Our library is the biggest of these that have literally hundreds of thousands of different products represented.

Book Descriptions:

Domo 2 Telephone Manual In English

Does anyone know where I can get hold of an english Manual for it thanks Id apprecite it Would appear 1st one is.The display on the DOMO2 can be changed to any of the Spanish languages, but English is not included. It will serve me well However My web site now contains details in English for operating both the original DOMO telephone and the latest DOMO2. This Eye On Spain web site wont let me correctly provide this useful web address until 10 posts have been made, so here is the address spaced out. The DOMO2 is covered by a series of web pages covering the most needed requirements. I hope to add to these over a period of time. Hope this helps those struggling with their new handset.By continuing to browse you are agreeing to our use of cookies. More information here. x. Customer service, especially to a large minority group like the English speakers in Spain, is not top of their priority list. No doubt this kind of exclusion, were it in the UK, is most probably illegal in this day and age! It took us quite a bit of time to find the router model as the Telefonica version is only branded with the Telefonica logo.We can provide you with a UK number which diverts calls to your Spanish land line or mobile from as little as 3 pence per minute. Find out by posting and hear about others experiences. The automessage just says something like this number could be confused with international dialling codes, and wont let us proceed any further. Has anyone got a degree in Spanish telephony!!!! Help seriously appreciated.Does it accept 0000 and then you get the error message when trying to set your own access code.The only problems I have come across with the password is when you are given a reallocated telephone line and the previous subscriber changed the password and that you have inherited it. If this is the case Telefonica should be able to reset it.http://www.gardens-spa.pl/user_pict/83cb65manual.xml

- **domo 2 telephone manual in english, domo 2 telephone manual in english language, domo 2 telephone manual in english pdf, domo 2 telephone manual in english version, domo 2 telephone manual in english translation.**

Perhaps I have got the wrong end of the stick because I dont think instructions on how to operate the Telefonica answering service are included in the Domo Mensajes manual. I have dug up this thread from last year on the subject which may help. Sid has also produced a copy of the answerphone instructions in English and I expect he will PM them to you if you ask him nicely. The tread you linked to of past queries relates exactly to what we are dealing with. From that thread it sounds as though we have to be VERY patient and keep trying OR buy our own phone. Telefonica dont you just luv em!!! Cheers for your help. I get to the bit where you have to put in your own 4 digit number and keep being told the number is incorrect. I have come to the conclusion that the phone must have been used by another person although a new phone but the number cant be a new one!! I have given up unless anyone comes up with any ideas If so call Telefonica on 1004 and ask them to reset the access code or if the language is the only thing you want to change ask them if they can do it for you. If they say they cant, leave it for a day or so and try again. Telefonicas helpline is only as good as the operator answering your call and some are much better and more helpful than others. One tip, if you are a woman and a woman operator answers pass the telephone to a man to make the enquiry and if you are a man and a man answers pass it to a woman. Believe me, it does make a difference! Cant win! Will try ringing the operator and ask them to change the language for us. Thanks for the info. Put the telephone back on the cradle then pick it up again. You should get the dialling tone for several seconds followed by three short tones in rapid succession repeated over and over until you hang up. Put the handset back and pick it up again and you should get the message No tiene mensajes I assume you are then doing the following but I will repeat it just

to be sure you are following the correct procedure. <http://primer-spb.ru/files/83-cb650sc-manual.xml>

Wait until you hear Para salir, pulse 0. Para opciones personales, pulse 1 Press 1. You will then hear Para cambiar el mensaje de bienvenida pulse 1. Para cambiar la clave de acceso pulse 2. Para acciones sobre la hora de aviso, pulse 3. Para cambiar el idioma, pulse 4 Press 2. You will then hear Por favor, marque su clave de acceso Press 0000 If everything has gone right you should then be able to enter your new access code. If not you will hear Clave de acceso incorrecta and the service will hang up in which case you will definitely need to contact Telefonica to sort it out. If you have the new Domo Mensajes with the hands free facility and you are entering the access code with the speaker on try it using the handset instead and put your finger over the hole in the mouthpiece whilst you are entering the digits. It can happen that the system gets confused by the tones echoing back over the system from the speaker or even from the earpiece of the handset. Not very likely, I know, but it is worth a try. I know this all sounds like that Steve Penk wind up where he phones someone up and gets them to do some odd things under the guise of carrying out technical tests but I can assure you this isnt. Many thanks for all your help. How are you getting on Ever Hopeful We have also tried to contact customer services on 1004 for help umpteen times. THis company must have the worst customer service record on the planet!!! I was hoping to get onto Broadband with this bunch, but I am having serious doubts. I cannot even get in touch to ASK for the service!!! I have only just seen your last message of advice of another angle to set up these phones, so will try that first before I chuck the phone across the room. Many thanks Totally exasperated PS Is this why the Spanish shout so much something to do with communication problems! Try my last resort advice, though. It seemed to work for daisymarg. It seems to work and Ive never had trouble since then.

