

Setup Guide

This manual provides a summary of and the specifications for this product as well as explains this product's usage precautions. It also contains an FAQ that explains actions you can take if you have problems such as the product malfunctioning.

Names and Functions of Parts

Left side view

Back view

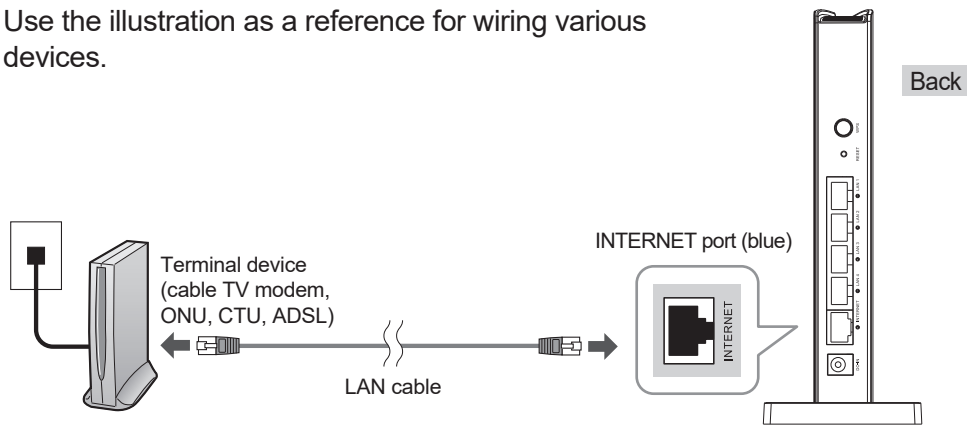

| | | |
|---|--------------------------------------|--|
| ① | WPS lamp (red) | Blinking: WPS setting button is pressed and WPS function is running. Blinking continues at 0.5-second intervals for approximately 2 minutes. Not lit: WPS function is not running. |
| ② | Power lamp (white) | Lit: Power of this product is on Not lit: Power of this product is off |
| ③ | 2.4G WLAN lamp (white) | This indicates the connection status of 2.4 GHz band (11n/g/b) and 5GHz band (11ac/n/a). Lit: Wireless LAN connection is established. Blinking: Wireless LAN connection is underway. Not lit: Wireless LAN connection is not established. |
| ④ | 5G WLAN lamp (white) | |
| ⑤ | WPS setting button | This is used to connect to a wireless device with WPS function (such as a wireless LAN adapter). To use this, press the button for 2 seconds or more. |
| ⑥ | RESET button | When this button is pressed continuously for more than 10 seconds, the WPS lamp blinks and the product's settings are initialized (returned to the factory default settings). Do not turn off the power during the WPS lamp is blinking. |
| ⑦ | LAN ports/LAN lamps 1 - 4 (white) | These ports are used to connect PCs and network equipment to this product with a LAN cable. Lit: LAN cable connection with PC or network equipment is established. Blinking: Data is being transferred. Not lit: Cable is not connected. |
| ⑧ | INTERNET port/ INTERNET lamp (white) | Connect the cable of the WAN (Internet)-side devices of various types of modems (ONU, CTU, etc.). An LED lamp is located next to the port. Lit: Connection with WAN-side device is established. Blinking: Data is being transferred. Not lit: Cable is not connected. |
| ⑨ | DC IN (power supply jack) | Connect the AC adapter included with the product. Do not connect any AC adapter other than the one included with the product. |
| ⑩ | Stand | For instructions on how to use the stand, please read the attachment "Installation method and precautions". |

Installation of the product (router)

1 Connect the equipment.

Use the illustration as a reference for wiring various devices.

3 Check that the lamp is lit.

Check that the lamps on the modem, etc and this product are lit correctly.

2 Turn on the terminal device and this product.

- ① Connect the power cable of the terminal device. If there is a power switch, turn on the switch.

- ② Connect the AC adapter included with the product.

Installation method and precautions

* Be sure to follow the installation method described below and use this product correctly.

- Whether in a horizontal or vertical position, the product should not be placed in a location such as between a wall and a desk but in a well-ventilated area. Do not place this product so as to overlap network equipment such as a modem or terminal device.
- The stand is not secured to the product. Place the product on the stand after connecting the cables to the product.

As dropping this product or yanking a cable during operation could lead to damage or data loss, be sure to stabilize the product by placing it on the stand included and take measures to prevent dropping or yanking.

Vertical placement

- Face the side with the LED lamp forward.
- Refer to the illustration to set the back side of the product on the provided stand in a way that it fits snugly in the groove.

Horizontal placement

- Face the side with the LED lamp upward.
- Place the product on the center rear of the provided stand so that the body does not wobble.

Configuring settings from smartphones and PCs

1 Wireless connection with the product

For a wireless connection with this product, enter the wireless configuration information provided in the “かんたんセットアップシート (初期値)” bundled with the product.
Have the “かんたんセットアップシート (初期値)” ready at hand.
The operational procedures vary depending on the computer, tablet, or smartphone you are using.

