MANUFACTURING A COMPLETE FAMILY OF PREMIUM WALL SYSTEM PRODUCTS omega-products.com

OMEGA PRODUCTS INTERNATIONAL is a leader in commercial and residential exterior stucco wall systems and finishes. Our state-of-the-art manufacturing facilities, unsurpassed quality control, industry-leading wall system warranties, and our commitment to service has made us the professional's choice since 1974.

Omega Products provides the most complete line of exterior stucco wall systems and finishes, including ColorTek Stucco, OmegaFlex 100% Acrylic Finishes, Diamond Wall One Coat Stucco Systems, AkroFlex Exterior Insulation Finish Systems (EIFS), and Masonry Adhered Veneer Systems (MAVS). Additionally, Omega manufactures performance enhancing admixtures, bonders, elastomeric coatings, and interior finishes.

Omega's Valentino brand manufactures authentic decorative Venetian plaster for upscale designer wall applications. Omega's Siena Products division produces a full line of floor preparation and tile & stone installation products.

Premium, Yet Practical Solutions For Veneer & Masonry Installations

Omega Product's Masonry Adhered Veneer Systems (MAVS) offers contractors and architectural specifiers high performance installation products for challenging adhered veneer installations.

- · Premium bonding mortars and grouts.
- Engineered for demanding vertical applications, including large format and heavy veneers.
- Industry-leading warranties, including combined system warranties with Omega's stucco products.

Diamond Wall Pro Concentrate (Replaces Diamond Wall PM)

A cementitious, fiber-reinforced, polymer-modified base coat that offers an upgrade to current one coat stucco systems by providing improved crack resistance, flexural and tensile strength, and impact resistance. It is a factory-prepared blend of portland cement complying with ASTM C150, chopped fibers, dry polymers, and proprietary ingredients field mixed with sand and water. Diamond Wall Pro Concentrate is the base coat used in the Diamond Wall Pro Stucco Systems.

Coverage

Approximately 8yd² to 10yd² (6.7m² to 8.4m²) per bag at 3/8" thick. Coverage may vary.

Styro Admix

A 100% acrylic admix that is field mixed with Omega's acrylic finishes and portland cement to create an adhesive and base coat. Styro Admix saves contractors money, by allowing them to create an economical base coat and/or adhesive from leftover AkroFlex or OmegaFlex finishes. This base coat/adhesive can be used to coat and attach EPS foam shapes or as skim coat over approved substrates.

Coverage

Approximately 400ft^2 to 600 ft^2 (37.2m^2 to 55.7m^2) as a base coat and 350 ft^2 to 550 ft^2 (32.5m^2 to 51m^2) as an adhesive.

SKU	TYPE

Omega Products International's Crack Isolation System is an effective method used to reduce the appearance of surface cracking in new and existing plaster systems. With stucco cracking continuing to be one of the most common complaints from building owners, Omega's Crack Isolation System is a cost effective way to improve customer satisfaction and reduce callbacks or repairs. It is also a great choice for repairing or refreshing an existing stucco building that has surface cracking.

Color

Available in a wide variety of colors. Some dark stucco colors may not be attainable in OmegaCoat. See a current ColorTek color chart for stock colors.

OmegaCoat Plus (Premium Fog Coat)

A premium, cementitious, polymer-modified fog coat, OmegaCoat Plus is a spray-applied pigmented coating, which cures to become an integral part of the stucco surface and maintains original finish characteristics. When compared to standard fog coat, OmegaCoat Plus has improved adhesion and water-resistance, while reducing the likelihood of color streaking and efflorescence. When compared to paint, OmegaCoat Plus is longer-lasting, more durable, and more breathable.

Coverage

Approximately 400ft² to 900ft² (37.2m² to 83.6m²). Coverage may vary.

Travertino Finishes

A cementitious interior/exterior finish manufactured with a mixture of various size aggregates designed to achieve a variety of sedimentary stone appearances, such as travertine, limestone, and sandstone. Travertino can create a pitted look like that of classic Tuscan stone or can be troweled/ground to achieve a smooth stone appearance. Designs can also be carved into Travertino during application and can be used to cast special shapes. Travertino is an excellent choice to create a beautiful, warm sedimentary stone appearance with a lower cost, lower weight, and shorter lead time than real stone. Available in Fine and Standard textures.

