

Guide to read this table:

		①	②			③	④	⑤
Camera Supplier	Device Name	Tested Firmware	IPCAM/VS	Video Codec	Sub channel	I/O Ports	Video Event	Audio In/Out

1. Meaning of "**Tested firmware**" remarks:
When version number is given, it means the camera was physically tested with this firmware version.
An "-" (hyphen-minus) means that camera vendor certified this camera compatible with a
2. Meaning of "**IPCAM/VS**" remarks:
IPCAM: The IP camera supports only one channel.
VS-X: The IP camera supports a video server that supports a number of channels. "X" represents the number.
3. Meaning of "**I/O port**" remarks:
NA: The camera's digital I/O feature isn't supported by the NVR.
m/n: The number of digital I/O points supported by the NVR.
4. Meanings of "**Video Event**" remarks:
M: Video motion events are supported.
Ta: Tampering events are supported
VL : Video Loss events are supported
VA : Video Analytic events are supported
5. Meanings of "**Audio in/out**" remarks
in/out: Both input and output of audio are supported by the NVR.
in: Only input of audio is supported by the NVR.
NA: Audio input and output are not supported by the NVR.
6. Other notes:
- This table doesn't account for camera functionality. Consult the documentation of your camera if you need information.
