Book Descriptions:

We have made it easy for you to find a PDF Ebooks without any digging. And by having access to our ebooks online or by storing it on your computer, you have convenient answers with canon faxphone l170 super g3 manual . To get started finding canon faxphone l170 super g3 manual , you are right to find our website which has a comprehensive collection of manuals listed.

Our library is the biggest of these that have literally hundreds of thousands of different products represented.

Book Descriptions:

canon faxphone l170 super g3 manual

After you finish reading this guide, store it in a safe place for future reference. Where to Find Help. Reading these is highly recommended. Text that appears in the machine's display is shown in capital letters, such as. This list is intended to be a guide only. In most but not all areas, the sum of RENS should not exceed five 5.0. To be certain of the number of devices that may be connected to a line, as determined by the total RENS, contact the local telephone company. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. If the CA11A jack is not present, installation cannot occur. Before installing this equipment, users should ensure that it is permissible to be connected to the facilities of the local telecommunications company. The equipment must also be installed using an acceptable method of connection. The customer should be aware that compliance with the above conditions may not prevent degradation of service in some situations. It also explains how to get the most out of the documentation that comes with the machine, and gives important safety instructions. Welcome Thank you for purchasing the new Canon FAXPHONE L170. We are sure that your machine will meet your printing and copying needs easily and conveniently, as well as your fax and phone requirements. For example, you can print a document or make copies at the same time you are sending a fax. The compact size of the machine makes it ideal for desktop use, and allows you to use it in places where other machines may not fit. Using Your Documentation. Make sure you can reach it easily, as you will be using the machine as a printer, fax machine, copier, and telephone. <http://inanguney.com/E/husqvarna-345e-chainsaw-manual.xml>

As you unpack the machine, save the carton and packing material in case you want to move or ship the machine in the future. Carefully remove all items from the box. You should have someone help by holding the box while you lift the machine and its protective packaging out of the carton. For best results, use a cable that is no more than 5 meters long. To see how the machine will look fully assembled, see "Getting Acquainted With Your Machine," on p. 29. Attaching Components NOTE Make sure the tabs are inserted into the slot completely. Pull out the paper cassette. Attach the cassette extension to the cassette. Insert the paper cassette into the machine. Assembling the Machine. To do this, you need to purchase a USB cable from your dealer. Do not use it outside the country where it was purchased. Use only the power cord that came with the machine. Using a longer cord or extension cord can cause the machine to malfunction. NOTE The machine has no power switch, so its power is on as long as it is plugged in. Once connected, though, the machine still needs to warm up before you can use it. Front View Document feeder tray Output tray Place documents to be faxed or copied. Holds printout. Received faxes. Open it when you output paper face up, or remove jammed paper. Handset jack Power socket Connect the handset. Connect the power cord. Extension phone jack Extension cover Connect an extension phone. Use this button to set a document for polling sending, and to poll the other fax to receive a document. Space button Clear button Use this button to enter a space between letters and numbers when you are registering information. Speaker Volume Switch Adjust the volume of the handset so you can hear suitable from

the speaker. Do not forcefully move or push the protective shutter of the drum in any way. Hold the cartridge on a flat stable surface with one hand, and break the tab and pull out the seal completely with the other hand. Open the printer cover. <http://copy2d.com/ftp/image/husqvarna-345rx-manual.xml>

Align the projections on both sides of the cartridge to the guides in the machine and slide the cartridge completely into the machine. The time until the machine returns to the standby mode can be specified in a range of 1 minute to 9 minutes. You can also turn off AUTO CLEAR function. You can see what mode you are in by the character indicated on the top right corner of the LCD display. Use the numeric buttons to enter the letter or number. You must register your details in your machine so that whenever you send a fax, the other party knows who sent it, and when it was sent. Below is an example of how your sender. If you selected, go to step 5. Failure to do so will cause paper creases and a paper jam. I Unacceptable Paper Do not print on the following types of paper stock. This is because the machines safety function works to prevent the failure due to heat. Store unused paper from opened packs in a cool, dry location in the original packaging. When you load paper with a logo on, position the paper with the print side down logo side and load it so that the top of the paper feeds first in the cassette. If you load extra paper while printing, remove the loaded paper first. Then put it together with the extra paper and tap the edges. After that, reload it in the cassette. IMPORTANT If the slide guides are not adjusted correctly for the size of the envelopes, the quality of your printouts may be adversely affected. Do not load paper from the rear of the cassette. Be sure that the envelopes do not exceed the load limit mark of the paper guide. If the envelopes exceed the load limit mark, this may result in misfeeds. NOTE When you load paper with a logo on it, position the paper with the print side up logo side and insert it so that the top of the paper feeds first in the multipurpose feeder. IMPORTANT If the slide guides are not adjusted correctly for the size of the envelope, the quality of your printouts may be adversely affected or jams may occur.