Coverage

Approximately 26.5 ft² (2.1 m²) at a 1/4 inch coat. Coverage may vary.

ACRYLIC FINISHES

AkroFlex Desert Series Finishes

Pebble Beach and Sahara Sand finishes are 100% acrylic-based using the latest Dirt Pick-up Resistance (DPR) technology, which can produce a variety of textures depending on the aggregate size and application method. Desert Series Finishes will enhance the appearance of any plastered structure by providing a flexible, durable, integrally colored finish. Desert Series Finishes utilize silica aggregates and are available in the following finishes: SAHARA SAND FINE (~0.8mm): uniform fine sand-like finish. SAHARA SAND (1.0mm): uniform med. to fine sand-like finish. PEBBLE BEACH (~1.5mm): uniform med. sand-like finish. Not available in all markets

Coverage

Approximately 90ft² to 140ft² (8.4m² to 13.0m²) Coverage may vary.

AkroLastic Finishes

A 100% acrylic-based, elastomeric, textured finish. AkroLastic Finishes provide enhanced elasticity and a weather-resistant finish, which will enhance the appearance of any plastered structure. AkroLastic Finishes help bridge the hairline structural and shrinkage cracks inherent in traditional portland cement-based plaster construction. Available in all AkroFlex texture options. AkroLastic Finishes are designed to be used with the AkroFlex EIF Systems and also as an interior or exterior finish.

Coverage

Approximately $100 ft^2$ to $140 ft^2$ ($9.3 m^2$ to $13.0 m^2$). Coverage may vary.

PRIMERS • COLOR FOR ACRYLIC SYSTEMS

PRODUCTS INTERNATIONAL

RapidPrime

(Replaces OmegaFlex Base Primer)

Formulated for use as a priming agent under all Omega acrylic-based textured finishes, coatings, and similar products to promote bond strength, color consistency, and uniform suction, while increasing water-resistance and finish coverage. It offers excellent efflorescence and alkali resistance on cement-based surfaces with a pH up to 13, such as new stucco, concrete, and masonry. With its high alkali resistance, RapidPrime can be applied without having to wait for the cement-based substrate to drop in pH, thus saving time and money.

Coverage

Approximately 1,400ft² to 2,000ft² (130m² to 185m²) per pail. Coverage may vary.

OMEGA IS ALL ABOUT COLORS

WATER-RESISTIVE BARRIERS

AkroGuard

A flexible, liquid-applied coating that creates a water-resistive air barrier when used as part of the AkroGuard System. AkroGuard is field applied and designed for use as a water-resistive barrier (WRB) and vapor-permeable barrier that seamlessly wraps the structure. It can be applied over a variety of substrates and be used under different wall systems, including AkroFlex EIFS, stucco, brick, stone veneer, or siding. It is used in conjunction with AkroGuard Fabric, a reinforced, non-woven polyester fabric to treat and reinforce joints, corners, rough openings, and other transitions within the AkroGuard WB-AB Assembly. The AkroGuard System complies with ICC-ES acceptance criteria for water-resistive coatings (AC212) and ASTM standards as an air barrier.

	OmegaCure	E-FX Admix	AquaShield
Description	Accelerator to improve curing	Efflorescence reducing admix for cement-based products	Water repellent admix for stucco and mortar
Area of Use	One coat stucco Scratch and brown coat Cement-based finish coats Cement plasters Other approved cementitious products	Cement-based finishes Cement-based fog coat	ColorTek Stucco Mortar Other cement- based products
Other Features	Accelerates the cement hydration Allows cold weather applications Increases early strength and hardness Non-corrosive	Reduces efflorescence Retains natural appearance	Increase water- resistance Improves freeze/ thaw resistance Retains natural appearance No extra application steps(s)

