

MANUAL PARA EL ACCESO REMOTO A LA COMPUTADORA VIA VPN

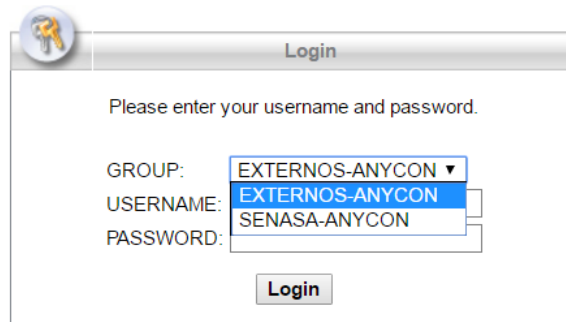

I. INSTALACION

Descargar el Any Connect: <https://200.60.104.69/>

A screenshot of the login form. It is a small window titled 'Login'. The text 'Please enter your username and password.' is at the top. Below it, there are three input fields: 'GROUP' (a dropdown menu with 'EXTERNOS-ANYCON' selected), 'USERNAME', and 'PASSWORD'. At the bottom, there is a 'Login' button.

Si la Pc del usuario no tiene creado una cuenta de Dominio de senasa, seleccionar EXTERNOS-ANYCON, de si tener una cuenta de Red de Senasa, seleccionar SENASA-ANYCON

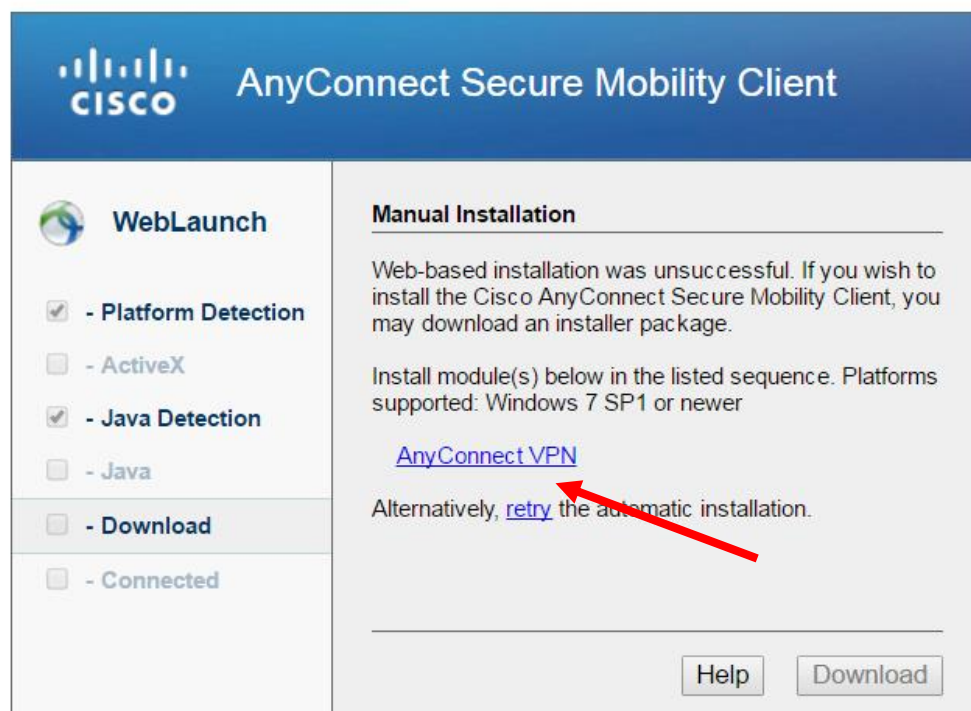

Nota: De no ingresar a la ruta o no ingresar su usuario y contraseña remitir un correo a mesadeayuda@senasa.gob.pe

A login window titled "Login" with a key icon. It contains the text "Please enter your username and password." Below this are three fields: "GROUP:" with a dropdown menu showing "EXTERNOS-ANYCON", "USERNAME:" with a text box containing "EXTERNOS-ANYCON", and "PASSWORD:" with a text box containing "SENASA-ANYCON". A "Login" button is at the bottom.

