User's Manual for Hexagonal Modules

How To Assemble and Mount to Wall

1. Place all the lights face down in the configuration of your choice

2. Instal USB connectors between lights. Read the following instruction for each model to find the correct way of using the USB connectors.

3. Use Triangle-connectors between lights to reinforce them together

4. Insert the USB cable into a compatible 5V adapter, and into the designated light, then plug adapter to outlet

* Test the functions before attaching lights to wall.

5. Apply double-side adhesive to center back of each light

6. Clean and dry the place you plan to attach the lights

7. Press light configuration to wall for 10 seconds

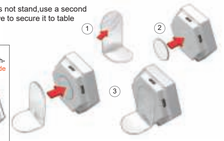

How To Use Table-Stand

1. Remove protective film from both sides of L-shape Table-Stand
2. Place one double-side adhensive to back of one light
3. Place the light upright on flat surface, and push the L-shaped stand with short side on the bottom tightly against adhensive
4. Place all lights face down in the configuration of your choice, keeping the light with stand at the bottom
5. Instal USB connectors between lights.
6. Use Triangle-connectors between lights to reinforce them together
7. Insert the USB cable into a compatible 5V adapter, and into the designated light, then plug adapter to outlet

* If configuration does not stand,use a second double-side adhensive to secure it to table

to avoid brading the stand, use this method when detaching it from table: Pull from side to side,NOT front to back!
