellite receiver.
- 2 75 Ω coaxial cable (*included*) from the “**RF OUT**” on the satellite receiver to the “**VHF/UHF RF IN**” on the TV.
- 3 Audio/video cable (*included*) from the “**DVD/VHS COMMON OUT**” on the unit to the “**AV IN**” on the TV.
- 4 Audio/video cable from the “**AV OUT**” on the satellite receiver to the “**IN1**” on the unit.
- 5 AC power supply cord (*included*) from the “**AC IN ~**” on the unit to a household AC outlet.

Connection Options for Improved Playback Quality

You can enjoy high-quality picture by using the following terminals for connection.

DVD output and DVD/VHS output

The unit has DVD/VHS COMMON output terminals and DVD PRIORITY output terminals. You can enjoy higher picture quality when connecting with DVD PRIORITY output terminals. However, when using these terminals, the following restrictions will occur.

Restrictions

- You cannot play a tape with the DVD PRIORITY output terminals while recording or making a scheduled recording on a disc. However, you can play a tape with the DVD/VHS COMMON output terminals when recording to a disc.
- If connecting with the DVD/VHS COMMON output terminals, closed caption cannot be displayed by this unit while playing a tape. Make the settings and display on a TV that supports Closed Captioning.

If connecting to the TV with the S VIDEO terminal or the COMPONENT VIDEO terminals, we recommend connecting to the TV with the DVD/VHS COMMON OUT terminals as well (→ below, 51).

Using an S Video Cable for Better Video (S Video Cable not included)

The S VIDEO OUT terminal achieves a more vivid picture than the VIDEO OUT terminal. (Actual results depend on the television.)

Notes

Usually you can watch video from input 2 on TV. When you want to playback VHS while recording on DVD, switch to input 1 on TV.

Using Component Video Cables for Better Video (Component Video Cables not included)

The COMPONENT VIDEO OUT terminals on this unit can be used for either interlace or progressive output (→ 82) to provide a purer picture than the S VIDEO OUT terminal.

Notes

Usually you can watch video from COMPONENT VIDEO input on TV. When you want to playback VHS while recording on DVD, switch to input 1 on TV.

Additional Connection Options

You can enjoy better quality sound by changing the audio cable connection between this unit and your TV on page 47 to 49 as follows.

Using an Audio Cable for Better Sound

Use this connection to play sound through speakers connected to an amplifier or system component.

Using an Optical Digital Audio Cable for Better Sound (Optical Digital Audio Cable not included)

This method allows you to enjoy multi-channel surround sound on DVD-Video.

- Connect an amplifier or system component with a built-in decoder displaying these logo marks.

- Adjust settings in "Digital Audio Output" (→ 42).

Notes

- You cannot use DTS Digital Surround decoders not meant for DVD.
- Before purchasing an optical digital audio cable, check the terminal shape of the equipment to be connected.

Setting the Channels and Clock

Preparation:

- Turn on the television and select channel 3.
- These are the first settings you make upon buying the unit. You don't need to make these settings again.

1 **DVD/VHS POWER** to turn the unit on.

Notes

Note about using a DualDisc:

The digital audio content side of a DualDisc does not meet the technical specifications of the Compact Disc Digital Audio (CD-DA) format so play may not be possible.

* Play may be impossible on some DVD-RW (DVD Video Recording format), CD-R or CD-RW discs due to the condition of the recording.

- You can play still pictures (JPEG), CD-DA and MP3 format data recorded on CD-R/RW. Close the session or finalize the disc after recording.
- The producer of the disc can control how discs are played. So you may not always be able to control play as described in these operating instructions. Read the disc's instructions carefully.

The manufacturer accepts no responsibility and offers no compensation for loss of recorded or edited material due to a problem with the unit or recordable media, and accepts no responsibility and offers no compensation for any subsequent damage caused by such loss.

