

PEBBLEBEE STONE
USER MANUAL

PEBBLEBEE STONE

QUICK START

1. Download Pebblebee App in GooglePlay Store.

2. Create an account and login.

Please note: In order to use IFTTT, you must create a Pebblebee account with an email address. A Facebook login will not work.

3. Tap CLAIM then follow the on screen prompt.

PEBBLEBEE STONE

Creating & Signing into your Account

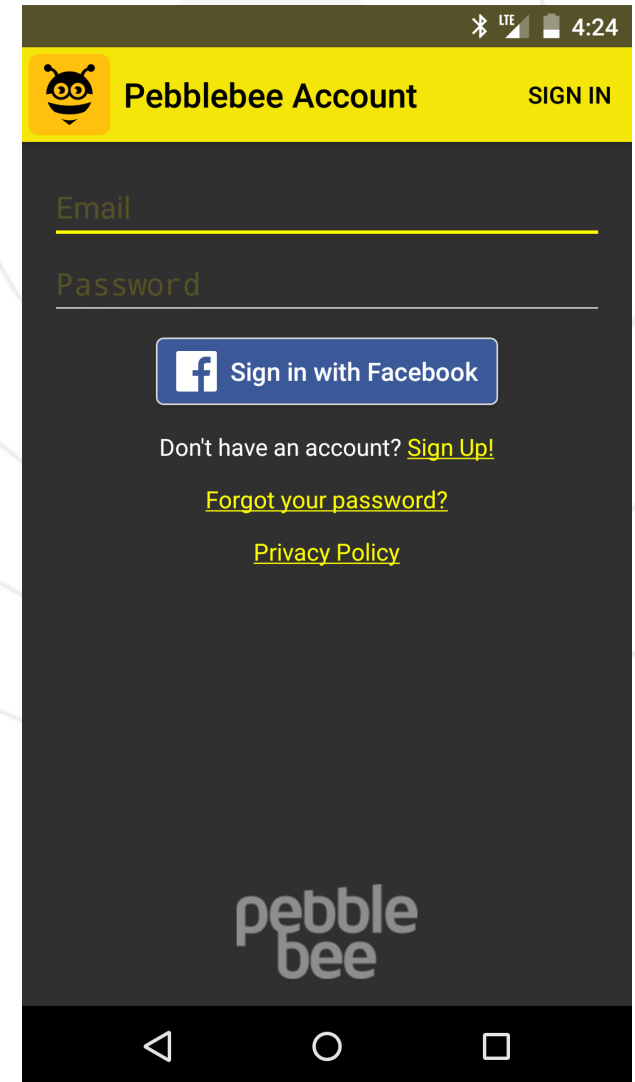

Follow these simple steps to login and get started.

(recommended method) Create a Pebblebee account using your email address by tapping on the “Sign Up!” link. After entering your information, tap Sign Up in the upper corner to finish.

(alternate) Login with your existing Facebook account. (Note: If you need to reset your password, this is done directly through Facebook.com.)

Forgot Password takes you to a link to reset your account password.

