HOLLIS GEAR - TECNOMAR

HOLLIS FOR LIFE

Our commitment does not end when you buy a Hollis product. Long after the initial sale, we provide prompt and professional after-sales service to keep your gear working well and looking good, for a very long time.

OUR PRODUCT WARRANTIES

Regulators	Materials and Construction	Limited lifetime* and Hollis for Life* (Free Parts) *Proof that regulator was serviced, according to service interval, to qualify.
Buoyancy Compensators	Materials and Construction Requires Annual Service	Five years from date of purchase
LX Wings	Materials and Construction	Limited Lifetime
Analog Instruments	Materials and Construction Requires Annual Service	Two years from date of purchase
Masks, Snorkels, Fins	Materials and Construction	One year from date of purchase
Wetsuits	Materials and Construction	One year from date of purchase
Drysuits	Materials and Construction	Five year warranty on construction. Does not cover damage caused by normal wear and tear, misuse or negligence. The warranty is limited to repair or replacement, at Huish Outdoors' option, and where permitted by law does not include consequential or incidental damages. This warranty is rendered invalid by unauthorized repairs. 1 year warranty on zippers and valves
Neoprene Accessories	Materials and Construction	One year from date of purchase
Lights	Materials and Construction	One year from date of purchase

BRASS SPG

Solid and compact brass SPG. This rugged, easy-to-read gauge works great as a primary or even backup pressure gauge for all divers. Gauge has a luminescent face for easy reading in low light or night diving conditions. Pressure gauge module has a durable tempered glass scratch resistant lens.

- Luminescent Faceplate
- Standard with Air Spool and Viton O-rings
- Oxygen Clean
- Available in 0-5000 PSI or 0-360 BAR
- Chrome-plated brass housing with Bourdon tube
- Scratch-resistant tempered glass
- 2" (50.8 mm) size

LOW-PROFILE BRASS SPG

Low-Profile Brass SPG with scratch-resistant lens, high-contrast background, luminescent needle, low weight and small size allow for a more streamlined rigging and are ideal for stage and deco bottles. White markings.

- Luminescent needle
- Standard with Air Spool and Viton O-rings
- Oxygen clean
- Available in 0-5000 PSI or 0-400 BAR
- Super hard PVD coated brass housing with Bourdon tube
- Scratch-resistant plastic lens
- 1.5" (38.1 mm)

LARGE PONY BOTTLE GAUGE

Tiny gauge that easily connects to the 7/16" (1.1 cm) high-pressure port of your pony bottle regulator or other alternate tank regulator to show pressure in an easy-to-read display. Switching regulators to view the primary pressure gauge or adding a separate pressure gauge to the pony bottle is a problem. Now with this Gauge, all those headaches are over.

- Eliminates Use of Standard Hosed Pressure Gauge
- Compact Small Design
- Large Numbers and Colored Indicators Easy to Read Display
- Equipped with HP O-Ring Ready to Install
- Nitrox compatible to 100% O2
- Threads Directly 7/16" (1.1 cm) First Stage HP Port
- Available in 0-400 BAR
- Ideal for Pony Bottles, Deco Bottles or Back-Up Air Supplies
- One-Way Safety Valve

200LX+DCX

"Whether it's a technical diver in a cave at 300 ft or a recreational diver on a reef at 40 ft, we only make our regulators one way: to the highest possible standard. Because lives depend on it." — Bob Hollis

Hollis' newest flagship regulator is the 200LX + DCX Regulator, designed by divers for divers. Every feature is designed with high performance and superior manufacturing at every step. The 200LX can be converted from a right-handed hose configuration to a left-handed hose configuration in a manner of minutes. The valve of the 200LX is "PVD" Industrial Plated. PVD is a super-hard coating that is by far the most durable coating available today. Superior quality that will outlast any traditional plating. The front metal ring, packing nut and inhalation knob are also "PVD" Plated.

All LX regulators come standard with MiFlex® hoses and orthodontic mouthpieces with dual color tabs. It comes standard in both YOKE or DIN configuration

The LX regulators come standard with the Hollis Lifetime Warranty, 2-Year Service Interval and Free Parts for Life

- Pneumatically balanced PVD plated brass valve results in smooth, easy breathing
- Reversible demand valve, can be converted from right-handed hose configuration to left-handed hose configuration
- Diver adjustable inhalation knob, allows diver to customize inhalation effort
- Adjustable Dive/Pre-Dive switch: Large Venturi lever has a soft rubber grip, which makes it easy to locate and use
- Ergonomic exhaust channels bubbles away from field of view and reduces exhaust effort
- Improved orthodontic mouthpiece with dual color tabs
- PVD plated stainless steel metal ring, adjustable knob and Dive/Pre-Dive end cap
- MiFlex® braided hose
- Paired with the new DCX 1st stage
- **LIFETIME WARRANTY**
- **FREE PARTS FOR LIFE**
- 2-Year Service Interval with inspection