	OmegaGuard	OmegaGuard Plus	OmegaSeal 1000
Technology	Silicon-based	Silane/Siloxane	Acrylic-based sealer
Area of Use	Vertical, porous materials such as stucco, masonry, or stone	Vertical or horizontal, porous materials such as stucco, masonry, stone, or cement	Vertical, cement-based materials, stone, or acrylic surfaces
Method of Sealing	Penetrates into the surface pores	Penetrates into the surface pores	Creates continuous protective film on surface
Appearance	Natural	Natural	Slight sheen
Stain Resistance	Water-based stains	Water-based stains Some oil-based stains	Water-based stains Oil-based stains
Can be Painted After Application?	No	Yes	Yes

CLEANERS

Stucco Cleaner

From the leading manufacturer of stucco products, Omega Stucco Cleaner is designed to dissolve dirt and some stains from stucco walls and similar products. It is a concentrated, water-based detergent that will penetrate the surface to help remove stains without damaging the finish. Regular cleaning of stucco walls will keep them looking new for many years.

ATTENTION BUILDING MATERIAL DEALERS

If your customers are installing stucco, stone or masonry . . . OMEGA's ABC'S are the perfect companion products.

- Admixtures are used in cement-based products to improve the performance of various properties, such as tensile/bond/flexural strength, water resistance, and early strength.
- **Bonders** are used to adhere new concrete, portland cement plaster, mortars, other cementitious products, and gypsum plaster mixes to structurally sound substrates.
- **Cleaners** are used to clean and maintain the appearance of surfaces, including stucco, painted stucco, acrylic textured finishes, along with stone, masonry, concrete, and all types of siding.
- **Sealers** are used over approved surfaces to increase weatherability, provide moisture protection, and resist staining while protecting the substrate against freeze-thaw cycles and allowing for easy maintenance.

MAVS 1000

MAVS 1000 is a polymer-modified, factory blended mortar specifically designed for bonding thin natural stone and manufactured veneers. This bonding mortar is a mixture of portland cement, specialty polymers, aggregate, and other proprietary additives. The advanced technology and high quality ingredients gives MAVS 1000 excellent workability, greater sag and efflorescence resistance, and superior bond strength than standard Type S or field mixed mortars. MAVS 1000 is an excellent choice for some of the more challenging masonry applications, such as stacked stone.

Coverage

Trowel Size	1/4" x 1/4"	1/4" x 3/8"	1/2" x 1/2"	Masonry Method
FT ²	85-95	55-65	40-50	25-35

MAVS 2000

MAVS 2000 is a premium, polymer-modified, factory blended mortar specifically designed for bonding natural and manufactured veneers, precast, most tile, and thin brick. This bonding mortar is a mixture of portland cement, specialty polymers, aggregate, and other proprietary additives that give MAVS 2000 excellent workability and sag resistance with greater efflorescence resistance and bond strength than standard Type S mortars. MAVS 2000's advanced technology improves adhesion and is an excellent option for more challenging masonry applications, such as stacked stone and large or heavy veneers.

Coverage

Trowel Size	1/4" x 1/4"	1/4" x 3/8"	1/2" x 1/2"	Masonry Method

MAVS 3000

MAVS 3000 is a highly polymer-modified, factory blended mortar specifically designed for bonding natural stone, manufactured veneers, precast, most tile, and thin brick. This bonding mortar is a mixture of portland cement, specialty polymers, aggregate, and other proprietary additives that give MAVS 3000 excellent workability and sag resistance with greater efflorescence resistance and bond strength than standard Type S or slightly modified mortars. MAVS 3000 advanced technology improves adhesion and is an excellent option for the most challenging veneer applications, such as large format and heavy veneers.

Coverage

Trowel Size	1/4" x 1/4"	1/4" x 3/8"	1/2" x 1/2"	Masonry Method

MAVS Masonry Mortar & Grout

MAVS Masonry Mortar & Grout is manufactured with portland cement, lime, masonry aggregates and other proprietary additives to produce a high quality masonry mortar. It is used for grouting interior and exterior applications of most natural and manufactured veneers, thin brick, pavers, brick, tile, stone, precast, and block. MAVS Masonry Mortar & Grout may also be used to set full brick and block units. Omega AkroLoc or Siena Admix AX100 latex admixtures can be used to impart greater flexibility, improve bond strength, increase water retention, and surface appearance.

