Epson Projector Control User's Guide

The Epson[®] Projector Control software lets you control the projector over a wired or wireless network from a computer running Windows[®] 2000 SP4, XP SP2 32-bit, or Windows Vista[™] 32-bit. It enables you to perform operations, such as turning the projector on/off and switching sources, from your computer without using the projector's remote control.

Note: Macintosh® systems are not supported.

To install the Projector Control software, double-click the installer icon and follow the on-screen instructions.

Make sure the following requirements are met before starting the Projector Control software:

- The Projector Control software is installed on your computer
- Your computer and the projector are connected to the same network and you can access the projector
- The Network setting in the projector's menu is set to On

Connecting to the Projector

 In Windows, click Start > Programs > EPSON Projector > Projector Control. You see a window like this:

Project	or Ca	ntrol ¥1.00	[Disconnec	t]					×
le <u>T</u> ool	Help								
Powe	er	Computer1	Computer2	EasyMP	Video	S-Video	A/VMute	Freeze	1
							Volume	+	

2. Select Settings from the Tool menu. You see a window like this:

Settings	×
Startup	
Register at startup	
Projector IP Address	
0.0	. 0 . 0
Monitor Password	
Advanced Mode	Simple Mode
Computer1	Computer
Computer2	
🗹 EasyMP	
Video	Video
✓ S-Video	
A/V Mute	A/V Mute
Volume	Volume
Freeze	Freeze
CC(Closed Caption)	CC(Closed Caption)
	OK Cancel

- 3. Select **Register at startup** if you want the Projector Control software to start automatically when your computer starts up.
- 4. Enter the IP address for the projector in the Projector IP Address field.

You cannot connect to the projector without entering a Projector IP Address. See your projector's documentation for information on obtaining your projector's IP address.

- 5. Enter the Web Control password or the password that was set using the Epson EMP Monitor Utility in the Monitor Password field. If you didn't set a password, don't enter anything.
- 6. Uncheck the boxes for the buttons that you do not want to display in Advanced and Simple Mode.
- 7. Click OK to save and close the settings window or Cancel to discard your changes and close the settings window.

Using Epson Projector Control

There are two modes for the main screen, Advanced Mode and Simple Mode. Choose Simple Mode to minimize the number of button options.

	Project	or Co	ntrol ¥1.00	[Disconnec	t]					_ 🗆 🗙

Freeze	Turns the Freeze function on/off on the projector.		
Volume –	Turns the volume down on the projector.		
Volume +	Turns the volume up on the projector.		
•	Switches between Advanced Mode and Simple Mode.		

Solving Connection Problems

If you can't connect to the projector, check the following:

- Make sure that the network cable is correctly connected to your computer and projector.
- Check the network settings on the projector.
- Make sure that you entered the correct IP address for the projector you're trying to connect to. See your projector's documentation for information on obtaining the projector's IP address.
- Make sure that you entered the correct Monitor Password or Web Control Password for the projector that you're connecting to. If you didn't set a password, don't enter anything.
