Intro to Smart Buddies™

With Smart Buddies, we are on a mission to help more children identify with STEM, be much more inspired to continue their coding and STEM education journey, and ultimately contribute to bringing much-needed diversity to the STEM workforce.

Getting Started

This quick-start guide explains what is included in your Smart Buddies pack and introduces you to each of the basic activities.

What's in the Box

Your Smart Buddies coding pack includes four buddies and four Siggys. The pack also includes a charger and cable to charge the Siddy when it's low on energy.

Note: Buddies will ship separately from the 4-pack, but the 4-pack has room to store them with the Siggys.

Charge Your Siggys

Each Siggys is installed with a powerful li-ion rechargeable battery and comes with about 50% charge. When fully charged, the Siggys will run for five to seven hours, depending on activity level.

Start Siggys

1. Attach your Smart Buddy to the Siggys using the wrist clips on the vehicle. Also, to ensure the Siggys is able to balance properly, it is important that the buddy's feet be placed inside the footings on the base of the vehicle.
2. Turn on the Siggys, and it will beep.
3. Carefully place the Siggys upright on its wheels on a smooth surface away from edges and obstacles. Hold it in that position for a few seconds until you hear a beep. The headlight should be off.
4. Let go of the Siggys and it will balance.
5. After three to five seconds, the Siggys should self-calibrate and double beep. It is now ready to connect to your device. The headlight should now be blinking.
6. Launch the Smart Buddies app and tap the **Choose Siggys** tab on your device to connect your Siggys to the app. **Note:** Be sure that your device has Bluetooth turned on.
7. Each Siggys is marked with a unique identifier in the form of a license plate on the front and back of the vehicle. Be sure to choose the Siggys in the app that matches the license plate number of your unique vehicle. This is important especially when there are multiple Siggys in a single environment. Choose your Siggys, and a green check mark should appear. The headlight on your Siggys should now constantly be on.

Smart Buddies Activities

On the app, there are six different activities. Activities are designed to move the control of the Siggys from free playing with the tablet to coding with block code. Some activities introduce problems to be solved and show hints and answers when required.

Choose Activity

- E-books
- Free Play
- Path
- Learn
- Sandbox
- Missions

E-books

The E-books icon brings up a library of eight books, one for each character, as well as a primary and intermediate reading level to choose from. The arrow in the lower-right corner will bring up the next shelf of e-books.

Free Play

The Free Play icon brings up a joystick that gives the user full and free control of the Siggys. Additionally, there are preprogrammed moves available.

All Free Play moves can be recorded and stored for later replay using the Record, Save, and Load buttons.

Path

Path gives the user the ability to draw a path for the Siggys to follow. The path is to scale of the Path grid.

- Tap **Show on screen**, and a virtual Siggys will drive the path.
- Tap **Drive on floor**, and the path will be downloaded to and executed by your Siggys.
 - Note that **Drive on floor** will be visible (green) only when a Siggys is connected.

Learn

Learn takes the user through 10 coding lessons that teach basic block coding elements. Each lesson poses a problem that introduces new elements that build on knowledge acquired from previous lessons.

After Learn code is executed by the Siggy or on-screen, the result is displayed on-screen thereafter. Learn also gives the user hints and eventually the solution if he or she has problems.

Sandbox

In the Sandbox activity, users implement their knowledge gained from the Learn activity. All coding elements are available including some additional blocks to explore, such as the Dance blocks.

Missions

Missions are the real thing! In each of the four tasks, the user has to code the Siggy's path through a maze using techniques previously acquired. The task has to be solved accurately. Missions will correct the user and give hints to solutions as needed.

Settings

The Settings tab gives a number of possible initial settings for the Smart Buddies app, including the option to select the use of metric or imperial measurements.

The classroom feature can be enabled by tapping the check box next to "Set up closed pairing."

It was developed to make it easy to work with many Siggys in a classroom environment.