PEBBLEBEE STONE

Claiming & Unclaiming A Stone

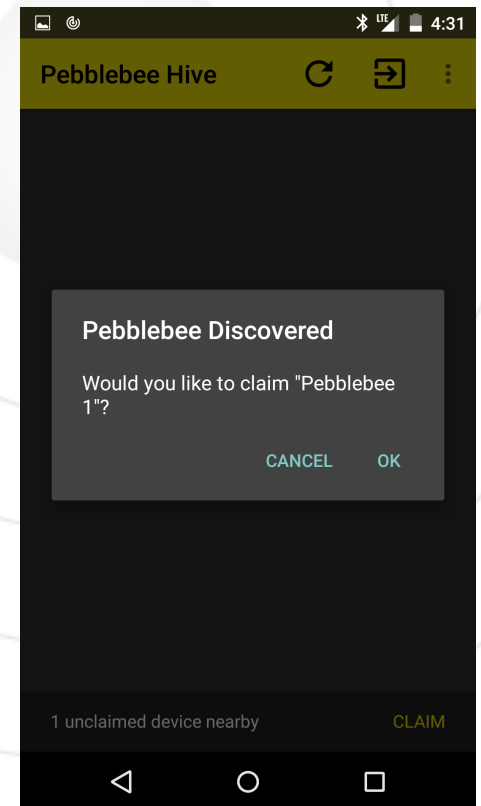

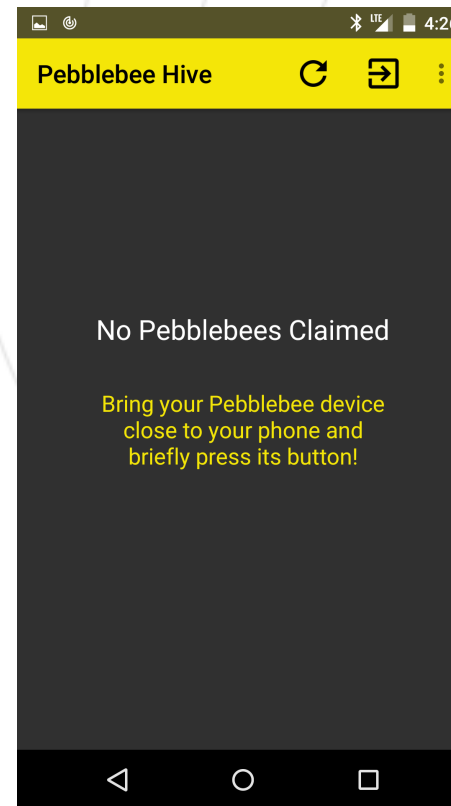

The Hive serves as the control center for your devices. This is where you can claim or unclaim a device, as well as view all of your owned and shared devices.

Unclaiming a device releases ownership of the device so that another account can claim it.

1. Launch the Pebblebee App and navigate to the Hive.
2. Briefly push the Stone's button. It will blink 6-8 times.
3. Tap OK when prompted.

Unclaiming a device releases ownership of the device so that another account can claim it.

1. In the Hive, swipe left on the Stone you want to unclaim.
2. Select OK when prompted to Unclaim Pebblebee.

PEBBLEBEE STONE

The Hive

The Hive is where you can see your Stone at a glance in a list view.

1. Reload Page - Reloads Pebblebee data from the cloud, including any new shared data. Auto updates are limited to reduce data transfer and maximize phone battery life.

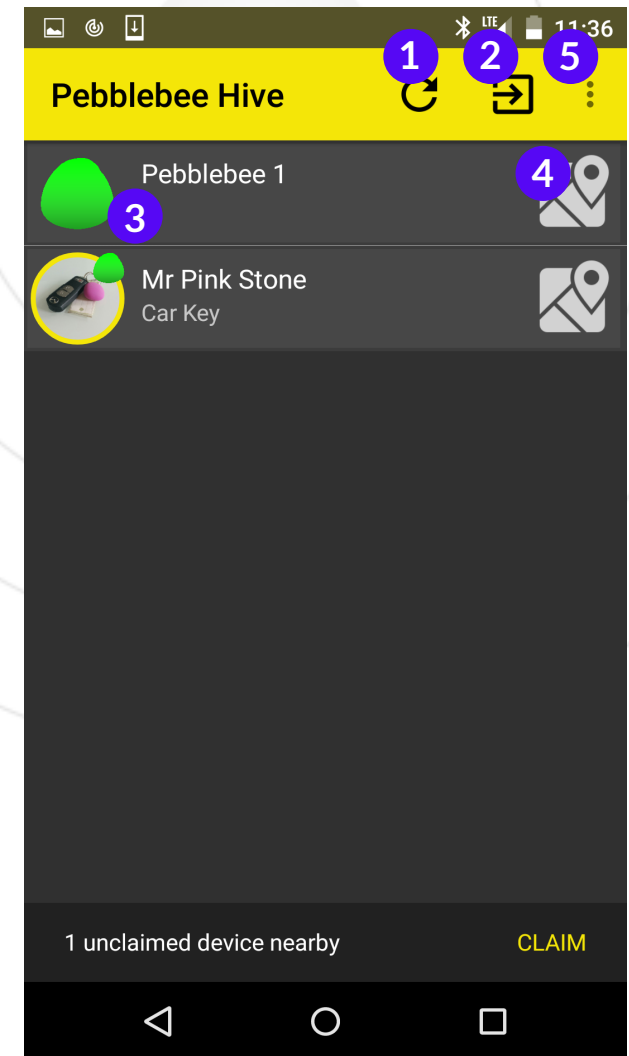

2. Sign Out - Exit current account to allow another user to log in. Signing out prevents all Stone functionality from working.