Download English manuals.Telefonica Manual in English. In Spain but dont know how the telephone works. This can be changed to the autonomous languages, e.g. Catalan, and also to English, French and German.You will then be asked to choose the language Para castellano, pulse 1; para idiomas autonomicos, pulse 2; para otros idiomas, pulse 3 Translation Press 1 for Castillian; 2 for autonomous languages; Press 3 for other languages. If you press 3, you will hear the operator saying that you are going to select a foreign language Para ingles, pulse 1; para frances, pulse 2; para aleman, pulse 3 Translation For English, press 1; for French Francais, press 2; for German Deutsch, press 3 If you press 1, you will hear the operator saying that you have chosen English. If you agree press 1 for English. If not, press 2 and try again. The operator will now say in English Thank you for using Telefonica answering service. Then the call will be disconnected and you will have to pick up the phone again to access the other services. From now on you can listen to your messages and change a variety of options in English, the exceptions being the Information Service and the 1004 Service. Listening to messages is a free service at any time of the day. Pick up the receiver and wait. If you do not have any messages you will hear Telefonica Answering Service informs you that you have no new messages.

<http://www.diamondsinthemaking.com/content/cuisinart-ss-300-manual>

To hear the message again, press 1 To save it, press 2. To erase it, press 3 To answer the message by means of the mensavoz voice mail service, press 4 You do not need to wait for the end of these instructions to press asterisk, 1, 2, 3 or 4. Once you know this, you can press one of the numbers as the operator starts to speak. Continue with the next message. At the end you will hear again the

Main Menu. Main Menu The Movistar operator will run through the Main Menu options as follows To go to the information service, press 3 To access the mensavoz voice mail service, press 2 For personal options, press 1 To exit, press 0 Personal Options There are five alternatives under Personal Options To change the welcome message, press 1 To change the access code, press 2 To modify the notification of new messages, press 3 To change language i.e. Castillian,Catalan, Autonomous, English, French, German, press 4 To change the options on calls received on your answering service, press 5 Dial your number, or 0000 if you have not changed it.If you do not accept it, press 2 and try again. If correct, press 1. If not, press 2. If you press 2, you will have to redial your correct new access number. Once you have pressed 1, the operator will say that the new access number has been registered and she will thank you. There are also options to be advised on a different phone when you are not at home.You will hear To access the notification call service, press 1 To access text message alert actions, press 2 To programme information on new messages on your phone, press 4 The operator will then tell you the new time, If you agree, press 1, if not press 2. If you press 3 you erase the time. To another fixed phone If you chose this option you will hear To set the notification call for another terminal, press 1 Follow the instructions, set the time and then you will be asked to enter the phone number where you wish to be notified of new messages.

To change the time and phone number where you wish to redirect the call, press 2. Again follow the instructions. 8. Access Text Message Alert Actions If you choose this option by pressing 2, you will hear To activate the text message alert mechanism, press 1 To change the telephone number where you wish to receive the text message alert, press 2. Follow the instructions as indicated 9. Programme Information On New Messages On Your Phone If you press 4, you will hear The answering service can inform you when you receive new messages on your fixed phone by means of a visual or acustic signal If you wish to deactivate this service, press 1 If you wish to delete the voice messages text from your phone screen, press 2 Again, follow the instructions accordingly. 10. Change Options On Calls Received On The Answering Machine a Lift the receiver and listen to the operator advise that you either have messages or not.You will hear To deactivate the call return service, press 1 To deactivate the information service on calls without messages, press 2. When you hear the bleep, you can ignore it or you can press the key R. When you hear the dial tone, press 2. You can now talk to the new caller. By pressing R2 again you can return to the first caller and alternate. To Disconnect a Second Call To end any one of the conversations you must press R1. To Hear your Messages from another Phone You may listen to your messages from anywhere in the world. However, you will need to have a different personal access number from 0000.Providing noone answers, you will hear your own answer phone message. The operator will ask for you access number.If not, the operator will say Clave de acceso incorrecta and will hang up. The service is used when you do not want to speak to the person you are calling but just wish to leave a voice message.If you don't, you can return the call by dialing the number. For more information, you can ring the free phone number 900505300.

You will hear the Spanish operator giving four options, press Key 1. During or after the following five options, press Key 4 You will be asked to enter your access number, which is always 0000 at this set up stage and until you change it Next press Key 3. Then press Key 1. The operator will advise that you have chosen English. To accept, press Key 1. Replace the receiver. From now on you can listen to your messages and a variety of options in English, the exceptions being the Information Service and the 1004 Service. You now need to reply clearly " English speaking please". You will then be put through to an operator who speaks English. Login to post I have a Brother MFC 7220 Fax, Scanner, Photo Copier. The problem I am having is
with the Photo Copying and Scanning. The printer works great. When I go to make a photo copy of a
document it is. My model is older and is chrome with black.I appreciate your kind assistance.Put
Genio in the subject.The manuel is in spanish which I do not reas, so an english translation would be
very useful. Can anyone. There is also a manual online and printed for the original Domo phone. I
hope this helps those struggling with their new handset.How do I add or edit directory Answer
questions, earn points and help others.

