NOKIA RESERVES THE RIGHT TO REVISE THIS DOCUMENT OR WITHDRAW IT AT ANY TIME WITHOUT PRIOR NOTICE.

The availability of particular products and applications and services for these products may vary by region. Please check with your Nokia dealer for details and availability of language options.

Export controls

This device may contain commodities, technology or software subject to export laws and regulations from the US and other countries. Diversion contrary to law is prohibited.

The third-party applications provided with your device may have been created and may be owned by persons or entities not affiliated with or related to Nokia. Nokia does not own the copyrights or intellectual property rights to the third-party applications. As such, Nokia does not take any responsibility for end-user support, functionality of the applications, or the information in the applications or these materials. Nokia does not provide any warranty for the third-party applications.

BY USING THE APPLICATIONS YOU ACKNOWLEDGE THAT THE APPLICATIONS ARE PROVIDED AS IS WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW. YOU FURTHER ACKNOWLEDGE THAT NEITHER NOKIA NOR ITS AFFILIATES MAKE ANY REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF TITLE, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, OR THAT THE APPLICATIONS WILL NOT INFRINGE ANY THIRD-PARTY PATENTS, COPYRIGHTS, TRADEMARKS, OR OTHER RIGHTS.

FCC/INDUSTRY CANADA NOTICE

Your device may cause TV or radio interference (for example, when using a telephone in close proximity to receiving equipment). The FCC or Industry Canada can require you to stop using your telephone if such interference cannot be eliminated. If you require assistance, contact your local service facility. This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference

received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by Nokia could void the user's authority to operate this equipment.

SAFETY

Read these simple guidelines. Not following them may be dangerous or illegal. Read the complete user guide for further information.

SWITCH ON SAFELY

Do not switch the device on when wireless phone use is prohibited or when it may cause interference or danger.

ROAD SAFETY COMES FIRST

Obey all local laws. Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety.

INTERFERENCE

All wireless devices may be susceptible to interference, which could affect performance.

SAFETY

SWITCH OFF IN RESTRICTED AREAS Follow any restrictions. Switch the device off in aircraft, near medical equipment, fuel, chemicals, or blasting areas.

QUALIFIED SERVICE Only qualified personnel may install or repair this product.

ENHANCEMENTS AND BATTERIES Use only approved enhancements and batteries. Do not connect incompatible products.

WATER-RESISTANCE

Your device is not water-resistant. Keep it dry.

General information

About your device

The wireless device described in this guide is approved for use on the WCDMA 850 and 2100 (RM-364), WCDMA 900 and 2100 (RM-365), WCDMA 850 and 1900 (RM-366), and GSM 850, 900,1800, and 1900 networks. Contact your service provider for more information about networks.

When using the features in this device, obey all laws and respect local customs, privacy and legitimate rights of others, including copyrights.

Copyright protection may prevent some images, music, and other content from being copied, modified, or transferred.

Your device may have preinstalled bookmarks and links for third-party internet sites. You may also

General information

access other third-party sites through your device. Third-party sites are not affiliated with Nokia, and Nokia does not endorse or assume liability for them. If you choose to access such sites, you should take precautions for security or content.

Warning: To use any features in this device, other than the alarm clock, the device must be switched on. Do not switch the device on

when wireless device use may cause interference or danger.

Remember to make back-up copies or keep a written record of all important information stored in your device.

When connecting to any other device, read its user guide for detailed safety instructions. Do not connect incompatible products.

Network services

To use the phone you must have service from a wireless service provider. Many of the features require special network features. These features are not available on all networks; other networks may require that you make specific arrangements with your service provider before you can use the network services. Your service provider can give you instructions and explain what charges will apply. Some networks may have limitations that affect how you can use network services. For instance, some networks may not support all language-dependent characters and services.

Your service provider may have requested that certain features be disabled or not activated in your phone. If so, these features will not appear on your phone menu. Your phone may also have a special configuration such as changes in menu names, menu General information

order, and icons. Contact your service provider for more information

This device supports WAP 2.0 protocols (HTTP and SSL) that run on TCP/IP protocols. Some features of this device, such as multimedia messaging (MMS), browsing, e-mail application, instant messaging, remote synchronisation, and content downloading using the browser or MMS, require network support for these technologies.

Enhancements

Warning: Use only batteries, chargers, and enhancements approved by Nokia for use with this particular model. The use of any other types may invalidate any approval or warranty, and may be dangerous.

For availability of approved enhancements, please check with your dealer. When you disconnect the power cord of any enhancement, grasp and pull the plug, not the cord.

Access codes

Select Menu > Settings > Security to set how your phone uses the access codes and security settings.

 To prevent accidental key presses, use the keypad lock (keyguard).

Select Menu > Settings > Phone > Automatic keyguard or Security keyguard > On or Off. If the Security keyguard is set On, enter a security code of your choice when requested.

To unlock the keys, select Unlock, and press the * key.

To answer a call when the keyguard is on, press the call key. When you end or reject the call, the keys are automatically locked.

• The security code helps to protect your phone against unauthorised use.

General information

- The PIN code, supplied with the SIM card, helps to protect the card against unauthorised use.
- The PIN2 code, supplied with some SIM cards, is required to access certain services.
- PUK and PUK2 codes may be supplied with the SIM card. If you enter the PIN or PIN2 code incorrectly three times in succession, you will be asked for the PUK or PUK2 code. If you do not have them, contact your service provider.
- The barring password (four digits) is required when using the *Call barring service* to restrict calls to and from your phone (network service).
- To view or change the security module settings, if installed, select Menu > Settings > Security > Security module sett..

Software updates

Important: Use only services that you trust and that offer adequate security and protection against harmful software.

Nokia may produce software updates that may offer new features, enhanced functions, or improved performance. You may be able to request these updates through the Nokia Software Updater PC application. To update the device software, you need the Nokia Software Updater application and a compatible PC with Microsoft Windows 2000, XP, or Vista operating system, internet access, and a compatible data cable to connect your device to the PC.