3. Device - Information including name, description, and picture. To edit, select Settings on the device page. Your Stone will default to the basic Stone image and name "Pebblebee 1."

4. Range Indicator

If your Stone has not been in range recently, the map icon will show. If it's currently in range, green bars will show here.

5. Account Settings and Camera

PEBBLEBEE STONE

Details View - Front

1. Hive View

Go back to the Hive view.

2. Sign Out

Exit current account to allow another user to log in. Signing out prevents all Stone functionality from working.

3. Map Navigation

Centers the map based on your current location.

4. Flip Card

Tap here to change the card view. Settings, Temperature, and Sharing are all accessed from the back of the card.

5. Map

See the last known location of your Stone. Tapping on the red pin will show the detailed timestamp.

6. Device Settings

Use this as a shortcut button to access the Settings page directly

- Change the Stone's Picture, Name, and Description.
- Set up the Left Behind, Motion, and Temperature Alerts.
- Mark your Stone as Lost

7. Navigate

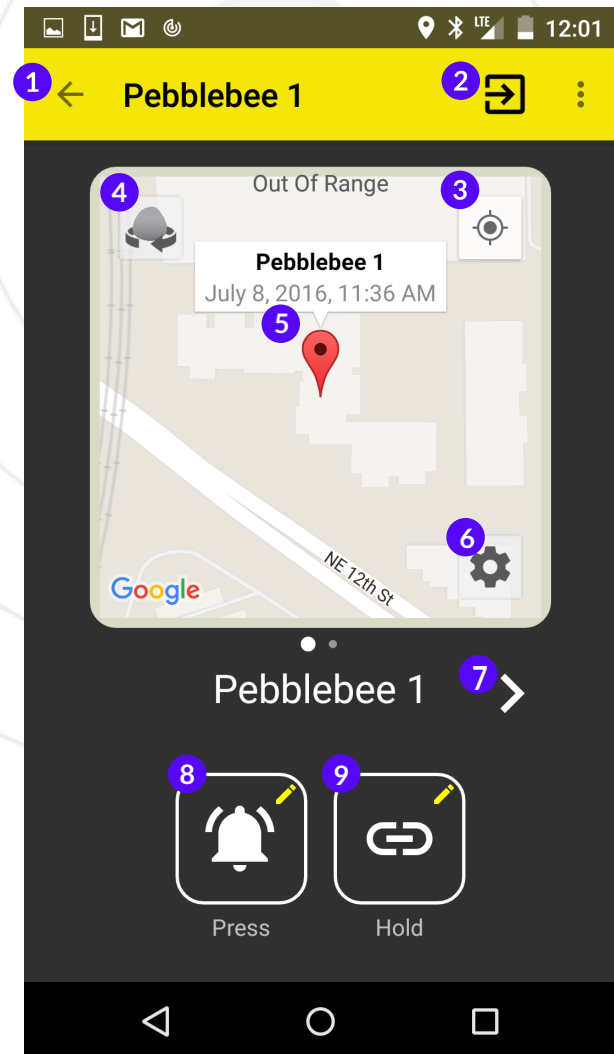

Quickly scroll between other Pebblebee devices without going back to the Hive screen.

8. Press

Tap to assign or change an action for your Stone's button press

9. Press-and-Hold

Tap to assign or change an action for your Stone's long button press

PEBBLEBEE STONE

Details View - Back

1. Map view

Flips the card over to show the map view of your Stone with last known location.

2. Settings

Name your Stone, choose a photo, & set up alerts: Temperature, Left Behind, and Motion.

3. Temperature

Displays the current temperature of the Stone. Temperature must be calibrated for each Stone.