DCX

PHYSICAL VAPOR DEPOSITION (PVD)

Physical Vapor Deposition (PVD) is a time tested proven technology that has been used for decades in other industries and is now available for specific Hollis products. PVD is a collective set of processes used to deposit thin layers of material, typically in the range of few nanometers to several micrometers. This state of the art process provides a superior alternative to traditional "Chrome Plating", which is environmentally friendly and provides long lasting durablity.

150LX+DC7

An additional regulator being added to the Hollis Regulator line is the 150LX, similar in design to the 200LX but without the PVD Plating.

The 150LX delivers great performance at a moderate price. This second stage is paired with the DC7 for a great travel-the-world design or for those divers looking for a regulator to provide performance during long deco stops.

The 150LX is paired with the HO2 1st Stage for an oxygen regulator that will never stop performing. Built for oxygen percentage 40% to 100%.

The front metal ring, packing nut and end cap in Stainless Steel.

All LX regulators come standard with MiFlex® hoses and orthodontic mouthpieces with dual color tabs. It comes standard in both YOKE or DIN configuration.

The LX regulators come standard with Hollis's Lifetime Warranty, 2-Year Service Interval and Free Parts for Life

- Pneumatically balanced chrome-plated brass valve results in smooth, easy breathing
- Reversible demand valve, can be converted from right-handed hose configuration to left handed hose configuration
- Adjustable Dive/Pre-Dive switch: Large Venturi lever has a soft rubber grip, which makes it easy to locate and use
- Ergonomic exhaust channels bubbles away from field of view and reduces exhaust effort
- Improved orthodontic mouthpiece with dual color tabs
- Stainless steel cosmetic ring
- MiFlex® braided hose
- Suitable for coldwater diving
- Paired with the DC7 1st stage as Primary regulator
- Paired with HO2 1st stage as O2 regulator (O2 Cleaned in sealed bag)
- **LIFETIME WARRANTY**
- **FREE PARTS FOR LIFE**
- 2-Year Service Interval with inspection

100LX+DC3

The 100LX has the performance of the 150LX, but is paired with the DC3 for a great value regulator.

All LX regulators come standard with MiFlex® hoses and orthodontic mouthpieces with dual color tabs. It comes standard in both YOKE or DIN configuration.

- Pneumatically balanced chromed-plated brass valve results in smooth, easy breathing
- Reversible demand valve, can be converted from right-handed hose configuration to left-handed hose configuration
- Adjustable Dive/Pre-Dive switch: Large Venturi lever has a soft rubber grip, which makes it easy to locate and use
- Chrome Plated Brass Valve
- Ergonomic exhaust channels bubbles away from field of view and reduces exhaust effort
- Improved orthodontic mouthpiece with dual color tabs
- Plastic Cosmetic Ring
- MiFlex® braided hose
- Paired with the DC3 1st stage as Primary regulator
- **LIFETIME WARRANTY**
- **FREE PARTS FOR LIFE**
- 2-Year Service Interval with inspection

500SE+DC7

OLD SCHOOL. NEW TECH.

The 500SE utilizes a servo controlled valve to provide precision airflow and unparalleled performance for both air and trimix divers in a side exhaust configuration. To achieve this, we have perfected the original "lever-servo valve" we designed 35 years ago. Overbalanced diaphragm first stage also provides ideal hose routing for both backmount and sidemount users and optimum performance regardless of depth.

- Pneumatically balanced servo valve system
- Patented Orthodontic Mouthpiece for comfort and reduced jaw fatigue
- Standard with 30" MiFlex® hose
- Easily disassembled without the use of tools and underwater if necessary
- Left or right positioning—no upside-down
- Boltsnap tie point
- First Stage Configuration: DC7

DCX

Every feature is designed with high performance and superior manufacturing at every step. Surrounded by the most durable coating available today, PVD, has been redesigned to reduce weight improving angle of LP and HP ports to maximize hoses routing. Hollis has made it an industry standard to include the 5th LP port making the DCX the diver's first choice for back-mounted doubles, sidemount or even for the recreational diver that demands the same performance as a technical diver.

