ASUS is one of Fortune magazine’s World’s Most Admired Companies and has over 1,000 service centers across 98 countries and employs more than 16,000 people worldwide, including over 5,000 world-class R&D talents. Our comprehensive business product portfolio includes servers, workstations, intelligent edge computers, mini PCs, business motherboards, monitors, projectors and routers. ASUS offers end-to-end total solution for business of all sizes, bridging the gap between business requirements and IT deployments. Driven by innovation and committed to quality, the company won 4,385 awards and earned approximately US\$13.3 billion of revenue in 2016.

- World’s most admired companies for 3 years - **FORTUNE**
- Top regarded companies for 2 consecutive years - **Forbes**
- Named as 2018 Top 100 Global Technology Leaders - **Thomson Reuters**
- No.1 most valuable brand in Taiwan for 5 consecutive years - **Interbrand**

ProArt Studiobook Pro 16 OLED

"ProArt Studiobook 16 is best for professionals who often work on programs like Adobe Premiere, Photoshop, After Effects, Lightroom, as well as DaVinci Resolve, Blender and more. However, if you're an architect or engineer who uses CAD modeling apps, or a data scientist who works with AI and big data programs, you may want to redirect your attention to ProArt Studiobook Pro 16."

ASUS Zenbook Pro 15 Duo OLED

"ZenBook Duo Pro 15 brings a lot to the table with powerful specs for those who need them, and a second screen not only adds a wow factor but functionality. The ZenBook Duo Pro 15 should be considered by content creators who need more screen real estate while on the go."

ASUS Vivobook Pro 16X OLED

"ASUS' newest additions to its Vivobook Pro series form a middle ground between the more budget-friendly Vivobook and premium ProArt Studiobook. The first thing you will notice is the futuristic design. From the 0° Black or unique weave-textured Meteor White finish to the bright orange escape key, it all feels very Cyberpunk."

CREATE THE UNCREATED

Who is a content creator?

A thinker. A tinker. A creator.

A content creator is someone who is a thinker or a tinker. Someone, be it a 3D designer, a photographer or a TikTok Star who are deeply immersed in their world. Where thinking, tinkering, exploring and/or creating is inherent to who they are.

It's not a choice to create, it's innate.

Best ASUS laptops for your creativity

Ignite your creative spark with the comprehensive range of ASUS creator laptops, designed to help you explore the worlds of your imagination. We remove every barrier for creative experts, and employ cutting-edge technology in the pursuit of truly inspirational performance. Our laptops feature groundbreaking technologies such as ScreenXpert, ASUS Dial, ASUS DialPad and much more. Dream the impossible, and create the unimagined.

Create the uncreated with ASUS!

PROFESSIONAL

ProArt Studiobook Series

Born for Creative Pros

Who are they?

Professional creators whose job demands a high-performance machine for them to do the job well.

These people are a broad cross section of society (Data Scientist, 3D Artist, Design Engineer, Game Developer) whose interests are diverse.

They are united by the focus on detail, on solving problems, making things and doing so beautifully. Creation isn't just their bread and butter, creation is who they are. They are only limited by the tools available to them.

Attitude:

They are creator purists, who champion function over form and therefore have zero interest in Apple. They are self-starters who are self-taught and look on-line to update their skills regularly.

Need:

The programs they use require more power and speed to be able to create, analyse and send large files; and they require access to seamless integration with Windows.

PROSUMER

ASUS Zenbook Pro Series

Unleash your Creative Power

Who are they?

Emerging and established professional creators who want premium performance, light and sleek laptop to be with them every step of the way to help master their hidden talent.

They're storytellers, beginning influencer's in their emerging fields. They want to make beautiful things that move people. They're inspired by the everyday. They take their tool of choice with them wherever they go. They can't really afford to sustain their craft full-time and so augment it with their full-time or part-time work.

Attitude:

Love of the craft, purists at heart. No compromises. Doers, not talkers, self-taught learners on the go.

