About OLYMPUS A-GPS Utlity

OLYMPUS A-GPS Utility is a software application that can be used to download the latest Assisted GPS data for faster positioning and write it to OLYMPUS Digital Cameras that support Assisted GPS.

Assisted GPS data is valid for 14 days, after which it cannot be used to calculate position. You will need to write the latest Assisted GPS data to your camera periodically by using OLYMPUS A-GPS Utility.

*NOTE: Without Assisted GPS data, it takes longer time to calculate the position.
