Excellent energy efficiency guarantees that you save money as well as time with this powerful drying machine. Home > Household appliances > Dryers > Grundig Dryers Below you can find all models Grundig Dryers for which we have manuals available. Also view the frequently asked questions at the bottom of the page for useful tips about your product. Is your model not on the list? Please contact us. Is your product defective and the manual offers no solution? Go to a Repair Café for free repair services. Frequently Asked Questions Our support team searches for useful product information and answers to frequently asked questions. If you find an inaccuracy in our frequently asked questions, please let us know by using our contact form. Why is de drum of my dryer larger than that of my washing machine, even though they have the same capacity? Verified To properly dry laundry, a dryer needs to have air.

This needs space and that's why the drum needs to be larger.
This was helpful (2846) What is the difference between a condenser dryer and a vented dryer? Verified In a condenser dryer the condensed water vapour is drained and collected in an internal reservoir. In a vented dryer the hot, moist air is drained through a hose, for example out of a window. A vented dryer is cheaper to use than a condenser dryer
This was helpful (694) Can I stack my dryer and washing machine?
Verified In general it is possible to directly stack a dryer and washing machine directly on top of each other. This only works with front loading models. However, it is advisable to use a fitting accessory to do so. This will prevent the machines from vibrating and falling off and also prevents damage to the bottom machine. This was helpful (545) Can I connect a dryer to an extension cord? Verified Appliances that require large amounts of power, like a dryer, can not be connected to all extension cords. See what the power usage of the dryer is, which is indicated in Watt, and check if the extension cord can handle this. There are extension cords with thicker cables that are made to handle larger appliances. This was helpful (417) What is the difference in usage between a washer-dryer and a separate washing machine and dryer? Verified The biggest advantage of a washer-dryer is that it takes less space. However, a separate dryer will be able to dry more than a washer-dryer. A washer-dryer also uses relatively more energy and requires more time. This was helpful (404) This Grundig GT54823CW 8kg heat pump tumble dryer comes in a white finish. The capacity should be big enough for most medium-sized families, but there are other tumble dryers available with a larger capacity. Heat Pump technology is the most energy efficient dryer technology and can help to save money on your energy bills, it also uses a lower drying temperature to help protect your clothes. Because it uses a lower drying temperature it can take more time to dry your clothes. Read my heat pump tumble dryer comparison for more information. Sensor drying identifies the level of moisture in your clothes and automatically stops when the desired dryness level is achieved. There is also the option to use timed programmes. A Hygiene Refresh programme will quickly refresh clothes that do not need washing but have a slight odour eg slightly musty, been in your cupboard for a long time.
Other special programmes include Jeans, Sports, Shirts, Towels and Gentle Care. The LED display will show you how long your programme has left until it finishes and when the cycle is finished a buzzer will sound to let you know. You can even set a time delay so you can dry at a time more convenient for you. Warning lights will remind you to empty the water tank and fluff filter and you can also directly expel the water collected during the cycles to a drain using the hose provided. This will save you having to manually empty the water tank. Remember to take a read through my tumble dryer buying guide before you make your purchase. What's the best price for the Grundig GT54823CW? If you are interested in buying the Grundig GT54823CW heat pump tumble dryer, make sure you don't pay over the odds. The maximum price you should be paying is around £480, but the best price would be below £430. These prices are based on historical data and deals. Remember to also check out some independent review sites to see how they are rating this tumble dryer. Two of the best sites for this are Reevoo and Which?, but you will have to be a member of Which? to read their reviews. Some retailers also have their own review system so be sure to check these before you buy. To see if the Grundig GT54823CW has made it into my best tumble dryer deals, check out my latest offers that I've searched from multiple retailers. I search for the best tumble dryer deals, so you don't have to.