Need:

They need access to other creatives to spar with, to learn from. They also need a laptop that fits their lifestyle –they take their tools wherever they go and so need something light; something that looks good and reflects their aesthetic.

AMATEUR

ASUS Vivobook Pro Series

The Power to Wow the World

Who are they?

Gen Zs –they're living and creating intertwined. Amateurs are innate creators. Their creations live on social media, primarily on platforms like YouTube and TikTok.

Attitude:

They've got big plans, they're highly driven and altruistic, and they're 17% more likely than average to say they take risks.

They're switched on, but willing to unplug. Gaming is also a staple for this audience, with 94% playing games on any device, they're the most active gaming generation.

Digital natives who turn to Google to up-skill, learn –nothing is beyond the realm of possibility.

Need:

Connecting. Tools that reflect their lifestyle and creative needs.

MYASUS FEATURE INTRODUCTION

MyASUS is the one-stop portal that integrates ASUS-developed software tools and services. Link to MyASUS is an integrated and updated version of the previous ASUS Sync and ZenAnywhere. It provides solutions for hand-held device mirroring on PC, PC screen extending on hand-held devices and remote file access from your hand held device.

Link to MyASUS Overview

Link to MyASUS is a handy tool that's part of the MyASUS app. It seamlessly integrates your ASUS PC with your mobile devices, boosting your productivity and allowing easier multitasking. A series of features enables you to transfer files or links fast and wirelessly between devices, control your phone from the PC, use your mobile device as a secondary display, or access local PC files remotely from your phone. Link to MyASUS simplifies your life.

HANDS-FREE PHONE CALL

Make and take phone calls, which can be routed through your PC's speakers and microphone. You can also access your phone's contact book on your PC, so you can search for contacts and call them directly. There's no need to dig out your phone from your bag or pocket!

URL TRANSFER

Simply tap the share icon in your browser and click MyASUS. The link of the webpage you are watching on your PC will be instantly sent to your mobile device — where it will open automatically for seamless on-the-go convenience*.

*URL transfer requires the Microsoft Edge browser

MIRROR

Mirror your phone's screen on your PC and input text in mobile apps via your PC's keyboard, which significantly accelerates your workflow compared to using the small screen and virtual keyboard on your phone. The notifications on your phone will also pop up on your PC, so there's no need to pick up your phone constantly.

*The Link to MyASUS Mirror function works on Android version 9.0 or above. iOS is not supported.

FILE TRANSFER

Simply tap or drag to share files between your PC and mobile devices in the blink of an eye. It is many times faster than the traditional Bluetooth file transfer, with a user-friendly drag and drop experience to ensure seamless transfer between your ASUS PC and mobile devices. You may also share the files by right clicking the file and share through simple Windows sharing. It provides solutions for hand-held device mirroring on PC, PC screen extending on hand-held devices and remote file access from your hand held device.

SCREEN EXTENDER

Use your phone or tablet as a secondary display on the go, for dual-display convenience. The feature can be exceptionally useful when you need to cross reference multiple documents or visuals. Multitasking on the go has never been easier.

*The Screen Extender function works on Android version 9.0 or above. iOS is not supported.

REMOTE FILE ACCESS

Use your mobile device to remotely access files stored on your ASUS PC, and use your PC as a personal cloud replacement and gain access anywhere and anytime. Remote File Access can be extra beneficial for commercial users who would need access to files in the office during a business trip or at home. QR Code File Transfer allows you to generate a QR code with your files attached, so people can scan and download your file. not supported.

57,156 AWARDS WON SINCE 2001

Since 2001, ASUS has earned a total of 57,156 awards from some of the most prestigious international organizations and media groups around the world. Each award is a testament to our relentless quest and commitment to creating solutions designed for everyone to joy.

