Avoid touching the antenna area while the antenna is in use. Contact with antennas affects the communication quality and may reduce battery life due to higher power level during operation.

Do not connect to products that create an output signal, as this may damage the device. Do not connect any voltage source to the audio connector. If you connect an external device or headset, other than those approved for use with this device, to the audio connector, pay special attention to volume levels.

Parts of the device are magnetic. Metallic materials may be attracted to the device. Do not place credit cards or other magnetic storage media near the device, because info stored on them may be erased.

[Nokia 5 User Guide](#)

Insert or remove SIM and memory card
Insert SIM and memory card

Open the SIM tray and memory card tray by putting the provided tray opener into the holes next to the trays.

[Nokia 5 Manual PDF](#)

[Nokia 5 User Guide](#)

Put the nano-SIM into the slot 1 located on the tray with the contact area face down. If you have a second SIM, put it into the slot 2. If you have a memory card, put the card into the slot located on the memory card tray.

Slide the SIM and memory card trays back into the slots.¹

Remove SIM and memory card

Open the SIM and memory card trays, remove the cards, and slide trays back into their respective slots.

¹ Use only original nano-SIM cards. Use of incompatible SIM cards may damage the card or the device, and may corrupt data stored on the card.

[Nokia 5 User Guide](#)

Charge your phone
Charge the battery

Plug a compatible charger into a wall outlet.
Connect the cable to your phone.

Your phone supports the USB micro-B cable. You can also charge your phone from a computer with a USB cable, but it may take a longer time.

If the battery is completely discharged, it may take several minutes before the charging indicator is displayed.

Switch on and set up your phone

Switch on and set up your phone

When you switch your phone on for the first time, your phone guides you to set up your network connections and phone settings.

Switch on your phone

1. To switch on your phone, press and hold the **power** key until the phone vibrates.
2. When the phone is switched on, choose your language and region.
3. Follow the instructions shown on your phone.

When you switch your phone on for the first time, your phone guides you to set up your network connections and phone settings.

Switch on your phone

To switch on your phone, press and hold the power key until the phone vibrates.
When the phone is switched on, choose your language and region.
Follow the instructions shown on your phone.

Transfer data from your previous phone

You can transfer data from a previous device to your device via your Google account.

To back up data on your old phone to Google account, refer to your old phone's user guide.

Tap Settings > Accounts > Google.

[Nokia 5 User Guide](#)

Select which data you want to be restored on your phone. The sync will start automatically once your phone is connected to the internet.

Restore app settings from your previous Android phone

If your previous device was an Android, and back up to Google account is enabled on it, you can restore app settings and Wi-Fi passwords.

Tap Settings > Backup & reset.
Switch Automatic restore to On.

Dual SIM settings

Dual SIM settings

You can have 2 SIMs in your phone, for example, one for your work and one for your personal use.

Choose which SIM to use

When, for example, making a call, you can choose which SIM to use by tapping the corresponding SIM 1 or SIM 2 button after you dial the number.

Your phone shows the network status for both SIMs separately. Both SIM cards are available at the same time when the device is not being used, but while one SIM card is active, when, for example, making a call, the other may be unavailable.

Manage your SIMs

Don't want work to interfere with your free time? Or do you have a cheaper data connection on one SIM? You can decide which SIM you want to use.

Manage your SIMs

Don't want work to interfere with your free time? Or do you have a cheaper data connection on one SIM? You can decide which SIM you want to use.

Tap Settings > SIM management.

Rename a SIM card

Tap a SIM you want to rename, and type in the name you want.

Select which SIM to use for calls or data connection

Under Preferred SIM for, tap the setting you want to change and select the SIM.

Setting up fingerprint ID

Setting up fingerprint ID

You can unlock your phone with just a touch of your finger. Set up your fingerprint ID for extra security.

Add a fingerprint

1. Tap **Settings** > **Security** > **Fingerprint**. If you don't have screen lock set up on your phone, tap **SET UP SCREEN LOCK**.
2. Select what backup unlocking method you want to use for the lock screen and follow the instructions shown on your phone.

You can unlock your phone with just a touch of your finger. Set up your fingerprint ID for extra security.

Add a fingerprint

Tap **Settings** > **Security** > **Fingerprint**. If you don't have screen lock set up on your phone, tap **SET UP SCREEN LOCK**.