To get more information and to download the Nokia Software Updater application, visit www.nokia.com/ softwareupdate or your local Nokia website.

Downloading software updates may involve the transmission of large amounts of data through your service provider's network. Contact your service provider for information about data transmission charges. General information

Make sure that the device battery has enough power, or connect the charger before starting the update.

If software updates over the air are supported by your network, you may also be able to request updates through the device. See "Phone," p. 69.

Download content

You may be able to download new content (for example, themes) to your phone (network service).

For the availability of different services, pricing, and tariffs, contact your service provider.

Important: Use only services that you trust and that offer adequate security and protection against harmful software.

Nokia support

Check www.nokia.com/support or your local Nokia website for the latest guides, additional information,

downloads, and services related to your Nokia product.

On the website, you can get information on the use of Nokia products and services. If you need to contact customer service, check the list of local Nokia contact centres at www.nokia.com/customerservice.

For maintenance services, check your nearest Nokia service centre at www.nokia.com/repair.

1. Get started

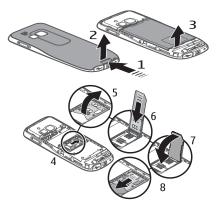

Install SIM card and battery

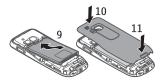

Always switch the device off and disconnect the charger before removing the battery.

The SIM card and its contacts can easily be damaged by scratches or bending, so be careful when handling, inserting, or removing the card. Insert the SIM card

Get started

with the gold-coloured contact area facing down (6-7).

Charge the battery

Charging the BL-4U battery with the AC-3 charger takes approximately 2 hours 15 minutes while the phone is in the standby mode.

- 1. Connect the charger to a wall socket.
- 2. Connect the lead from the charger to the charger connector at the bottom of your phone.

Get started

If the battery is completely discharged, it may take several minutes before the charging indicator appears on the display or before any calls can be made.

Switch the phone on and off

- 1. Press and hold the power key as shown.
- If the phone asks for a PIN or a UPIN code, enter the code (for example, displayed as ****), and select OK.

When you switch on your phone for the first time, and the phone is in the standby mode, you are asked to obtain the configuration settings from your service provider (network service). Confirm or decline the query. See "Configuration," p. 71, and "Configuration settings service," p. 23.

Set the time, zone, and date

When you switch on your phone for the first time, the phone is in the standby mode, and you are asked to set the time and date. Fill in the fields, and select **Save**.

To access Date and time later, select Menu > Settings > Date and time > Date & time settings, Date and time format, or Auto-update of time (network service) to change the time, time zone, and date settings.

Configuration settings service

To use some of the network services, such as mobile internet services, MMS, Nokia Xpress audio messaging, or remote internet server synchronisation, your phone needs the correct configuration settings. For more information on availability, contact your network operator, service Get started

provider, nearest authorised Nokia dealer, or visit the support area on the Nokia website, www.nokia.com/ support.

When you have received the settings as a configuration message, and the settings are not automatically saved and activated, *Configuration settings received* is displayed. Select **Show** > **Save**. If required, enter the PIN code supplied by the service provider.

Antenna

Your device may have internal and external antennas. As with any radio transmitting device, avoid touching the antenna area unnecessarily while the antenna is transmitting or receiving. Contact with such an antenna

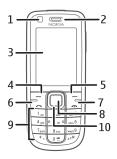

affects the communication quality and may cause the device to operate at a higher power level than otherwise needed and may reduce the battery life.

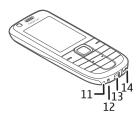

Get started

microSD memory card

The sales package of your device may not include a memory card. Memory cards are available as separate accessories. A microSD memory card can be loaded with data such as ringing tones, themes, tones, images and videos. If you delete, reload, or replace this card, these functions and features may not function properly.

Use only compatible microSD cards approved by Nokia for use with this device. Nokia uses approved industry standards for memory cards, but some brands may not be fully compatible with this device. Incompatible cards may damage the card and the device and corrupt data stored on the card.

Important: Do not remove the memory card in the middle of an operation when the card is being accessed. Removing the card in the middle of an

operation may damage the memory card as well as the device, and data stored on the card may be corrupted.

- 1. Remove the battery cover of the phone. Insert the card with the goldcoloured contact area facing down (1).
- 2. Press the card into the slot until it clicks into place (2). Replace the battery cover.

Get started

Standby mode

When the phone is ready for use, and you have not entered any characters, the phone is in the standby mode.

- 1. 3G indicator
- 2. Signal strength of the cellular network
- 3. Battery charge level
- 4. Indicators. See "Indicators," p. 31.
- 5. Name of the network or the operator logo
- 7

- 6. Clock
- 7. Display
- The left selection key is Go to or a shortcut to a function that you have selected. See "Left selection key," p. 60.

- 9. The middle selection key is Menu.
- 10. The right selection key may be **Names** to access the list of contacts in the *Contacts* menu, an operator-specific name to access an operator-specific website, or a shortcut to a function that you have selected. See "Right selection key," p. 60.

Indicators

- You have unread messages.
- The phone registered a missed call. See "Log," p. 54.
- The keypad is locked. See "Access codes," p. 15.
- The phone does not ring for an incoming call or text message when Incoming call alert

and Message alert tone are set to Off. See "Tones," p. 57.

- The alarm clock is set to On
- **G**, E The packet data connection mode, Always service is available, the indicator is shown.
- $^{\texttt{G}}$. $^{\texttt{E}}$ A GPRS or EGPRS connection is established.
- (on hold).
- Bluetooth connectivity is activated. See * "Connecting with Bluetooth," p. 62.

Flight profile

You can deactivate all radio frequency functions and still have access to offline games, calendar, music player, and phone numbers. Use the flight profile in

radio sensitive environments—on board aircraft or in hospitals. When the flight profile is active, and is shown.

