INTRODUCTION

Welcome to Phanteks!

The P600S combines the best of 2 worlds with its high quality sound dampening panels and the ultra high airflow fabrics from Phanteks. Achieving both a quiet system and a high airflow configuration.

The durable fabric, carefully selected by Phanteks, results in a much lower airflow resistance compared to standard mesh panels. Keeping air speed higher and noise levels lower.

*Phanteks believes that meaningful designs are created through
the fusion of form and function.*

The Phanteks team

ECLIPSE P600S CONFIGURE YOUR P600S

The P600S can be transformed from a Silent to a High Airflow configuration. The magnetic front and top Silent Covers can be easily removed or installed. By removing the Silent Covers the air intake and outtake surface area is increased dramatically, allowing a much higher cooling capacity.

P600S可以从静音配置转换为高散热配置。可以轻松拆卸或安装磁性前部和顶部静音盖。通过移除静音盖，进气口和出气口面积显著增加，达到增强风道的作用。

Heavy and sound dampening panels reduce noise levels and improve acoustics.

High performance fabric from Phanteks enhances the cooling performance while lowering noise levels.

GET STARTED

PREPARATIONS

- The P600S case is designed to support installation in a standing position.
- Don't turn on the power to your system until installation is complete.
- Discharge your body's static electric charge by touching a grounded surface before performing any hardware procedure.
