NCIC
NICS DENIED TRANSACTION FILE

SECTION 1 -- INTRODUCTION

1.1 BACKGROUND

The NICS Denied Transaction File (NDF) in NCIC is designed to share information regarding individuals who, having been determined to be prohibited persons according to the Brady Handgun Violence Prevention Act of 1993 (Brady Act), have been denied as a result of a National Instant Criminal Background Check System (NICS) background check. The data in the NDF will enhance officer and public safety and provide investigative assistance.

If the status of a NICS denied transaction is subsequently changed, such as the result of a successful appeal, then the corresponding NDF record will be removed from NCIC. To ensure that NICS deny transactions which have subsequently incurred a status change are not stored in NCIC, in accordance with the purge requirements of the Brady Act as defined by the United States Congress and federal regulation, NDF information will not be maintained on the NCIC system logs.

1.2 CRITERIA FOR ENTRY

The NDF will contain all records for individuals who have been denied as a result of a NICS check. NDF records are entered and canceled through an interface between NCIC and NICS.

1.3 MESSAGE KEY (MKE) CODES

Message	MKE	Translation
Entry	END	NICS DENIED TRANSACTION FILE
Inquiry	QND	

1.4 RECORD RETENTION

NDTF records are not subject to validation.

All records in the NDTF are entered through an interface between NCIC and NICS that is managed by the FBI.

SECTION 3 -- MODIFICATION

There are no modification procedures for the NDTF.

SECTION 4 -- CANCELLATION

All records in the NDTF are canceled through an interface between NCIC and NICS (which is managed by the FBI) and are immediately removed from the NDTF.

SECTION 5 -- INQUIRY

5.1 NCIC INQUIRY PROCESSING

The NDTF Inquiry (QND) will only search records in the NDTF and is not restricted by the date of denial. NDTF records are searched by all NCIC Wanted Person File Inquiry MKEs during the entry/modification of other NCIC person files (except the Unidentified Person File). Other than the QND, the NCIC will return all NDTF records where the date of NICS denial is less than 180 days.

5.4 REQUIREMENTS FOR INQUIRY

An inquiry of the NDTF may be made by name and one, more than one, or all of the following alphanumeric identifiers: DOB (including year, month, day), MNU, and SOC with each data element preceded by the proper MFC. Additionally, inquiries may be made using NAM and NTN only, in that order; NAM and STN only, in that order; or NIC only, with each data element preceded by the proper MFC.

NOTE: Exact spelling of the name as contained in the record is required when inquiring with only NAM and NTN or NAM and STN.

5.5 ADDITIONAL GUIDELINES FOR INQUIRY

1. A QND transaction containing a DOB will search on the exact date of birth.
2. The SEX and RAC Fields should be included in the QND to minimize hits by limiting the scope of the name search. The RAC Field codes and the race codes that NCIC will search in an inquiry follow:

Race Code In Inquiry	Race Codes Searched
A (Asian or Pacific Islander)	All
I (American Indian or Alaskan Native)	All
B (Black)	All except W
W (White)	All except B
U (Unknown)	All

3. When the inquiry contains a name and an alphanumeric identifier other than DOB (SOC or MNU) a name search is not generated. In this situation, only the alphanumeric identifier is searched. Including sex and race in this inquiry will not confine the search.
4. QW, QWA, QWE, QWF, QWS, ZW, or QWI inquiries may contain the Image Indicator (IND), Related Search Hit (RSH), Expanded Name Search (ENS), and Expanded Date of Birth Search (EBS) Fields. Additional information on the use of these fields can be found in the Wanted Person File chapter.

5.6 BATCH INQUIRY (QWB)

The batch inquiry allows users to create a file of multiple QWA inquiries in one message. Each inquiry is delimited by a sequence number (SEQ) at the beginning of the inquiry and an "&" as a separator. The SEQ is three numerics and is used to match the responses (hit or no hit) to the specific inquiries from which they were generated. Prior to each response SEQUENCE NUMBER: <SEQ> will be returned to identify those responses that follow as coming from the inquiry with that sequence number. Additional information on procedures for conducting QWB inquiries can be found in the Wanted Person File chapter.

5.7 PROCEDURES FOR HANDLING A HIT

The existence of an NDTF record does not require hit confirmation by the inquiring agency.

SECTION 6 -- LOCATE

There are no locate procedures for the NDTF.

SECTION 7 -- CLEAR

There are no clear procedures for the NDTF.

SECTION 8 -- SUPPLEMENTAL RECORD

There is no supplemental data for the NDTF.
