Introduction

This VMware Compatibility Guide page lists Storage solutions that are certified against a defined Virtual Desktop Infrastructure storage workload with Horizon (with View) also called Fast Track Storage.

For deployment and configuration issues with these solutions, please contact respective partners. Disclaimer: The partner product/solution reference in this article is a software and/or hardware module that is developed and supported by a partner. Use of this partner product/solution is also governed by the end user license agreement of the partner. You must obtain the application, support, and licensing for using this product/solution from the partner.

Proven Storage solutions are certified to offer specific workload performance for 1000 and 2000 seat Horizon deployments. With Proven Storage solutions, customers:

- 1) Get more I/O per second for their money
- 2) Avoid under- or over-provisioning capacity
- 3) Increase ease of use and deployment agility

It is a requirement that the relevant components of each certified solution are also ESX certified and listed on the appropriate [VMware Compatibility Guide](https://www.vmware.com/resources/compatibility) .