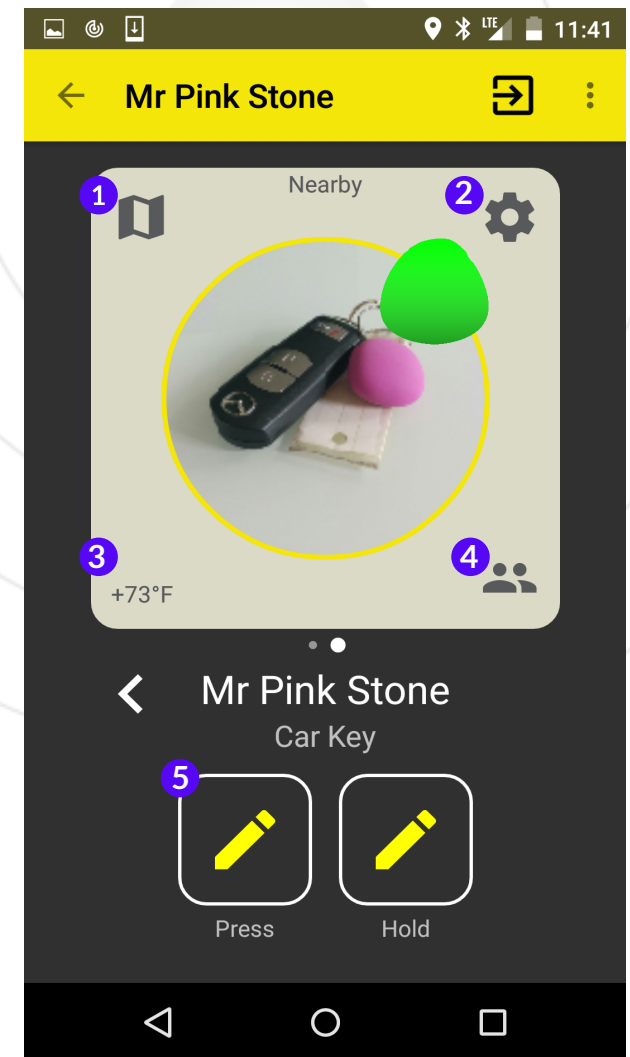

- Tap once to refresh the temperature
- Long press to open the calibration window

4. Sharing

Add friends to share devices with them

5. Button Actions

Actions can be assigned to the Stone's Press or Press-and-Hold from either side of the card

PEBBLEBEE STONE

Temperature View

Temperature must be calibrated first for accuracy. To do so, you will need to be in an area with a thermostat or temperature gauge.

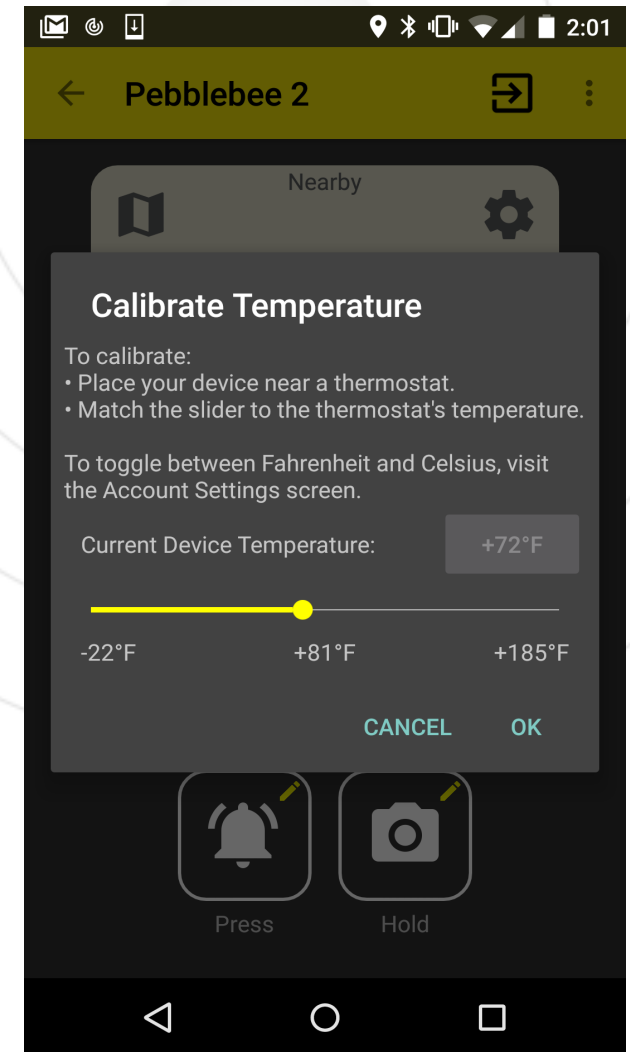

Calibration can be accessed in two places:

1. On the back device page, long press on the temperature.
2. On the device settings page, tap on the temperature.

1. Tap and hold the thermometer icon to calibrate the Stone's temperature.

2. Use the slider to tell the app what the current temperature of the device is.

3. Tap OK once you've entered the current Stone temperature.

PEBBLEBEE STONE

Device Settings

1. Battery

Shows an estimate of the current battery life of your Stone.