Select Menu > Settings > Profiles > Flight > Activate or Personalise.

To set the phone to ask every time it is switched on whether to use the flight profile, select Menu > Settings > Phone > Flight query > On or Off.

To deactivate the flight profile, select any other profile.

In the offline or flight profiles, you may need to unlock the device and change to the calling profile before making a call.

Warning: With the flight profile you cannot make or receive any calls, including emergency calls, or use other features that require network coverage.

To make calls, you must first activate the phone function by changing profiles. If the device has been locked, enter the lock code. If you need to make an emergency call while the Calls

device is locked and in the flight profile, you may be also able to enter an official emergency number programmed in your device in the lock code field and select 'Call'. The device will confirm that you are about to exit flight profile to start an emergency call.

2. Calls

Make a voice call

Do one of the following:

• Enter the phone number, including the area code if required, and press the call key.

For international calls, press * twice for the international prefix (the + character replaces the international access code), enter the country code, the area code without the leading 0, if necessary, and the phone number.

- To list the last called numbers, press the call key once. To call one of the numbers, select it, and press the call key.
- Call a number saved in Contacts. See "Contacts," p. 51.

To increase or decrease the volume during a call, press the volume key up or down.

Answer or reject a call

To answer a call, press the call key. To end the call, press the end key.

To reject a call, press the end key.

To mute the ringing tone, select Silence.

Speed dialling

To assign a number to one of the speed-dialling keys, 3 to 9:

Calls

- 1. Select Menu > Contacts > Speed dials.
- 2. Scroll to the speed-dialling number that you want.
- Select Assign, or if a number has already been assigned to the key, select Options > Change.
- 4. Select Search and the contact you want to assign.

If the *Speed dialling* function is off, the phone asks whether you want to activate it.

Select Menu > Settings > Call > Speed dialling > On or Off.

To call a number, press and hold a speed-dialling key until the call begins.

Options during a call

Many of the options that you can use during a call are network services. For availability, contact your service provider. Possible options that your service provider may offer include conference calls, video sharing and placing calls on hold.

Make a video call

- To start a video call, enter the phone number in the standby mode, or select Contacts and a contact.
- 2. Press and hold the call key, or select **Options** > *Video call.*

Starting a video call may take a while. *Video call* and an outgoing animation is shown. If the call does not succeed (for example, video calls are not supported by the network, or the receiving device is not compatible), you are asked if you want to try a voice call or send a message instead.

To increase or decrease the volume during a call, press the volume key up or down.

Calls

3. To end the call, press the end key.

When you make a video call, you send a real-time video to the recipient of the call. The video image captured by the camera on the front of your phone is shown to the video call recipient.

To make a video call, you must have a USIM card and be connected to a WCDMA network. For availability of and subscription to video call services, contact your network operator or service provider. A video call can only be made between two parties. The video call can be made to a compatible phone or an ISDN client. Video calls cannot be made while another voice, video, or data call is active.

During extended operation such as an active video call and high speed data connection, the device may feel warm. In most cases, this condition is normal. If you suspect the device is not working properly, take it to the nearest authorised service facility.

3. Messaging

Write and send a text message

- Select Menu > Messaging > Create message > Message.
- Enter one or more phone numbers in the *To:* field. To retrieve a phone number from a memory, select Add.
- 3. Write your message in the *Text:* field.

To use a text template, scroll down, and select Insert.

4. Select Send.

Messaging

Write and send a multimedia message

- Select Menu > Messaging > Create message > Message.
- 2. Enter one or more phone numbers or e-mail addresses in the *To:* field. To retrieve a phone number or e-mail address from a memory, select Add.
- 3. Write your message. To add a file, scroll down, and select Insert.
- To view the message before sending it, select Options > Preview.
- 5. Select Send.

Only devices that have compatible features can receive and display multimedia messages. The appearance of a message may vary depending on the receiving device.

The wireless network may limit the size of MMS messages. If the inserted picture exceeds this limit, the device may make it smaller so that it can be sent by MMS.

To check availability and to subscribe to the multimedia messaging service (MMS, network service), contact your service provider.

Read and reply to a message

- To view a received message, select Show.
 To read the message later, select Menu > Messaging > Inbox.
- 2. To reply to a message, select **Reply**. Write the reply message.
- 3. Select Send.

Important: Exercise caution when opening messages. Messages may contain malicious software or otherwise be harmful to your device or PC. Messaging

E-mail application

To activate the e-mail settings, select Menu > Messaging > Message settings > E-mail messages.

To use the e-mail function on your phone, you need a compatible e-mail system.

You may receive the e-mail configuration settings as a configuration message.

E-mail setup wizard

Select **Menu** > *Messaging* > *E-mail* and enter your email address.

The e-mail application requires an internet access point without a proxy. WAP access points normally include a proxy and do not work with the e-mail application.

Write and send e-mail

You can write your e-mail message before connecting to the e-mail service; or connect to the service first, then write and send your e-mail.

 Select Menu > Messaging > Create message > Email.

If more than one e-mail account is defined, select the account from which you want to send the email.

2. Enter the recipient's e-mail address, write the subject, and enter the message. To attach a file to the e-mail, select **Options** > *Insert*.

To save your e-mail, select **Options** > *Save message*. To edit or continue writing your e-mail later, select *As draft message*.

3. To send the e-mail message, select Send.

To send an e-mail from a draft folder, select **Menu** > *Messaging* > *Drafts* and the desired message.

Read and reply to e-mail

- Select Menu > Messaging, the account name, and the desired message.
- To reply to an e-mail, select Options > Reply. Confirm or edit the e-mail address and subject, and create your reply.
- 3. To send the message, select Send.

To end the e-mail session, select **Options** > *Disconnect*.