- Lighter weight, suitable for cold-water use
- PVD "industrial" plating - PVD (Physical Vapor Deposition) is a super-hard coating that is by far the most durable coating available today. Superior quality that will out last any traditional finish.
- Unique over-balanced, diaphragm design - As the diver descends, the over-balancing feature allows the medium pressure gas in the hose to increase at a rate faster than ambient. Superior performance at depth.
- 2 HP ports and 5 LP ports for optimum hose routing, 5th port allows for side-mount or twin cylinder set ups
- An environmental dry system keeps water out of the main spring chamber thus preventing ice buildup and keeping salt and contamination out

PART NO.	ITEM
240-3572	DCX - YOKE
240-3573	DCX - DIN

DC3

- Built with the same quality as the DCX, without the swivel turret, is the ideal 1st stage for double cylinder configuration as well as perfect for single cylinders.
- Environmental sealing prevents internal corrosion, contaminants, and icing of the 1st stage
- Withstands rigorous CE standard for coldwater performance

PART NO.	ITEM
240-3555	DC3 - YOKE
240-3556	DC3 - DIN

DC7

High performance over-balanced 1st stage provides progressively greater intermediate pressure as depth and gas density increases for superior gas delivery under extreme conditions.

- Fixed hose routing ideal for both backmount and sidemount configuration
- Environmental sealing prevents corrosion, contaminants, and icing of the first stage
- Withstands rigorous CE standard for coldwater performance
- Nitrox compatible to 40% | 2 HP and 4 LP | DIN 300 bar

PART NO.	ITEM
240-3567	DC7 - YOKE
240-3568	DC7 - DIN

H02

It's certified for up to 100% Oxygen Service thanks to highly specialized component materials and manufacturing processes. The Flow-By Piston Design is the only true Fail-Safe First Stage Design on the market. The Piston will automatically move downstream from the high pressure air coming from the Scuba Cylinder if there is an unexpected malfunction of the High-Pressure Seat. This feature guarantees a constant Gas-Flow to the Second-Stage Regulator. The Regulator First Stage weighs 8.3 oz (235.3 g).

- Bulletproof Hollis HP5 First Stage Design
- Non-Balanced Flow-By Piston
- Fail-Safe First Stage Design
- 300 BAR/4500 PSI DIN Connection | 4 LP 3/8" Threaded Ports | 1 HP 7/16" Threaded Port
- DIN Hand-Wheel Connector: Oxygen Green for Easy Identification for Oxygen-Use-Only
- Material: Durable and Corrosion Resistant Marine-Grade Chrome Plated Brass

HD-200

Comfort, function and durability, the HD-200 is everything the advanced sport diver could ask for. Fitted with a combination of Tech/Rec features that provide ultimate comfort and function. Heavy-duty construction and innovative design make this BC best in class.

- 16 kg bladder S and M sizes, 20.4 kg bladder L and XL sizes
- 1000 denier Cordura™ with PU lamination outer shell and 15 mm urethane internal bladder
- Contoured, lightweight backpack with backpad, lumbar support, and a rolled neoprene comfort neck
- New 10 lb (4.5 kg) pinch-and-pull weight pockets
- 5 lb (2.27 kg) non-dumpable rear weight pockets
- System weight: 9.4 lbs (4.3 kg)
- Traditional 2" waist strap with stainless buckle
- 2" Nylon waist strap with quick release buckle and 2" SS D-ring
- New comfort molded backpad

L.T.S.

LIGHT TRAVEL SYSTEM

The Light Travel System (L.T.S.) is our latest warm water solution for traveling divers and destinations where weight restrictions are limited. Incorporating key features from our popular HD200, the L.T.S. is a weight integrated back inflation design with 30 lbs (13.6 kg) of lift, suitable for single AL80s and steel 85s. Its simple, non-modular design stows easy and weighs only 5 lbs. (2.26 kg)

- Ideal for traveling divers, weighs only 5 lbs (2.26 kg)
- 30 lbs (13.6 kg) of lift capacity
- Comfortable backpad
- Chest and hip D-rings for accessories or sling bottle
- Rugged 1000D nylon outer cover with 420D internal bladder
- 5 lbs (2.26 kg) dumpable integrated weight system
- Available in four sizes SM, MD, LG, XL
- Limited lifetime warranty

HTS 2
HARNESS SYSTEM

The Harness Tech System 2 (HTS 2) easily switches from a single tank soft pack to a dual tank backplate system, the modular capabilities of the HTS 2 may be personalized to your needs.

