Up To 6*
* Requires Optional
Cordless Handset.

Not just an All-in-One Unit, but a Multi Communication Centre

The KX-MB2062CXB and KX-MB2061CXB are new-concept multifunction printers. This next generation MFP offers Print, Copy, Scan and Fax capability as well as many new state of the art features, such as a built-in telephone answering system and standard cordless telephone system with DECT technology.

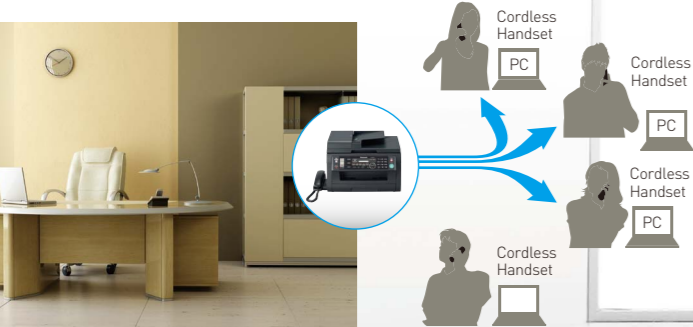

- **Saving Office Space**
Multifunctional "9-in-1"

Almost all the equipment needed by a small office is combined into this single machine. It gives you 24 ppm high-speed printing and 24 cpm copying, network colour scanning, Super G3 faxing, networking, a digital cordless telephone, an intercom, a telephone, and a digital answering machine. Naturally, this saves office space to make your business more efficient.

- **Cutting Office Costs**
Built-in DECT Phone System

Panasonic's DECT comes as standard equipment, so there's no more need to purchase a separate cordless phone. Up to six phones can be added, so everyone in the office can install a cordless phone at their own desk and use it as an extension line. In addition to reducing costs, the high quality of Panasonic's DECT phone gives you business conversations with great, clear sound.

- **Stay in Touch Even While You're Away from the Office**
Remote Voice and Fax Management System

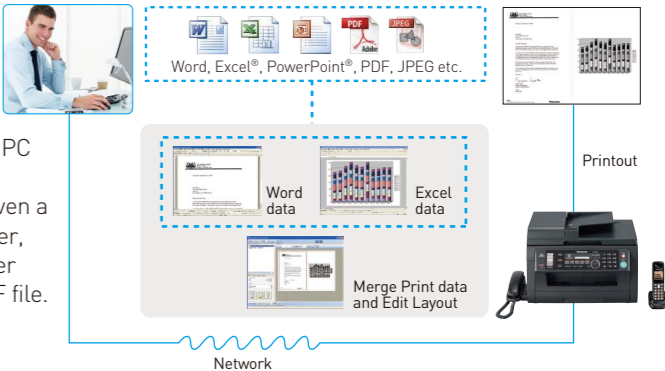

Utilising the power of the Internet, users can have their voice messages and received fax documents automatically forwarded to Email. Great for mobile users, the new KX-MB2062CXB and KX-MB2061CXB are able to convert received voice messages into a standard .wav file and received fax documents into PDF format, both of which are accessible on most Smartphones.*1

More Excellent Features!

Data Merge and Print Easy Print Utility

The Easy Print Utility lets you merge and print files created with different applications. You can check the file on a PC before printing, or edit it by rearranging pages or changing them to a 2-in-1 or even a 16-in-1 format. You can also add a header, footer or watermark before printing. After editing, you can save the image as a PDF file. This greatly reduces the number of trial prints and misprints.

Diverse Copy Layout Editing Convenient Copy Functions

Quick ID Copy

Copy both sides of one or more ID or business cards consecutively, and then print onto a single page in the 2-in-1, 4-in-1 or 8-in-1 format. This reduces paper consumption and simplifies information management.

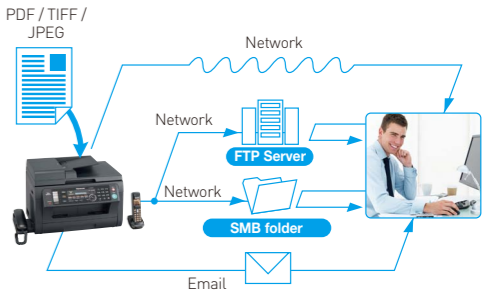

Image Repeat

Copy one original and print it repeatedly on a single page in the 2-in-1, 4-in-1 or 8-in-1 format. This makes it easy to produce items like tickets.

Easy Scanning Network Colour Scanner Function

Documents can be easily scanned into a PC in colour. Scanned data can also be sent in the appropriate data format directly to the bundled OCR software on a PC, to easily convert it to editable text without requiring any PC operation. Scanned data can also be saved to a SMB folder (Windows share folder) or an FTP server, without using a PC, and then sent by Email.

Reducing Unnecessary Printouts Incoming Fax Web Preview Function*

You can read the faxes you receive on a PC first, and then decide whether you want to print them, save them to the PC, or delete them. This previewing ability minimises wasteful printouts.

* LAN connection only
