Hardware Requirements

Minimum Configuration

Server :	Pentium 4	2.0 GHz; 4 GB N	lemory;	500 GB HD
Mac Clien	t :	G5 1.6 GHz; 1 G	B Memor	У
PC Client	:	Pentium 4 1.5 G	Hz; 1 GB	Memory
Video Mer	mory:	64 MB		
Network of	connection	: 100 M	B Etherne	et

Recommended Configuration

Server:	Dual-core Xeon 2.66 GHz; 8 GB Memory;		
	2 HD (One	for windows system, the other for ElecRoc server)	
Mac Client	t :	iMac 2.5 GHz; 2 GB Memory	
PC Client : Dua		Dual-core 2.8 GHz; 2 GB Memory	
Video Mer	nory :	1GB; 19 inch Monitor	
Network c	onnection	1000 MB Ethernet	

Supported Operating Systems (English version only)

Server

Windows Server 2003 SP2, Windows Server 2008 R2 SP1 x64, Windows 7, Windows Server 2012 x64(**R2 version is not supported**), Windows 8 (**8.1 version is not supported**)

Mac Client

Mac OSX 10.7, Mac OSX 10.8 (with Java 1.5 or above)

PC Client

Windows Server 2003 SP2, Windows Server 2008 R2 SP1 x64 Windows Server 2012 x64, Windows 7, Windows 8, Windows XP SP3, Windows 10

The operating systems (OS) must be English versions and be fresh. We strongly recommend you to prepare the OS on a fresh disk partition, i.e. have the partition formatted during the OS installation.

Operating System Configuration

- Server
- Client

Server

Windows Server 2003/2008

<u>Windows Server 2012</u>(**R2 version is not supported**)

Windows 7/8(8.1 version is not supported)

Notes:

- 1. Don't install any anti virus software.
- 2. Only let one network connection working and give it a fixed IP address.
- 3. Don't modify the computer name after server has been installed.

• Windows Server 2003/2008

You do NOT need to manually configure anything. ElecRoc install program will configure automatically during the installation.

• Windows Server 2012(R2 version is not supported)

You need to make the following configurations before the Server installation:

- 1) Manually install the Windows components **IIS** and **.NET Framework 3.5.**
- 2) Close the UAC and turn off the firewall
- 3) Install manually **Microsoft SQL Server 2005 Express**

FOUNder

• Install both IIS & .NET

• 1. Open the Server Manager (right-click Computer on the desktop and choose Manage), choose Dashboard > Add roles and features, to start Add Roles and Features Wizard.

Defore you begin Installation Type Server Selection Server Roles Peatures Confirmation Results Defore you continue, verify that the following tasks have been completed: Defore you continue, verify that any of the preceding prerequisites have been completed, close the wizard, complete the steps, and then run the wizard again.	B	Add Roles and Features Wizard
To continue, click Next.	Before you begin Before You Begin Installation Type Server Selection Server Roles Features Confirmation	This wizard helps you install roles, role services, or features. You determine which roles, role services, or features to install based on the computing needs of your organization, such as sharing documents, or hosting a website. To remove roles, role services, or features: Start the Remove Roles and Features Wizard Before you continue, verify that the following tasks have been completed: • The Administrator account has a strong password • Network settings, such as static IP addresses, are configured • The most current security updates from Windows Update are installed If you must verify that any of the preceding prerequisites have been completed, close the wizard,

- Windows XP
- Windows XP can be used to install and run the Client. If you want to use remote 3D preview, please separately install .NET Framework. The install program is available under the install directory \Server\Tools.

- MAC
- The logging in account must be administrator.

Install Required Applications

Adobe Acrobat Pro

Enfocus PitStop (Just for 3rd Party Preflight)

Adobe Acrobat Pro

- Before you install ElecRoc, you need to install Adobe Acrobat at least version 7.0 on both the server and client. It is required as you use processors like Trap, Composer, ganging, the modules like preflight navigator, PDF compare and zone trap. Ganging requires at least version 8. Zone trap, preflight navigator and PDF compare require 9 or higher version.
- For details on the installation, refer to related instructions provided by Adobe.