2. Picture

Tap on the Stone image to add a custom photo, using either current images or the camera. If no photo is added, it will default to the Stone cutout.

3. Lost

Labels your Stone as lost. When another Pebblebee user walks past your lost device, you will be alerted of its updated location.

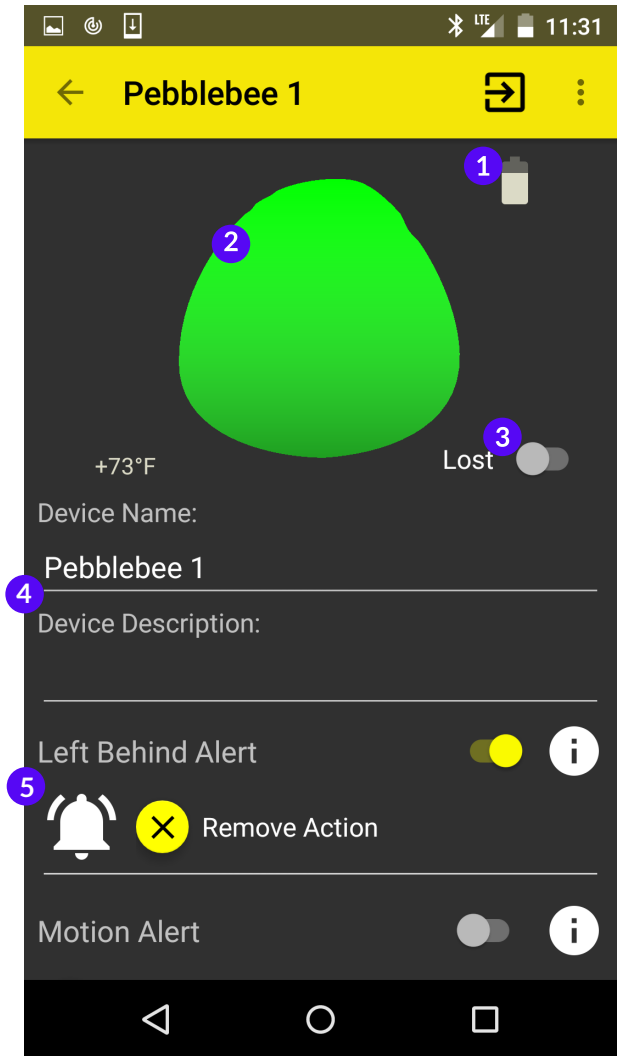

4. Name and description

Your Stone is given a default name when it's claimed. Edit the name and add a description to help you keep track of multiple Stones within the app.

5. Left Behind Alert

This alert notifies you when the Stone has been out of range of your phone for an extended period of time (at least 2 minutes). It can sound an alarm, or trigger any action.

More information about alerts continued on next page...

PEBBLEBEE STONE

Device Settings Contin.

1. Motion Alert

This alert notifies you when the Stone has moved. It can sound an alarm, or trigger any action.

2. Set up Motion Alert

Customize your alert by choosing how you would like to be notified of motion. Many actions allow for even more customization, like choosing the tone and volume.

3. Toggle Alert On/Off

Easily turn alerts On or Off without losing your settings

4. Temperature Alerts

This alert notifies you when the Stone has gone above or below the specified temperature. It can sound an alarm, or trigger any action.