Select what backup unlocking method you want to use for the lock screen and follow the instructions shown on your phone.

Lock or unlock your phone

Lock or unlock your phone

Lock your phone

If you want to avoid accidentally making a call when your phone is in your pocket or bag, you can lock your keys and screen.

To lock your keys and screen, press the **power** key.

Unlock the keys and screen

Press the **power** key, and swipe up across the screen. If asked, provide additional credentials.

Lock your phone

If you want to avoid accidentally making a call when your phone is in your pocket or bag, you can lock your keys and screen.

To lock your keys and screen, press the power key.

Unlock the keys and screen

Press the power key, and swipe up across the screen. If asked, provide additional credentials.

[Nokia 5 User Guide](#)

Use the touch screen

Avoid contacting the touchscreen with other electrical devices, using excessive pressure, or tapping it with sharp objects.

It's best to use your fingers or dedicated accessories - never use an actual pen, pencil, or other sharp object on the touch screen.

Leaving the touchscreen on for a long time may result in afterimages (screen burn-in). Lock your screen when you're not using the phone to avoid that.

Tap and hold to drag an item

Place your finger on the item for a couple of seconds, and slide your finger across the screen.
Swipe

Swipe

Place your finger on the screen, and slide your finger in the direction you want.

Scroll through a long list or menu

Scroll through a long list or menu

Slide your finger quickly in a flicking motion up or down the screen, and lift your finger. To stop the scrolling, tap the screen.

Zoom in or out

Zoom in or out

[Nokia 5 User Guide](#)

Place 2 fingers on an item, such as a map, photo, or web page, and slide your fingers apart or together.
Lock the screen orientation

The screen rotates automatically when you turn the phone 90 degrees.

To lock the screen in portrait mode, swipe down from the top of the screen, and tap Auto-rotate to switch to Portrait.

Use the navigation keys

[Nokia 5 User Guide](#)

Use the navigation keys

To see which apps you have open, press **Overview**  key.

To switch to another app, tap the app you want. To close an app, tap **x** next to it on the screen.

To go back to the previous screen you were in, tap the **Back** key. Your phone remembers all the apps and websites you've visited since the last time your screen was locked.

To go to the **Home** screen, tap the **Home** key. The app you were in stays open in the background.

Open two apps at once

For easier navigation between apps, you can use the split-screen mode to divide the screen between two apps. To turn the split-screen mode on or off, when in app, press and hold  key.

To see which apps you have open, press **Overview**  key.

To switch to another app, tap the app you want. To close an app, tap **X** next to it on the screen.

To go back to the previous screen you were in, tap the **Back** key. Your phone remembers all the apps and websites you've visited since the last time your screen was locked.

Battery life

Get the most out of your phone while getting the battery life you need. There are steps you can take to save power on your phone.

Extend battery life

[Nokia 5 Manual PDF](#)

nokiauserguides.com

To save power:

1. Charge wisely: Always charge the battery fully.
2. Select only the sounds that you need: Mute unnecessary sounds, such as key press sounds. Tap **Settings** > **Sounds**, and under **Other sounds**, select which sounds to keep.
3. Use wired headphones, rather than the loudspeaker.
4. Change the phone screen settings: Set the phone screen to switch off after a short time. Tap **Settings** > **Display** > **Sleep** and select the time.
5. Lower the screen brightness: Tap **Settings** > **Display** > **Brightness level**. Make sure that **Automatic brightness** is unchecked. To adjust the brightness, drag the **Brightness level** slider.
6. Stop apps from running in the background: Press ☐, and close the apps you don't need.
7. Use location services selectively: Switch location services off when you don't need them. Tap **Settings** > **Location**, and switch to **Off**.
8. Use network connections selectively: Switch Bluetooth on only when needed. Use a Wi-Fi connection to connect to the internet, rather than a mobile data connection. Stop your phone scanning for available wireless networks. Tap **Settings** > **Wi-Fi**, and switch to **Off**. If you're listening to music or otherwise using your phone, but don't want to make or receive calls, switch Airplane mode on. Tap **Settings** > **More** > **Airplane mode**.

To save power:

1. Charge wisely: Always charge the battery fully.
2. Select only the sounds that you need: Mute unnecessary sounds, such as key press sounds.