Install Required Applications

• Enfocus PitStop

- ElecRoc supports Enfocus preflight. To correctly check PDF files by using this preflight, you need to install the Enfocus PitStop Server on ElecRoc server.
- Please note that non-Server versions, such as 7.0 and 7.5 designed for personal users, are not supported in ElecRoc. The Enfocus PitStop Server can be obtained from Enfocus. And you need to install the Enfocus PitStop Server before you install ElecRoc Server.

- PitStop Server lower than v4.0 (not including v4.0):
- 1) Install PitStop Server and register;
- 2) Search the file EnfocusPitStopLibraryAA.dll in PitStop Server's program folders, and then copy it into ElecRoc's directory PreflightJTP\bin\Preflight\;
- 3) Double-click the file register_PitStopPreFly.bat under ElecRoc' s directory PreflightJTP\bin\Preflight\;
- 4) Restart the 3rd Party Preflight processor on ElecRoc Server.
- PitStop Server v4.0~4.08 (not including v4.08):
- 1) Install PitStop Server and register;
- 2) Double-click the file register_PitStopPreFly4.0.bat under ElecRoc' s directory PreflightJTP\bin\Preflight\;
- 3) Restart the 3rd Party Preflight processor on ElecRoc Server.

- **PitStop Server v4.08 and above:**
- 1) Install PitStop Server and register;
- 2) Search the files ipworks6.dll, MutatorLibraryAB.dll, PitStopLibraryAB.dll, and xerces-c_2_8.dll in PitStop Server' s program folders, and then copy them into ElecRoc' s directory PreflightJTP\bin\Preflight\;
- 3) Double-click the file register_PitStopPreFly4.0.bat under ElecRoc' s directory PreflightJTP\bin\Preflight\;
- 4) Restart the 3rd Party Preflight processor on ElecRoc Server.

Install Founder ElecRoc

- Founder ElecRoc is a distributed digital workflow management system. The Server, the Client, and most of the processors can reside independently on various LAN computers, not limited to a same machine.
- The **Client** can be installed on **PC** or **Macintosh** machines connected to the server, binding TPL Editor and Composer together.
- In addition, we do not recommend you to install ElecRoc into a computer that has already deployed Founder EagleRIP.

- ElecRoc Server
 - ElecRoc Server

• ElecRoc Client

- ElecRoc Client on PC
- ElecRoc Client on Mac

ElecRoc Server

Install Founder ElecRoc - Server

- FOUNder
- The installation steps on various Windows versions are the same on the whole. Please perform as follows to install ElecRoc Server and/or processors (take Windows Server 2008 as example):
- 1. Insert the ElecRoc install DVD into the DVD-ROM drive and open it, or open the ElecRoc install fold which download from the internet. Run the file **Autorun.exe** to start the installation. The following window appears.

FOUNder		ElecRoc 6 An Integrated JDF/PDF Pre-press Workflow Solution
		Install Server
	Ū	Install Client
	Q	Install Color Tools
	٢	Explore
		R Quit

- 2. Choose **Install Server**. It first checks up your system to see if it is suitable for installing ElecRoc Server, e.g. if it has installed IIS and .Net Framework, if it has closed the UAC, and etc. If not suitable, it will then return a report window. Please configure as per the report suggests, and then choose **Install Server** to re-start the install program.
- For Windows Server 2008/2003 and Windows 7, if possible, it can auto-configure some features, such as IIS, .Net, and UAC (for Server 2003, the UAC is NOT applied, and the .Net will be installed with stand-alone install program). A DOS-style window then pops up, hinting you to wait a moment. After the auto-configuration, please press any key to continue.

	Configuring IIS features. This will take a few minutes.