Envelopes with a flap on the short edge cannot be used. Face up paper output delivers paper with the printed side up out of the face up paper output. Select the area depending on your purpose by opening or closing the face up cover on the back of the machine. This way is convenient for printing on transparencies, envelopes, or labels which tend to curl, because the paper is delivered straight through the machine. The following pages describe how to register numbers for speed dialing. You will also find instructions for changing numbers and names registered under speed dialing buttons and codes, and how to use speed dialing. NOTE You may need to insert a pause if you are trying to access on outside line or you are making an international call. See p.91 OneTouch Speed Dialing. NOTE You can also use Coded Speed Dialing to send a document to more than one location at a time. For details, see "Group Dialing," on p. 58, and "Sequential Broadcasting," on p. 612. Make sure that you press the correct OneTouch Speed Dial button or enter the correct Coded Speed Dialing code, and that the group you want has been registered correctly under that button or code. Preparing to Send a Fax Document Requirements The documents you load into the machine must meet the following requirements. Scanning Area The margins shown in the illustration below are outside the machine's scanning area. Adjust the document guides to the width of the document. The machine also lets you adjust the resolution it uses in sending faxes to best suit your particular document. See Chapter 5, "Speed Dialing," for details on registering and using Coded Speed Dialing. For details on how to set the machine to redial automatically, see "Automatic Redialing With Memory Sending," on p. 610. Follow this procedure for manual sending Load the document in the ADF. You can also control how many times the machine will redial the number and how long it will wait between dialing attempts.

The document to be sent using delayed sending will be listed as or. To print the list, see "Document Memory List,". The receive mode is displayed in the lower left of the LCD. Different Ways to Receive a Fax. For those cases the machine may think that the call coming in is a voice call and rings to alert

you of the call the amount of time it is going to ring is determined by the. Set the fax ring pattern that matches the pattern assigned by your telephone company. Contact the other party and ask them to resend the remaining pages of the fax. Then, as soon as you finish making copies or printing, the machine automatically prints the fax. If you are entering registration information, the fax is printed as soon as it is received, and does not go into memory. Your fax can poll to receive a document, or it can be polled to send a document that it is holding. The sender only needs to make sure the document is on his fax machine and ready to be sent when your machine polls that machine, the document is sent automatically. Setting Up a Polling Box Before you can use polling sending, you must create a polling box with the of the Menu. The polling box holds the document in the memory until the other party prompts polls your fax to send the document, or until you delete the document see p. Select this setting if you expect that the document will be polled by more than one fax machine. To change the settings for an item, follow the same procedure you used for the initial setup of the polling box. See "Setting Up a Polling Box,". If you want to delete the polling box, delete the document stored in the polling box first, then perform the procedure described above. During dialing registration, when you come to a step that asks you to enter a number for dialing, use the numeric buttons to enter the number. This allows you to take advantage of many services that require tones, such as selecting options from telephone "touchline".

After you return to the office, you can review the contents of the memory, and enter the memory lock password to print all of the documents stored in memory. If you have not set the memory lock password see step 6 in "Turning Memory Lock ON and Setting the Password" on p. 93, the LCD displays Making Copies One of the machine's convenient features is its ability to make up to 99 highquality copies of a document. To make copies, do the following Load the document in the ADF. Failure to do so may make copies dirty or cause a paper jam. When setting the exposure darker, the indicator moves to the right. Improving Copied Image 107. It is convenient when you make multiple copies of multiple page documents. When the ADF is used for scanning, the document being scanned stops in the ADF. Using characters other than those in ASCII cord may have the LCD display garbled characters. You can set the machine to print the RX REPORT every time you receive a document or only if an error occurs during receiving. If they become dirty, wash them immediately with cold water. Washing with warm water will set the toner, and make it impossible to remove the toner stains. If necessary, put the cartridge in its original protective bag or wrap it with a thick cloth to prevent exposure to light. Open the face up cover and push down the green paper release levers on both sides of the face up paper output. Roll the leading end of the paper outwards so that the printed surface is on the inside of the roll, then gently pull the rolled up paper out of the machine. If the jammed paper is badly folded, similar to the folds of an accordion, ease the jammed paper loose and then pull it out of the machine Close the printer cover. Message Cause Action CHANGE PAPERSIZE The paper size setting is set to a size Set the paper size setting to letter, legal, A4, B5, or A5 and load other than letter, legal, A4, B5, or A5.

