

LTC4278: PoE+ (802.3at) Powered Device Controller and Synchronous Flyback

DESCRIPTION

Demonstration circuit 1561B is an Ethernet Alliance™ certified Power over Ethernet (PoE) powered device (PD), featuring the [LTC®4278](#). The DC1561B also features a wide auxiliary input voltage range of 9V to 57V. The demonstration board can connect to a Type 2 Power Sourcing Equipment (PSE) device, such as the DC1567.

This board is a Type 2 (IEEE 802.3at) compliant, high power Power over Ethernet (PoE), Powered Device (PD). The DC1561B also features a wide auxiliary input voltage range of 9V to 57V. The demonstration board can connect to a Type 2 Power Sourcing Equipment (PSE) device, such as the DC1567.

The LTC4278 provides IEEE 802.3at standard (PoE+) PD interfacing and power supply control. When the PD fully powers, the PD interface passes power from the PSE to the switcher through an internal, low resistance, high power MOSFET. The highly integrated LTC4278 controls a high power, small power supply that utilizes a highly-efficient isolated flyback topology with synchronous rectification. The DC1561B outputs 5V at 4.5A.

DC1561B also demonstrates the use of an auxiliary wall adapter for nominal 12VDC, 24VAC/24VDC, or 48VDC systems. When present, the auxiliary supply is the dominant supply over PoE to provide power.

PERFORMANCE SUMMARY (T_A = 25°C)

PARAMETER	CONDITION	VALUE
PoE Input Voltage (V _{PORT})	At RJ-45 Jack (J1)	37V to 57V
Auxiliary Input Voltage (V _{AUX})	From AUX ⁺ to AUX ⁻ Terminals	8V(On)/7V(Off) to 57V
Output Voltage (V _{OUT})	Typical	5V
Output Current (I _{OUT})	Over 9V to 57V Input Voltage	4.5A (Max)
Output Voltage Ripple (Typ)	Over 9V to 57V Input Voltage, I _{OUT} = 4.5A	30mV _{P-P} (Typ)
Output Regulation	PoE Input Voltage, I _{OUT} = 0A to 4.5A	±0.4% (Typ)
	Auxiliary Input Voltage, I _{OUT} = 0A to 4.5A	±1.1% (Typ)
Output Voltage Response to Load Step (Typ)	Load Step = 2.25A to 4.5A, 48V Input Voltage	±500mV (±10%) (Typ)
	Settling Time (Within 1% of V _{OUT})	< 150μs (Typ)
Switching Frequency		250kHz (Typ)
Efficiency	V _{AUX} = 24V, I _{OUT} = 4.5A (Includes Diode D12)	89% (Typ)

OPERATING PRINCIPLES

A compatible high power PSE board, such as the DC1567, connects to the DC1561B at the RJ45 connector J1 (see the schematic in Figure 12). As required by IEEE 802.3at, the DC1561B uses a diode bridge across the data pairs and signal pairs. Schottky diodes (D2-D9) are used at the input to improve efficiency over standard diode bridges. The LTC4278 provides the PoE required 25k signature resistance and classification up to class 4 (25.5W). When the PD is powered and voltage reaches above the PoE “On Voltage,” the LTC4278 switches the port voltage over to the power supply controller through its internal MOSFET. This voltage allows the Zener and NPN-based linear regulator (R9/D17/Q3) to power up the bias pin, V_{CC} , of the power supply controller. The IC begins a controlled soft-start of the output. As the output voltage rises, bias power takes over by the bias supply made up of T1’s bias winding and D11 since it reverse biases the linear regulator’s (Q3) base to emitter junction.

When the soft-start period is over, the output voltage regulates by observing the pulses across the bias winding during the flyback time. The Primary Gate drive (PG) and Synchronous Gate (SG) drive Pulse Width Modulates (PWM) in order to keep the output voltage constant. The synchronous gate drive signal transmits to the secondary via the small signal transformer, T2. The output of T2 drives a discrete gate drive buffer, R22 and Q6/7 to achieve fast gate transition times, hence higher efficiency.

The two-stage input filter, C5, L2, and C6 and output filter, C1/C3, L1, and C9 are the reasons that this PoE flyback supply has exceptionally low differential mode conducted emissions. A common mode filter consisting of a common mode choke (L3) and common mode capacitor (C34) yields low common mode emissions out of the power supply.

QUICK START PROCEDURE

Demonstration circuit 1561B is easy to set up to evaluate the performance of the LTC4278 in a PoE+ PD application. Refer to Figure 1 for proper equipment setup and follow the procedure below:

1. Place test equipment (voltmeter, ammeter, and electronic load) across output.
2. Input supplies:
 - a. Connect a PoE+ capable PSE, like the DC1567, with an Ethernet cable to the RJ45 connector, J1. See Figure 1.
 - b. Or, connect a 37V to 57V capable power supply (Power Supply in Figure 1) across VPORT_P and VPORT_N.
 - c. Or, if evaluating the auxiliary power supply capability, connect a 9V to 57V at 4A capable power supply across AUX+ to AUX- (Auxiliary Supply in Figure 1).

