April 13, 2020 Verified purchase As simple as it gets, very slow so its perfect for the toddler thats just learning how to use one. My

son is three now and got it on his third birthday. When he was just 2 he was terrified of these because he didnt know how it worked. He LOVES this thing, uses both doors and drives around like hes the king of the world. For the price, I couldnt be happier. Assembly was simple and straight forward. If youre deciding whether you should buy it or not, stop. Just get it! Trust me, youll be glad you did.http://www.dulichhoaha.com/fckeditor_data/canon-cameras-service-manual.xml

Got it as a birthday present for my 3 year old, he loved it! Battery lasted the whole time we were out and we were out for a while. See more Reviewed by Thumbsup Thumbsup Helpful. Yes 0 No 0 Report Average Rating 5.0 out of 5 stars Great Bday Gift. Great Value November 12, 2018 I bought it for my Godson as a bday gift and let me tell you, its was really easy to put together and once charged my Godson drove it for a good few of hours before the car started to slowed down. My Godson is very happy and so am I. See more Reviewed by Bella Bella Helpful. Yes 0 No 0 Report Average Rating 5.0 out of 5 stars Liam Car July 2, 2018 Bought this for my grandson for his 3rd Birthday and he loves this car so much. He plays with this car everyday wants us to take him outside to play with his car. I love this car he gets so many compliments with his car.It was easy to built too. See more Reviewed by Millie Millie Helpful. Yes 0 No 0 Report Average Rating 4.0 out of 5 stars Satisfied in, PA. July 27, 2020 Verified purchase Our grandson loves this car. See more Reviewed by Charles Charles Helpful. Yes 0 No 0 Report Average Rating 4.0 out of 5 stars December 13, 2017 My son loves it, but Its slow and has no traction unless its on the pavement. I ordered a second motor, gear wheel, and battery from Huffy to upgrade this cool looking car. I didnt have to modify the body of the car, but I did have to reverse the polarity of the second motor, and wire the batteries in series. It now goes twice as fast, and goes offroad. 0 out of 5 stars Didnt hold a charge June 12, 2017 I purchased this car on 61017. I let it charge for a whole day and the car barely made it out of my driveway. I allowed a few more hours of charging and it died again. I will say the overall look of the car is really cool looking. I have reached out to huffy with no response, so we ordered the fisher price power wheel. This one is going back to the store today. See more Reviewed by seemykidssmile seemykidssmile Helpful. Yes 52 No 26 Report Average Rating 2.0 out of 5 stars Needs many improvments August 24, 2017 First off, if you have a flat concrete area to ride its OK. Leaving our driveway for the yard, which is very flat, is a no go. This thing has zero traction, when it does get traction it is so under powered that it cannot go. It will barely pull my son. Now, I realize they need to be slow so kids dont get hurt. That said it needs to be 12 volt and at least 2wd not one wheel peel. We havent even ran the battery down the first time and now it wont even go forward. It would make a cool project if you could buy a second gearbox and the wheel adapter. As it is its a waste of money. Also the red engine button that turns off and on the motor was a poor idea. See more Reviewed by Bear Bear Helpful. Yes 16 No 9 Report Average Rating 1.0 out of 5 stars Seriously, Do Not Buy This. January 13, 2018 I wish I could post the look on my two year olds face when this didnt work on Christmas morning. Assembly was a breeze but it was all downhill from there. After seeing Lightning McQueen under the tree and jumping for joy, our son nearly cried when he drove the car two feet only for the drive wheel to disengage. Time and time again, the drive wheel would slip before completing a full rotation. My husband was able to wedge a wooden block between the drive axle and motor and the car was finally functional.

After 2 minutes of fun, the battery, that we had charged continuously for more than 8 hours, died and wouldnt recharge. This product is awful and must be avoided. The Power Wheel Lightning McQueen could be better, weve had good experiences with our Paw Patrol quad. As for replacing

this hunk of junk, we bought a Rollplay VW bus and are highlyimpressed. Fortunately, our son loves buses so it wasnt too disappointing for him in the end. We just told him his McQueen car broke down and the mechanic couldnt fix it. See more Reviewed by Anne Anne Helpful. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. David T. Kreal 5.0 out of 5 stars This made my 4 year old happy. She then tried to run me over. Everyone wins.My daughter is thrilled with her little toy. I highly recommend it. It charges just fine. Im thinking maybe everyone who gave a bad review had a bad cell in their batteries, I have had no problems whatsoever. Im very pleased with my purchase.I do know that our original battery very

clearly stated the battery must remain upright at all times or it would potentially leak battery acid, so I am not pleased with this not returnable purchase. Won't work and there is no option of contacting the seller. I'm frustrated. The only thing it was missing was a battery, so we decided to purchase this one. It worked perfectly. It holds a charge as long as expected, and recharges just fine. My daughter has already had hours of enjoyment out of her new 4 wheeler, and this battery has been recharged at least half a dozen times so far. She rides it every day, and this battery has given us no problems. Although it works as indicated, VERY disappointed in the performance of the quad itself. If you're looking for a toy quad, better to get a 12 volt one. Charger is fully manual. Do NOT let it over charge else you'll cook the batteries. We were not able to return it or exchange it due to not being able to mail batteries back to the company. We have given the battery to friends that could use it. We were very frustrated, but thankful that we could provide it to a family that could use it. The batteries that came with our toy no longer had any life in them and no longer worked at all. I came to Amazon and found these batteries. My Harley requires the two 6 volt batteries pictured.

I ordered two and the vehicle works beautifully now. My kids can't get enough of it. I felt the need to comment because one previous reviewer indicated that this battery did not work in her Harley toy. It works perfectly in ours. Did Fisher Price put out two types of Harley Power Wheels. I don't know, but I know that if you are careful to look at the pictures here and compare them with the toy you have at your house, you can see that they match. I'm a happy Harley owner and this battery works at my house. My only issue is that my vehicle runs beautifully for a long while and then it seems to need a rest. It slows down to a crawl and seems to be out of life. To most of us, that would indicate that it needs to be recharged. Yet when my children get off of it for the night and come back to it the next day, it goes again for a good length of time although not as long as the previous day. After the second day of use, it does need to be recharged. I only mention this because I'm under the impression that this type of battery needs to be fully empty of a charge before being put on the charger in order to prolong the life of the battery. Could just be my older Power Wheels because I have no experience with a brand new machine. Still, I'm totally happy with my purchase. Those are no longer available but these red batteries were the same exact dimensions and it was an easy matter to convert the wiring to work. Kids are now having a ball with their toy car again. Instead of having to get rid of such a cherished toy for my little ones, bought this battery for endless hours of fun! Don't get screwed out of your hard earned cash like I did. For the best experience on our site, be sure to turn on Javascript in your browser. Sorry your version of browser is not supported. Please try to upgrade it. One 6 volt battery and an easy to use charger keep the engine running. See more Huffy ride ons available only at Walmart.

Durable frame has the total Minnie look plus a realistic dashboard for a great driving experience. Engine sounds, working headlights, a horn that honks are part of the electronics making the ride all the more fun. Fast, easy assembly means more time for fun. Snap in the wheels, connect the battery, install seat and windshield, then snap in mirrors you're done and ready to go. Rides 2.5 m.p.h. forward or reverse. Just press the power switch to turn it on. The floor pedal makes it easy to accelerate in forward or reverse. It's simple to stop, just take the foot off the accelerator pedal. No need for foot brake. Real working doors are part of the fun. An easy to use charger is included. All the bows and all the dots add up to one fun ride to enjoy over and over again. Push the pedal for maximum fun, from Huffy. Retailer price may vary.
