

## 2014

# EXT 520

## A 5.2m tender in just 3.3m.

Extender is the first folding tender with a rigid keel designed to occupy less space on board and to offer more space once unloaded into the water. It folds easily and quickly – in less than two minutes – thanks to its manual or servo-controlled closing system. Made of rubber and fibreglass, its vertical bow allows maximum flotation and safety during navigation. It is customisable and can be supplied with your choice of equipment, colour and decoration.