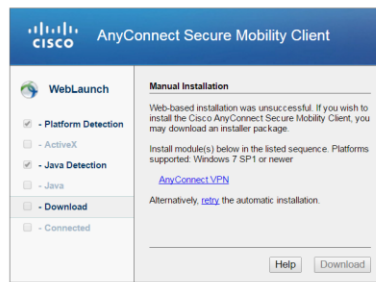

Haremos un prueba con un usuario que tiene cuenta de Red de Senasa

Una vez logueado, en la opción Download, Descargamos el AnyConnect VPN

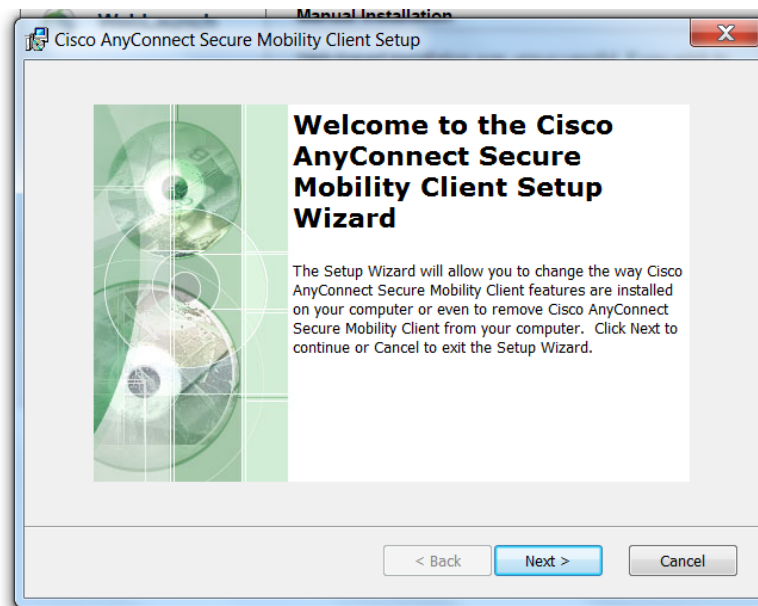

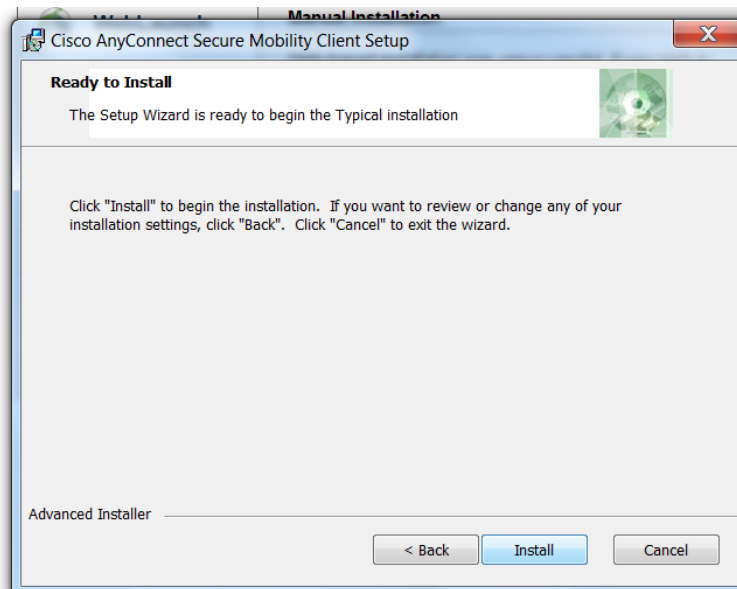

The interface shows the Cisco AnyConnect Secure Mobility Client WebLaunch page. On the left, under "WebLaunch", there are several options: "Platform Detection" (checked), "ActiveX" (unchecked), "Java Detection" (checked), "Java" (unchecked), "Download" (unchecked), and "Connected" (unchecked). The "Download" option is highlighted. On the right, under "Manual Installation", there is a message: "Web-based installation was unsuccessful. If you wish to install the Cisco AnyConnect Secure Mobility Client, you may download an installer package." Below this, it says "Install module(s) below in the listed sequence. Platforms supported: Windows 7 SP1 or newer". A link "AnyConnect VPN" is displayed, with a red arrow pointing to it. Below the link, it says "Alternatively, [retry](#) the automatic installation." At the bottom right, there are "Help" and "Download" buttons.

