Canopus ProCoder is not only an easy program to use, but it provides superb quality for MPEG2 encoding. On some NOTE This part of the guide is mostly textbased because the options are easily explained by words. Start Procoder. Care center colgan contract managed physician surgery, Staples office supply statement, Sportsmans guide shipping, Equipment evaluation report, Drag cave guide. Reload to refresh your session. Reload to refresh your session. The engine operation is resolution independent and frame rate independent to enable future support of new video and audio formats. Aspect ratios are converted automatically in realtime. MPEG2, DV and uncompressed video clips seamlessly edit and mix without requiring rendering, while uncompressed animations with alphachannel information key in realtime. All of this is possible with Edius 2.0, and all with Canopuss renowned realtime DV output processing technology.

We know there are plenty of differences when it comes to used equipment and quite often, choosing between different pieces is difficult, especially when the equipment is not sitting right in front of you. Well, what if you were able to see a piece of equipment before you purchased it. Not just a

picture from the manufacturers website, but the actual piece of equipment you would receive. You can zoom in close to see the labels with the serial number or zoom out to see the overall condition of the equipment. Its like having the store come to you. Thank You! We will be contacting you shortly. Therefore, by applying these stickers on your standard keyboard you can immediately start editing with Canopus EDIUS software. If not, do not hesitate contact us with any of yourFor that purpose, please find our contact info in the legal notice. Why fire if it is not warm us. Why this laughter as lying around.Why fire if it is not warm us. Why this laughter as lying around.With EDIUS users can mix and match is being performed on the same format, codec, resolution, scale, working with with the native quality of the material in real time. Henceforth, the new version of EDIUS 5.5, this is true for the AVCHD format. AVCHD Advanced Video Codec High Definition is a codec for recording and playback highdefinition video. AVCHD format is also compatible with Bluray discs and can be used for authoring and distribution of HD video. Unlike EDIUS no other product on the market applications for nonlinear video editing can not offer native support for multilayer editing AVCHD material in realtime and full resolution. With the new engine, AVCHD from Grass Valley EDIUS 5.5 is able to work simultaneously with more than three layers of AVCHD video in real time, full resolution and full frame rate. Fixed issue with drastically changing color when loading certain QuickTime movie H.264 files. Fixed issue with lipsync alignment when converting certain clips that had the frame rate changed.

Fixed issue with error access violation when performing certain operations on Player window. Fixed issue with region filter where the rendering got cancelled in areas where the filter is not applied. Fixed issue with timeline operation when clicking the monitor window while changing the border color in 2D transitions. Fixed issue with stopping MPEG conversion while batch exporting. Fixed issue with bitrate being set to 0.0 Mbps under certain conditions when using Disc Burner. Fixed issue with writing data to BDR when using Disc Burner with Pioneer BDRS05. Fixed issue with sync alignment of video and audio in certain files imported with K2 Connect. Fixed issue with loading certain GXF files with K2 Connect. Fixed issue with placing certain files on the timeline when loading MXF files with K2 Connect. Fixed issue with access violation when updating overlay. Fixed issue with the display settings of the timecode being ignored when outputting MXF files via XRE. Extras. Information Despite the fact that EDIUS previously supported the installation of AVCHD material, the workflow was still impractical. Users before the assembly had to convert AVCHD clips into a format Canopus HQ, which required manual intervention and led to delays in the process of working on the project. With the new version of EDIUS 5.5 professionals can import native AVCHD clips in bin EDIUS, move them to the test being performed and thus any performance limitations. In one project, users can work simultaneously with clips of any format supported by EDIUS, without any additional transcoding and clamping. Thus, in order to begin immediate installation, no additional steps are required. Installation manual Instructions for installing the Readme. Update 5.5 does not require a USBkey. San Jose, CA 95131 www.canopus.com Because of its brightness and stability, Voyagers 1 and 2 relied on the Canopus star to navigate through the solar system.