- Streamlined modular harness system
- Comfort back pad with lumbar support
- Stainless steel D-rings and cam buckle included
- Adjustable sternum strap with 2 mounting positions
- New version with added carry handle
- Accommodates mounting of new S25-LX and S38-LX wings without STA
- Adjustable padded shoulder straps
- Optional 10 lb (4.5kg) interchangeable quick-release weight pockets
- 2 in (5.1 cm) webbing crotch strap with vehicle hook ring
- No-slip cam bands with plastic buckles

Wing Sold Separately

ELITE 2
HARNESS SYSTEM

Tech/Rec is at its best with the Elite 2 Harness. The Elite 2 Harness System offers you all the features of a technical harness with the added comfort that recreational divers look for.

- Adjustable shoulder straps with quick release buckles
- Easier donning and doffing of equipment
- Adjustable and removable shoulder pads
- 316 marine grade stainless steel
- Adjustable sternum strap included allows for custom fit
- System weight (harness only): 1.7 lb (0.77 kg)

Backplate Available Separately

SOLO
HARNESS SYSTEM

Designed to meet all the needs of demanding technical divers, the Solo Harness System is clean, simple, and foolproof!

- Streamlined design enhances comfort with less drag
- Continuous one piece harness system limits failure potential
- Stainless steel D-rings and cam buckle included
- Removable shoulder pads accept stainless steel D-rings
- Backplate sold separately
- System weight (harness only): 1 lb (0.45kg)
- Solo Harness: One Size, Trim-to-fit

Backplate Available Separately

SMS 100 DUAL
EXPEDITION GRADE

Our legendary SMS100 Dual was designed not just with the sidemounts cave divers in mind, but any diver. Whether you are a beginner, advanced or technical diver, this kit was designed for you. Suitable for sidemounting, double or single cylinders, but also for use with rebreathers or rear mounted singles. SMS100 Dual provides redundancy for technical sidemount divers using wetsuits and carrying multiple cylinders. This "go anywhere" system can be used in any environment from open water to the overhead environment. Ready to dive out of the box.

- 360 Degree wing—52 lbs (23.5 kg) lift
- Bulletproof construction
- Dual wing
- Redundant inflator system built in
- Centrally and uppermost located elbow to avoid overhead interference
- Upper / Lower cam band slots for rear mounted single tank
- Full visibility over your system
- Reduces additional gear
- Aids in transporting gear to and from the beach or boat
- Streamlines profile and reduces drag, increasing bottom time
- Rigging kit included: tank bungees, SS Cam bands, SS Bolt snaps and nylon line

SMS 75

Hollis has become a leader in the sidemount market. It is not just a fad and not just a tool for cavers, it's here to stay and is growing. The SMS 75 is an evolution from years of sidemount development. While it will cater more to hardcore cave divers, SMS 75 was created to handle all environments. Proper trim is key, and the wing is designed to promote horizontal diving with increased lift towards the hips where it's needed most. The SMS 75 will also support rear-mounted tanks and reversible inflator positions.

- Trapezoid shape to promote horizontal trim
- Adjustable and removable wing bungee
- Designed for cave or open water sidemount
- Cam slots for single tank and grommets at 11" for banded doubles
- Reversible Inflator and dump assembly
- Rigging kit included: tank bungees, SS Cam bands, SS Bolt snaps and nylon line
- Includes sternum strap and crotch strap
- Inner located elbow to avoid overhead interference

208-1311	SMS75 SINGLE WING - ONLY

SMS KATANA 2

Katana 2 is designed for the dedicated sidemount diver and every configuration imaginable, from warm water to cold, wet to dry, steel to aluminum tanks, open circuit to sidemount CCR. The Katana 2 is the answer to the evolving minimalist, low profile and modular sidemount category.

UPDATES:

- Increased lift capacity to 40lbs (18kg), Increased weight capacity to 15lbs (7 kg)
- Removal of “belly band” design to retain the wing and keep the lift closer to the diver and central to the weight of the tanks without the turtle shell effect found on other products
- One-size-fits-all harness design
- “H” or “Y” style harness configuration options available with the same harness
- Includes new attachment points for canister lights and accessories
- Single bladder ideal for recreational sidemount or divers who use a drysuit for redundancy
- Dual bladder ideal for technical dives using a wetsuit
- Increased lift capacity ideal for cold water diving with multiple tanks while still maintaining a low profile
- Increased weight capacity for even colder water diving using a drysuit and heavy undergarments
- Oversized lower rails for easy attachment of tanks while using gloves or diving with multiple cylinders
- Flexible rear plate adds protection from cuts or abrasion from overhead

OPTIONAL ACCESSORIES:

Storage Pocket

Butt-Plate

Rigging Kit

LX SERIES WINGS

BACKMOUNT SERIES

Hollis proudly presents the LX Series Wings, developed and tested by technical divers, and 3 years in the making. Quality and performance are the two most integral features of this product, which is why Hollis reintroduced the proven S Series and C Series Wings with key improvements.