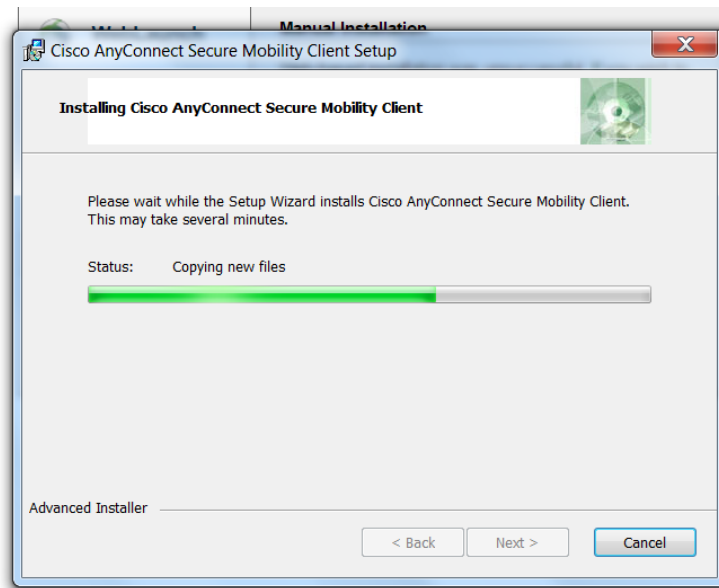

Una vez descargado el programa lo ejecutamos

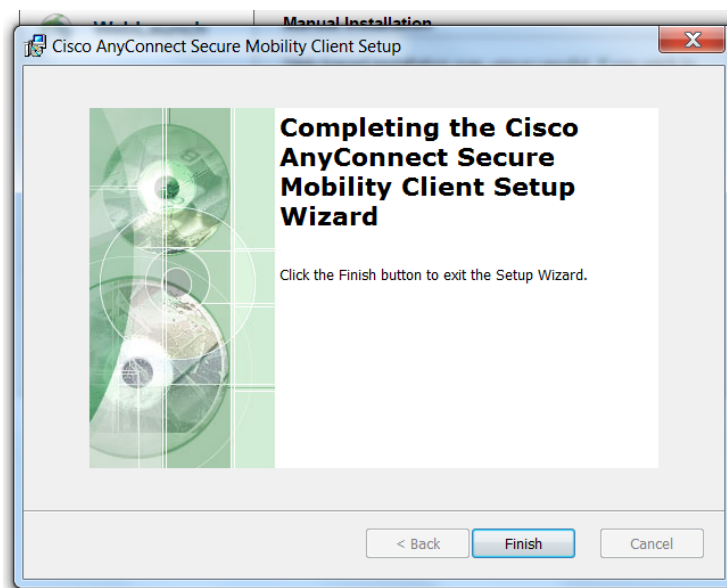

Clic en **Next** a toda la instalación