Important: Exercise caution when opening messages. Messages may contain malicious software or otherwise be harmful to your device or PC.

Message settings

General settings

General settings are common for text and multimedia messages.

Select Menu > Messaging > Message settings > General settings and from the following options:

Save sent messages – to save the sent messages in the Sent items folder

Overwrite sent items — to overwrite the old sent messages with the new ones when the message memory is full. This setting is shown only if you selected Save sent messages.

Favourite recipient — to define easily available message recipients or groups when sending messages

Font size - to select the font size used in messages

Messaging

Graphical smileys – to replace character-based smileys with graphical ones

Text messages

The text message settings affect the sending, receiving, and viewing of text messages.

Select Menu > Messaging > Message settings > Text messages, and from the following options:

Delivery reports — to receive delivery reports about your messages (network service)

Message centres — to add a message centre that is required for sending text messages. You receive the phone number of the message centre from your service provider.

Msg. centre in use – to select the message centre in use

Message validity – to select the length of time for which the network attempts to deliver your message

Messages sent via — to select the format of the messages to be sent: *Text*, *Paging*, or *Fax* (network service)

Use packet data — to set GPRS as the preferred SMS bearer

Character support — to select how characters in the messages are sent. Select *Full* to send the characters as they are viewed.

Rep. via same centre — to allow the recipient of your message to send you a reply using your message centre (network service)

Multimedia messages

The message settings affect the sending, receiving, and viewing of multimedia messages. You may receive the configuration settings for multimedia messaging as a configuration message. See "Configuration settings service," p. 23. You can also Messaging

enter the settings manually. See "Configuration," p. 71.

Select Menu > Messaging > Message settings > Multimedia messages and from the following options:

Delivery reports — to receive delivery reports about your messages (network service)

MMS creation mode – to restrict or allow various types of multimedia to be added to messages

Image size in MMS – to set the image size in multimedia messages

Default slide timing – to define the default time between slides in multimedia messages

Allow MMS receptn. — to allow or block a multimedia message. If you select *In home network*, you cannot receive multimedia messages when outside your home network. The default setting is generally *In*

home network. The availability of this menu depends on your phone.

Incoming MMS msgs. – to decide how multimedia messages are retrieved. This setting is not shown if Allow MMS receptn. is set to No.

Allow adverts — to receive or reject advertisements. This setting is not shown if *Allow MMS receptn.* is set to *No*, or *Incoming MMS msgs.* is set to *Reject*.

Configuration sett. – to view the configurations that support multimedia messaging. Select a service provider, *Default*, or *Personal config.* for multimedia messaging. Select *Account* and a MMS account contained in the active configuration settings.

E-mail messages

The e-mail settings affect the sending, receiving, and viewing of e-mail. You may receive the settings as a configuration message. See "Configuration settings

Messaging

service," p. 23. You can also enter the settings manually. See "Configuration," p. 71.

Select Menu > Messaging > Message settings > Email messages, and from the following options:

New e-mail notif. — to select whether a notification is shown when new e-mail is received

Allow mail reception — to select whether e-mail can be received when you are outside your home network

Reply with orig. msg. – to select whether the original message is included in the reply

Image size in e-mail – to select the size of images in e-mail

Edit mailboxes – to add new mailboxes or edit one in use

You can save names and phone numbers (contacts) in the phone memory and in the SIM card memory.

Save names and phone numbers

Select Menu > Contacts > Names > Options > Add new contact. Names and numbers are saved in the phone memory.

Add contact details

Select Menu > Contacts > Settings, and ensure that the Memory in use is Phone or Phone and SIM. In the phone memory, you can save different types of phone numbers, a tone or a video clip, and short text items for a contact.

```
Contacts
```

Search for the contact to which you want to add a detail, and select **Details** > **Options** > *Add detail*. Select from the available options.

Search for a contact

Select Menu > Contacts > Names. Scroll through the list of contacts, or enter the first characters of the name you are searching for.

Copy or move contacts

You can move and copy contacts from the phone memory to the SIM card memory or vice versa. The SIM card can save names with one phone number attached to them.

To move or copy all contacts, select **Menu** > Contacts > Move contacts or Copy contacts. To move or copy contacts one by one, select **Menu** > *Contacts* > *Names.* Scroll to the contact, and select **Options** > *Move contact* or *Copy contact.*

To move or copy multiple contacts, select Menu > Contacts > Names. Scroll to a contact, and select Options > Mark. Mark the other contacts, and select Options > Move marked or Copy marked.

Edit contacts

Select **Menu** > *Contacts* > *Names.* Scroll to the contact, and select **Options** > *Edit*, and scroll to the details you want to change.

Groups

Select **Menu** > *Contacts* > *Groups* to arrange the names and phone numbers into caller groups with different ringing tones and group images.

Log

Contact settings

Select Menu > Contacts > Settings, and from the following options:

Memory in use – See "Add contact details," p. 51.

Contacts view – to select how the names and numbers in *Contacts* are displayed

Name display – to select whether the contact's first or last name is displayed first

Font size - to set the font size for the list of contacts

Memory status – to view the free and used memory capacity

5. Log

Select Menu > Log > Missed calls, Received calls, or Dialled numbers. To view your recent missed and received calls and dialled numbers chronologically, select All calls. To view the contacts to whom you most recently sent messages, select Msg. recipients. To view how many text and multimedia messages you have sent and received, select Menu > Log > Message log.

Note: The actual invoice for calls and services from your service provider may vary, depending on network features, rounding off for billing, taxes,

and so forth.

6. Settings

Profiles

Select **Menu** > *Settings* > *Profiles*, the desired profile, and from the following options:

Activate - to activate the selected profile

Settings

Personalise — to customise the profile with ringing tones, ringing volume, vibrating alerts, light effects, and message alert tones.

Timed — to set the profile to be active for a certain time up to 24 hours. After this time the previous profile becomes active.

