Connections

Connecting a Microphone

Connect your microphone (not included) into the **MIC IN** socket. Turn the **-MIC VOLUME+** dial to adjust the volume/echo of the microphone.

Connecting a Guitar

You can connect a guitar (not included) to the unit directly through the **GUITAR IN** socket on the top panel.

Charging the Unit

- Ensure all audio connections of the unit are connected before connecting to the mains power socket.
- Make sure the mains plug is firmly inserted into the mains socket.
- Do not overcharge the battery as it may shorten its life. Disconnect the mains cable after the unit is fully charged.
- The unit should be fully recharged after using the device each time. This will keep the health of the battery.
- If you plan to store your device for longer than 6 months, charge the battery for an hour every 6 months to keep it fresh.
- Charging time varies depending on conditions of use of the battery and the output voltage of your charging device.
- The unit will get warm during charging. This is not a malfunction.

- The unit has a built-in rechargeable battery, which should be charged before using the speaker for the first time.
- The battery is charged automatically whenever the unit is connected to the mains socket.
- Charge the unit for 4 hours before first time use.
- Connecting the unit to any other power source may damage the unit. Unwind the mains cable to its full length. Connect the end of the cable to the **AC IN~** socket at the rear of the unit and then connect the mains plug to the mains socket.

Battery Life

The unit has has approximately 8 hours of playback time in fully charge status and in medium sound level. Time stated above may vary, depending on ambient temperature or conditions of use.