Push the cassette into the machine as far as it will go, and make sure the cassette is not tilted or inserted at an angle. Are the paper size and type set correctly. Specify the appropriate paper size and type in. Make sure the paper stack in the cassette or the paper in the multipurpose feeder does not exceed the capacity of the cassette or multipurpose feeder. See "Loading Paper," on p. 43. Do not force the paper stack into the cassette or the paper into the multipurpose feeder. Load an envelope one by one in the multipurpose feeder. Is the machine possibly overheated. Unplug the machine and let it cool for approximate 3 minutes to 5 minutes. Then plug in the machine and try sending again. Did you connect the power cord to the machine just now. Wait for a while. Make sure there is a dial tone when you pick up the handset of the telephone connected to the machine. If there is no dial tone, contact your local telephone company. Some fax machines cannot send the CNG signal that tells the machine the incoming call is a fax. Is the sending fax machine functioning properly. The sending fax machine usually determines the faxes quality. Call the sender and have

them make sure the scanning glass of their fax machine is clean. Make sure the machine is set for the correct telephone line type. See "Setting the Telephone Line Type," on p. 35 The telephone disconnects while you are talking. Is the document loaded correctly. Remove the document, stack it if necessary, and load it in the ADF correctly. See "Loading Documents in the ADF," on p. 63. Make sure the ADF is closed. If not, condensation might build up inside the machine. Is the paper type set correctly. Select or in in of the Menu. See "Loading Paper," on p. 43. The printouts are missing when you make copies on rough paper. If the problem is fixed, the Alarm indicator will turn off, and the LCD will return to the standby mode.

CAUTION If the machine makes strange noises, emits smoke or strange smells, unplug it immediately and contact the Canon Customer Care Center. However, when you have set a document for delayed transmission, the machine holds the document in its memory for about 1 hour. This is what causes black lines on copies. Whenever you load a document in the ADF, always check to make sure that any paste, ink, or correction fluid that is on the document is completely dry. Dirt and dust particles that collect on the underside of the operation panel also affect the quality of documents you copy and send. When you finished, close the operation panel by pressing it down from the center. Open the printer cover. Grip the end of the cartridge, and remove it from the machine. In order to avoid direct sunlight, place the cartridge in the protective bag that the cartridge came in when you purchased it. This chapter explains the procedure to access the menus and their contents.

COPY The Copy mode is selected. The Fax mode is selected. 2.SW AFTER AUTO CLR Selects whether the machine switches to the mode you set in. Menu Descriptions. **TOUCH TONE** The telephone line is set for touch tone dialing. **ROTARY PULSE** The telephone line is set for rotary pulse dialing. 3.TX **START SPEED** Sets the transmission speed for all documents you send. After reception, the offhook alarm sounds when the handset is left off the hook. ECM is turned off. 2.**PAUSE TIME** Sets the length of the pause you insert into a dialing sequence. 01 to 15SEC 02 SEC The factory default setting is in bold face. **RING COUNT** Sets the number of incoming rings before the machine answers. The machine enables remote receiving. **REMOTE RX ID** You can dial code on the remote extension to start receiving a document.**SUPER FINE** Suitable for documents that contain fine print and images. The resolution is four times that of **STANDARD** **ULTRA FINE** Suitable for documents that contain fine print and images. The resolution is eight times that of **STANDARD** 2.

SCAN DENSITY. The auto error skip is on. The error is skipped and shifted to the next job automatically without indicating an error code. The auto error skip is off. Skip the error and shift to the next job manually. I Printable area Letter size Legal size A4 size 8.5" 8.5" 210mm Max. 0.2" Max. 0.2" max. 5.0mm Max. 0.2" Max. 0.2" max. 5.0mm 11.0". To prevent this information from crowding the faxed image on the page and possibly lengthening the fax, the machine automatically reduces the size of the image on the page. You do not have to be in your office to use delayed sending to one or more destinations. You can set up only one delayed transmission at a time on the machine. Dialing methods Ways of pressing one or more buttons to access a number to connect to an outside party or fax machine. Do not use ECM if you need to send a document quickly and you are sure the other party can read your transmission without it turning off ECM also turns off MMR. If you hear a slow beep it indicates an incoming fax transmission from another machine. On this machine, the printing area varies depending on the type of paper being used. You can also reduce the size of large incoming documents using the option. Also called TX or Transmit. Sending speed The rate at which faxes are transmitted through the phone line.