[Nokia 5 User Guide](#)

- Tap Settings > Sounds, and under Other sounds, select which sounds to keep.
3. Use wired headphones, rather than the loudspeaker.
 4. Change the phone screen settings: Set the phone screen to switch off after a short time. Tap Settings > Display > Sleep and select the time.
 5. Lower the screen brightness: Tap Settings > Display > Brightness level. Make sure that Automatic brightness is unchecked. To adjust the brightness, drag the Brightness level slider.
 6. Stop apps from running in the background: Press check_box_outline_blank, and close the apps you don't need.
 7. Use location services selectively: Switch location services off when you don't need them. Tap Settings > Location, and switch to Off.
 8. Use network connections selectively: Switch Bluetooth on only when needed. Use a Wi-Fi connection to connect to the internet, rather than a mobile data connection. Stop your phone scanning for available wireless networks. Tap Settings > Wi-Fi, and switch to Off. If you're listening to music or otherwise using your phone, but don't want to make or receive calls, switch Airplane mode on. Tap Settings > More > Airplane mode.

Save on data roaming costs

Save on data roaming costs

You can cut data roaming costs and save on your phone bills by changing mobile data settings. To use the optimal connection method, change the Wi-Fi and mobile networks settings. Data roaming means using your phone to receive data over networks that your network service provider doesn't own or operate. Connecting to the internet when roaming, especially when abroad, can raise data costs substantially. Using a Wi-Fi connection is generally faster and less expensive than using a mobile data connection. If both Wi-Fi and mobile data connections are available, your phone uses the Wi-Fi connection.

Connect to a Wi-Fi network

1. Tap **Settings** > **Wi-Fi**.
2. Make sure Wi-Fi networking is switched to **On**.
3. Select the connection you want to use.

Close the mobile data connection

Swipe down from the top of the screen, tap  and switch **Mobile data** to **Off**.

 To follow your data usage, tap **Settings** > **Data usage**.

Stop data roaming

Tap **Settings** > **More** > **Mobile networks**, and switch **Data roaming** off.

[Nokia 5 User Guide](#)

Activate Wi-Fi

Activate Wi-Fi.

Using a Wi-Fi connection is generally faster and less expensive than using a mobile data connection. If both Wi-Fi and mobile data connections are available, your phone uses the Wi-Fi connection.

Turn on Wi-Fi

1. Tap **Settings** > **Wi-Fi**.
2. Switch Wi-Fi to **On**.
3. Select the connection you want to use.

Your Wi-Fi connection is active when  is shown on the status bar at the top of the screen.¹

 **Tip:** If you want to track locations when satellite signals are not available, for example when you're indoors or between tall buildings, switch Wi-Fi on to improve positioning accuracy.

¹ Note: Using Wi-Fi may be restricted in some countries. For example, in the EU, you are only allowed to use 5150–5350 MHz Wi-Fi indoors, and in the USA and Canada, you are only allowed to use 5.15–5.25 GHz Wi-Fi indoors. For more info, contact your local authorities.

Important: Use encryption to increase the security of your Wi-Fi connection. Using encryption reduces the risk of others accessing your data.

Switch on Airplane mode.

Bluetooth

Bluetooth

You can connect wirelessly to other compatible devices, such as phones, computers, headsets, and car kits. You can also send your photos to compatible phones or to your computer.

Connect to a Bluetooth accessory

You can connect your phone with many useful Bluetooth devices. For example, with a wireless headset (sold separately), you can speak on the phone hands-free – you can continue what you're doing, such as working at your computer, during a call.

Connecting a phone to a Bluetooth device is called pairing.

1. Tap **Settings** > **Bluetooth**.
2. Switch **Bluetooth** to **On**.
3. Make sure the other device is switched on. You may need to start the pairing process from the other device. For details, see the user guide of the other device.
4. To pair your phone and the device, tap the device in the list of discovered Bluetooth devices.
5. You may need to type in a passcode. For details, see the user guide of the other device.

Since devices with Bluetooth wireless technology communicate using radio waves, they do not need to be in direct line-of-sight. Bluetooth devices must, however, be within 33 feet (10 meters) of each other, although the connection may be subject to interference from obstructions such as walls or from other electronic devices.

[Nokia 5 User Guide](#)

Delete a map

Tap Maps > menu > Offline areas and the map name.
Tap DELETE.