Themes

Select **Menu** > Settings > Themes, and from the following options:

Select theme – to set a theme. A list of folders in *Gallery* opens. Open the *Themes* folder, and select a theme.

Theme downloads – to open a list of links to download more themes

Tones

Select Menu > Settings > Tones.

Select **Options** > *Save* to save the settings or *Cancel* to leave the settings unchanged.

If you select the highest ringing tone level, the ringing tone reaches its highest level after a few seconds.

Display

To personalise your display view, adjust the display settings.

Standby mode settings

Select **Menu** > *Settings* > *Display*, and from the following options:

Wallpaper – to set your phone to display an image or a slide as wallpaper in the standby mode. Select

Settings

Wallpapers > *Image* or *Slide set*, scroll to a folder, and select an image or slide set.

Active standby – to select whether the active standby mode is used.

Standby font colour – to select the colour for the texts on the display in the standby mode

Navigation key icons – to display the icons of the current scroll key shortcuts in the standby mode when active standby is off

Notification details – to show or hide details such as contact information, in both missed call and message received notifications

Screen saver — to display a shifting pattern or image when no function of the phone is used for a certain time

Power saver — to save battery power, a digital clock is displayed when no function of the phone is used for a certain time

Sleep mode — to save battery power, the display turns black when no function of the phone is used for a certain time

Font size — to set the font size for reading and writing messages, and viewing contacts and web pages

Operator logo — to set your phone to display or hide the operator logo, if available

Cell info display — to receive information from the network operator depending on the network cell used (network service)

Date and time

Select Menu > Settings > Date and time > Date & time settings, Date and time format, or Auto-update of time (network service) to change the time, time zone, and date settings. Settings

My shortcuts

Personal shortcuts give you quick access to frequently used functions of the phone.

Left selection key

To select a function from the list, select **Menu** > Settings > My shortcuts > Left selection key.

Right selection key

To select a function from the list, select **Menu** > Settings > My shortcuts > Right selection key.

Navigation key

To assign other phone functions from a predefined list to the scroll key, select **Menu** > Settings > My shortcuts > Navigation key

Active standby key

To select a function from the list, select **Menu** > Settings > My shortcuts > Active standby key.

Sync and backup

Select Menu > Settings > Sync and backup, to synchronise or copy data between your phone and another phone or remote server (network service).

Phone switch — to synchronise or copy data between two phones

Create backup — to create a backup of selected content and store it to your phone memory

Restore backup — to restore content previously backed up on your phone memory

Server sync— to synchronise data between your phone and a server

Settings

Connectivity

You can connect your phone to a compatible device using Bluetooth wireless technology or a USB data cable.

Connecting with Bluetooth

This device is compliant with Bluetooth Specification 2.0 supporting the following profiles: advanced audio distribution, audio video remote control, dial-up networking, file transfer, generic access, generic object exchange, generic audio/video distribution9, hands-free, headset, object push, phonebook access, serial port, service discovery application, and SIM access. To ensure interoperability between other devices supporting Bluetooth technology, use Nokia approved enhancements for this model. Check with the manufacturers of other devices to determine their compatibility with this device.

Bluetooth technology allows you to connect your phone to a compatible Bluetooth phone within a 10

meter (33 feet) range. Since phones using Bluetooth technology communicate using radio waves, your phone and the other phones do not need to be in direct line of sight, although the connection can be subject to interference from obstructions, such as walls, or from other electronic devices.

Features using Bluetooth technology increase the demand on battery power and reduce the battery life.

Activate a Bluetooth connection

Select Menu > Settings > Connectivity > Bluetooth > On.

Select *My phone's name*, to set or change the name of your phone that is visible to other Bluetooth devices.

indicates that Bluetooth is active. Remember that Bluetooth uses battery power and may reduce battery life.

Connect a Bluetooth device

Select Menu > Settings > Connectivity > Bluetooth > Connect audio enhan. and the device that you want to connect to.

View a list of your Bluetooth connections

Select Menu > Settings > Connectivity > Bluetooth > Active devices.

Send data to a Bluetooth device

Select Menu > Settings > Connectivity > Bluetooth > Paired devices. Select the device that you want to connect to, and enter a passcode. To connect to another device, you must agree on a passcode (up to 16 characters) to use. You only use the passcode once to set up the connection and begin transferring data. If you do not see the device on the list, select New to list Bluetooth devices in range.

Hide your Bluetooth device from others

Select Menu > Settings > Connectivity > Bluetooth > My phone's visibility. Select Hidden, or turn off Bluetooth completely.

Synchronise from a compatible PC

To synchronise data from calendar, notes, and contacts, install the Nokia PC Suite software for your phone on a compatible PC. Use Bluetooth wireless technology or a USB data cable, for the synchronisation, and start the synchronisation from the PC.

Synchronise from a server

To use a remote internet server, subscribe to a synchronisation service. For more information and the settings required for this service, contact your service provider.

USB data cable

You can use the USB data cable, CA-101, to transfer data between the phone and a compatible PC or a printer supporting PictBridge. You can also use the USB data cable with Nokia PC Suite.

Ask on conn. — to set your phone to ask whether to accept a connection

PC Suite – to use your phone to interact with applications on a PC that has Nokia PC Suite

Printing & Media – to use your phone with a PictBridge compatible printer, or to connect your

phone to a PC to synchronise it with Windows Media Player (music, video)

Data storage – to connect to a PC that does not have Nokia software and use your phone for data storage

To change the USB mode, select **Menu** > Settings > Connectivity > USB data cable > Ask on conn., PC Suite, Printing & Media, or Data storage.

∎ Call

Select **Menu** > *Settings* > *Call*, and from the following options:

Call divert — to divert your incoming calls (network service). You may not be able to divert your calls if some call barring functions are active. See *Call barring service* in "Access codes," p. 15.

