Mouse features

1. Left and right mouse buttons
2. Scroll wheel
3. Battery LED—Flashes green when mouse is powered on, and it flashes red when the battery power is low.
4. Middle button—The function of this button depends on your operating system and the application being used. For example, if you are browsing the Internet in Windows® and click on a link using the Middle button, typically the link opens in a new tab.

5. Internet back/forward—Tilt the scroll wheel right to move forward one page. Tilt the scroll wheel left to move back one page.*
6. On/Off slider switch
7. Battery door release
8. Unifying receiver storage—When the mouse is not in use, you can store the Unifying receiver inside the mouse.

*On a Mac® the Internet back/forward feature is not supported. You can assign Dashboard, Exposé, Spaces, or other functions to the tilt wheel feature using System Preferences.