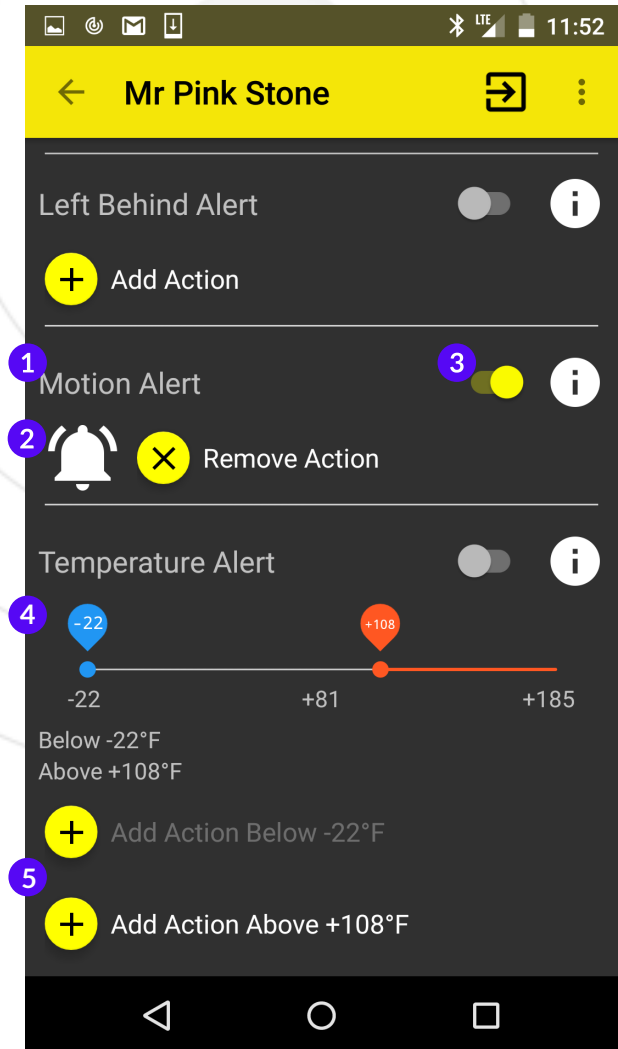

5. Set up Temperature Alerts

Customize each alert by choosing how you would like to be notified. Many actions allow for even more customization, like choosing the tone and volume. The two alerts (above and below) can have entirely different settings.

NOTE: For Left Behind and Motion Alerts, Tracking Mode must be enabled on V1 Stones. To turn on/off Tracking Mode, hold the Stone's button for 6 seconds.

3 LED Flashes = Tracking Off

4 LED Flashes = Tracking On

PEBBLEBEE STONE

Stone Button Actions

A list of actions currently available to assign to your Stone's button presses. To assign an action, tap the action icon on the details view of the Stone you want to control, and then tap the action icon from the Action List view.

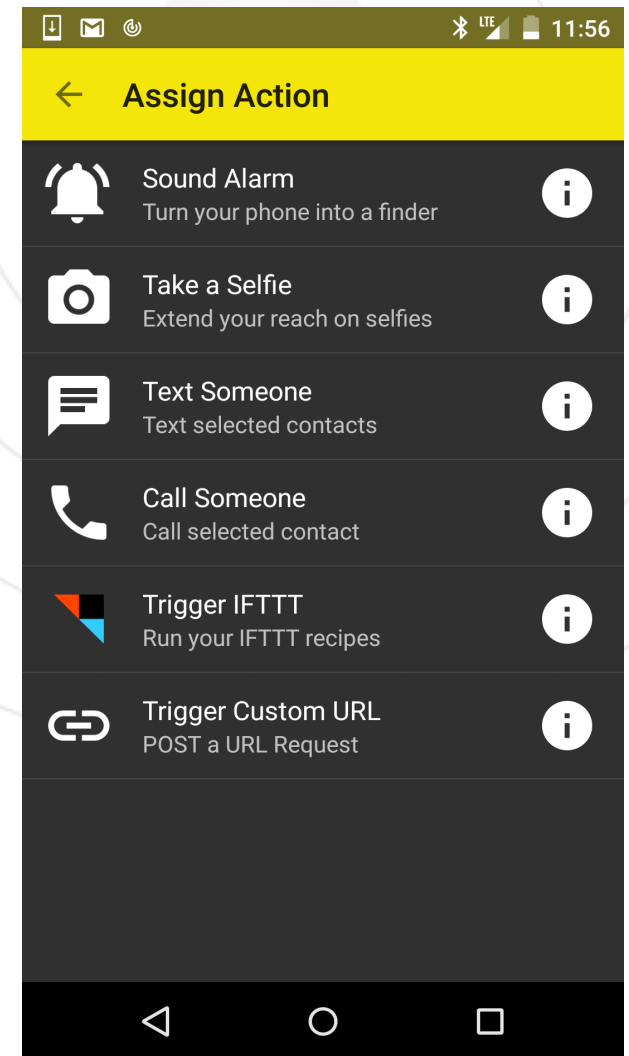

Information:

Tap here to learn more about the different actions available.