Examples of causes of such losses are

- A disc recorded and edited with this unit is played in a DVD Recorder or computer disc drive manufactured by another company.
- A disc used as described above and then played again in this unit.
- A disc recorded and edited with a DVD Recorder or computer disc drive manufactured by another company is played in this unit.

Number of folders	Maximum number of folders recognizable: 99 folders (including the root folder)
Number of files	Maximum number of files recognizable: 999 files (Total number for all the MP3, JPEG and other type of files.)
MOTION JPEG	not compatible

Notes

- Compatible formats: ISO9660 level 1 or 2 (except for extended formats) and Joliet
- This unit is compatible with multi-session; however, reading or play of the disc may take time if there are a lot of sessions.
- Operation may take time to complete when there are many files (tracks) and/or folders (groups); some files (tracks) may not display or be playable.
- Images recorded at a very high resolution may take a long time to display.
- English alphabetical characters and Arabic numerals are displayed correctly. Other characters may not display correctly.
- The display order on this unit may differ from how the order is displayed on a computer.
- Depending on how you create the disc (writing software), files (tracks) and folders (groups) may not play in the order you number them.
- This unit is not compatible with packet-write format.
- Depending on the recording conditions, the disc may not play.

Tips

You can play MP3s and still pictures (JPEG) on this unit by making folders as shown below. Depending on how you create the disc (writing software), play may not be in the order you number the folders.

How to structure MP3 folders

Prefix with 3-digit numbers in the order you want to play them.

Structure of still pictures (JPEG)

Files inside a folder are displayed in the order they were updated or taken.

- When the highest level folders are “DCIM” folders, they are displayed first on the tree.

Media Handling (Disc/Video Cassette)

Inserting Discs

1  to open the tray.

–Insert a disc.

2  to close the tray.

Notes

- When using 8 cm (3") DVD-RAM or 8 cm (3") DVD-R, remove the disc from the cartridge.
- It is not possible to record or play continuously from one side of a double sided disc to the other. You will need to eject the disc and turn it over.

Disc Care

RAM Use cartridges to protect them from scratches and dirt.

Holding a disc

Handle discs by the edges to avoid inadvertently scratching or getting oil from your fingers on the disc. Do not touch the signal surface of discs (the shiny side).

Cleaning discs

Discs are not indestructible and occasionally dirt or condensation may appear. Clean by gently wiping with a soft, dry lint-free cloth in a straight line from the center of the disc to the edge of the disc. Return discs to their cases when not in use; this helps to protect against scratches and dirt.

Storing discs

Do not place or store discs in the following locations:

- Direct sunlight
- Very dusty or humid areas
- Near a heat source
- Places that undergo extreme shifts in temperature (condensation can occur)
- Where static electricity or electromagnetic waves occur

Discs to avoid

- Discs that are not perfectly circular in shape
- Warped discs, which may not balance properly in your unit, causing improper operation or damage to the unit
- Cracked discs
- Discs with exposed adhesive (from removed stickers or labels, such as may occur with rental discs or improperly cared-for discs that were previously labeled or re-labeled)

Inserting a Video Cassette

Insert a cassette (the surface with the roll of tape should face up).

–The unit turns on automatically.

To eject:

From the main unit:

EJECT

or

From the remote control

DRIVE
SELECT

to select the VHS drive.

STOP

Press and hold for 3 or more seconds.

Video Cassette Information

Video cassettes

- Break off the video cassette's tab to prevent accidental erasure. Cover the hole with a double layer of adhesive tape when you want to use the video cassette for recording again.
- You can use video cassettes with the VHS and S-VHS marks, but the unit is unable to make full use of the characteristics of S-VHS video cassettes.

Video cassette care

- Poor quality or damaged video cassettes can cause the heads to become dirty and malfunction. Store your video cassettes carefully and discard them when they become dirty or damaged.
- Never use video cassettes on which juice has been spilled or those that are extremely damaged since this will not only cause the heads to become dirty, but will also make the unit malfunction.