Anykey answer > On - to answer an incoming call by briefly pressing any key, except the power key, the left and right selection keys, or the end key

Settings

Automatic redial — to make a maximum of 10 attempts to connect the call after an unsuccessful call attempt

Voice clarity – to enhance speech intelligibility, especially in noisy environments

Speed dialling – See "Speed dialling," p. 35.

Call waiting — to receive a notification when you have an incoming call while you are on a call (network service).

Summary after call — to display the approximate duration and cost (network service) of the call after each call

Send my caller ID — to show your phone number to a person you are calling (network service). To use the setting agreed upon with your service provider, select Set by network.

Video sharing - to define video sharing settings

Phone

Select **Menu** > *Settings* > *Phone*, and from the following options:

Language settings — to set the display language of your phone, select *Phone language. Automatic* selects the language according to the information on the SIM card. To select the USIM card language, select *SIM language*. To set a language for the voice playback, select *Recognition lang.*

Memory status – to view the amount of used and available phone memory

Automatic keyguard – See "Access codes," p. 15.

Security keyguard – See "Access codes," p. 15.

Voice recognition — to make a phone call by saying the name that is saved in Contacts.

Flight query – See "Flight profile," p. 32.

Settings

Welcome note – to write the note that is shown when the phone is switched on

Phone updates — to update your phone software if there is an update available

Network mode – to select dual mode (UMTS or GSM). You cannot access this option during an active call.

Operator selection — to set the phone to automatically select one of the cellular networks available in your area, select Automatic. With *Manual*, you can select a network that has a roaming agreement with your service provider.

Help text activation – to select whether the phone shows help texts

Start-up tone — to select whether the phone plays a tone when it is switched on

Enhancements

This menu or the following options are shown if the phone is, or has been, connected to a compatible mobile enhancement.

Select Menu > Settings > Enhancements. Select an enhancement and, depending on the enhancement, from the following options:

Default profile – to select the profile that you want to be automatically activated when you connect to the selected enhancement

Automatic answer — to set the phone to answer an incoming call automatically after 5 seconds. If Menu > Settings > Tones > Incoming call alert is set to Beep once or Off, automatic answer is off.

Configuration

You can configure your phone with settings that are required for certain services to function correctly.

Settings

Your service provider may also send you these settings as a configuration message.

Select **Menu** > *Settings* > *Configuration* and from the following options:

Default config. sett. — to view the service providers saved in the phone. To set the configuration settings of the service provider as default settings, select **Options** > Set as default.

Activ. def. in all apps. — to activate the default configuration settings for supported applications

Preferred access pt. — to view the saved access points. Scroll to an access point, and select **Options** > Details to view the name of the service provider, data bearer, and packet data access point or GSM dial-up number.

Connect to support – to download the configuration settings from your service provider

Personal config. sett. — to add new personal accounts for various services manually, and to activate or delete them. The parameters differ according to the selected service type.

Restore factory settings

To reset some of the menu settings to their original values, select **Menu** > *Settings* > *Rest. factory sett.* Enter the security code. The names and phone numbers saved in *Contacts* are not deleted.

Phone software updates

Your service provider may send phone software updates over the air directly to your device. This option may not be available, depending on your phone.

PC connectivity

Warning: If you install a software update, you cannot use the device, even to make emergency calls, until the installation is completed and the device is restarted. Be sure to back up data before accepting installation of an update.

PC connectivity 7.

You can send and receive e-mail, and access the internet when your phone is connected to a compatible PC through a Bluetooth connection or a data cable. You can use your phone with a variety of PC connectivity and data communications applications.

Nokia PC Suite

With Nokia PC Suite, you can synchronise contacts, calendar, notes, and to-do notes between your phone and a compatible PC or a remote internet server (network service). You may find more information and PC Suite at www.nokia.com/support or your local Nokia website.

Data communication applications

For information on using a data communication application, refer to the documentation provided with it.

Making or answering phone calls during a computer connection is not recommended, as it might disrupt the operation.

For better performance during data calls, place the phone on a stationary surface with the keypad facing downward. Do not move the phone by holding it in your hand during a data call. Media

8. Media

You can take photos or record live video clips with the built-in 2.0-megapixel camera.

Camera

The camera produces pictures in .jpg format, and you can digitally zoom up to eight times.

<u>Take an image</u>

Select Menu > Media > Camera > Capture. To take another image, select Back; to send the image as a multimedia message, select Send. Your phone saves the image in *Gallery* > *Images*.

To zoom in or out, press the volume key up or down.

Video

You can record video clips in .3gp or .mp4 format.

To set the quality of your video clips, select **Menu** > Media > Video > **Options** > Settings > Video clip quality > High, Normal, or Basic.

To select the file size limit, select Menu > Media > Video > Options > Settings > Video clip length.

Record a video clip

Select **Menu** > *Media* > *Video* > **Record**. To zoom in or out, press the volume key up or down.

Music player

Your phone includes a music player for listening to music tracks, recordings, or other MP3, MPEG4, AAC, eAAC+, or WMA music files that you have transferred

```
Media
```

to the phone with the Nokia Audio Manager application, which is part of Nokia PC Suite. To open the music player, select Menu > Media > Music player.

Radio

The FM radio depends on an antenna other than the wireless device antenna. A compatible headset or enhancement needs to be attached to the device for the FM radio to function properly.

Warning: Listen to music at a moderate level. Continuous exposure to high volume may damage your hearing. Do not hold the device near your ear when the loudspeaker is in use, because the volume may be extremely loud.

Select Menu > Media > Radio. To use the graphical keys 🛦 , 🔻 , < , or 🏁 on the display, scroll left or right to the key you want, and select it.

Save stations

- To search for radio stations, select and hold *◄* or
 In the radio frequency in 0.05 MHz steps, press *◄* or *▷*.
- 2. To save the station to a memory location, choose **Options** and select *Save station*.
- To name a saved station, choose Options > Stations, select the station, Options > Rename and enter a name.

