1 Purpose

This companion guide is to be used in implementing the ASC X12N 834 Benefit Enrollment and Maintenance Set for use with the LA Enrollment Broker Project. Trading Partner specific guidelines have been added throughout this guide to assist in use for this project's Trading Partners; for further information please refer to the ASC X12N 834 (005010X220 and 005010X220A1) implementation guides.

Note: This guide is intended only as a supplement to and NOT a replacement for the ASC X12N 834 Benefit Enrollment and Maintenance Implementation Guide as mandated under HIPAA.

1.1 Background

On January 16, 2009, HHS published two final rules to adopt updated HIPAA standards; these rules are available at the Federal Register. One of these rules adopted the new X12 5010 version and set the compliance date for all covered entities to January 1, 2012.

For more information go to www.hhs.gov

1.2 Usage & Special Instructions

Each MCO will receive two types of files, Daily and Monthly Files.

Daily files are transmitted from the enrollment broker to the MCO's and contain records that have passed application system edits. These transactions include enrollment, disenrollment, or change records for the MCO.

The monthly file is the MCO's full positive file of enrollments. The file includes a record for each MCO member with information on that member's current eligibility and enrollment. Daily and Monthly file share the same format.

The monthly recon file contains information about a member's eligibility and enrollment updates for the prior month. The monthly recon and quarterly recon files share the same format.

The quarterly recon file includes a record for each member that was enrolled with a MCO anytime in the past two years including the span of that member's coverage. The quarterly and monthly recon files share the same format.

All dates are 8-character dates in the format CCYYMMDD. The only date data element that is in YYMMDD is the Interchange date data element in the ISA segment.

Both the Daily and Monthly files need to be processed to ensure that all enrollment transactions are in sync with the Louisiana Medicaid records.

1.3 Definitions

The following table includes definitions for the abbreviations and annotations in this document.

Element	Definition	Comment
Segment Level		
REQUIRED	Segment must be transmitted	
SITUATIONAL	Segment may be transmitted if data is available and supports the business or application	
Element Level		
REQUIRED	Data element must have valid data and be transmitted	
SITUATIONAL	Data element may be transmitted if data is available. If another data element in the same segment exists and follows the current element the character used for missing data should be entered.	
NOT USED	Data elements included in the shaded areas of the Implementation Guide are NOT USED according to the standard and no attempt should be made to include these in transmissions.	
General		
USAGE	Indicates if the Segment or Element is Required, Situational or Not Used.	
REF DES.	Reference designator	
Name	Descriptive name of the data element.	

Element	Definition	Comment
Attributes	Indicates the different attributes of the segment or element. Includes the requirement designator, data type and minimum/maximum length.	

Please review the ASC X12N Implementation Guide for detailed instructions regarding the above.

1.4 Delimiters

A delimiter is a character used to separate two data elements or components elements or it can be used to terminate a segment. Once specified in the interchange header, delimiters are not to be used in a data element value elsewhere in the interchange.

The following delimiters will be used for the Louisiana Medicaid enrollment file.

Character	Name	Delimiter
*	Asterisk	Data Element Separator
^	Carat	Repetition Separator
:	Colon	Component Element Separator
~	Tilde	Segment Terminator

2 Structure

The transmission of the data follows the Interchange control structure as outlined in the ASC X12N/005010X220 guide. Refer to the guide for the Transmission Control Schematic.

2.1 Transaction Set Listing

This section lists the levels, loops, and segments contained in this companion guide. The layout of the table shows the nesting of the different loops. Detailed specifications begin in section 2.2.3 (ST – Transaction Set Header)

2.1.1 Table 1 – Header

3 Testing

Once testing begins, files will be posted on the Xchange website. An email notification will be sent to the email address provided by the Trading Partner.

3.1 Xchange Gateway

All test files will be loaded to the Xchange Gateway for each Trading Partner to download.

3.1.1 Xchange Gateway Server

The Xchange Gateway server is a centralized, secure, external file drop server. Each Trading Partner will have a mailbox and folder directory structure, located on the Xchange Gateway Server; which allows for plans to upload and download files.

3.1.2 Access

The Xchange Gateway server can be accessed through https using a web browser or SFTP using a SFTP client. Although note that changing passwords must be done through the web browser.

3.1.2.1 Using Web Browser

Using Internet Explorer or Firefox go to the following URL.

<https://xchange.maximus.com/>

3.1.2.2 Using SFTP Client

SFTP Clients are supported; FileZilla is a tested and supported option.

3.1.3 User Account Activation

To obtain an Account for the 834 Testing please email Xchange@maximus.com specifying the following information. Accounts are not meant to be shared, so for multiple users, please request multiple logins.

Full Name:

Email Address:

Health Plan:

Purpose: 5010 Testing for the LA EB Project

3.1.4 Self Service Password Administration

Xchange will allow for 5 login attempts before the user is secretly locked out. No indication will be made to the user that their account has been locked out for security purposes; only the Xchange administrative team will be notified. If you believe you have forgotten your password, a password reset can be requested automatically from the Xchange Server Login Web Page.

3.1.5 Connectivity Issues

Please contact Xchange@maximus.com if you experience any difficulty with the Xchange Gateway.

3.1.6 File Locations

Trading Partner's home directory will contain an outbound folder. All X12 test files will be placed in the test folder under the outbound folder.