Troubleshooting Guide

If the Antenna Connector Doesn't Match

Use the following connection to suit the antenna lead to the unit's RF IN terminal, and the 75 Ω coaxial cable to the antenna terminals on your TV or other equipment. Refer to the other equipment's operating instructions for more information.

Type	This unit	Other equipment (television etc.)
A twin lead	from the antenna (Flat) Twin lead 300 Ω cable 	75–300 Ω transformer 75 Ω coaxial cable 

Changing RF Output Channel

If you connected this unit and a TV without an audio/video cable, interference (lines or patterning) or a very poor picture may appear on the TV. If this happens, follow the steps below to change the video playback channel (RF output channel) to remove the interference.

1  Press and hold for more than 5 seconds.

Troubleshooting Guide

Before requesting service, make the following checks. If you are in doubt about some of the check points, or if the solutions indicated in the chart do not solve the problem, refer to “Customer Services Directory” on page 83.

The following does not indicate a problem with the unit:

- Regular disc rotating sound.
- Poor reception due to atmospheric conditions.
- Image disturbance during search.
- Periodic interruptions to the reception due to satellite broadcasting breaks.
- Operations not working due to a poor-quality disc. (Try again using a Panasonic disc.)
- The unit freezing due to the activation of one of its safety devices (→ 67, To restore the unit if it freezes).

Product Service

- 1. Damage requiring service**—The unit should be serviced by qualified service personnel if:
- (a) The AC power supply cord or AC adaptor has been damaged; or
 - (b) Objects or liquids have gotten into the unit; or
 - (c) The unit has been exposed to rain; or
 - (d) The unit does not operate normally or exhibits a marked change in performance; or
 - (e) The unit has been dropped or the cabinet damaged.
- 2. Servicing**—Do not attempt to service the unit beyond that described in these operating instructions. Refer all other servicing to authorized servicing personnel.
- 3. Replacement parts**—When parts need replacing ensure the servicer uses parts specified by the manufacturer or parts that have the same characteristics as the original parts. Unauthorized substitutes may result in fire, electric shock, or other hazards.
- 4. Safety check**—After repairs or service, ask the servicer to perform safety checks to confirm that the unit is in proper working condition.

Glossary

Bitstream

This is a signal compressed and converted into digital form. It is converted back to a multi-channel audio signal, e.g., 5.1-channel, by a decoder.

CPRM (Content Protection for Recordable Media)

CPRM is technology used to protect broadcasts that are allowed to be recorded only once. Such broadcasts can be recorded only with CPRM-compatible recorders and discs.

Decoder

A decoder restores the coded audio signals on DVDs to normal. This is called decoding.

Dolby Digital

This is a method of coding digital signals developed by Dolby Laboratories. Apart from stereo (2-channel) audio, these signals can also be multi-channel audio. A large amount of audio information can be recorded on one disc using this method.

Down-mixing

This is the process of remixing the multi-channel audio found on some discs into two channels. It is useful when you want to listen to the 5.1-channel audio recorded on DVDs through your TV's speakers. Some discs prohibit down-mixing. If this is the case, this unit can only output the front two channels.

DTS (Digital Theater Systems)

This surround system is used in many movie theaters. There is good separation between the channels, so realistic sound effects are possible.

Dynamic range

Dynamic range is the difference between the lowest level of sound that can be heard above the noise of the equipment and the highest level of sound before distortion occurs. Dynamic range compression means reducing the gap between the loudest and softest sounds. This means you can hear dialog clearly at low volume.

Film and Video

DVD-Video are recorded using either film or video. The unit can determine which type has been used, then uses the most suitable method of progressive output.

Film is 24 or 30 frames per second, with motion picture film generally being 24 frames per second.

Video is 60 fields per second (2 fields making up 1 frame).