ASUS OLED LAPTOPS EXPERIENCE VISUALS LIKE NEVER BEFORE

ASUS OLED display laptops come with a best-in-class colour gamut. They reproduce colours with superb real-life accuracy for professional-grade visuals, making them perfect for professional and creative work, or anyone who simply wants to enjoy the very best colour fidelity. OLED displays, due to the nature of the special organic light-emitting compounds they use, can reduce the harmful blue light by up to 70% compared to LCD displays, making them extra gentle on your eyes to reduce the risk of retinal damage.

time on any laptop

Ultimate Professional-Grade Colours

ASUS PANTONE® Validated OLED laptops deliver exceptionally detailed and realistic visuals, with a cinema-grade 100% DCI-P3 colour gamut. This means that the colours reproduced on the display are richer and more vivid: it's ideal for colour-intensive projects, but also enhances any kind of content.

LCD
100% sRGB

OLED Has 1.6x Colour Volume Compared to LCD

On conventional LCD displays, detail and colour quality usually decrease dramatically as the brightness is reduced. But ASUS OLED laptops are able to show great detail at lower brightness settings due to their high contrast and their ability to maintain a wide colour gamut at low brightness. When calculating the 3D colour volume — which adds illumination to the traditional 2D colour gamut — ASUS OLED displays have about a 60% higher colour volume, offering better colour performance at any brightness level.

OLED has much higher perceptual brightness

ASUS OLED laptops can maintain good colour reproduction at any brightness level, so you can freely adjust the screen's brightness to suit your working environment, while still enjoying exceptionally vivid colours. For example, in the living room environment (usually illuminated at about 100 lux), you only need 177 nits brightness in an OLED display to produce the same clear image as 400 nits brightness in an LCD display. At the lower brightness levels needed on OLED displays, there's less harmful blue light emitted.

Colour-perfect at any brightness

ASUS OLED laptops maintain a 100% DCI-P3 colour gamut at both high and low brightness levels, while on a standard LCD laptop the colour gamut is reduced dramatically at low brightness levels. At a gray-level brightness of 16 G, LCD laptops only have an 11% DCI-P3 colour gamut, while ASUS OLED laptops maintain a 100% DCI-P3 colour gamut.

High coverage of HDR standard

The industry HDR standard covers a huge range of brightness from 0.0005 nits — the lowest measurable level — up to 10,000 nits. The true blacks and high brightness possible with OLED displays give them a 75% coverage of the HDR standard, compared to about 46% for LCD displays.

70% Less Harmful Blue Light for Eye Comfort

Blue light is known to cause visual discomfort and disrupt sleep quality. However, due to the nature of the special organic lighting materials in an OLED display, ASUS OLED laptops emit 70% less harmful blue light, and they're also certified by TÜV Rheinland and SGS. More importantly, unlike traditional blue-light filters, shifting the spectrum means there's no need to compromise colour accuracy.

70 %
reduced blue light

Low Blue Light

Premature aging of retina

Research has shown that in a five-year-old child's eyes, approximately 60% of the received blue-light emissions pass through to the retina, compared to only around 20% for a 60-year-old adult. With ASUS OLED displays, the significantly lower blue light levels mean better eye care for children.

Learn more at:
https://www.essilorpro.com/content/dam/essilor-redesign/product-resources/crizal/Blue-Light-Roundtable_White-Paper.pdf

Harmful effects on retina cells

Cone cells are the cells in the eye's retina that enable colour vision. In experiments conducted by the Gifu Pharmaceutical University in Japan, mice cone cells were subjected to red, green, and blue light sources. The survivability of the cone cells under blue light exposure dropped dramatically to 20% after 24 hours, while cone cells exposed to other colours retained around 100% survivability.

Fastest Response Time on Any Laptop

ASUS OLED displays have a 0.2 ms response time – the fastest of any laptop, and 50x faster² than the average laptop LCD display. In fact, most of LCD laptop displays have a response time between 10 and 25 ms. This ensures smoother fast-paced action scenes, low-latency gameplay, and subtle details like blur-free text scrolling.

Extreme Contrast, Astonishing Detail

ASUS PANTONE® Validated OLED laptops deliver exceptionally detailed and realistic visuals, with a cinema-grade 100% DCI-P3 colour gamut. This means that the colours reproduced on the display are richer and more vivid: it's ideal for colour-intensive projects, but also enhances any kind of content.

