

LED-5 Diving Light System

Introduction

Thank you for choosing the Hollis LED5 Light System. To help ensure its high performance and reliability, please take the time to review and understand this manual.

This User's Guide describes the unique functions and features of the Hollis LED5 Light System. The more acquainted that you become with your new light, the more you will enjoy your diving experience. By following the instructions in this guide, you will understand how your light works allowing the best use of its features. It is very important to first read the entire contents of this manual before attempting to use your new light.

All Hollis products are tested for function and water integrity before leaving the factory. Hollis products are constructed with the highest quality materials and utilize the latest computer aided design and manufacturing techniques to ensure their highest performance and reliability.

Technical Specifications

The LED5 light system offers the reliability, durability and efficiency of LED technology in a small compact package.

Power Source	5 Watt LED
Weight	1.2 lbs (batteries installed)
Beam Degree	8 Degree – Custom AL Reflector
Burn Time	Approx. 8 hours
Output	260 Lumens
Bulb Life	50,000 hour life
Material	T6061-T6 Anodized Aluminum
Battery	3 “C” Alkaline
Maximum Operating Depth	600 Feet / 152 Meters
Dimensions	46mm (Diameter) / 206mm (Length)

Instruction for Use

The LED5 light system has a simple operating procedure. Once the batteries are installed into the supplied battery carrier, slide the pack into the housing and secure the battery cap by turning it clockwise until it stops – at this point the light is in the “ON” position. To turn “OFF”, turn the cap counterclockwise one full turn.

CAUTION:

- * While underwater, do not turn the cap counterclockwise more than one and half full turns from fully closed as this will flood the light
- * LED5 light system is not to be used out of water

MANUFACTURER WARRANTY – 1 Year Limited