Every wing in the LX Series includes a 360-degree internal retraction system that matches the design of the wing, allowing for a streamlined rig at all times. The exterior bladder is constructed of 1680D Cordura, the internal bladder of 420 nylon, which means these wings are tough. We're so confident in the LX Series, every new LX wing includes a lifetime warranty.

- 1680D Cordura Exterior Bladder
- 420-Nylon Internal Bladder
- 360˚ Degree Internal Retraction System for a streamlined rig at all times
- New Oval Corrugated Hose Power Inflator Mechanism
- Redesigned overpressure relief valve (OPV)
- Corrosion-resistant stainless steeldrain grommets
- Welded Flange and One-Piece Retainer: Servicing w/o need-for-tools
- Centrally-Located Inflator Mechanism Elbow: Avoids tank valve/regulator interference
- Single Wing: Lower Left Pull Dump/Overpressure Relief Valve
- Dual Wing: Lower Left and Lower Right Pull Dump/ Overpressure Relief Valves
- Hollis Power Inflator System: Durable impact resistant plastic with a corrugated rubber hose
- Internal Components and Inlet Quick-Disconnect Nipple: Corrosion-resistant chrome plated brass
- Cam Band Slots for cylinder mounting
- **LIMITED LIFETIME WARRANTY**

DX-300X

DRYSUIT

The DX-300X is our flagship technical drysuit, developed over three years in a variety of demanding conditions including cave and wreck diving where performance is critical. Benefit from comfort, maneuverability and long wearing durability.

- The DX-300X is the benchmark expedition-grade drysuit, made from TriLaminate Cordura® for superior strength and comfort. Overall material weight is 700 g/sq.
- "Outer Layer" is a heavy-duty Cordura® which offers superior puncture and abrasion resistance with incredible tear strength in excess of 300N
- The middle "Butyl Mass" is constructed of 12 layers to provide long-term water integrity with superb chemical and ozone resistance
- "Inner Liner" is a silk weave polyester offering the optimum comfort and softness with easy donning and doffing
- Our patented BIAS cut combined with a telescopic torso increases freedom of movement, but allows for a closer fit reducing air migration
- The wide, flat seam construction minimizes the risk of leaks in high risk areas
- Fitted with YKK zipper
- Fitted with SiTech Neck Tite system with silicon seal
- Fitted with SiTech Quick Change Solution Oval wrist system with silicon seals as standard
- Two large Velcro® bellows pockets with an internal D-ring
- Double thickness kneepads
- 5 mm neoprene socks
- Adjustable suspenders included
- 5-year warranty on workmanship

Photo shows Drysuit Gaiters and Canvas Overboots on him. Each sold separately.

BTR-500

DRYSUIT

The BTR-500 drysuit uses our latest Butyl Trilaminate Ripstop material to produce a lightweight but very durable suit at a great value. Everything from the material to the taping has been fine-tuned and optimized to make the BTR-500 an absolute pleasure to dive in, whether you are at 10m or 100m.

The BTR-500 uses our specially developed 600g/sqm Butyl Trilaminate Ripstop material which incorporates a 140g/sqm High Decitex Nylon 6.6 Ripstop external lining for optimum tear, puncture and abrasion resistance that has the benefit of a easy clean and wash down finish. The internal lining is made from a patented coating that maximizes water integrity and seam tape adhesion as well as making the suit easy to get in and out of. The internal coating also make suit repairs exceptionally easy.

As with all our suits, each panel that makes up the BTR-500 is cut on the bias of the material to increase the stretch and flexibility of the material by up to 15%. This, combined with clever panel designs, makes this front entry suit especially easy to get on without the need to struggle to get the neck seal over the head. A composite zip maintains flexibility in the torso and is protected by a Velcro secured flap.

- Si-Tech inflator and auto shoulder dump
- Composite front entry zip
- Latex neck and wrist seals
- Internal suspenders
- Two front mounted zippered leg pockets
- 5mm thick neoprene socks
- 5-year warranty on workmanship

NEOTEK 8/7/6

SEMI-DRY

Enjoy the warmth of our Neotek 8/7/6 coldwater hooded semi-dry. Constructed from a compression resistant 8/7/6 mm neoprene and a Hollis exclusive ThermaSkin inner liner. Includes a front neckdam with revolutionary G-lock horizontal front zipper for easy on/off and a tight barrier against water intrusion. Arms and legs are also sealed against leaks with an internal dam. All seams are double glued and butt joined with a blind stitch construction which is all covered by a unique liquid seam. Fitted with generous pockets on both the left and right thigh and comes in 9 different sizes.

