Earthmate[®] Quick Start Guide - Android[™]

inReach® devices can be paired with the Earthmate app on a compatible* Android device to create, send and receive messages, navigate, and more from your mobile device, even when you're beyond range of cellphone coverage.

Messaging, tracking, and SOS functions require an active satellite subscription. Always test your device before you use it outdoors.

NOTICE

Some jurisdictions regulate or prohibit the use of satellite communications devices. It is the responsibility of the user to know and follow all applicable laws in the jurisdictions where the device is intended to be used.