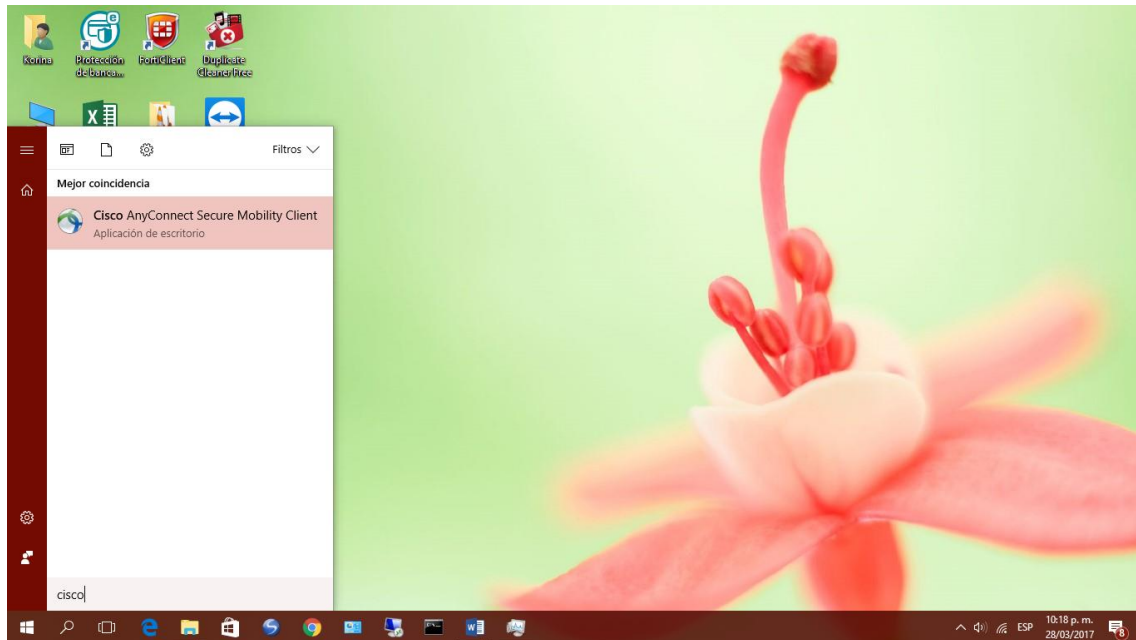

Al finalizar clic en Finish

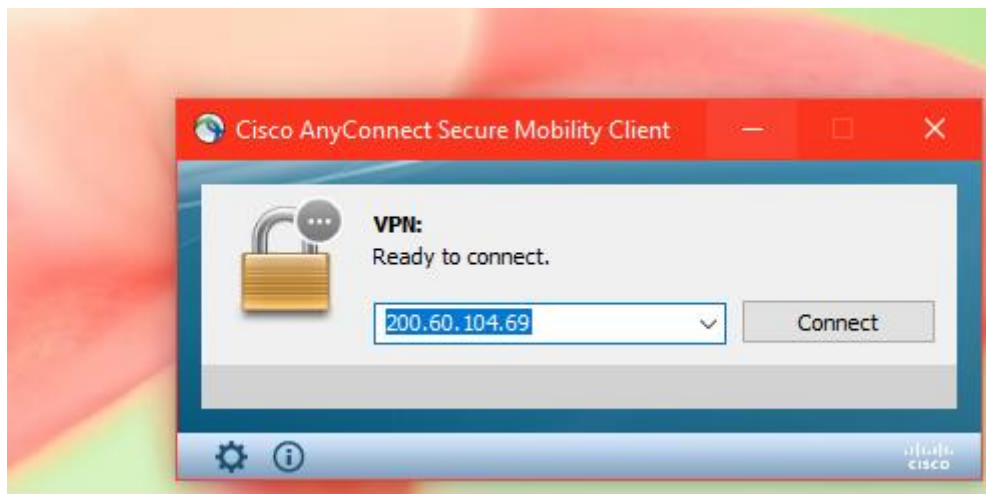

II. CONFIGURACION

En el escritorio Validar Ubicar el icono CISCO en el escritorio:

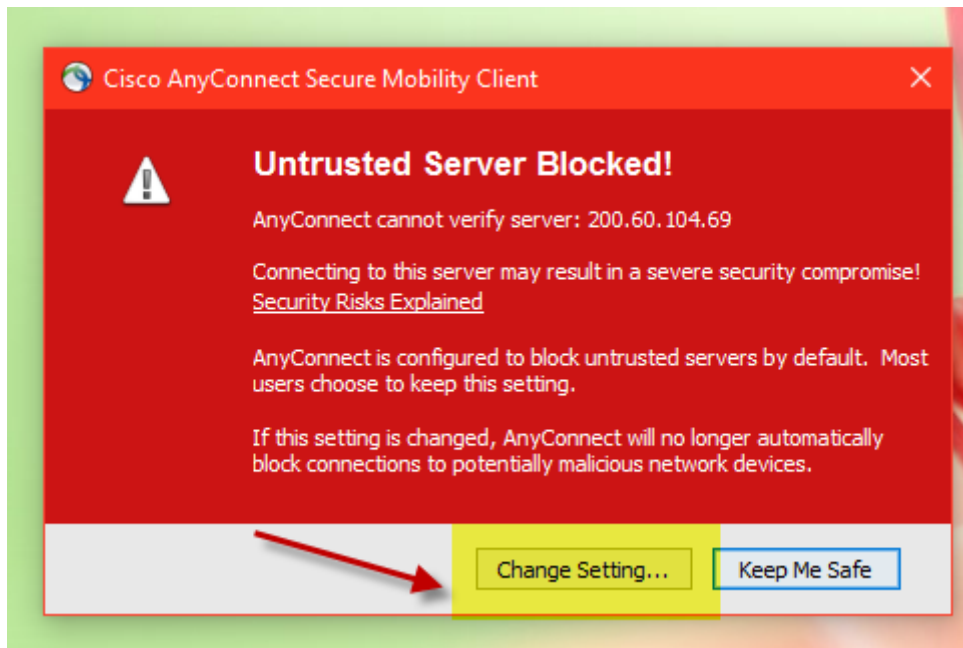

Luego colocar el número de IP 200.60.104.69

Se genera la pantalla CISCO AnyConnet Secure Mobility Client

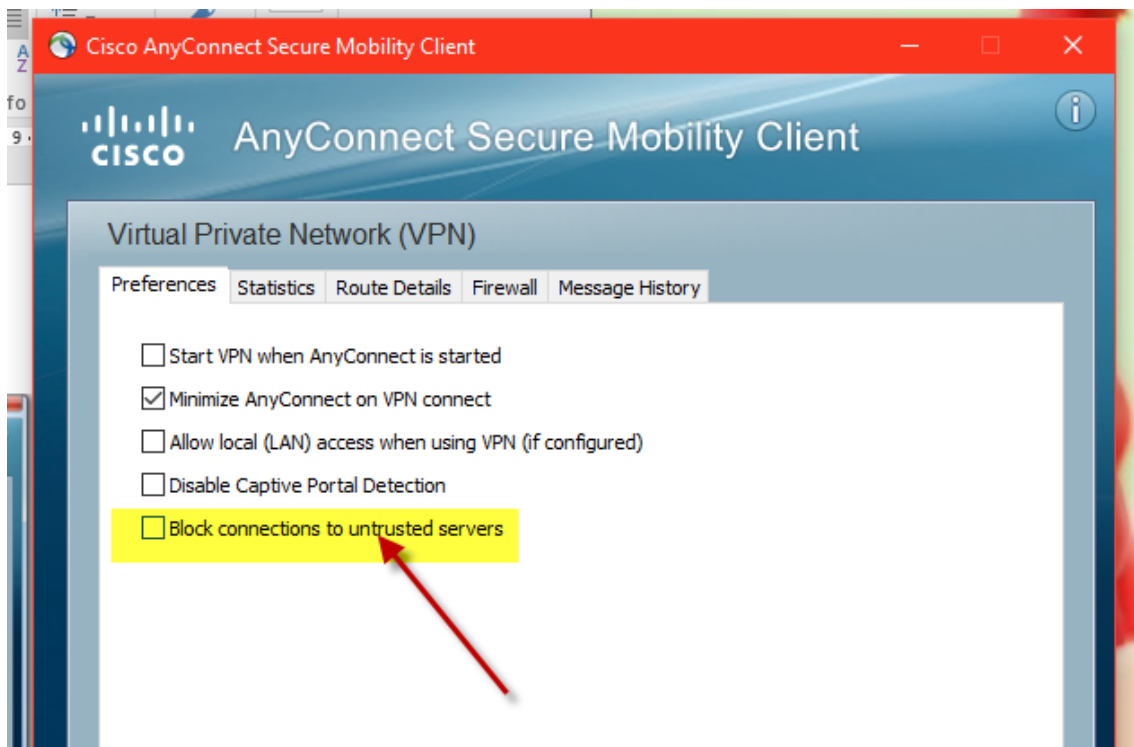

Darle clic en el botón resaltado