- 8/7/6 mm compression-resistant and superstretch neoprene mix
- Exclusive "ThermaSkin" inner liner
- G-lock horizontal front zipper with internal bib
- Neck, wrist and ankle internal dams
- Seams are quadruple glued and butt joined with a blindstitch
- Liquid glued seams cover entire suit
- Tech-friendly thigh pockets on both left and right thigh
- Attached hood standard
- Seams sewn and double taped for extreme protection

AUG 450

ADVANCED UNDERGARMENT

The AUG 450 maintains the AUG families super high wicking properties, drawing body moisture to the outside of the garment, away from the skin, keeping you dry and warm. Fully machine washable, and the wicking properties won't be degraded by the washing cycle. The AUG 450 comes in a range of dedicated Men's and Women's sizes, and is sold as a separate top and bottom, allowing mix and match of sizes if required.

- For use under all types of drysuits
- Dual layered technical fleece
- High insulation without thickness
- Zippered arm pocket
- Thumb loops for easy on/off
- Men's/Women's sizing
- Machine washable

AUG BASE

ADVANCED UNDERGARMENT

AUG Base is an ultra-fast wicking fabric, designed as a base layer that draws moisture away from the body, effectively keeping the skin drier, and allowing any additional undergarments the optimal chance to maintain body warmth during and after the dive. Fully machine washable, and the wicking properties won't be degraded by the washing cycle.

Made from a combination of polyester fleece and spandex for the utmost comfort, AUG Base comes in a range of dedicated Men's and Women's sizes, and is sold as a separate top and bottom, allowing mix and match of sizes if required.

- Fast wicking PolyPro
- Keeps diver dry and warm
- Layering garment
- Machine washable

M1

The M1 Mask raises the bar for optical quality and distortion-free vision. The lens is made from Saint-Gobain, a highly transparent extra clear glass which is valued for its unique appearance and optical qualities. The low iron oxide content gives it optimum clarity. Its light transmittance is greater than that of conventional glass. The use of extra clear glass results in a virtually colorless product which allows objects to remain vivid and natural. This makes the lens distortion free and helps improve visibility, even in low light conditions underwater.

- Frameless 100% pure silicone skirt
- Saint-Gobain Diamant—crystal clear lens
- Wide vision and low volume

M3

The M3 Mask provides visibility, the most important aspect of any dive, with distortion-free vision and superior fit. This low profile design uses a rigid frame and two lenses with an ultra clear glass. The low iron content produces a higher light transmittance and a reduced green tint inherent in other glasses. This makes the lenses distortion free and helps improve color and visibility in low light conditions underwater. Optical lenses from -1.5 to -8.0 diopters available.

- Frameless 100% pure silicon skirt
- Saint-Gobain Diamant—crystal clear lenses
- Wide vision and low volume
- 4 way buckle design for superior comfort and storage if needed

M3 GOPRO® MOUNT

Mount your GOPRO® camera and housing on your M3 Mask for hands-free photography and video. Made from durable Delrin plastic, the M3 GoPro Mount is easy-to-install on the M3 with just a Hex Key Wrench.

GoPro mount included with M3 Mask

M4

When choosing a mask, fit and field of vision come first.
The M4 Mask gives you the best of both worlds, fitting a wide variety of faces and offering superior peripheral and vertical vision. It is low profile, stows easy and carries an excellent value.

- Frameless silicon skirt
- Rugged mask box and adjustable mask strap included
- Increased vision and low volume

F1 "BAT FIN"

The Hollis F1 fin blends graceful movement, power, and bulletproof construction making it the standard in technical diving.

- High grade, heavy-duty rubber construction
- Angled strap mounts for comfort and a better transition of power
- Spring heel straps with easy-grip heel tab
- Multiple strap mounting positions for a fine tuned fit
- Vented blade to reduce stress while accelerating
- Generous foot pocket

F1 LT

The new F1 LT is a shorter and slightly lighter version of the original F1 molded from SEBS. The LT is also more durable due to its UV resistant properties.

- Short blade for easier finning in confined spaces
- Angled strap mounts for comfort and a better transition of power
- Spring heel straps with easy-grip heel tab
- Multiple strap mounting positions for a fine tuned fit
- Vented blade reduces stress while accelerating water over blade
- Generous foot pocket

F2

Increase your power-to-weight ratio. The patented F2 is designed to add blade surface on both the downstroke and upstroke to increase your efficiency with any type of kick.