Listen

- 1. Select Menu > Media > Radio.
- To scroll to the radio station you want, select ▲ or ▼, or press the headset key.
- 3. To select a radio station location, briefly press the corresponding number keys.
- Select Options and one of the following options: Switch off – to turn off the radio

Media

Save station — to save a new radio station by entering the station's name. This option is only displayed when the selected radio station is not saved.

Stations – to select a saved station from the list. It is only possible to enter the station list if the selected station has been previously saved.

Search all stations – to search for all radio stations that the phone can receive

Set frequency – to enter the frequency of the radio station.

Settings – to change the radio default settings.

Station directory – to access Visual Radio web pages.

Visual Radio – to set whether the Visual Radio application is used. Some radio channels may send text or graphical information that you can view using Visual Radio.

Enable visual service — to set whether the Visual Radio application starts automatically when you turn on the radio

You can normally make a call or answer an incoming call while listening to the radio. During the call, the volume of the radio is muted.

When an application using a packet data or HSCSD connection is sending or receiving data, it may interfere with the radio.

9. Battery and charger information

Your device is powered by a rechargeable battery. The battery intended for use with this device is BL-4U. This device is intended for use when supplied with power from the following chargers: AC-3. The battery can be charged and discharged hundreds of times, but it will eventually wear out. When the talk and standby times are noticeably

shorter than normal, replace the battery. Use only Nokia approved batteries, and recharge your battery only with Nokia approved chargers designated for this device. Use of an unapproved battery or charger may present a risk of fire, explosion, leakage, or other hazard.

If a battery is being used for the first time or if the battery has not been used for a prolonged period, it may be necessary to connect the charger, then disconnect and reconnect it to begin charging the battery. If the battery is completely discharged, it may take several minutes before the charging indicator appears on the display or before any calls can be made.

Always switch the device off and disconnect the charger before removing the battery.

Unplug the charger from the electrical plug and the device when not in use. Do not leave a fully charged battery connected to a charger, since overcharging may shorten its lifetime. If left unused, a fully charged battery will lose its charge over time.

Always try to keep the battery between 15°C and 25°C (59°F and 77°F). Extreme temperatures reduce the capacity and lifetime of the battery. A device with a hot or cold battery may not work temporarily. Battery performance is particularly limited in temperatures well below freezing.

Do not short-circuit the battery. Accidental short-circuiting can occur when a metallic object such as a coin, clip, or pen causes direct connection of the positive (+) and negative (-) terminals of the battery. (These look like metal strips on the battery.) This might happen, for example, when you carry a spare battery in your pocket or purse. Shortcircuiting the terminals may damage the battery or the connecting object.

Do not dispose of batteries in a fire as they may explode. Batteries may also explode if damaged. Dispose of batteries according to local regulations. Please recycle when possible. Do not dispose as household waste.

Do not dismantle, cut, open, crush, bend, deform, puncture, or shred cells or batteries. In the event of a battery leak, do not allow the liquid to come in contact with the skin or

eyes. In the event of such a leak, flush your skin or eyes immediately with water, or seek medical help.

Do not modify, remanufacture, attempt to insert foreign objects into the battery, or immerse or expose it to water or other liquids.

Improper battery use may result in a fire, explosion, or other hazard. If the device or battery is dropped, especially on a hard surface, and you believe the battery has been damaged, take it to a service centre for inspection before continuing to use it.

Use the battery only for its intended purpose. Never use any charger or battery that is damaged. Keep your battery out of the reach of small children.

Nokia battery authentication guidelines

Always use original Nokia batteries for your safety. To check that you are getting an original Nokia battery, purchase it from an authorised Nokia dealer, and inspect the hologram label using the following steps:

Successful completion of the steps is not a total assurance of the authenticity of the battery. If you have any reason to believe that your battery is not an authentic, original Nokia battery, you should refrain from using it, and take it to the nearest authorised Nokia service point or dealer for assistance. Your authorised Nokia service point or dealer will inspect the battery for authenticity. If authenticity cannot be verified, return the battery to the place of purchase.

Authenticate hologram

1. When you look at the hologram on the label, you should see the Nokia connecting hands symbol from one angle and the Nokia Original Enhancements logo when looking from another angle.

2. When you angle the hologram left, right, down and up, you should see 1, 2, 3 and 4 dots on each side respectively.

What if your battery is not authentic?

If you cannot confirm that your Nokia battery with the hologram on the label is an authentic Nokia battery, please do not use the battery. Take it to the nearest authorised Nokia service point or dealer for assistance. The use of a battery that is not approved by the manufacturer may be dangerous and may result in poor performance and damage to your device and its enhancements. It may also invalidate any approval or warranty applying to the device.

To find out more about original Nokia batteries, visit www.nokia.com/battery.

Care and maintenance

Your device is a product of superior design and craftsmanship and should be treated with care. The following suggestions will help you protect your warranty coverage.

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will corrode electronic circuits. If your device does get wet, remove the battery, and allow the device to dry completely before replacing it.
- Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.
- Do not store the device in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.
- Do not store the device in cold areas. When the device returns to its normal temperature, moisture can form inside the device and damage electronic circuit boards.

Care and maintenance

- Do not attempt to open the device other than as instructed in this guide.
- Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device.
- Do not paint the device. Paint can clog the moving parts and prevent proper operation.
- Use a soft, clean, dry cloth to clean any lenses, such as camera, proximity sensor, and light sensor lenses.
- Use only the supplied or an approved replacement antenna. Unauthorised antennas, modifications, or attachments could damage the device and may violate regulations governing radio devices.
- Use chargers indoors.
- Always create a backup of data you want to keep, such as contacts and calendar notes.
- To reset the device from time to time for optimum performance, power off the device and remove the battery.