Blue light disrupts sleep cycles

When it gets dark, your brain produces the hormone melatonin, which helps to maintain the correct scheduling of your daily sleep cycles. According to a Stanford University study the production of melatonin can be blocked by exposure to blue light at night, and potentially cause sleep disruption.

Verified Displays for Content Creation and Consumption

Portrait Displays' Calman colour-calibration software is the leading choice for display calibration by colour professionals in broadcast, production, and post-production, trusted by many respected Hollywood professionals. As part of an ongoing cooperation between ASUS and Portrait Displays, selected ProArt Displays and Studiobook are now either Calman Ready to indicate the ability to communicate directly with Calman software, or Calman Verified as an assurance of studio-quality colour accuracy right out of the box.

ASUS CREATOR LAPTOPS WITH NVIDIA STUDIO DRIVER

Graphics-intensive creative applications demand powerful graphics processors, so selected ASUS creator laptops are validated as NVIDIA Studio laptops. NVIDIA Studio laptops feature powerful NVIDIA GeForce RTX™ or NVIDIA RTX™ GPUs with real-time ray-tracing and AI-augmented features, supported by NVIDIA Studio drivers that deliver the outstanding stability, maximum performance, rock-solid reliability and wide software compatibility required by professional creators.

ISV CERTIFICATION COMPATIBLE WITH CREATIVE APPS

ISV is Independent Software Vendors certified (ISV) to give you peace of mind when working with creative apps. This ensures software from vendors such as Adobe® or Autodesk® will run smoothly on your ProArt series to give you the very best user experience.

Adobe connects content and data and introduce new technologies that democratize creativity, shape the next generation of storytelling, and inspire entirely new categories of business.

From greener buildings to smarter products to mesmerizing blockbusters, Autodesk software helps you to design and make a better world for all.

PTC testing and verifying devices for use with 3D CAD, CAM and CAE software to work smoothly and efficiently.

Dassault Systèmes, the 3DEXPERIENCE Company, provides businesses and people with virtual universes to imagine sustainable innovations.

HIGHER PERFORMANCE POWERED BY NVIDIA RTX™ ON ASUS CREATOR LAPTOPS APPS

Software certifications and enterprise driver optimizations deliver best performance on NVIDIA RTX for professional applications.

ASUS Dial
on ProArt Studiobook

ASUS DialPad
on Vivobook Pro X

ASUS ScreenPad™ Plus
on Zenbook Pro Duo

ASUS NEW TECHNOLOGIES WITH CREATIVE APPS

To streamline your workflow and give you precision control over your creative apps, our creator-focused products, such as the ProArt Studiobook, are equipped with the groundbreaking ASUS Dial. This is a precision-engineered rotary control that gives you intuitive fingertip control over app parameters and values. On other models, such as Vivobook Pro 16X, there's a virtual version of ASUS Dial called DialPad, which brings the same functionality to budding creators and hobbyists via the touchpad. Zenbook Pro Duo with ASUS ScreenPad™ Plus gives you on-the-go computing like you've never experienced before. A series of handy built-in apps help boost your productivity. With Control Panel in Zenbook Pro Duo, you can easily change brush size, change saturation, adjust layer opacity, and much more. Four types of control are available — ASUS Dial, Button, Slider, and Scroll — and each work in a different way to help smooth your creative workflow. Control Panel works with Adobe® apps including Photoshop®, Lightroom® Classic, Premiere® Pro and After Effects®. It's fully customisable — and there are more compatible apps on the way!

CREATIVE APPS SUPPORT

Photography

Video post-production

PROART CREATIVE HUB

The ASUS ProArt Creator Hub app lets you power up your imagination in an instant. This easy-to-use app unifies your creative experience across your compatible connected devices, and makes it easy to calibrate colours, adjust settings, or monitor performance. It also gives you full control over the ASUS Dial or ASUS DialPad, so you can also optimise your workflow with ProArt Creator Hub!

