### Description

The CD74AC153 and CD74ACT153 are dual 4-input multiplexers that utilize the Harris Advanced CMOS Logic technology. One of the four sources for each section is selected by the common Select inputs, S0 and S1. When the Enable inputs ( $\overline{1E}$ ,  $\overline{2E}$ ) are HIGH, the outputs are in the low state.

### NOTES:

- Test one output at a time for a 1-second maximum duration. Measurement is made by forcing current and measuring voltage to minimize power dissipation.
- Test verifies a minimum 50Ω transmission-line-drive capability at 85°C, 75Ω at 125°C.