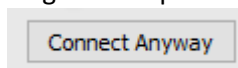

Luego se genera la pantalla

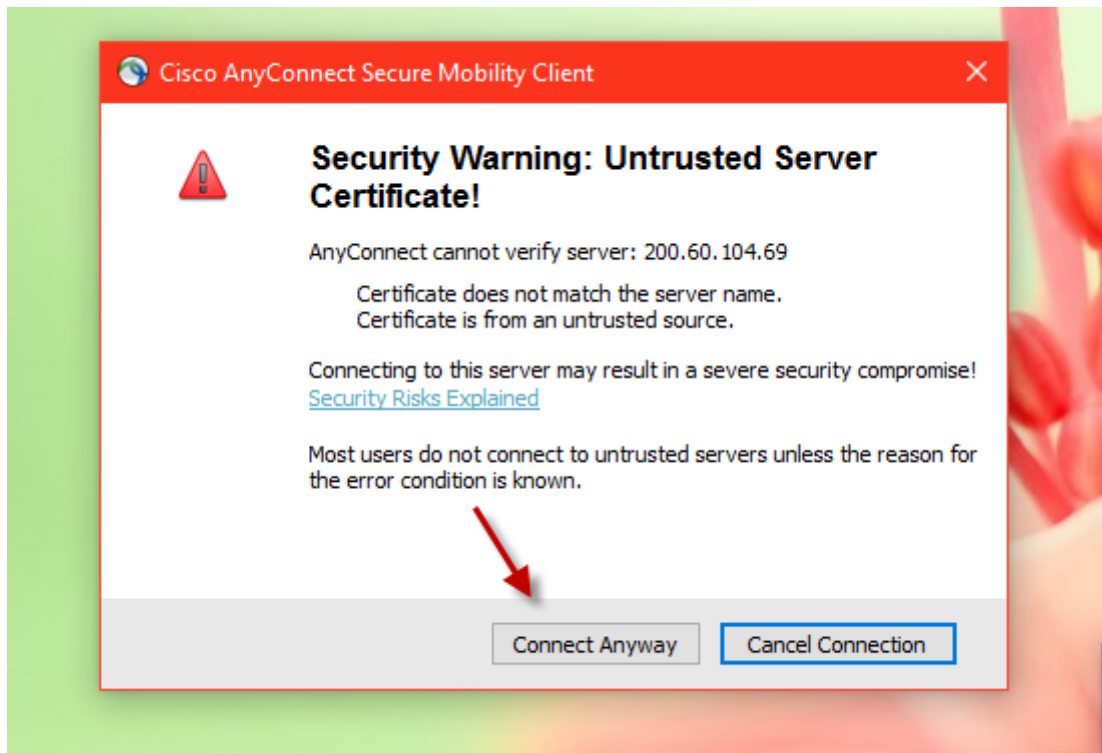

Virtual private network

Retirar el check de la parte resaltada tiene que quedar como se muestra en pantalla

