

How to Download and Install the Latest Firmware for Oppo A57

Oppo A57 is a popular smartphone that offers many features and functions. However, to keep your device running smoothly and securely, you need to update its firmware regularly. Firmware is the software that controls the hardware and operating system of your phone. Updating the firmware can fix bugs, improve performance, enhance security, and add new features.

In this article, we will show you how to download and install the latest firmware for Oppo A57 using two methods: OTA (over-the-air) and manual. OTA is the easiest and most convenient way to update your phone, as it does not require a computer or a cable. Manual method is more suitable for advanced users who want to have more control over the process.

oppo a57 firmware download

Method 1: OTA (Over-the-Air) Update

OTA update is the recommended method to update your Oppo A57 firmware. It is simple, fast, and safe. You just need to connect your phone to a Wi-Fi network and follow these steps:

1. Go to **Settings** on your phone and tap on **Software Updates**.
2. Tap on **Check for Updates** and wait for the phone to search for the latest firmware version.
3. If there is a new update available, tap on **Download Now** and wait for the download to complete.
4. After the download is finished, tap on **Install Now** and follow the on-screen instructions to install the update.
5. Your phone will reboot automatically after the installation is done.

Congratulations! You have successfully updated your Oppo A57 firmware using OTA method.

Method 2: Manual Update

Manual update is another way to update your Oppo A57 firmware. It requires a computer, a USB cable, and a flash tool. You also need to download the firmware file from the official website of Oppo. This method is more complex and risky than OTA method, so please proceed with caution and backup your data before you start. Here are the steps:

1. Go to <https://support.oppo.com/in/software-update/> [^4^] on your computer and select your phone model (Oppo A57) from the list.
2. Download the latest firmware file for your phone and save it on your computer.
3. Extract the zip file using a tool like WinRAR or 7-Zip and you will get a folder containing the firmware file (Oppo_A57_EX_11_A.30_181206.zip) [^2^], the USB driver, the flash tool, and an

instruction manual.

4. Install the USB driver on your computer if you have not done so before.
5. Launch the flash tool (QFIL.exe) from the folder and select **Browse**.
6. Navigate to the folder where you extracted the firmware file and select it.
7. Turn off your phone and press and hold **Volume Up** and **Volume Down** buttons simultaneously.
8. Connect your phone to your computer using a USB cable.
9. The flash tool will detect your phone and show its information on the screen.
10. Select **Download** on the flash tool and wait for the flashing process to complete.
11. Your phone will reboot automatically after the flashing is done.

Congratulations! You have successfully updated your Oppo A57 firmware using manual method.