These suggestions apply equally to your device, battery, charger, or any enhancement. If any device is not working properly, take it to the nearest authorised service facility for service.

Disposal

The crossed-out wheeled-bin symbol on your product, literature, or packaging reminds you that all electrical and electronic products,

batteries, and accumulators must be taken to separate collection at the end of their working life. This requirement applies to the European Union and other locations where separate collection systems are available. Do not dispose of these products as unsorted municipal waste.

By returning the products to collection you help prevent uncontrolled waste disposal and promote the reuse of material resources. More detailed information is available from the product retailer, local waste authorities, national producer responsibility organizations, or your local Nokia representative. For the product Eco-Declaration or instructions for returning your obsolete product, go to country-specific information at www.nokia.com.

Additional safety information

Small children

Your device and its enhancements may contain small parts. Keep them out of the reach of small children.

Operating environment

This device meets RF exposure guidelines when used either in the normal use position against the ear or when positioned at least 1.5 centimeters (5/8 inch) away from the body. When a carry case, belt clip, or holder is used for body-worn operation, it should not contain metal and should position the device the above-stated distance from your body.

To transmit data files or messages, this device requires a quality connection to the network. In some cases, transmission of data files or messages may be delayed until such a connection is available. Ensure the above separation distance instructions are followed until the transmission is completed. Parts of the device are magnetic. Metallic materials may be attracted to the device. Do not place credit cards or other magnetic storage media near the device, because information stored on them may be erased.

Medical devices

Operation of any radio transmitting equipment, including wireless phones, may interfere with the functionality of inadequately protected medical devices. Consult a physician or the manufacturer of the medical device to determine if they are adequately shielded from external RF energy or if you have any questions. Switch off your device in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

Implanted medical devices

Manufacturers of medical devices recommend that a minimum separation of 15.3 centimeters (6 inches) should be maintained between a wireless device and an implanted

medical device, such as a pacemaker or implanted cardioverter defibrillator, to avoid potential interference with the medical device. Persons who have such devices should:

- Always keep the wireless device more than 15.3 centimeters (6 inches) from the medical device when the wireless device is turned on.
- Not carry the wireless device in a breast pocket.
- Hold the wireless device to the ear opposite the medical device to minimise the potential for interference.
- Turn the wireless device off immediately if there is any reason to suspect that interference is taking place.
- Read and follow the directions from the manufacturer of their implanted medical device.

If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

Hearing aids

Some digital wireless devices may interfere with some hearing aids. If interference occurs, consult your service provider.

Vehicles

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles such as electronic fuel injection systems, electronic antiskid (antilock) braking systems, electronic speed control systems, and air bag systems. For more information, check with the manufacturer, or its representative, of your vehicle or any equipment that has been added.

Only qualified personnel should service the device or install the device in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty that may apply to the device. Check regularly that all wireless device equipment in your vehicle is mounted and operating properly. Do not store or carry flammable liquids, gases, or explosive materials in the same compartment as the device, its parts, or enhancements. For vehicles equipped with an

air bag, remember that air bags inflate with great force. Do not place objects, including installed or portable wireless equipment in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

Using your device while flying in aircraft is prohibited. Switch off your device before boarding an aircraft. The use of wireless teledevices in an aircraft may be dangerous to the operation of the aircraft, disrupt the wireless telephone network, and may be illegal.

Potentially explosive environments

Switch off your device when in any area with a potentially explosive atmosphere, and obey all signs and instructions. Potentially explosive atmospheres include areas where you would normally be advised to turn off your vehicle engine. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death. Switch off the device at refuelling points such as near gas pumps at service stations. Observe restrictions on the use of radio equipment

in fuel depots, storage, and distribution areas; chemical plants; or where blasting operations are in progress. Areas with a potentially explosive atmosphere are often, but not always, clearly marked. They include below deck on boats, chemical transfer or storage facilities and areas where the air contains chemicals or particles such as grain, dust, or metal powders. You should check with the manufacturers of vehicles using liquefied petroleum gas (such as propane or butane) to determine if this device can be safely used in their vicinity.

Emergency calls

Important: This device operates using radio signals, wireless networks, landline networks, and user-programmed functions. If your device

supports voice calls over the internet (internet calls), activate both the internet calls and the cellular phone. The device will attempt to make emergency calls over both the cellular networks and through your internet call provider if both are activated. Connections in all conditions cannot be guaranteed. You should never rely solely on any wireless

device for essential communications like medical emergencies.

To make an emergency call:

- If the device is not on, switch it on. Check for adequate signal strength. Depending on your device, you may also need to complete the following:
 - Insert a SIM card if your device uses one.
 - Remove certain call restrictions you have activated in your device.
 - Change your profile from offline or flight profile mode to an active profile.
- 2. Press the end key as many times as needed to clear the display and ready the device for calls.
- 3. Enter the official emergency number for your present location. Emergency numbers vary by location.
- 4. Press the call key.

When making an emergency call, give all the necessary information as accurately as possible. Your wireless device

may be the only means of communication at the scene of an accident. Do not end the call until given permission to do so.

Certification information (SAR)

This mobile device meets guidelines for exposure to radio waves.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The exposure guidelines for mobile devices employ a unit of measurement known as the Specific Absorption Rate or SAR. The SAR limit stated in the ICNIRP guidelines is 2.0 watts/kilogram (W/kg) averaged over 10 grams of tissue. Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The actual SAR level of an operating device can be below the

maximum value because the device is designed to use only the power required to reach the network. That amount changes depending on a number of factors such as how close you are to a network base station. The highest SAR value under the ICNIRP guidelines for use of the device at the ear is 0.98 W/kg for RM-364, 0.86 W/kg for RM-365, and 0.69 W/kg for RM-366.

Use of device accessories and enhancements may result in different SAR values. SAR values may vary depending on national reporting and testing requirements and the network band. Additional SAR information may be provided under product information at www.nokia.com.