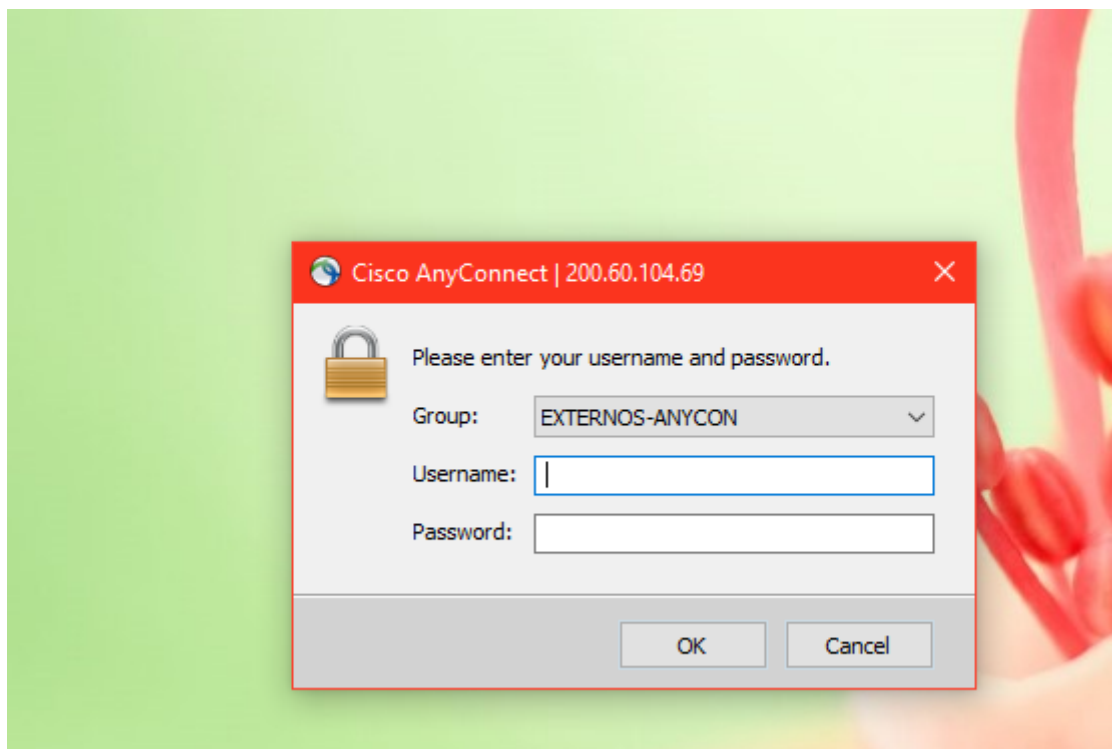

Se genera la pantalla Security Warning dar clic en el boton Connet Anny Way

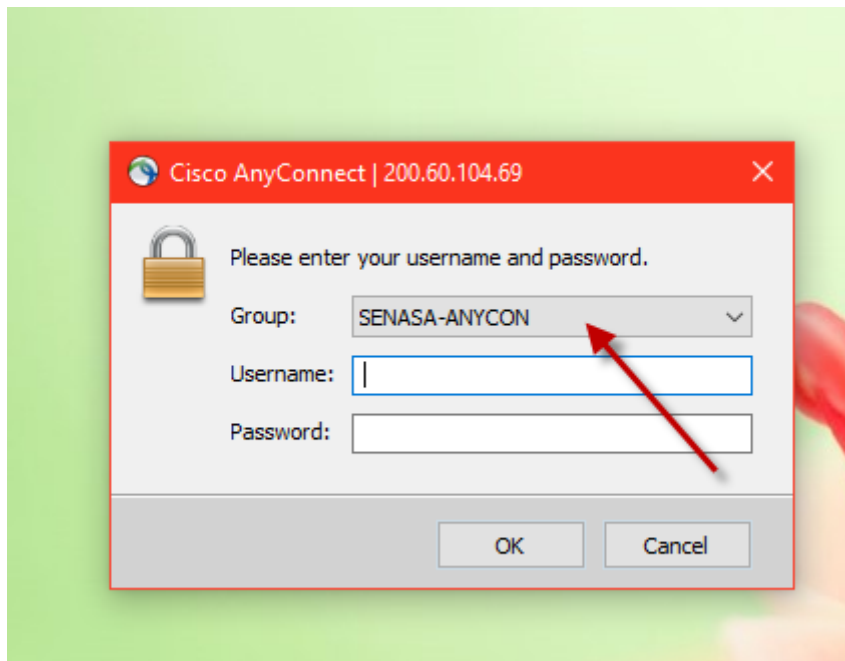

Luego se va generar esta pantalla en la que se van a mostrar dos grupos:

