1. RAZER VIRTUAL RING LIGHT APP

The features listed here require you to log in using your Razer ID. Internet connection is required for installation and updates. All listed features are subject to change based on the current app version.

VIRTUAL RING LIGHT

Upon launching the Razer Virtual Ring Light app, the virtual ring light is immediately ready for use as a source of illumination for your video calls or streams.

When using multiple screens, you can drag and drop the virtual ring light to your desired monitor.

CONTROL POD

Found at the bottom right corner of the screen, the control pod lets you customize how the virtual ring light is displayed on-screen. Use the control pod to enable or disable the virtual ring light, change its thickness and color, adjust its brightness, and access the Settings window.

The following settings are available on the control pod:

- **Power button (** ⁽)**).** Turn on/off the virtual ring light.
- Brightness slider (🔅). Adjust the luminance of the screen using the slider.
- Thickness slider (=). Change how thick the virtual ring light appears on-screen.
- **Color slider.** Found between the brightness and thickness slider, use this slider to change the color of the virtual ring light.
- Minimize (____). Minimize the control pod without turning off the virtual ring light (if applicable).
- **Close (**×**).** Close the virtual ring light and minimize the control pod to the system tray.

To open the app again, click the app icon on the system tray and then click on the Razer Virtual Ring Light.

SETTINGS

The Settings window, accessible by clicking the (🌣) button on the control pod, enables you to configure the app's startup and screen display behavior, easily access the Windows camera properties window, change the app's display language, check for updates, and more.