Dashboard

Dashboard gives you a quick overview of your laptop, with tabs at the top for other connected ProArt devices. Each device has its own specific dashboard, making it easy to optimise them all and get ready to level up your workflow!

Update Center – Worry Free Upgrades!

The new Update Center gives you peace of mind when creating. Enable automatic background updates, and your compatible ProArt devices updated when they're connected to your PC. There's no need to wait when inspiration strikes.

Colour Calibration

The Colour Calibration section of ProArt Creator Hub gives you access to the built-in display calibration tool. Working together with a hardware colour calibrator, this tool automatically adjusts all the parameters of the display to ensure perfect colour accuracy.

Control Settings – Customised Key

The Customised Key tab of the Control Settings menu lets you assign handy keyboard shortcuts for your creative apps on supported laptops.

* Only support in ProArt Studiobook 16, Pro 16 Series.

Control Settings – ASUS Dial

ASUS Dial is a precision engineered rotary control that gives you intuitive fingertip control over app parameters and features. You can customise your ASUS Dial or ASUS DialPad in the Control Settings menu. For more precise control, you can adjust the speed and sensitivity preference in the Preference Setting menu.

WorkSmart – Task Group

The WorkSmart feature lets you assign up to four apps to a task group and pin it on the desktop; then you can simply click on a designated task group to open assigned apps simultaneously.

ASUS NOW WITH ADOBE CREATIVE CLOUD

Get complimentary membership with the purchase of selected ASUS products.¹ (Up to a \$230.97 value)

Three-Month Membership of Adobe Creative Cloud

Purchase an eligible ASUS creator laptop, including ProArt Studiobook, Zenbook Pro Duo and Vivobook Pro series, ASUS ProArt desktop, ASUS ProArt display, or ASUS motherboard, to enjoy complimentary three-month membership to the full Adobe Creative Cloud suite.

Get creative with Adobe Creative Cloud

Adobe Creative Cloud gives you the entire collection of Adobe desktop and mobile creative apps, from essentials like Adobe Photoshop to innovative tools like Adobe XD. You also get built-in templates to jump-start your designs and step-by-step tutorials to help you get up to speed quickly and sharpen your skills. It's your entire creative world, all in one place.

20+ Adobe apps

Industry-leading apps including Photoshop, Illustrator, InDesign, Spark and XD.

Adobe Fonts

Access thousands of fonts right within your Creative Cloud apps.

Behance

Find inspiration in the world's largest creative community.

Creative Cloud Libraries

Your team can share assets across their apps and devices, so everyone's in sync.

100 GB of cloud storage per user

Extra storage makes it easier for your team to share and manage creative assets.

Turn your creative vision into reality with the ProArt Studiobook Pro 16 OLED. With up to a certified color-accurate 16-inch 4K OLED HDR 16:10 NanoEdge display, up to a breathtakingly powerful Intel® Xeon® processor, pro-grade NVIDIA RTX™ A5000 graphics, huge amounts of memory, advanced ultrafast storage, superb I/O connectivity, and ultra-precise fingertip control over your creative apps with the groundbreaking new ASUS Dial, ProArt Studiobook Pro 16 OLED is simply the best creator laptops we've ever made.

World's first 16" 4K OLED HDR 16:10 display

Your creations demand visual perfection, and ProArt Studiobook Pro 16 OLED delivers it with a 4K OLED HDR display that's in a class of its own. This display delivers truly photorealistic visuals that are VESA DisplayHDR™ 500 True Black certified for ultra-high contrast and deep blacks, and the 100% DCI-P3 industry-standard color gamut ensures you're seeing as many vivid, true-to-life colours as possible. For delivering precise color accuracy, this remarkable display is Calman verified, PANTONE® Validated, and has a Delta-E color-accuracy value of less than 2.