Edit and Assign Action:

1. Tap on an action
2. Choose the settings for that action
3. To select that as your action, toggle "Enable as Action" On.

PEBBLEBEE STONE

Stone Recipe Overview

Sound Alarm

This Action is commonly used to find your phone. Choose from multiple song options, set how loud it will alarm, and choose if you want the phone to vibrate.

Take a Selfie

Use the app's camera to take a photo of yourself when the Stone action is triggered. Any photos will get stored in a separate folder within your phone's photo storage.

Text Someone

Assign contacts to text when the assigned Stone action is triggered. Add contacts, write a template message, and choose to add your current location when the text is sent.

Call Someone

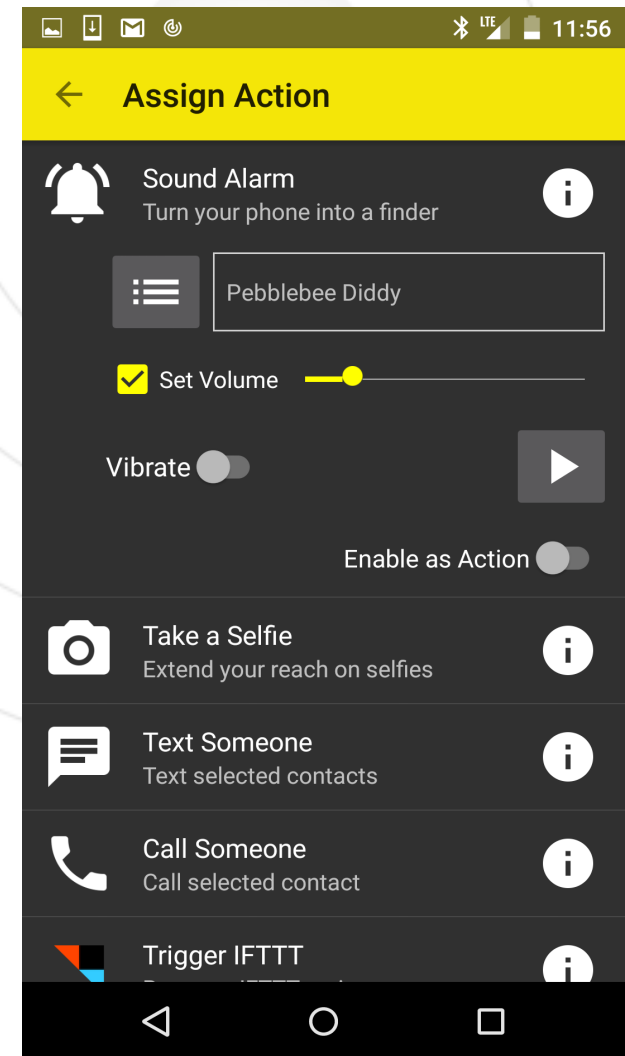

Have a person you call a lot? Maybe you want a way to quickly get ahold of someone in a pinch? Simply tap the call icon and assign a contact to call when you trigger the assigned Stone action.

Trigger IFTTT

Oh boy, IFTTT is pretty awesome. Please check out the IFTTT page for more information regarding this action and how to set it up.

Trigger Custom URL (not pictured)

Like IFTTT, triggering a Custom URL is an advanced action. To learn more, tap on the Information icon.