Se genera el group SENASA – ANYCON, como el que se muestra en pantalla

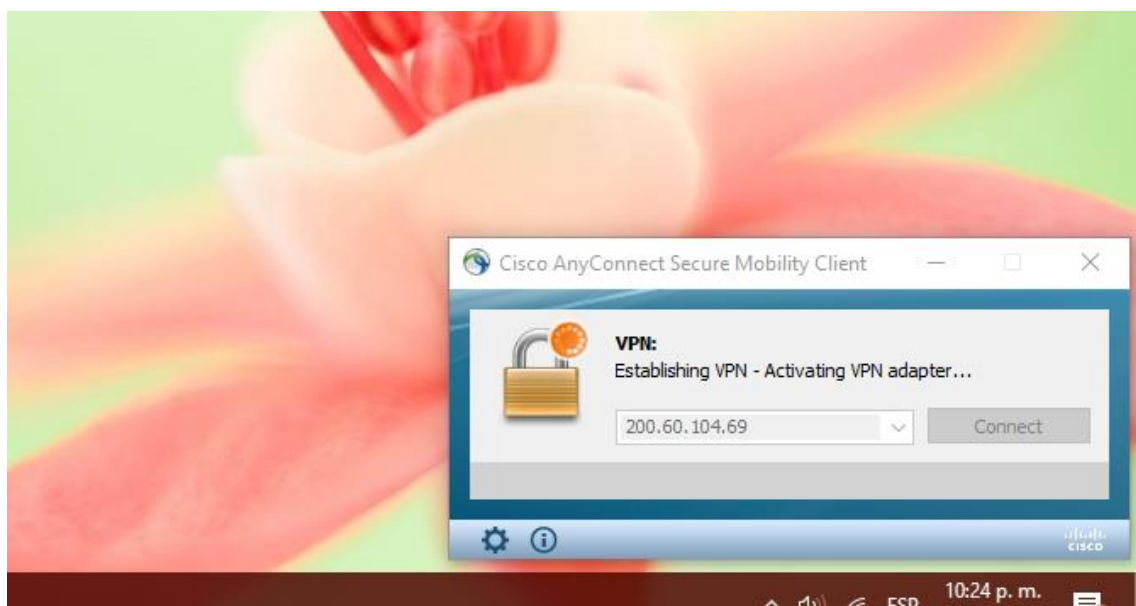

Se tiene que colocar su usuario y contraseña de red (Usuario que usan para prender la pc)

Ejemplo ksadavalg contraseña *****

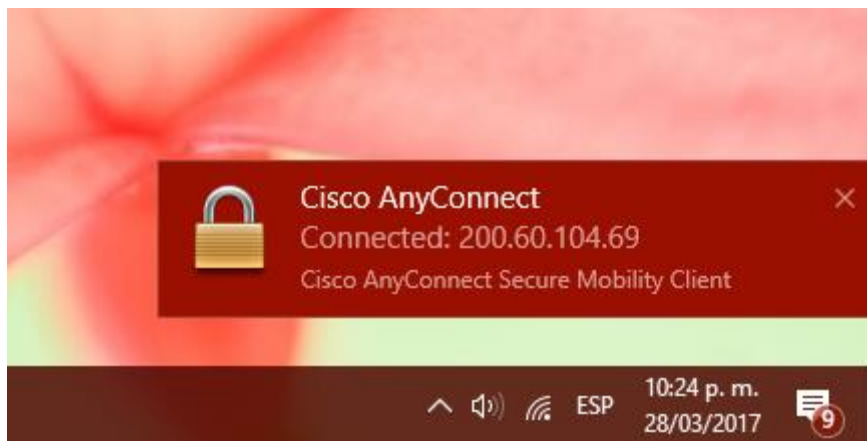

De salir algún error remitir la pantalla a mesadeayuda@senasa.gob.pe para poder ayudarlo.

De conectarse correctamente debe salir la siguiente pantalla

Esto demuestra que ya estamos conectados

Luego proceder a conectarse con el escritorio remoto de ser necesario.