The manuel is in spanish which I do not reas, so an english translation would be very useful. Can
anyone help. I have a Siemens DOMO2 from Telefonica. My Spanish teacher deals with things, but I
would like to be able to sort the phone out myself. There is also a manual online and printed for the
original Domo phone. I hope this helps those struggling with their new handset. The manuel is in. I
have not yet started on a DOMO2 manual, but I have prepared a leaflet in Acrobat format dealing
with the most popular settings of this new telephone. Both DOMO manual and DOMO2 leaflet can be
found on my web site John H.Sumner Login to post All hand sets say Check Tel Line. Will not make
or receive calls. Will a dead battery in one handset make all handsets malfunction. Are batteries
available I purchased out in Tenerife so the manuel is in Spanish and I would appreciate if you could
tell me where the volume control is please. Many Thanks The detailed steps for setting the volume is
given on page 21 of this manual. Adobe PDF Reader is required to view this manual. Download
Adobe Reader Hope this helps. Thanks for using FixYa. Its not sending any audio to the phone line,
which would explain why tone dialing doesnt work and people cant hear you. Pulse dialing doesnt
need the audio tones so it will still work. Ive never run across one doing this before. The problem is
almost certainly some electronic failure, and I doubt theres anything you can do other than replacing
the thing. If this is still under any warranty it should be up to the manufacturer to repair or replace
it. If you got this from VoIP service provider, contact their customer service department. Keep
holding the reset button until all of the LAN lights blink, and your router will be reset back to the
way it was when it left the factory. This only applies to get round the settings installed on the router.
You will have to input all the telefonica settings again so that your router can connect to the
internet.

Resetting the router will not solve any problems regarding telefonica passwords or user names for
this, you or the account holder will have to contact telefonica directly. I hope this helps you. All hand
sets say Check Tel Line. Will not make or receive calls. Will a dead battery in one handset make all
handsets malfunction. Are batteries available How do I add or edit directory Answer questions, earn
points and help others. The quality of a call through our Low Cost Call system simply cannot get
better. Our ability to offer the most competitive prices in Spain for International Calls in the industry
is due to the extraordinary amount of call traffic we generate. These benefits we pass on directly to
our customers. This is why we have gained the confidence of thousands of individuals, families,
businesses and corporations Nationwide for us to take care of their telecommunications needs. This
alone saves a lot of money as many other providers charge a significant fee just to connect the call.
This might help. The Land Line will provide you with a local telephone number which we can then
bring over to us for the dT Onebill service and then also provide Internet and UKTV if needed. More
often than not, our customers have found dT OneBill to be an extremely liberating service because
during the "migration" process, our staff have additionally been able to remove all kinds of
unwanted and inexplicable costs that Movistar have been charging for years. With the dT Call BOX,
you will be able to avoid the expensive call rates through the Movistar Fibre, which can no longer be
bypassed using traditional prefix methods. The dT Call BOX simply needs to be connected to your
Fibre Router and you will be able to connect your analogue telephone to the dT Call BOX. All calls

made will appear on your Direct Telecom invoice.

With the VoIP Phone, you will be able to avoid the expensive call rates through the Movistar Fibre, which can no longer be bypassed using traditional prefix methods. All calls made will appear on your Direct Telecom invoice. Broadband services can also be provided by the Direct Telecom and included in a single bill. An important added advantage of applying for dT OneBill is that we will check the "additional contracted services" with our customer and proceed to remove the unwanted costs in the process to achieve even more savings. Can I take my dT OneBill service with me If it is not possible to keep your current number we can arrange for the installation of a new line and thereafter proceed to add the wanted services. If you have this service activated it has priority over the answer machine. You will be billed for the call to the diverted number. You will hear a continuous tone that confirms the activation. For this function to work you are required to have both the answer machine and caller identification functions activated. It is required to have a handset that accepts this function and also that your line is able to be configured to work with this service. Line Guard also covers the time and travel expenses presented by the engineer which can be expensive. If you decide to authorise a repair with a superior amount that is billed to Direct Telecom, then the difference will be charged on your following Direct Telecom invoice. Any expenses covered by Line Guard will be billed to the customer if the running contractual agreement is prematurely breached. The rest of the cabling throughout a house or premises all starts off from here. Movistar's responsibility of the functionality of your line ends at the PTR. If all is OK at the PTR it can be considered that there is a fault with the rest of the cabling that stems off from the PTR and is the responsibility of the customer. By opening the "testing port", the rest of the network is automatically disconnected.

Every team member at dT brings years of experience to the role that they play to guarantee the level of service and support that exceeds expectations. We want you to have no doubts that contracting our services was the smartest choice you made. The feedback we receive from our customers has become the single most important resource so that the ideas and suggestions become projects and eventually a reality that will benefit our customers. ONLY with Direct Telecom. Do you want to change sites Please try again later. Please check back later. Risks of clogging or blockage are very low, and the grinder system is easily adjustable.