- High grade, heavy-duty monoprene construction
- Angled strap mounts for comfort and a better transition of power
- Spring heel straps with easy-grip heel tab
- Multiple strap mounting positions for a fine tuned fit
- Vented blade to reduce stress while accelerating
- Generous foot pocket with 3 sizes—Small, Regular and XL

DUFFEL BAG

Made from a durable tarpaulin material, the Hollis Duffel is an excellent gear bag.

The bag is tough and rugged, extremely resistant to abrasions and punctures. It contains one main compartment featuring a tough D-zipper and one internal zippered pocket. Carrying the bag is an easy task with backpack shoulder straps. It also incorporates carry handles on both ends of the bag and two straps with padded handles. The bag is large enough to contain all of your dive gear and even features an ID pocket on top just by chance that someone has the same cool Hollis duffel bag as you.

D-zip main compartment with internal zippered pocket	
ID pocket on top	Backpack shoulder straps
Carry handles on both ends	Straps with padded handle
Rugged construction	Capacity: 95 Liters
Dimensions: 28" x 16" x 14" (71cm x 41cm x 35.5cm)	

MESH DUFFEL BAG

Made from laminated nylon mesh, the Hollis Mesh Duffel is a great way to air out your wet equipment while keeping everything secure.

- D-zip main compartment
- Shoulder carry strap included
- Carry straps with padded handle
- Rugged construction

DRY BAG

This dry bag is ideal for all types of outdoor adventures, from camping to white water rafting, boat trips to biking. The classic stuff-sack design built to stay dry.

- PVC-tarpaulin
- 9"W x 21.25"H
- Roll closure system
- Waterproof materials
- High-frequency welded and heat seal taped technique make the bag watertight

REGULATOR BAG

- #10 YKK self-healing zippers
- Interior Velcro® loops

LED1200 CANISTER LIGHT

THE LAST PRIMARY YOU'LL EVER NEED

A critical tool for demanding exploration dives, LED1200 is dependable and reliable, constructed with the highest-quality materials in Lake City, FL. Available in in standard or sidemount configuration, LED1200 is the ultimate primary light for cave, wreck or ocean dives.

- Heavy-duty light head with housing and handle made of aircraft-grade aluminum for ultimate durability
- Light head provides fast heat dissipation of the LED components and redundant seals in the light head ensure no flooding will ever occur
- Two handle options: elastic goodman (standard) and hard goodman (accessory)
- Delrin-machined battery canister with external locking Nielsen latches
- 5.2aH (57.5wH) Li-Ion battery pack
- Redundant sealing, overcharge and discharge circuitry protection is built into the battery and the charger
- Charging ports inside the battery lid keeps the battery sealed from the environment during charging
- Standard and sidemount options available
- Cable Length Standard 48" or Sidemount 52"
- 300 mins burn time
- 600' depth rating
- LED is by OSRAM, 1200 lumens output at 6000 Kelvin
- Power settings, "on" or "off" and uses a toggle switch
- Light Head 6-degree MR11 reflector
- Buoyancy Negative in water -.69 lbs (.31 kg)
- 3-year warranty
- CE Approved Certified for safe transportation UN/DOT 38.8

LED 6

Type	Single 6W primary light
Material	Anodized Aluminum 6061-T6
Surface finish:	CNC machined and black anodize
Light source	Cree LED T6 with lifespan of 50,000 hours
CCT range	5000k-7000k
Brightness	320 Lumens
Output	1000mA
Beam angle	Concentrated 8 degrees
Battery type	3 x C alkaline battery
Burntime	6 hours
Depth rated	650 ft (200 m)
Switch type	Mechanical
Size	1.81 in (46 mm) (D) x 8.66 in (220 mm) (L)
Weight	343 g
Rear tie-point for boltsnap / lanyard included	
Double O-ring seals	
Custom aluminum reflector	

LED 3

Type	Single 3W backup light
Material	Anodized Aluminum 6061-T6
Surface finish	CNC machined and black anodize
Light source	Cree LED R5 with lifespan of 50,000 hours
CCT range	5000k-7000k
Brightness	290 Lumens
Output	900mA
Beam angle	Concentrated 8 degrees
Battery type	3 x AA alkaline battery
Burntime	3 hours
Depth rated	650 ft (200 m)
Switch type	Mechanical
Size	1.97 in (50 mm) (D) x 5.79 in (147 mm) (L)
Weight	380 g

LED MINI 3

Type	Single 3W backup light
Material	Anodized Aluminum 6061-T6
Surface finish	CNC machined and black anodize
Light source	Cree LED R5 with lifespan of 50,000 hours
CCT range	5000k-7000k
Brightness	250 Lumens
Output	700mA
Beam angle	Concentrated 8 degrees
Battery type	3 x AAA alkaline battery
Burntime	3 hours
Depth rated	650' (200 m)
Switch type	Mechanical
Size	1.61 in (41 mm) (D) x 5.39 in (137 mm) (L)
Weight	220 g

MICRO LIGHT

The Hollis LED Micro Light offers the reliability, durability and efficiency of LED technology in a small compact package.