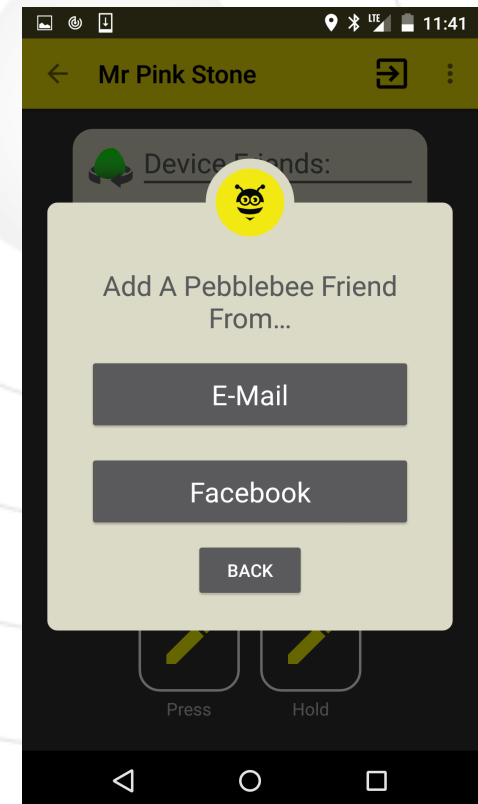

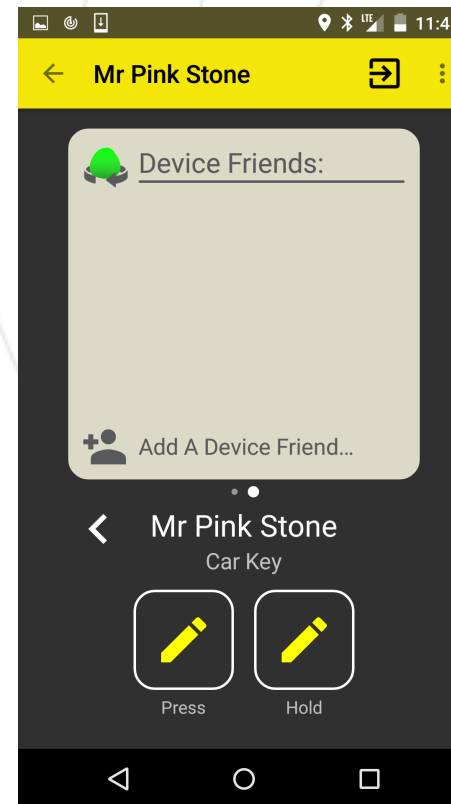

PEBBLEBEE STONE

Sharing

Sharing allows friends and family to access your Stone's features without granting full access to edit and change settings. Friends can be added by email or through Facebook

1. From the back of the device page, tap on the Friends icon
2. Tap "Add a Device Friend", then choose how you would like to add them, based on how they created an account.
Note: Using Facebook requires logging in to your account
3. If they have not downloaded the app and created an account, you can then invite them to do so. If they have, they will be added to your list
4. Once added to your list, choose which friends to add to the device

Setting Up IFTTT

IFTTT gives you creative control over the products and apps you love. To find out more about what IFTTT is and how it works, please check out their about page: <https://ifttt.com/wtf>

Using IFTTT with your Stone:
In order to use IFTTT with your Stone, you will need an IFTTT account.

1. To sign up for an IFTTT account, head over to <https://ifttt.com/join>.
2. To join the Pebblebee Channel on IFTTT, search for and open the Pebblebee IFTTT Channel <https://ifttt.com/channels>.
3. Click the big blue Connect button and follow the prompts to connect.
4. Once you've created an IFTTT account, and connected to the Pebblebee IFTTT channel, you can start building custom IFTTT recipes for use with your Stone.

Note: When building your recipe, the Press Type has to match the Action type that IFTTT is assigned to in the Stone App to function properly.

Note: When Joining the Pebblebee IFTTT Channel, you must use the same email address that is tied to your Pebblebee account. If you use Facebook or Twitter to log into your Pebblebee account, IFTTT will not work properly. In order to take advantage of IFTTT, please unclaim all of your devices. Log out of the Pebblebee App, and create a new Pebblebee Account using a regular e-mail address. We apologize for any inconvenience this may cause.

PEBBLEBEE STONE

Battery Information & Replacement

Please Note: This information is for V1 of the Stone only. If your Stone has a small metal ring attached, it is the V2. Please contact support@pebblebee.com for further help.

The Stone's battery lasts up to 1 year in Button mode, and up to 4 months in Tracking mode. When the day finally comes that your stone is in need of a new battery, swapping it out for the old one is a cinch.

The following items are required to change the battery for your Stone:

The Stone

*A Fresh **CR2032** 3 Volts Battery
Ballpoint pen*

Instructions:

1. Hold the Stone on its side so the keyring hole is facing directly up.
2. Gently insert the ball point pen into the keyring hole and apply light downward pressure until the Stone shell splits open.
3. Remove the old battery from the triangle contacts and insert your new battery with the Positive contact facing upwards. ("+" side up!)
4. Place the Stone Button side of the plastic on a flat surface and align the front of the Stone plastic on top. Press the two pieces together firmly until the sides are closed.

Press the Stone button and verify that the LED flashes.

Please note: If the light does not flash, repeat steps 1-3 and verify that the battery is inserted correctly. If the device does not turn on after replacing the battery, please reach out to support@pebblebee.com
