If you lose your Intelligent Key or it's stolen, it's best to Erase its ID code from the vehicle as a precaution against unauthorized key use. Shift to Park This warning illuminates when the ignition switch is in the ACC (if so equipped) or OFF position and the shift lever is in any position other than P (Park) position. If you tend to drop the intelligent key, it can get damaged over time. This warning message ("Key System Error- See Owners Manual"). Luckily, this message shows up before the battery dies, so you'll not be without the keyless remote function. Timer Alert - Time for a driver break? "Key System Error- See Owners Manual" mwawrzyniec Posts: 2 Joined: Wed Jun 28, 2023 10:48 am Delivery Date: 28 Jun 2023 Sun Jul 02, 2023 2:43 pm I changed out the 12v battery and still have the message, anyone have any suggestions on where to look next? Yet, once it appears when the vehicle is stopped, the engine will likely not start. Hate to say it, but the OP never returned to post his results...and that's the problem with "drive by" postings (1 or 2 posts). For additional information, refer to "Battery replacement" in the "Maintenance and do-it-yourself" section of this manual. There will be a small reserve of fuel in the tank when the fuel gauge needle reaches 0 (Empty). Stanton Posts: 2908 Joined: Thu Feb 03, 2011 10:56 am Delivery Date: 01 Sep 2011 Leaf Number: 7458 Location: Orlando, FL Contact: Website Twitter Sat Apr 15, 2023 5:16 am RMundekis wrote: ! Fri Apr 14, 2023 7:11 pm 12 volt system battery reports charged and is only two years old.

Nissan allows registering of up to four intelligent keys for your vehicle. If this warning is displayed, stop the vehicle with the engine idling, as soon as it is safe to do so. When the 12 volt battery ages it loses its peak performance and we see strange messages on the display. For additional information, refer to "Temperature" in this section. When this message shows: the steering wheel is very light, seat belt signal doesn't work, miles/kilometers doesn't show, the instrument it doesn't show either how fast you drive it. Place the headlight switch in the OFF or AUTO position. If this warning comes on, have the system checked by a NISSAN dealer. Low Washer Fluid This warning illuminates when the windshield washer fluid is at a low level. As soon as possible, tighten the wheel nuts to the specified torque with a torque wrench.

Since this error appears when you leave the key fob outside the vehicle, it's good practice to have it with you when operating the car. That doesn't mean the 12v battery is "good"; you need to check resting voltage (and 2 years is a long time for hot climates). To this end, you should change the intelligent key's battery with the new one. ... As I've mentioned, the battery on the key's fob needs replacing when you get the Key Battery Low warning message. For additional information, refer to "Windshield-washer fluid" in the "Maintenance and do-it-yourself" section of this manual. If this indicator illuminates, replace the battery with a new one. Low Fuel This warning illuminates when the fuel level in the fuel tank is getting low. Use the dipstick to check the oil level.

I appreciate it if someone can help me with this and give me instruction about to fix this problem? I'll explore what it means and how you can clear it. This problem came when I took out the instrument cluster to fix the glass, and when I install it back I didn't take off the battery (-) cable. Engine start operation for Intelligent Key system (if I-Key battery is low) (if so equipped) This indicator appears when the battery of the Intelligent Key is low and when the Intelligent Key system and the vehicle are not communicating normally. Step #4: Pop the new battery in, close the two cases (C and D), and put the mechanical key back. You'll get a Key Battery Low warning light when it's time to replace the key fob's battery. Return to "Website/Forum Discussions" Are you getting the annoying key system error warning light on the Nissan dashboard? If you have yet to program your intelligent key, you'll get the Key ID Incorrect message.