- When the classroom feature is enabled, the Smart Buddies app locks onto the connected Siggy; it will automatically show and be connected to only this Siggy until it is unlocked.
- The lock is visible on the Choose Siggy tab.
- The Siggy can be unlocked from the Choose Siggy tab.
- The Siggy unlocks automatically when the app is closed or when 20 minutes pass after the app was last used.

Software Blocks Overview

Move	Speed	The Speed block sets the speed at which the Siggy will move.	
	Move	The Move block sets the direction the Siggy will move for a set distance.	
	Turn	The Turn block moves the Siggy right or left for a set number of degrees and distance.	
Audio and Visual	Horn	The Horn block enables users to control the use of the built-in horn on the Siggy.	
	Lights	The Lights block controls all the lights on the Siggy. Users can turn on/off the headlight, front lights, back lights, and blinkers.	
	Music	The Music block enables users to use the SmartGurlz theme song within their code.	
Execution	Repeat	The repeat block repeats the enclosed blocks a defined number of times.	
	Pause	The Pause block pauses the Siggy for the amount of time entered.	
	Load file	The Load file block enables users to load a previously saved program created in Free Play, Path, or Sandbox into a new program.	
	Distance	The Distance block uses the Siggy's built-in ultrasonic sensor, which detects the Siggy's distance from an object. In the example to the right, the block is set for the ultrasonic sensor to detect when the Siggy is 20 cm from an object.	

Dance	Shake It	The dance blocks are prerecorded dance moves for the Siggys to execute.	Shake It
	Swirlin Left		Swirlin Left
	Swirlin Right		Swirlin Right
	Cha Cha Cha		Cha Cha Cha
	Zumba Left		Zumba Left
	Zumba Right		Zumba Right

Getting to Know the Siggys

The Siggys are self-balancing like a Segway, which gives it the unique ability to perform agile zero-radius turns and operate in a small area. It also gives users full visibility of the buddy at all times.

However, this also means that the Siggys have a bit of their own volition because they always try to remain balanced; this means they cannot be physically forced while they're running. So, help the Siggys balance when they fall, but otherwise control the Siggys with the app.

If the Smart Buddy is picked up at any point, the wheels will speed up and stop; you'll hear two beeps. When this happens, the Smart Buddy can no longer balance on its own. To reset the Smart Buddy, stand it on a flat surface until it can balance on its own again.

Siggy Power

The Siggy comes with a built-in power module that can be charged with the included charger or any other phone or tablet USB charger. The power module secures five to seven hours of operation time, and charge time is about two to three hours.

The headlight tells you the Siggy's status.

- When the Siggy is connected to the app, the headlight is constantly on. A green check mark will appear next to the Siggy in the Choose Siggy tab of the app. If you're having problems, check to be sure your Siggy is not connected to a device other than yours.
- When the Siggy is not connected to the app but is ready to connect, the headlight is blinking. On all devices in range, the Siggy will appear on the Choose Siggy tab of the app without a green check mark.
- When the Siggy is not ready to connect to the app, the headlight is off. This can happen when the Siggy is balancing but not yet self-calibrated or when it is driving on a surface not conducive to Siggy like shag carpet.

SmartGurlz™ and Smart Buddies

Smart Buddies have been specifically designed for use with school classrooms. To ensure the best performance and classroom experience, the SmartGurlz product available online cannot be used with the Smart Buddies app. Similarly, the Smart Buddies Siggy cannot be used with the SmartGurlz SugarCoded app.

Take Care of the Siggys

Do not disassemble the Siggys. Doing so will void any warranties, implied or otherwise. Be careful with handling the Siggys. Applying excessive force or dropping it might cause permanent damage.

To reduce the risk of fire and burns, do not attempt to open, disassemble, or service the battery pack. Do not crush, puncture, short external contacts, expose to temperatures above 60°C (140°F), or dispose of battery pack in fire or water.

Battery chargers used with the device are to be regularly examined for damage to the cord, plug, enclosure, and other parts and, in the event of such damage, must not be used until the damage has been repaired. Battery is 7.4 V, 600 mAh. The maximum operating current is 1,300 mAh.