Fire up your imagination

ProArt Studiobook Pro 16 OLED is powered by up to Intel Xeon W-11955M workstation processor that makes light work of super-complex, heavily multithreaded photorealistic rendering, visualisation, simulation or analysis applications. This 8-core processor gives you a mobile workstation with professional performance, easily outperforming mainstream models to make your creative workflow effortless.

Fast graphics, stable drivers

Professional-level 3D graphics processing power is provided by up to an NVIDIA RTX A5000 graphics, which is based on Ampere, NVIDIA's second-generation RTX architecture. It blitzes through the toughest tasks, such as complex CAD models, 3D product design, or 8K video editing, thanks to the advanced features of Ampere and up to 16 GB of fast GDDR6 video memory. For outstanding driver stability, we use NVIDIA Studio Drivers to ensure maximum performance, rock-solid reliability, and wide software compatibility.

Unique cooling design

Discover new ways to work with the brand-new and exclusive ASUS Dial, an intuitive physical controller that gives you instant and precise fingertip control over parameters in your creative apps. You can easily change brush size, change saturation, adjust layer opacity, or rapidly undo actions. You can also adjust screen brightness and volume, or vertical scroll to make your creative workflow smoother. There are over 70 functions available to help smooth your creative workflow. ASUS Dial is currently compatible with four Adobe apps: Photoshop, Premiere Pro, Photoshop Lightroom Classic, and After Effects. It's fully customizable — and there are more compatible apps on the way!

For delivering precise colour accuracy, this remarkable display is Calman verified, PANTONE® Validated, and has a Delta-E colour-accuracy value of less than 2.

Fire up your imagination

ProArt Studiobook 16 OLED is powered by up to an Intel® Core® i9 12900H processor, an eight-core processor that takes your creativity to another level, with the fastest ever performance that enables super-smooth and responsive multitasking. ProArt Studiobook 16 OLED can easily handle complex multithreaded applications multi-layered video editing, and 3D rendering.

Fast graphics, stable drivers

Professional-level 3D graphics processing power is provided by NVIDIA® GeForce® RTX3060 graphics, which is based on Ampere, NVIDIA's second-generation RTX™ architecture. Whether you're working on complex 3D scenes, 8K video, or high-quality livestreaming, ProArt Studiobook 16 OLED is more than equal to the task thanks to the GPU's enhanced core architecture and fast GDDR6 memory. For outstanding driver stability, we use NVIDIA® Studio Drivers to ensure maximum performance, rock-solid reliability, and wide software compatibility.

Make magic happen with ASUS Dial

Discover new ways to work with the brand-new and exclusive ASUS Dial, an intuitive physical controller that gives you instant and precise fingertip control over parameters in your creative apps. You can easily change brush size, change saturation, adjust layer opacity, or rapidly undo actions. You can also adjust screen brightness and volume, or vertical scroll to make your creative workflow smoother. There are over 70 functions available to help smooth your creative workflow. ASUS Dial is currently compatible with four Adobe apps: Photoshop, Premiere Pro, Photoshop Lightroom Classic, and After Effects. It's fully customisable — and there are more compatible apps on the way!

touchscreen

Zenbook Pro 15 Duo OLED lets you get things done in style: calmly, efficiently, and with zero fuss. It's your powerful and elegant next-level companion for on-the-go productivity and creativity, featuring an amazing 4K OLED HDR touchscreen. It also includes the brand-new tilting ASUS ScreenPad™ Plus secondary 4K display that offers effortless ergonomics and seamless workflows. Powered by up to an Intel® Core™ i9 eight-core processor, Zenbook Pro 15 Duo OLED brings you all the benefits of tomorrow's technology, today.

(UX582)

ASUS Zenbook Pro 15 Duo OLED (UX582)

World's first 16" 4K OLED HDR 16:10 display

Zenbook Pro 15 Duo OLED also includes the new tilting ScreenPad Plus, a secondary touchscreen that automatically tilts up by 9.5°, creating an angle of 144.5° between the main display and ScreenPad Plus for more comfortable viewing. You can enjoy seamless visuals across both displays, with easy multitasking thanks to the built-in ScreenPad Plus-optimized apps that enhance your workflow.

