

i-Repo FreeDraw

Overview manual

2022.03.23

Aim of the i-Repo FreeDraw product

- There are two types of documents:
 - Standard document (formatted fixed form such as inspection form)
 - Non- standard document (Drawing PDF, handwritten notes on photographs, etc.)
- Currently, i-Reporter can only handle standard documents.
- With i-Reporter, these two types of documents
 - Standard document (format fixed form)
 - This is to be able to handle both Non-standard documents (Drawing PDF, handwritten notes on photographs, etc.)

With a combination of  i-Reporter +  i-Repo FreeDraw

With i-Reporter, you will be able to create two types of documents, standard and non-standard!

■ Standard document (form)

→ With the i-Reporter app

Report / record form created on-site such as inspection report

■ Non-standard document

→ With the i-Repo FreeDraw app

Notebook documents that can be freely created on site, such as corrective instructions, handwritten on PDF drawings, pasting graphics, pasting photos, etc.

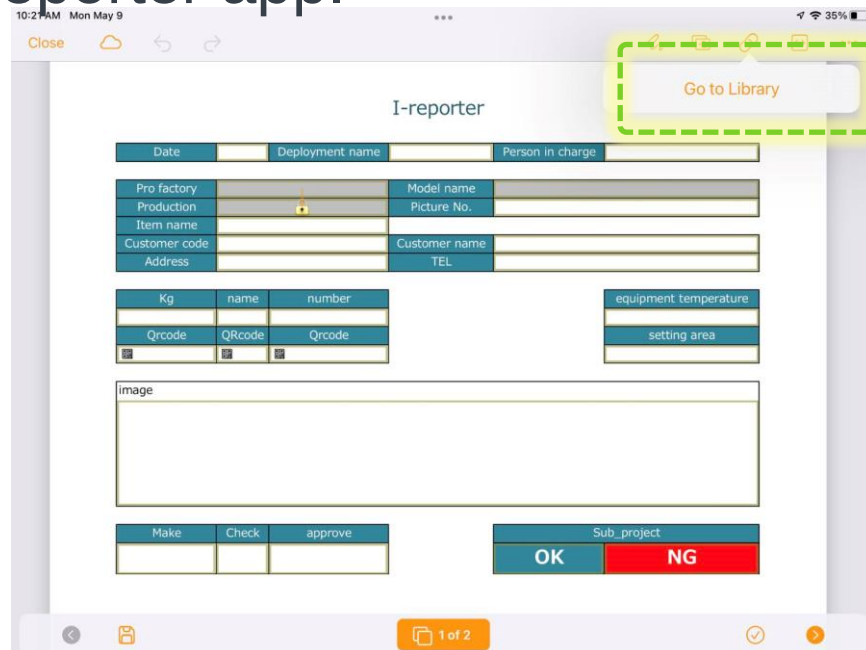

Main features of i-Repo FreeDraw

- 1 A high-performance iOS / iPad OS handwriting draw app for creating non-standard documents on site.
- 2 You can turn blank pages, PDF drawings, PDF documents, images, and i-Reporter forms into pages.
- 3 Two types of pens for handwriting, graphic objects, and text input for free memos. It is possible to cut out a part from a PDF drawing, paste an image taken with a camera, and paste an image saved in a photo library. PDF drawings and PDF documents remain as vectors without any deterioration in image quality.
- 4 Inter-app cooperation with i-Reporter is possible. You can insert the material created by i-Repo FreeDraw as the page of i-Reporter form.
- 5 You can also share to cloud storage such as Box and send to Microsoft Teams, Slack, LINE, email, etc.

Manage i-Reporter i-Repo FreeDraw with ConMas server

The ConMas server manages both i-Reporter forms and i-Repo FreeDraw documents.

Save i-RepoFreeDraw documents in the ConMas server's library management. You can refer to it as a PDF document as a related document from the i-Reporter app.
