

NEW JOB POSITION*

Williams and Okin Chiropractic, New York, NY seeks Chiropractors - Perform a series of manual adjustments to the spine, or other articulations of the body, in order to correct the musculoskeletal system including Flexion Distraction spine treatment protocol, when clinically required. Evaluate the functioning of the neuromusculoskeletal system and the spine using systems of chiropractic diagnosis. Referral to other specialists (ie. Diagnostic imaging or primary care, etc.) when indicated and upon review of findings with patient. Diagnose health problems by reviewing patients' health and medical histories, questioning, observing and examining patients and interpreting diagnostic imaging (DI) including x-ray, ultrasound (US) and MRI. Maintain accurate case histories of patients. Other medical specialists and provider must be able to seamlessly refer to records for ease of patient management and treatment decisions. Advise patients about recommended courses of treatment and promote proper care, including when to consult with other medical or rehabilitation specialties. Prepare health care records in an efficient manner using EMR software. Utilize advanced soft tissue and chiropractic rehabilitation methods. This can include instrument assisted soft tissue methods (IASTM) such as Graston Technique (GT) and kinesiology therapeutic taping procedures including SpiderTech. These methods can be used to enhance clinical outcomes for patients as well as expedite pain relieving mechanisms, such as in spine pain and sports injuries. Exhibit leadership and professional presentation in growth development of the clinic and business. This includes presentations, corporate events, networking meetings and outreach to other medical specialists or health services regionally. Function collaboratively with other medical specialists and providers involved in team-based care of patients exhibiting professional and accurate technical attention to detail and inter-specialist communication. Optimize clinic function and health provider team education through presentation and frequent review of evidence based clinical guidelines and peer-reviewed literature, including research journals, systematic reviews. Support and provide executive leadership to stimulate successful business and clinical operations of the office, including educating other staff on procedures or assisting in projects when needed. Innovate and cultivate in practice-building projects for the clinic. This can include clinical or research rounds presentations (background on exercise/sport science, wellness/health promoting techniques, nutrition, sports injury research are a definite asset and applicable), attending networking events and assisting in publications on behalf of the clinic. Assist in marketing and business development (BD) projects of the office. This can include proficient social media management, user experience (UX) improvements and written health promotion topics targeted for both patient and health provider education. Consistent attention to detail in patient care management including fast and accurate direct communication via phone and email access. Attend sports competition events to assist with sideline athlete injury support and management/treatment. The function would be to a chiropractor amongst other sports medicine specialists. Provide consistent clinical efficacy with a focus on spinal pain patients. This could include the utilization of methods including chiropractic manipulative therapy, which may include Flexion Distraction treatment when indicated. Educate patients with a focus on effective recovery from pain back to athletic or active performance using multi-modal methods including physiotherapy and other recovery strategies. This will rely on, but may not be limited to, a strong foundational knowledge from exercise science, sports injury management, functional rehabilitation and strength/conditioning.

Requires Doctor (or educ. equiv.) of Chiropractic Degree , NYS Chiropractic Licensed, Board Certified in Chiropractic & Board Certified in Physiotherapy and Certified in Graston Instrument Assisted Soft Tissue Techniques and SpiderTech Kinesiology Taping. Requires three (3) years of experience in the Job Offered. At least 2 years of experience must have included Clinical experience with Graston Instrument Assisted Soft Tissue methods; Clinical experience with SpiderTech Kinesiology Taping treatment protocol; Clinical experience with Flexion Distraction spine treatment protocol; and Clinical experience with patient care management collaborating with other medical specialists and providers.