Finalize

A process that makes play of a recorded CD-R, CD-RW, DVD-R, etc. possible on equipment that can play such media. You can finalize DVD-R, DVD-R DL, DVD-RW (DVD-Video format), +R, and +R DL on the unit. After finalizing, the disc becomes play-only and you can no longer record or edit. However, finalized DVD-RW can be formatted to become recordable.

Formatting

Formatting is the process of making media such as DVD-RAM recordable on recording equipment.

You can format DVD-RAM, DVD-RW (only as DVD-Video format) and +RW on this unit.

Formatting irrevocably erases all contents.

Frame and field

Frame refers to the single images that constitute the video you see on your TV. Each frame consists of 2 fields.

- A frame still shows 2 fields, so there may be some blurring between them, but picture quality is generally better.
- A field still shows less picture information so it may be rougher, but there is no blurring.

JPEG (Joint Photographic Experts Group)

This is a system used for compressing/decoding color still pictures. If you select JPEG as the storage system on digital cameras, etc., the data will be compressed to 1/10-1/100 of its original size. The benefit of JPEG is less deterioration in picture quality considering the degree of compression.

MP3 (MPEG Audio Layer 3)

An audio compression method that compresses audio to approximately one-tenth of its size without any significant loss of audio quality. You can play MP3s you have recorded onto CD-R and CD-RW.

Pan & Scan/Letterbox

In general, DVD-Video are produced with the intention that they will be viewed on a widescreen TV (16:9 aspect ratio), so images often don't fit regular TVs (4:3 aspect ratio). 2 styles of picture, "Pan & Scan" and "Letterbox", deal with this problem.

Pan & Scan: The sides are cut off so the picture fills the screen.

Letterbox: Black bands appear at the top and bottom of the picture so the picture itself appears in an aspect ratio of 16:9.

Progressive/Interlace

NTSC, the video signal standard, has 480 interlaced (i) scan lines, whereas progressive scanning uses twice the number of scan lines. This is called 480p.

Using progressive output, you can enjoy the high-resolution video recorded on media such as DVD-Video.

Your TV must be compatible to enjoy progressive video.

Protection

You can prevent accidental erasure by setting writing protection or erasure protection.

Sampling frequency

Sampling is the process of converting the heights of sound wave (analog signal) samples taken at set periods into digits (digital encoding). Sampling frequency is the number of samples taken per second, so larger numbers mean more faithful reproduction of the original sound.

Thumbnail

This refers to a miniature representation of a picture used to display multiple pictures in the form of a matrix.

Panasonic DVD Recorder Limited Warranty

Limited Warranty Coverage

If your product does not work properly because of a defect in materials or workmanship, Panasonic Consumer Electronics Company or Panasonic Puerto Rico, Inc. (collectively referred to as "the warrantor") will, for the length of the period indicated on the chart below, which starts with the date of original purchase ("warranty period"), at its option either (a) repair your product with new or refurbished parts, or (b) replace it with a new or a refurbished product. The decision to repair or replace will be made by the warrantor.

Product or Part Name	Parts	Labor
DVD Recorder	One (1) Year	One (1) Year
Rechargeable Batteries, DVD-RAM Disc (in exchange for defective item)	Ten (10) Days	Not Applicable

During the "Labor" warranty period there will be no charge for labor. During the "Parts" warranty period, there will be no charge for parts. You must carry-in or mail-in your product during the warranty period. If non-rechargeable batteries are included, they are not warranted. This warranty only applies to products purchased and serviced in the United States or Puerto Rico. This warranty is extended only to the original purchaser of a new product which was not sold "as is". A purchase receipt or other proof of the original purchase date is required for warranty service.

Carry-In or Mail-In Service

For Carry-In or Mail-In Service in the United States call 1-800-211-PANA (7262) or visit Panasonic Web Site: <http://www.panasonic.com>
For assistance in Puerto Rico call Panasonic Puerto Rico, Inc. (787)-750-4300 or fax (787)-768-2910.