[Nokia 5 User Guide](#)

Use location services

Use Maps to find out where you are, and save your location to the photos you take. Some apps can use your location info to offer you a wider variety of services.

Switch on location services

Your phone shows your location on the map using a satellite positioning system, Wi-Fi, or network (Cell ID) based positioning. The availability, accuracy and completeness of the location info depend on, for example, your location, surroundings, and third party sources, and may be limited. Location info may not be available, for example, inside buildings or underground. The Assisted GPS (A-GPS) network service and other similar enhancements to GPS and GLONASS retrieve location info using the mobile network, and assists in calculating your current location. Some satellite positioning systems may require transferring small amounts of data over the mobile network. If you want to avoid data costs, for example when traveling, you can switch the mobile data connection off in your phone settings. Wi-Fi positioning improves positioning accuracy when satellite signals are not available, especially when you are indoors or between tall buildings. If you're in a place where the use of Wi-Fi is restricted, you can switch Wi-Fi off in your phone settings.

Swipe down from the top of the screen, and tap Location to switch on location services.

Google Play

Your Android phone can live up to its full potential with Google Play – apps, music, movies and books are all readily available for your entertainment. All you need is a Google account.

Google Play

Your Android phone can live up to its full potential with Google Play – apps, music, movies and books are all readily available for your entertainment. All you need is a Google account.

Add a Google account to your phone

1. Tap **Settings** > **Accounts** > **Add account** > **Google**. If asked, confirm your device lock method.
2. Type in your Google account credentials and tap **Next**, or tap **Or create a new account**.
3. Follow the instructions on your phone.

Download apps

Unleash your phone's potential – there are thousands of apps waiting in the Google Play Store to help you with it.¹

1. Tap **Play Store**.
2. Tap the search bar to look for apps, or select apps from your recommendations.
3. In app description, tap **INSTALL** to download and install the app.

[Nokia 5 User Guide](#)

Add a Google account to your phone

Tap Settings > Accounts > Add account > Google. If asked, confirm your device lock method. Type in your Google account credentials and tap Next, or tap Or create a new account. Follow the instructions on your phone.

Download apps

Unleash your phone's potential – there are thousands of apps waiting in the Google Play Store to help you with it.¹

Tap Play Store.

Tap the search bar to look for apps, or select apps from your recommendations.

In app description, tap INSTALL to download and install the app.

Installed apps are available in Apps menu. On your Home screen, swipe up from the bottom of the screen to see your apps.

Update apps

Update apps

Update your Play Store apps to get all the latest features and bug fixes.

1. Tap Play store > ≡ > My apps & games to see available updates.
2. Tap the app with an update available and UPDATE .

You can also update all apps at once. In My apps & games , tap UPDATE ALL .

Remove downloaded apps

Tap Play Store > ≡ > My apps & games , choose an app you want to remove, and tap UNINSTALL .

Get music, movies, or books with Google Play

With Google Play, you can gain access to millions of songs, and thousands of movies and books.

Tap Play Music , Play Movies , or Play Books to learn more.

¹ You need to have a Google account added to your phone to use Google Play services. Some of the content available in Google Play is paid. To add a payment method, tap Play Store > menu > Account > Payment methods. Always be sure to have a permission from the payment method owner when buying content from Google Play.

Update your phone software

Update your phone software

Stay in step with the beat – update your phone software and apps wirelessly to get new and enhanced features for your phone.

Updating the software may also improve your phone performance.

Install available updates

Tap **Settings** > **About phone** > **System updates** > **Check for update** to check if updates are available.

When your phone notifies you that an update is available, just follow the instructions shown on your phone. If your phone is short on memory, you may need to move your apps, photos, and other stuff to the memory card.

Warning: If you install a software update, you cannot use the device, even to make emergency calls, until the installation is completed and the device is restarted.

Before starting the update, connect a charger or make sure the device battery has enough power, and connect to Wi-Fi, as the update packages may use up a lot of mobile data.

Stay in step with the beat – update your phone software and apps wirelessly to get new and enhanced features for your phone. Updating the software may also improve your phone performance.
Install available updates

[Nokia 5 User Guide](#)

Tap Settings > About phone > System updates > Check for update to check if updates are available.

