

# TRUE TOUCHPAD INTERFACE™ GUIDE

## The Interface

The TLX, RDX and MDX feature an Acura-exclusive approach that takes the best elements of a touchpad and remote system, and combines them into one intuitive, flexible, user-friendly design. Below are the some of the key components.

TLX

RDX

MDX

## True Touchpad Interface™

The True Touchpad Interface™ (TTI) features a large display screen that is controlled remotely by the touchpad located in front of the center console.

Unlike a computer, there is no cursor; instead, TTI uses 1:1 mapping. Touching the touchpad will highlight the corresponding area on the large screen.

Back Home Cards List

Three shortcut buttons are located along the top row. Use the cards list to select the audio, navigation or clock view.

The icons at the bottom of the display screen represent the All Apps list and multiple Home screen pages. To access the second Home page, swipe left on the touchpad.

## Primary and Secondary Areas

Both the display screen and the touchpad are divided into two areas: Primary and Secondary.

Primary

Secondary

The Primary touchpad area controls the Primary display.

The Secondary touchpad area controls the Secondary display.

Primary

Secondary

Note: Apple CarPlay® and Android Auto™ have slightly different touch logic that is designed to be similar to smartphone operation.

## Basic Touchpad Gestures

**Swipe:** Move your finger across the touchpad and lift your finger at the end of the stroke to operate each screen.

**Two-Finger Drag:** Move two fingers vertically, horizontally or diagonally to move a map.

**Click:** Press down on the touchpad until it clicks to select an item.

**Press and Hold:** Press the touchpad and hold it down for a moment to start the edit mode in any system.

## Handwriting Gestures

Enter a single letter or number at a time, or multiple letters or numbers on top of each other.

**Backspace/ Erase:** Swipe left to backspace (erase a letter).

**Add a Space:** Swipe right to add a space between words.
