The 14.4K modem supplies 50 percent more data per second than older 9,600 bps models, allowing your office to send documents quickly and efficiently. The B740 has a 200 x 200 dpi maximum resolution and supports paper sizes ranging from letter to A4. The copier function has a higher 360 x 360 dpi maximum resolution and is able to print up to 99 blackandwhite copies as quickly as three pages per minute. Sending a single fax to multiple destinations is easy with sequential broadcasting of up to 113 numbers builtin. Up to 100 pages of standard paper will fit into the paper tray, while an automatic document feeder will fax documents up to 20 pages long, at

the touch of a single button. You can store 112 of your most frequently used numbers in speed dial for quick retrieval, while the builtin memory will store 42 pages of incoming faxes should you run out of paper on a busy day. The B740 comes backed with a oneyear, Instant Exchange warranty on parts and labor.Its builtin 14.4 Kbps fax speed transmits blackandwhite documents at approximately six seconds per pageup to 50 percent faster than typical 9,600 baud machines. And Canons Drop Modulation Technology helps reproduce plainpaper documents in crisp blackandwhite and spectacular colorwhether youre communicating with computers or other colorcapable fax machines or simply making highquality color copies at the push of a button. The FaxPhone B740s compact, industrial design looks greatand fits easily on any desktop. But its real advantage is its ability to make highquality color faxing and copying simple.

Load up to 100 sheets in the paper tray and up to 20 pages in the Automatic Document Feederand fax or copy at the touch of a button. A 42page memory stores documents in case you run out of paper. And a 112number speed dial gives you pushbutton convenience. You can even reduce image size when copying. An easy dropin loading system makes replacing ink cartridges a snap. And for superb quality, the FaxPhone B740 combines a multinozzle printhead with Canons exclusive Drop Modulation Technology, which reduces image graininess and produces smoother color gradations. When copying at 360 dpi resolution, you get high quality at high speed.To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. D. Allen 5.0 out of 5 stars I am very happy with Canon cameras, so I reasoned that I would also like their electronic equipment. I could have been very wrong with this assumption, but we are very pleased with what we purchased. The installation and setup were very simple and easy to follow. The manual is clear, concise and helpful. The copy quality of incoming faxes is very good. Also, the size is perfect since our home office has limited space available to us. The only small drawback is that there is no place to put information in regard to speed dial numbers. Overall, I would highly recommend this product.I read from someone else that you will go through print cartridges like toilet paper, oh my god, he was right. Now if I use my laser paper to print a fax that is two pages forget about trying to get it through the fax, not a chance. One page is ok, but if I do two pages I must copy it in my copier that uses thinner paper. When I am finally ready to purchase a REAL fax I will give this machine to someone I hate.

Whoever gave this four stars must not use it for business.It does a fast job of sending out FAXes. Goes through the Canon toners like a binge eater. It has two problems that are making me search for another brand or model as I add a FAX to another location 1 the paper feeding is not even. The machine grabs two piece of paper at once no matter how careful I am, so I often have to fax items more than once. 2 When you dial and get a busy signal, the machine redials. There is no way to cancel the FAX in between its redialing. You have to catch it during the redial. If you have the wrong number, heaven help the person at the other end of the line. The incoming copies are soso. This time Im going for a laser printer and figure Ill save on the cartridges over time.I decided to pay the extra money to get an inkjet instead of the cheaper thermal printers, mainly because I read that thermal cartridges dont last long and replacements are expensive i.e. you get the machine cheaper up front, but over the long term it costs more. Since the B740 uses the same ink wells as some of Canons bubble printers, I also figured itd be easier to get replacement ink wells a few years down the road. The machine does what its supposed to do and Ive been happy with it so far. Setup was a slight pain, although a call to Canon support took care of that. Overall the manual is good. Note that the machine has a copy mode which is useful for the occasional copy.One touch receiving for incoming faxes on our phone line. Depending on your usage, the black ink cartridge is small but we used ours for about 3 months before it ran out. a larger black cartridge is available, if you dont use color. Set up took a bit of time but there are detailed instructions. The manual is very good.It performs well,

but the black cartridge holds too little ink. High Performance Made Easy. The FAXPHONE B740 's compact, industrial design looks great—and fits easily on any desktop.

But its real advantage is its ability to make highquality color faxing and copying simple. Load up to 100 sheets in the paper tray and up to 20 pages in the Automatic Document Feeder—and fax or copy at the touch of a button.A 42page memory stores documents in case you run out of paper. And a 112number speed dial gives you pushbutton convenience.You can even reduce image size when copying. Technology That Makes Sense. An easy dropin loading system makes replacing ink cartridges a snap.And for superb quality, the FAXPHONE B740 combines a multinozzle printhead with Canon 's exclusive Drop Modulation Technology, which reduces image graininess and produces smoother color gradations.When copying at 360 dpi resolution, you get high quality at high speed.