Reference **かんたんセットアップシート (初期値)**
If SSIDs for both 2.4GHz and 5GHz are displayed in the list, select either one.

| SSID (Wireless Name) | | Encryption Key (Same for All SSIDs) |
|----------------------|-----------------|-------------------------------------|
| 2.4GHz | elecom2g-xxxxxx | 1a2B3c4D5e6F |
| 5GHz | elecom5g-xxxxxx | 1a2B3c4D5e6F |

[Router control screen access information]

IP address: 192.168.2.1
Password (Optional settings): (blank)
MAC address: 12:34:56:AB:CD:EF

User name: admin

[Router WAN side information]

Windows 10/8.1/7

- Click the “Wireless” icon on the task tray.
* For Windows 8.1, switch to the desktop screen.
* Screen examples are described in Windows 10
- Select the “SSID (Wireless Name)” listed in the “かんたんセットアップシート (初期値)” and then click [接続] (Connect).
- Enter the “Encryption Key (All SSID)” provided in the “かんたんセットアップシート (初期値)” and then click [次へ] (Next) or [OK].

The connection is complete if a screen like the following appears.

* Before the above screen is displayed, if a sharing-related message such as “このネットワーク上の他の PC やデバイスが、この PC を検出できるようにしますか?” (Will you enable this PC to be detected by other PCs and devices on the network?), click [いいえ] (No).

Mac OS X

- Click the “Wireless” icon on the upper right side of the desktop and then click the “SSID (Wireless Name)” from the list provided in the “かんたんセットアップシート (初期値)”.
* If the Wi-Fi is off, click [Wi-Fi を入にする] (Turn On Wi-Fi).
- Enter the “Encryption Key (All SSID)” provided in the “かんたんセットアップシート (初期値)” and then click [接続] (Connect).

Connection is complete if a check mark is shown in front of the SSID.

Android

- Swipe down from the top of the screen and then tap the “Settings” icon from the menu that appears.
- Tap “Wi-Fi” and then tap the “SSID (Wireless Name)” provided in the “かんたんセットアップシート (初期値)”.
- Enter the “Encryption Key (Same for All SSIDs)” provided in the “かんたんセットアップシート (初期値)” and then tap [接続] (Connect).

Connection is complete if “接続済み” (Connection Completed) is displayed.

iOS

- Tap the “設定” (Settings) icon on the home screen.
- Tap “Wi-Fi” and then tap the SSID (Wireless Name) provided in the “かんたんセットアップシート (初期値)”.
- Enter the “Encryption Key (All SSIDs)” provided in the “かんたんセットアップシート (初期値)” and then tap [接続] (Connect).

* The screen may differ depending on the iOS version of the terminal.

Connection is complete if a check mark is shown in front of the SSID.

Step 1 of “2. Configuring the Router Mode of this Product” is displayed.

2 Configuring the Router Mode of this Product”

In the event that “かんたんセットアップ 2” (Easy Setup 2) is not automatically displayed on the screen, enter the URL address or use the QR code displayed on the right.

<http://192.168.2.1/wizard.html>

* In the event that even though you have conducted the tasks described on the left the configuration screen is not display, please try again or reset the router. To reset, press and hold the RESET button on the back of the product for 10 seconds or more.

- Enter the password in the “パスワード” (Password) column to log in to the configuration screen of this product and click (tap) [適用] (Apply).

- Because the password has not been initialized, enter the “パスワード” (Password) that you decided on your own. So that you do not forget the password, write it down in the “かんたんセットアップシート (初期値)” and keep it in a safe place.

| かんたんセットアップシート (初期値) | | |
|---------------------|-------------------|----------------------------|
| | SSID (無線名) | 暗号化キー (全SSID共通) |
| 2.4GHz | elecom2g-xxxxxx | 1a2B3c4D5e6F |
| 5GHz | elecom5g-xxxxxx | 暗号化キー (全SSID共通) : WPA2-AES |
| (ルーター管理画面アクセス情報) | | |
| IPアドレス | 192.168.2.1 | ユーザー名 admin |
| パスワード (任意設定) | 設定画面に入力してください。 | |
| (ルーターWAN側情報) | | |
| MACアドレス | 12:34:56:AB:CD:EF | |

- Click (tap) [自動設定] (Automatic Configuration).

- When the automatic configuration for the router mode settings is completed, “セットアップ完了” (Setup Complete) is displayed on the screen.
- When the automatic configuration does not work, the screen for the 3-A or 3-B operation may be displayed. Continue the procedures by following the steps displayed on the screen.

- Enter the “ユーザー名” (User Name) and “パスワード” (Password) and then click (tap) [次へ] (Next).

- For the “ユーザー名” (User Name) and “パスワード” (Password) here, enter the authentication ID and password for the Internet connection provided to you by your contracted provider. The name may differ depending on the provider.

- Enter each item on the screen and click (tap) [次へ] (Next).

- Only when there is a specified fixed IP address from your contracted provider should you enter the information from the provider for each item.

If the above screen appears, connection to the Internet is completed.