Limited Warranty Limits And Exclusions

This warranty ONLY COVERS failures due to defects in materials or workmanship, and DOES NOT COVER normal wear and tear or cosmetic damage. The warranty ALSO DOES NOT COVER damages which occurred in shipment, or failures which are caused by products not supplied by the warrantor, or failures which result from accidents, misuse, abuse, neglect, mishandling, misapplication, alteration, faulty installation, set-up adjustments, misadjustment of consumer controls, improper maintenance, power line surge, lightning damage, modification, or commercial use (such as in a hotel, office, restaurant, or other business), rental use of the product, service by anyone other than a Factory Servicenter or other Authorized Servicer, or damage that is attributable to acts of God.

THERE ARE NO EXPRESS WARRANTIES EXCEPT AS LISTED UNDER "LIMITED WARRANTY COVERAGE". THE WARRANTOR IS NOT LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT, OR ARISING OUT OF ANY BREACH OF THIS WARRANTY. (As examples, this excludes damages for lost time, travel to and from the servicer, loss of media or images, data or other recorded content. The items listed are not exclusive, but are for illustration only.)
ALL EXPRESS AND IMPLIED WARRANTIES, INCLUDING THE WARRANTY OF MERCHANTABILITY, ARE LIMITED TO THE PERIOD OF THE LIMITED WARRANTY.

Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the exclusions may not apply to you.

This warranty gives you specific legal rights and you may also have other rights which vary from state to state. If a problem with this product develops during or after the warranty period, you may contact your dealer or Servicenter. If the problem is not handled to your satisfaction, then write to the warrantor's Consumer Affairs Department at the addresses listed for the warrantor.

PARTS AND SERVICE WHICH ARE NOT COVERED BY THIS LIMITED WARRANTY ARE YOUR RESPONSIBILITY.

Conexión básica

Nota: Puede que los terminales en el panel trasero de su TV no sean similares a como se ilustran a continuación. Por favor consulte las etiquetas de los terminales con atención para asegurar conexiones correctas.

Conexión a una televisión mediante señal directa de cable o antena (sin pasar por receptor de cable ni receptor satelital)

Si su televisión no tiene terminales Audio/Video IN, el paso 3 podrá omitirse, aunque se recomienda el uso de conexiones AV para una mejor calidad de imagen.

Para disfrutar de una mejor calidad de imagen

- El terminal S VIDEO OUT logra una imagen más viva que la del terminal VIDEO OUT. (Los resultados reales dependen de la televisión).
- Los terminales COMPONENT VIDEO OUT en este aparato se pueden utilizar para la salida entrelazada o progresiva, para proporcionar una imagen más pura que la del terminal S VIDEO OUT.

Preparación:

Encienda la televisión y seleccione el canal 3.

Ajuste de los canales y el reloj

1 para encender el aparato.

2 para seleccionar una salida RF en el canal número 3.

- Cuando la imagen en la TV sea de calidad pobre, cambie al canal 4. También cambie la televisión de tal forma que se muestre "CH 4" en el visualizador.
- Cuando no se visualiza nada, cambie el canal de TV a entrada de video. Luego apague el visualizador de este aparato a "OFF".

3 ▲, ▼ para seleccionar el idioma, y luego

4 ▲, ▼ para seleccionar la relación de aspecto de la TV en "TV de 4:3" o en "TV ancho de 16:9", y luego

- Al conectar a una TV con relación de aspecto 4:3 seleccione "TV de 4:3".
- Al conectar a una TV con pantalla panorámica de 16:9 seleccione "TV ancho de 16:9".

5 ▲, ▼ para seleccionar la función de inicio rápido "Act." u "Desactivado", luego

6 ▲, ▼ para seleccionar si se recibirá o no señal de TV desde el terminal RF IN del aparato y luego

– Si selecciona "No", entonces se muestra la pantalla "Ajuste manual del reloj" en el aparato (→ 85).

7 ▲, ▼ para seleccionar el “Antena” o “Cable”, luego