Canopus was also the pilot of Menelaus ship on his quest to retrieve Helen of Troy after Paris abducted her. The question is Will Canopus EDIUS Pro 4 help you navigate your travails to tell your story. Let us pay the ferryman and find out. To thoroughly exercise those new features we can cover in the space allowed, we tested Canopus EDIUS Pro 4.00 on two systems an HP Workstation XW4200 3.20GHz Pentium 4 with 4GB RAM; and a MacBook Pro 2.16GHz Core Duo with 2GB RAM. Both ran Microsoft Windows XP SP2 with all updates applied. Editors can pull from SD, HDV, HD, MPEG2 and uncompressed sources of varying aspect ratios, resolutions and frame rates without converting first. Of course, youll need a computer that can handle processing any video streams that need to be converted in real time. In other words, if you want to take advantage of this feature, make sure you take a look at the recommended system specifications. Add effects, transitions and titles without having to render, and you can begin to imagine the possibilities. Many of you may be

intrigued by EDIUS Pro features, but know that EDIUS Pro is targeted squarely at the prosumer or professional. The Multicam Editing Mode is a snap to invoke and use. Pressing F8 reveals the Master Channel viewer that displays up to eight different sources. Select the camera source by pressing the corresponding numbered key. Sequences sit alongside their clips brethren in the bin and can be dragged onto the timeline and have any number of effects or filters applied. Every property of the color correction filter is key frameable, giving you exact control over your color corrections. The new Time Remap tool allows you to set multiple, key framed speed adjustments to a clip, without affecting its duration on the timeline. The tool uses a separate window to set and drag the key frames. The results are both immediate and gorgeous. Imported Dolby Digital clips keep their audio channel configuration.

If you have to edit footage from DVDs, this is a feature that will be especially useful to you. The Canopus HQ codec now supports alpha channel information within the video data. You no longer need to use uncompressed HD or still image sequences when compositing and layering video. Stay those knives. EDIUS Pro 4 introduces a change to its plugin architecture. This affects thirdparty plugins such as Boris.The good news is that the Canopus team is working on fixes; in fact, Boris may very well be fixed before this article is published. Any project inprogress using thirdparty plugins should remain on previous versions until you know that your plugins are supported. To complicate matters, the installation of EDIUS Pro 4 recommends the removal of any previous version of EDIUS Pro first. However, it is technically possible to have both versions installed. If youve modified your keyboard shortcuts, youll need to create a customized settings file to save settings and to restore into EDIUS Pro 4. Seemingly, innocuous acts such as importing audio sampled at rates other than 48k can cause application failure. WAV files with embedded metadata tend not to import. During evaluation, I experienced two other crashes that I cannot attribute to any specific act. Canopus is aware of these issues and with any luck will have an update with appropriate fixes. Unfortunately, their latest 4.01 update did not address these issues specifically. Adding effects, transitions, overlays, nested sequences and immediately seeing your results promise to speed your projects to completion. The problem is EDIUS Pro 4 doesnt feel done. Even after switching to single monitor layout, the palette windows overlap the timeline. Youll have to spend a few minutes setting up the layout to your liking, before youll feel comfortable in Edius space. Again, nothing major, but this lack of attention to detail creates unnecessary confusion to those new to EDIUS Pro.

While there is a License Transfer application that allows you to transfer your license from the USB key to a PC, should you change your hard drive, the license may become invalid. Canopus recommends using the USB key. But dont lose it! If you're working in a busy environment, you may want to consider getting an internal USB port installed so the USB key can exist inside your CPUs case. Canopus demands that you learn their editing paradigm using an interface that, while more accessible, is still not as discoverable nor as easy to use as their competitors. The persistent user will gain an invaluable tool to turn your vision into reality in real time. It can be nervewracking to handle these delicate, expensive components, but once you know the process, it's not too difficult. Click here to contact a sales representative and request a media kit. Please choose a different delivery location.Our payment security system encrypts your information during transmission. We don't share your credit card details with thirdparty sellers, and we don't sell your information to others. Please try again.Please try again.Therefore, by applying them on your standard keyboard you immediately start editing with EDIUS. Canopus EDIUS keyboard stickers are designed to improve your productivity and to enjoy your work all the way through. By using Canopus EDIUS stickers your productivity will be increased by 25 40 percent, saving your time and money. Stickers are made of highquality nontransparent matt vinyl, thickness80mkn. Each sticker is covered with laminate, which guarantees their lifetime durability.
