Simco ionizing air gun manual

Is ionizing air safe. Simco top gun ionizing air gun manual.

Ionising air guns neutralise static charges on several materials and clean the surface using ionized compressed air. Neutralising the static charges makes it easier to blow-clean the surface and prevents dust and dirt particles from being reattracted. The compressed air used for this purpose must be free from oil and water. The Cleanflex Easy ionising air gun can be used for cleaning and neutralising surfaces. It's unique features, not seen in any other ionising guns, make it very versatile to use. Ergonomic, hand or pull down, less air consumption, low noise, better blow-off force. The Cleanflex Easy ionising air gun can be used for cleaning and neutralising surfaces. It's unique features, not seen in any other ionising guns, make it very versatile to use. Ergonomic, hand or pull down, less air consumption, low noise, better blow-off force. Cleanflex Easy Simco-Ion's Top Gun is developed for light industrial applications. A high ion production attends to an optimal neutralisation of static charges.

High blow-off force and low air consumption provide high-efficiency cleaning. A filter at the exit of the gun ensures that the air is clean. The gun body is lightweight and durable. It features a light-touch trigger, making it comfortable even for extended use. Simco-Ion's Top Gun is developed for light industrial applications. A high ion production attends to an optimal neutralisation of static charges.

High blow-off force and low air consumption provide high-efficiency cleaning. A filter at the exit of the gun ensures that the air is clean. The gun body is lightweight and durable. It features a light-touch trigger, making it comfortable even for extended use. Top Gun The Cobra ionising air gun is excellently suited for heavy-duty industrial applications. It has a lightweight durable gun body made of high impact plastic. The airflow is controlled by the trigger. The air flow is amplified by a minimum factor of 6 : 1 by drawing in ambient air through the rear. The high-voltage point integrated aerodynamically in the gun body cleans itself during use. The gun comes standard with 6 metres of cable. Two guns at most can be connected to a single power unit. The Cobra ionising air gun is excellently suited for heavy-duty industrial applications.
