CARRY

1 HDPE FRAMESHEET SUSPENSION

- + 1 mm HDPE framesheet

2 DURABLE NYLON/ FOAM BACKPANEL

- + Storage pockets for harness and hipbelt
- + Durable material for travel wear and tear

3 STOWAWAY SPACERMESH HARNESS

- + Comfortable, soft, breathable contact surface
- + Adjustable sternum strap with whistle
- + Adjustable load lifters transfer weight from harness to hipbelt

4 STOWAWAY PADDED HIPBELT

- + Storable belt with foam padding and 38 mm webbing

SIZING / FIT

HARNESS FIT

The harness straps should wrap fully around your shoulders with no gaps between the pack and your back. The padded part of the harness straps should end 1"/2.5 cm-2"/5 cm below the armpits and the sternum strap adjusted to approximately 2"/5 cm below the collarbone.

FEATURE DETAILS

STOWAWAY HARNESS AND HIPBELT

A zippered compartment on the Porter's backpanel provides access to a stowaway padded shoulder harness and nylon hipbelt with foam-padded hipwings for use during backpack-style carry.

- 1 Remove the shoulder harness from the top zippered compartment on the backpanel and the hipbelt from the fabric compartment at the base of the backpanel.
- 2 Connect the male buckle found on the nylon harness tensioning straps to the female buckle on the hipbelt's fabric hipwings and tension to fit on body. Reverse this process to once again stow the harness and hipbelt.

LOCKABLE PANEL LOAD ACCESS

A dual lockable zipped front panel provides access to the main compartment. Once inside, the internal organization consists of one internal mesh zippered pocket, one internal fabric zippered pocket and ample space for additional gear.

ERGOPULL™ HIPBELT

The stowaway nylon hipbelt with fabric hipwings utilizes Osprey's exclusive modified straight ErgoPull™ closure. To operate, loosen the webbing enough so that you can connect the center buckle. Grasp the loose ends of the webbing on either side and pull in and across evenly with both hands at the same time.

PACK ATTACHMENT

The sliders along the sides of the Daylite button through the four cord loops found on the Porter's front panel. Push the slider through the cord loop from underneath and tug on the straps to tighten. Adjusting the tension on the straps will allow you to stash additional gear behind the Daylite.

STRAIGHTJACKET™ COMPRESSION

Dual foam-padded sidewalls work in conjunction with our StraightJacket™ compression system to both protect contents and stabilize loads. Loads can be compressed and stabilized by tensioning the dual StraightJacket™ straps on the pack's front panel. When contents are less than full, the protected buckles on the right side panel of the pack serve as connection points for the straps compressing and stabilizing your load.

PACK / RESERVOIR MAINTENANCE

Your Osprey pack is an extremely durable product and is built for years of use. However, some basic pack maintenance will help ensure your pack lasts a lifetime.

OSPREY PACKS

STANDARD MAINTENANCE

- + After each trip be sure to clean out your pack thoroughly.
- + Clean the zippers regularly using mild soap, warm water and soft brush. This will help keep them in proper working condition.
- + If your pack is wet, hang it to dry out of direct sunlight.
- + Loosen all the straps.
- + Wash your pack if dirt, sweat, salt and stains have worked their way into fabrics, webbing or mesh.
[Do not immerse travel packs in water with our HighRoad™ Wheeled Chassis.]

WASHING YOUR PACK

- A Empty the pack including any food, dirt or spilled contents.
- B If your pack has a removable harness and hipbelt, remove them from the pack body.
- C Do NOT wash your pack in a washing machine. Clean your pack and components in a bathtub or large sink using a mild detergent and warm water.
- D Agitate the pack gently. Scrub the inside and outside of all compartments including the pockets with a soft brush.
- E Clean the zippers using a mild soap, warm water and a soft brush. Flush water and soap through the buckles. Keeping dirt and debris out of the zippers and buckles will help keep them in proper working condition.
- F Drain the dirty water from the bathtub or sink and refill with cool clean non-soapy water. Rinse the pack thoroughly. Repeat this step as necessary.
- G Hang your pack to dry outside or in a well ventilated area, out of direct sunlight.

WHEELED TRAVEL LUGGAGE

[Do not immerse travel packs in water with our HighRoad™ Wheeled Chassis.]

- A After each trip, empty the pack including any food, dirt or spilled contents.
- B Clean the zippers regularly using mild soap, warm water and soft brush. This will help keep them in proper working condition.
- C Wipe the exterior of the chassis with a damp cloth or sponge.
- D Clean the pack fabric by scrubbing stains and dirt with warm water, mild detergent and a soft brush or sponge.
- E Use a wet towel with clean non-soapy water to wipe away any soap residue on the pack.
- F Hang your pack to dry outside or in a well ventilated area, out of direct sunlight.

RECOMMENDED CLEANING PRODUCTS

Osprey recommends Nikwax® products for pack care. Be sure to read label directions carefully before applying any product to your pack.

Tech Wash® - Use this with warm water for washing and cleaning your packs or luggage.

Tent & Gear Solar Proof® - Use this spray-on product to protect your packs from UV exposure and to improve water repellency.

For complete instructions on cleaning your Osprey pack, visit: ospreypacks.com/PackTech/PackCare.

OSPREY RESERVOIRS

RESERVOIR STANDARD MAINTENANCE

- + Rinsing out your reservoir after each use should keep your reservoir fresh, especially when using sugary drink mixes.
- + Periodically use Osprey's Hydraulics™ Cleaning Tablets to clean your reservoir.
- + Iodine or other purifying tablets used in your reservoir will not affect the quality of your reservoir. However these tablets may stain the reservoir over time.
- + Freezing your reservoir will not effect the quality of the reservoir. However if the reservoir is filled with water, be aware that water expands when it freezes and can damage your reservoir if it is overfilled.
- + Do NOT pour boiling water into the reservoir. This can damage the reservoir and will void your warranty.
- + Watch "Cleaning an Osprey Hydraulics™ Reservoir" video on Osprey Packs YouTube® page.

CLEANING YOUR RESERVOIR (WITH OSPREY HYDRAULICS™ CLEANING TABLETS)

- A Fill reservoir with warm water. Do not use bleach or boiling water.
- B Add one cleaning tablet to reservoir and close the cap.
- C Let tablet dissolve for 5 minutes with the reservoir laying on its back.
- D Shake the reservoir for 30 seconds to mix and spread the solution.
- E Pinch the bite valve and squeeze the reservoir to remove air and fill the reservoir hose and bite valve with solution.
- F Let the reservoir sit for 15 minutes and then pour out solution.
- G Rinse the reservoir and tube with clean cool water.
- H Hang your reservoir to dry in a well ventilated area.

DEEP CLEANING YOUR RESERVOIR (WITH OSPREY HYDRAULICS™ CLEANING KIT)

- 1 Rinse out the reservoir and fill it with warm water and a mild dish detergent. Do not use bleach or boiling water.
- 2 With the large cleaning brush from Osprey's Hydraulics™ Cleaning Kit scrub the interior of the reservoir.
- 3 Remove the hose from the reservoir and the bite valve from the hose and use the small brush from Osprey's Hydraulics™ Cleaning Kit to scrub the interior of the hose.
- 4 Remove the silicone bite valve cover and clean it and the bite valve with warm soapy water.
- 5 Rinse the interior and exterior of the reservoir, hose and bite valve parts with cool clean water.
- 6 Let the hose and bite valve dry in a well-ventilated area.
- 7 Insert Osprey's Hydraulics™ Cleaning Kit drying rack into the reservoir and hang to dry in a well ventilated area.