Type	Single 1W LED
Material	Anodized Aluminum 6061-T6
Surface finish	CNC machined and black anodize
Light source	Cree LED R5 with lifespan of 50,000 hours
CCT range	5000k-7000k
Brightness	55 Lumens
Output	700mA
Beam angle	Concentrated 8 degrees
Battery type	1 x AAA alkaline battery
Burntime	1.2 hours
Depth rated	300'
Switch type	Twist
Size	3.19 in (81 mm) (D) x 6.89 in (175 mm) (L)
Weight	34 g

SEEKER REEL

SEEK AND DEPLOY

NEW!

A reliable and robust primary reel that's easy to deploy is a necessity whether discovering a virgin cave or exploring a deep shipwreck. Our new 200ft and 400ft primary reels combine simplicity with durability so you can get on with your deepest explorations without any worries about performance.

- Spool machined with high-tensile Delrin® for durability and abrasion resistance
- Handle is 6061-T6 hard anodized aluminum to protect against cracking or breaking
- Easy deployment with left and right handle designed for easy switching between hands
- Knurled Stainless Steel lockdown screw for simple "on/off" with gloves on
- Ultra-bright lines in two sizes: 200ft is perfect for short distances such as jumps or shooting an SMB, and 400ft is ideal for reaching the main cave line or for deepest explorations
- Robust 316 Stainless hardware
- Built in rubber stop to prevent backing out of the lockdown and precise adjustment
- Molded line stopper included with both models
- Convenient winding knob provides easy and comfortable grip with gloves on
- Close tolerances to prevent line trapping during heavy use
- Sized appropriately for both warm and cold water wearing dry gloves
- Radiused edges for comfort
- All parts engineered with the strictest tolerances to eliminate line traps or failures when spooling

FINGER SPOOLS

Finger Spools are most often used as a Gap Reel or for Short Distance Exploration. Small and low-profile, a spool fits nicely out of the way in a pocket or clipped off to a D-ring. The holes in the side allow for clipping in a double-ended snap anywhere along the perimeter of the spool to keep the line tight when not in use. Hollis Stainless Steel Finger Spools, made from either 304L Stainless Steel or ABS plastic, are as rugged as they come. Or, choose the Hollis Finger Spool made of glass-filled nylon for durability in marine environments.

- Available in 30 ft (9 m), 100 ft (30 m) and 150 ft (45 m)
- The 30' is often used for GAP reels. The 100' and 150' Finger Spools are often used for shooting lift bags or as safety reel
- Smaller spools for safety and jump reels
- Spool fits in drysuit pocket, utility pocket or clipped off to a D-ring
- Available in ABS plastic or 304L stainless steel
- #24 white braid cave line
- Stainless double ended clip included

LIFT BAGS

60 AND 125 LB LIFT

You never know what you might find on a dive, so be prepared and always pack a Lift Bag. The Hollis 60 lb (27.2 kg) or 125 lb (56.7 kg) Lift Bag is just what you need to raise or mark items.

- 125-lb Lift Capacity
- Tear and mildew-resistant durable nylon fabric
- High-visibility bright orange for easy identification
- Over pressure relief valve with pull dump
- Stainless D-ring for line attachment
- Handle at the top of the lift bag for easy handling
- Lift bags are covered by a 12 month limited warranty

SIGNAL MARKER BUOYS

The Hollis Signal Marker Buoy (SMB) is an essential safety device all divers should carry on every dive. The SMB is the smart-way for a diver to mark their location when making safety stops, completing mandatory decompression stops, and signaling the boat if they surface a distance away from the boat.

Signal Marker Buoy is a Closed Cell Design made from Durable 300-D Polyester material with Radio Frequency (RF) Welded Seams. The Hollis SMB also has a Sturdy Nylon Webbing Strap Loop with a Stainless Steel D-Ring for attachment to a reel or anchor line along with a wrist lanyard for hand-held use.

- 6 ft (1.8 m), 3 ft (1 m)
- Available in Yellow or Orange and compact Orange
- Oral inflation
- New stainless oral inflate valve
- Open cell / closed cell
- Quick Dump valve included
- Buoy is covered by a 12 month limited warranty