Flagship performance

Zenbook Pro 15 Duo OLED is a real powerhouse when it comes to performance. It's powered by up to an 11th Generation Intel® Core™ i9 eight-core processor with up to 32GB of memory, with an ultrafast PCIe® SSD to ensure fast boot times and rapid app loads. With this ultrapowerful combination, Zenbook Pro 15 Duo OLED takes professional-quality tasks in its stride, such as multi-layer photo or video editing, music production, or even 3D graphics rendering.

Professional-grade graphics

The professional-grade NVIDIA GeForce RTX 080 Laptop GPU delivers fantastic performance. Advanced RTX features like hardware accelerated ray tracing ensure stunning visuals, while exclusive AI assistance helps with repetitive tasks for faster content creation.

4K OLED HDR, Ultraslim bezels

Zenbook Pro 15 Duo OLED gives you a superbly immersive viewing experience, with a brilliant 4K OLED HDR NanoEdge display that delivers ultra-vivid colors and deep blacks. Its cinema-grade 100% DCI-P3 color gamut and Delta-E <2 color accuracy make it a superb all-rounder for professional creation, and it's also PANTONE® Validated for professional-grade color accuracy and TÜV Rheinland-certified for eye care.

ASUS Zenbook Pro 15 Duo OLED (UX582)

Bright and clear NanoEdge OLED touchscreen

The bright and clear OLED HDR NanoEdge wide-view touchscreen on ZenBook Pro 15 OLED has ultraslim bezels and an 88% screen-to-body ratio, giving you a superbly immersive viewing experience. It also has a cinema-grade 100% DCI-P3 colour gamut for ultra-vivid colours.

Outstanding all-round performance

ZenBook Pro 15 OLED uses the AMD Ryzen™ 9 5900HX processors and up to NVIDIA® GeForce® RTX3050 Ti GPU discrete graphics that give you next-level performance so you can blitz through any creative task, no matter how demanding. This awesome power is matched by the ultrafast storage, with up to a 1TB PCIe® 3.0 x4 SSD. The laptop is cooled with exclusive ASUS IceCool Pro technology, which includes dual fans and three heat pipes, helping ZenBook Pro 15 OLED to reliably deliver all the power needed for effortless creativity.

Sleek and sophisticated

The sleek design of ZenBook Pro 15 OLED blends in perfectly to any professional or business setting. It has a calm and refined burnished Pine Grey finish, with a special off-center version of the iconic ZenBook spun-metal finish on the lid. It's subtle unique and sophisticated, and adds a fresh look to your creative workspace.

Ignite your creativity with Vivobook Pro 16X OLED, the uncompromising powerhouse for discovering your potential and exploring the future. Vivobook Pro 16X OLED brings you the speed and accuracy you need to realise your vision, with a 16-inch NanoEdge 4K OLED display, 11th Generation Intel® H Series CPU, and NVIDIA® GeForce® RTX3050 graphics. The exclusive ASUS DialPad gives you precise and intuitive control of your creative tools, and the dual-fan cooling design lets you work in undisturbed peace. Vivobook Pro 16X OLED unlocks the door to your creative future.

Power to create

Your journey of discovery starts here, with Vivobook Pro 16X OLED to power your exploration. Whatever your creative workload — scenes or spreadsheets, documents or designs — the 11th Gen Intel® H Series CPU and NVIDIA® GeForce® RTX3050 graphics give you the fastest performance in an ultrathin laptop. With up to 32GB memory and a 1TB PCIe® SSD, you're ready for anything, whether it's high-pressure multitasking, tough multimedia editing, or just some laid-back gaming.

Amaze your vision

Get your eyes ready for the 4K OLED NanoEdge display on Vivobook Pro 16X OLED. It's a viewing experience beyond compare, with a super-bright 550-nit panel, ultrahigh contrast ratio, and ultraslim bezels that give it an 86% screen-to-body ratio. The ultrawide 100% DCI-P3 colour gamut ensures vivid colours and it's also PANTONE® Validated for professional-grade colour accuracy. TÜV Rheinland certification for low blue light emissions makes it easy on your eyes, too. Everything's clearer and brighter on Vivobook Pro 16X OLED.