Coverage

Approximately 45 ft² (4.2 m²) per bag on a 6" x 12" veneer with a 1/2" x 1/2" grout joint.

Coverage may vary.

MAVS Adhesive Sealant

MAVS Adhesive Sealant is a professional grade, fast

drying, non-sag sealant for use inexpansion joints

for masonry, stone, tile and other applications. It is

available in hundreds of colors in either sanded or

smooth texture to match the specific application

needed. It is paintable, mold and mildew resistant,

and adheres to multiple types of substrates. MAVS

Adhesive Sealant can be used on: brick, block,

natural stone, concrete, porcelain & ceramic tile, steel,

aluminum, glass, wood, plastic, vinyl, and fiberglass.

Conforms to ASTM C920 Type S, Grade NS, Class 50,

Use T, M, G, A, O & TT-S-230C, Type II, Class A.

PRODUCTS INTERNATIONAL

A 10.3 fl oz. tube will approximately covers 24 lineal feet in a 1/4" x 1/4" joint, and 12 lineal feet in a 1/4" x 1/2" joint.

Coverage may vary due to actual joint size, depth and application.

Packaging

10.3 fl oz tube, 10 tubes per case, two case (20 tube) minimum.

Shelf Life

6 months

Color

Available in standard and custom colors, in sanded or smooth texture.

GET UP TO A 35 YEAR WARRANTY USING MAVS

One of the unique features of MAVS is the industry-leading warranties that can be integrated with Omega's wall system products. These exceptional wall system warranties incorporate Omega's already proven wall assemblies with our high-performing MAVS bonding mortars.

Adhered veneer is often being installed over Omega Super Cement Three Coat Systems or Omega Diamond Wall One Coat Systems. When using MAVS to install veneer, the builder or owner receives veneer bonding mortars that are verified to perform over Omega wall systems, plus the integrated warranty that covers the wall assembly from the scratch coat to the veneer. The warranty length depends on the combination of Omega products used.

MAVS with Omega Wall Systems

- ¹ Using AkroGuard will increase the warranty an additional 5 years
- ² Omega AkroLoc, Admix 500, or PolyLoc admix may be used to improve base coat tensile/flexural strength and water-resistance. Using admix will increase the warranty an additional 5 years.

WARRANTIES

Omega Products International is proud to manufacture only the highest quality products with excellent warranty plans. All of our products are warrantied to be free from defects for a period of one year from the date of purchase. Only a proof of purchase is required to receive this warranty; no form needs to be submitted to Omega Products.

Additionally, Omega has multi-year extended warranties for wall systems that utilize Omega products. The length of the warranty depends upon the combination of products used. The following warranties are available:

YEARS	SYSTEM AND/OR PRODUCTS USED
10	AkroFlex EIF Systems */**
5	Direct Applied (Restrictions Apply) */**
5	Diamond Wall with ColorTek
2	Diamond Wall or Super Cement
7	Diamond Wall with AkroFlex or OmegaFlex Finish */**
8	Diamond Wall with admix and AkroFlex or OmegaFlex Finish */**
6	Diamond Wall with admix and ColorTek
3	AkroFlex or OmegaFlex Finishes *
5	AkroLastic or ProPlus Finishes *
5	Super Cement with ColorTek
7	Super Cement with AkroFlex or OmegaFlex Finish */**
10	Diamond Wall PM with AkroFlex or OmegaFlex Finish */**
7	Diamond Wall PM with ColorTek
6	AkroGuard water-resistive/air barrier (standalone)

- * 3 years added to the above listed warranties when RapidPrime/AkroFlex Primer is used.
- ** 2 years added to the above listed warranties when AkroLastic or ProPlus finish is used.
- + 5 years added to the above listed warranties when Crack Isolation System is used.
- ++ 3 years added to the above listed warranties when AkroGuard water-resistive/air barrier is used.

To receive a written warranty, please download the Application for a Written Warranty file from the Omega website. The project must be completed prior to submitting the warranty application.