3. Check for the proper output voltage of 5V.
4. Once the proper output voltage is confirmed, adjust the output’s load current within the operating range and observe the output voltage regulation, output ripple voltage, efficiency, and other parameters.

NOTE: When measuring the input or output voltage ripple, care must be taken to avoid a long ground lead on the oscilloscope probe. Measure the output (or input) voltage ripple by touching the probe tip and probe ground directly across the +VOUT and -VOUT (or VPORT_P and VPORT_N) terminals. See Figure 2 for proper scope probe technique.

Information furnished by Analog Devices is believed to be accurate and reliable. However, no responsibility is assumed by Analog Devices for its use, nor for any infringements of patents or other rights of third parties that may result from its use. Specifications subject to change without notice. No license is granted by implication or otherwise under any patent or patent rights of Analog Devices.

ESD Caution

ESD (electrostatic discharge) sensitive device. Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

Legal Terms and Conditions

By using the evaluation board discussed herein (together with any tools, components documentation or support materials, the "Evaluation Board"), you are agreeing to be bound by the terms and conditions set forth below ("Agreement") unless you have purchased the Evaluation Board, in which case the Analog Devices Standard Terms and Conditions of Sale shall govern. Do not use the Evaluation Board until you have read and agreed to the Agreement. Your use of the Evaluation Board shall signify your acceptance of the Agreement. This Agreement is made by and between you ("Customer") and Analog Devices, Inc. ("ADI"), with its principal place of business at One Technology Way, Norwood, MA 02062, USA. Subject to the terms and conditions of the Agreement, ADI hereby grants to Customer a free, limited, personal, temporary, non-exclusive, non-sublicensable, non-transferable license to use the Evaluation Board FOR EVALUATION PURPOSES ONLY. Customer understands and agrees that the Evaluation Board is provided for the sole and exclusive purpose referenced above, and agrees not to use the Evaluation Board for any other purpose. Furthermore, the license granted is expressly made subject to the following additional limitations: Customer shall not (i) rent, lease, display, sell, transfer, assign, sublicense, or distribute the Evaluation Board; and (ii) permit any Third Party to access the Evaluation Board. As used herein, the term "Third Party" includes any entity other than ADI, Customer, their employees, affiliates and in-house consultants. The Evaluation Board is NOT sold to Customer; all rights not expressly granted herein, including ownership of the Evaluation Board, are reserved by ADI. CONFIDENTIALITY. This Agreement and the Evaluation Board shall all be considered the confidential and proprietary information of ADI. Customer may not disclose or transfer any portion of the Evaluation Board to any other party for any reason. Upon discontinuation of use of the Evaluation Board or termination of this Agreement, Customer agrees to promptly return the Evaluation Board to ADI. ADDITIONAL RESTRICTIONS. Customer may not disassemble, decompile or reverse engineer chips on the Evaluation Board. Customer shall inform ADI of any occurred damages or any modifications or alterations it makes to the Evaluation Board, including but not limited to soldering or any other activity that affects the material content of the Evaluation Board. Modifications to the Evaluation Board must comply with applicable law, including but not limited to the RoHS Directive. TERMINATION. ADI may terminate this Agreement at any time upon giving written notice to Customer. Customer agrees to return to ADI the Evaluation Board at that time. LIMITATION OF LIABILITY. THE EVALUATION BOARD PROVIDED HEREUNDER IS PROVIDED "AS IS" AND ADI MAKES NO WARRANTIES OR REPRESENTATIONS OF ANY KIND WITH RESPECT TO IT. ADI SPECIFICALLY DISCLAIMS ANY REPRESENTATIONS, ENDORSEMENTS, GUARANTEES, OR WARRANTIES, EXPRESS OR IMPLIED, RELATED TO THE EVALUATION BOARD INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTY OF MERCHANTABILITY, TITLE, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS. IN NO EVENT WILL ADI AND ITS LICENSORS BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES RESULTING FROM CUSTOMER'S POSSESSION OR USE OF THE EVALUATION BOARD, INCLUDING BUT NOT LIMITED TO LOST PROFITS, DELAY COSTS, LABOR COSTS OR LOSS OF GOODWILL. ADI'S TOTAL LIABILITY FROM ANY AND ALL CAUSES SHALL BE LIMITED TO THE AMOUNT OF ONE HUNDRED US DOLLARS (\$100.00). EXPORT. Customer agrees that it will not directly or indirectly export the Evaluation Board to another country, and that it will comply with all applicable United States federal laws and regulations relating to exports. GOVERNING LAW. This Agreement shall be governed by and construed in accordance with the substantive laws of the Commonwealth of Massachusetts (excluding conflict of law rules). Any legal action regarding this Agreement will be heard in the state or federal courts having jurisdiction in Suffolk County, Massachusetts, and Customer hereby submits to the personal jurisdiction and venue of such courts. The United Nations Convention on Contracts for the International Sale of Goods shall not apply to this Agreement and is expressly disclaimed.