Non-stop creativity

Vivobook Pro 16X OLED is designed to make your on-the-go life effortless, so we've given it a powerful 96 Wh battery with long battery life. Vivobook Pro 16X OLED keeps on going, just like your imagination.

Dominate the world with DialPad

The world moves fast, but with Vivobook Pro 16X OLED, you can move faster while immersed in your creative explorations. ASUS DialPad is a virtual interface on the touchpad that puts you in full control of adjustments in compatible Adobe® creative software, so you can stay fully focused on the task at hand.

It's time to show your vibrant new vision to the world! Vivobook Pro 15 OLED lets you express your true colours, with its vivid and stunning 15-inch NanoEdge FHD OLED display and awe-inspiring Harman Kardon-certified audio. Vivobook Pro 15 OLED immerses you in whatever you're doing, whether it's work or play. Powered by the 11th Gen Intel® H Series CPU with NVIDIA® GeForce® RTX3050 graphics and a dual-fan cooling system, and featuring ultrafast WiFi 6, the ultra-stylish Vivobook Pro 15 OLED is the key to expressing your true potential.

Unleash the possibilities

Vivobook Pro 15 OLED is ready and waiting to take you on your journey of discovery. Whatever you need to do — browse, create or play — the 11th Gen Intel® H Series CPU with NVIDIA® GeForce® RTX3050 graphics, up to 16GB memory and a 1TB PCIe® SSD give you all the horsepower you need to realise your visual creativity. GeForce® RTX GPUs provide hardware-accelerated ray tracing and AI capabilities for creators who need next-level performance. Render quicker, broadcast clearer, and edit videos better with NVIDIA® GPUs in Studio laptops and desktops.

Discover a new vision of the world

Expand your vision beyond the borders and immerse yourself in Vivobook Pro 15 OLED's amazing 16:9 aspect-ratio display. This FHD OLED NanoEdge display is super-bright — up to 600 nits — and has an 84% screen-to-body ratio, along with a 100% DCI-P3 colour gamut for ultra-vivid colours. It's also PANTONE® Validated for professional-grade colours accuracy and TÜV Rheinland-certified for low blue-light emissions. Let Vivobook Pro 15 OLED guide your creative journey, with a fresh new visual experience.

Design to impress

Forget ordinary, embrace Vivobook. The unique 3D ASUS logo, with its anodized chevron pattern and tactile texture, adds excitement even before you open the lid. Explore further, and see how the expressive design continues inside, where a warning-striped Enter key takes center stage.

A faster connection to the future

Step away from your desk and into the future — whether it's at home, in a downtown café, or at the airport. Your workspace is wherever you want it to be. Vivobook Pro 15 OLED is equipped with WiFi 6 (802.11ax), which delivers superfast networking speeds for faster larger file transfers responsive online gaming, and super-smooth video chats. It's also enhanced with exclusive ASUS WiFi Master Premium technology: this includes ASUS WiFi SmartConnect that automatically selects the best WiFi source, so your laptop connects seamlessly to the best WiFi signal and known mobile hotspots.

ASUS Premium Care
Upgrade your standard warranty with ASUS Premium Care and keep your ASUS products in tip-top condition with an extra layer of protection! ASUS Premium Care has several levels of cover to suit your needs, so you can create a tailor-made package to fully protect your ASUS products. ASUS Premium Care includes a wide range of benefits, including:

What to Purchase

- Warranty extension & servicing
 - Keep my drive
 - Battery back-up

How to Purchase

- Open the Windows Start Menu and click the MyASUS icon. Once opened select My Product Warranty.
- Contact your local resellers or service centre for more details.

When to Purchase

- ASUS Premium Care must be purchased and activated within 90 days of your ASUS product purchase date.