Pull off the road in a safe area, with the engine idling. 2011 Blue Ocean SV w/OVMS (no TCU) 12v LiFePO4 battery FIAMM 74100 horns/Wet Okole seat covers/Tor's heater mod/Dala's CAN-bridge Lizard Pack (Rev E) installed @51 months/41k miles 40 kWh Pack (Gen2) installed @115 months/84k miles mwawrzyniec Posts: 2 Joined: Wed Jun 28, 2023 10:48 am Delivery Date: 28 Jun 2023 Wed Jun 28, 2023 11:03 am RMundekis wrote: ! Fri Apr 14, 2023 7:11 pm I've just received the same Error, did you find a solution for this. Stop Vehicle (if so equipped) This warning may appear while trying to free a stuck vehicle due to increased oil temperature. Replace it as I've outlined in the steps above. Key Battery Low (if so equipped) This indicator illuminates when the Intelligent Key battery is running out of power. Step #2: Insert a small flathead screwdriver (A) into the slit (B) to separate the front and back cases. A chime also sounds for approximately 10 seconds. If cruise control is on and cancelled, the speed will be displayed to show the speed the vehicle will return to if the resume button is activated. The vehicle information display will also display the speed the cruise control was set at. However, if the light stays on with the ignition switch in the ON position, the Nissan's Immobilizer System is malfunctioning. I've gotten the same error message on my 2022 leaf. Door/Liftgate Open This warning illuminates when a door has been opened when the engine is running. If the light comes on while the engine is stopped, it may be impossible to start the engine. These are personal computers, TV tower signals, audio equipment, etc. Keep the intelligent key in temperatures not exceeding 140°F to prevent overheating problems. Therefore, you cannot start the engine because Nissan's electronic module cannot read an unregistered intelligent key. These radio waves can be interfered with if you're operating the key near a power station, TV tower, or broadcasting station. In addition, your phone, transceiver, or a CB radio can interfere with its signals and prevent the vehicle from receiving the radio waves. This gauge is not designed to indicate low oil level. Refer to "Flat tire" in the "In case of emergency" section in this manual for tire replacing procedures. Changing wheels and tires Tire rotation NISSAN recommends rotating the tires every 7,500 miles (12,000 km). This warning tells you there's a problem with the intelligent key system. When this warning appears, push in (switch on) the extended storage fuse switch to turn off the warning. The Nissan intelligent key always transmits weak radio waves to communicate with the vehicle. Fortunately, changing the key fob's battery is pretty straightforward.

All-Wheel Drive (AWD) Tire Size Incorrect See Owner's Manual (if so equipped) This warning may appear if there is a large difference between the diameters of the front and rear wheels. The car should start immediately. For setting the timer, refer to "Timer alert" in this section. Nevertheless, this time interval can be shorter if you leave the key near equipment that can cause radio wave interferences. It should open without pressing any button on the Nissan intelligent key. Additionally, striking it sharply against another object can cause physical damage.

Usually, this light comes on when you push the ignition switch to the ON position and lasts for about two seconds. Cruise indicators This indicator shows the cruise control system status When cruise control is activated, a green circle will illuminate to indicate it is set. You can start the engine in any position of the ignition switch. This is done by walking up to your Nissan and opening the door. Don't let it throw you off. Have the system checked by a NISSAN dealer. Always have the key fob with you when driving your Nissan. Watch for radio wave interferences and correct them as necessary. Wipe the intelligent key until it dries entirely immediately after it becomes wet. Replace the key fob's battery every two years. Hint: don't make that same mistake. Make sure the Intelligent Key is inside the vehicle. Get in the driver's seat of your Nissan with the key, and lock all the doors. Place the key into the ignition but not start the vehicle, then remove the key. Again, ask the Nissan dealer for help. You should do this about six times until the car accepts the key. The key system error light on Nissan vehicles displays one of these messages below. It flashes when the ignition switch is ON, ACC, or LOCK. The warning light can signal a serious issue, so it's best to get to the root of the problem as soon as possible. Exposure to temperatures above 140°F can also cause a faulty intelligent key. Your vehicle will enter into program mode at this point. Insert the key back into the ignition and turn it without starting the car. If this warning appears, stop the vehicle and adjust the tire pressures of all four tires to the recommended COLD tire pressure shown on the Tire and Loading Information label. However, you'll need to talk to a Nissan dealer before purchasing any additional keys. Typically, it indicates that Nissan's Immobilizer System is working correctly. 12 volt system battery reports charged and is only two years old. Put a fresh battery in your key fob. For additional information, refer to "NISSAN Intelligent Key® battery discharge" in the "Starting and driving" section of this manual. With this in mind, I'll go into the details of the different reasons why you're getting the key indicator warning light. Flat Tire - Visit dealer (if so equipped) This warning appears when the low tire pressure warning light in the meter illuminates and one or more flat tires are detected while driving. If this light appears as the engine is running, you can continue to drive your vehicle. However, in case you bring the key, but the warning still appears, a low battery may be the cause. In this case, you'll need to have it checked by an expert who can troubleshoot the problem. Low Oil Pressure Stop Vehicle This warning appears in message area of the vehicle information display if low oil pressure is detected. They include worn buttons, so you will need to replace the key fob. However, there could be other reasons your key fob is not working after a battery change. I've covered every possible cause for this warning. The I-Key System Error message warns of a malfunction with the Intelligent Key system. Good luck! Engine start operation No Key Detected (if so equipped) Shift to Park Key battery low (if so equipped) Engine start operation for Intelligent Key system (if I-Key battery level is low) (if so equipped) Key ID Incorrect (if so equipped) Release parking brake Low Fuel Low Washer Fluid Door/Liftgate Open I-Key System Error: See Owner's Manual (if so equipped) Loose Fuel Cap Tire Pressure Low - Add Air Flat Tire - Visit Dealer (if so equipped) Low Oil Pressure Stop Vehicle All Wheel Drive (AWD) Error: See Owner's Manual (if so equipped) All Wheel Drive (AWD) High Temp.