When your phone notifies you that an update is available, just follow the instructions shown on your phone. If your phone is short on memory, you may need to move your apps, photos, and other stuff to the memory card.

Warning: If you install a software update, you cannot use the device, even to make emergency calls, until the installation is completed and the device is restarted.

Before starting the update, connect a charger or make sure the device battery has enough power, and connect to Wi-Fi, as the update packages may use up a lot of mobile data.

[Nokia 5 User Guide](#)

Back up your data

To ensure your data is safe, use the backup feature in your phone. Your device data (such as Wi-Fi passwords and call history) and app data (such as settings and files stored by apps) will be backed up remotely.

Switch on automatic backup

Tap Settings > Backup & reset, and switch Back up my data to On.

Tap Backup account to select to which account your data will be backed up.

[Nokia 5 User Guide](#)

Restore original settings

Accidents can happen – if your phone is not working properly, you can restore its settings. Or, if you buy a new phone, or otherwise want to dispose of or recycle your phone, here's how you can remove your personal info and content. Note that it is your responsibility to remove all private content.

Reset your phone

Tap Settings > Backup & reset > Factory data reset.

Follow the instructions shown on your phone.

[Nokia 5 User Guide](#)

Storage

Use the Storage menu to check how much memory you have available.
Check available memory on your phone

If the phone memory is getting full, first check for and remove things you no longer need:

- Text, multimedia, and mail messages
- Contact entries and details
- Apps
- Music, photos, or videos

Instead of removing, you can also move the files to the memory card.

The quality of your memory card may affect the performance of your phone greatly. To get the best out of your phone, use a fast 4–128GB card by a well-known manufacturer.

Use only compatible memory cards approved for use with this device. Incompatible cards may damage the card and the device and corrupt data stored on the card.

To check how much memory you have available and how it's being used, tap Settings > Storage.

Move apps to a memory card

You can expand your phone's memory with a memory card.¹

- Tap Settings > Apps.
- Tap the app name.
- Tap Storage > Move to SD card.

You can later move the apps back to your phone from the memory card.

The type of the memory card may affect how long it takes to move large files to the card.

Uninstall an app

You can uninstall apps that you no longer want to use.

- Tap Settings > Apps.
- Tap the app name.
- Tap Uninstall. You may not be able to uninstall all apps.

If an installed app depends on a removed app, the installed app may stop working. For details, see the user documentation of the installed app.

Copy content between your phone and computer

You can copy photos, videos, and other content created by you between your phone and computer to

[Nokia 5 Manual PDF](#)

[Nokia 5 User Guide](#)

show or store them.

Connect your phone to a compatible computer with a compatible USB cable.

On your computer, open a file manager, such as Windows Explorer or macOS Finder, and browse to your phone.

Drag and drop items from your phone to the computer, or from your computer to the phone.

Make sure you put the files in the right folders on your phone, or you may not be able to see them.

1 The memory card is sold separately.

[Nokia 5 User Guide](#)

Protect your phone with your fingerprint

You can unlock your phone with just a touch of your finger. Set up your fingerprint ID for extra security.

Add a fingerprint

Tap Settings > Security > Fingerprint. If you don't have screen lock set up on your phone, tap SET UP SCREEN LOCK.

Select what backup unlocking method you want to use for the lock screen and follow the instructions shown on your phone.

Unlock your phone with your finger

Place your registered finger on the sensor.

If there is a fingerprint sensor error, and you cannot use alternative sign-in methods to recover or reset the phone in any way, your phone will require service. Additional charges may apply, and all the personal data on your phone may be deleted. For more info, contact the nearest care point for your phone, or your phone dealer.

[Nokia 5 User Guide](#)

Change your SIM PIN code

If your SIM card came with a default SIM PIN code, you can change it to something more secure. Not all network service providers support this.
Select your SIM PIN

You can select your own numbers for the SIM PIN. The SIM PIN code can be 4-8 digits.

Tap Settings > Security > Set up SIM card lock.
Under the selected SIM card, tap Change SIM PIN.

Tip: If you don't want to protect your SIM with a PIN code, in Set up SIM card lock, switch Lock SIM card to Off, and type in your current PIN.

[Nokia 5 User Guide](#)

Access codes

Learn what the different codes on your phone are for.
PIN or PIN2 code

PIN or PIN2 codes have 4-8 digits.

These codes protect your SIM card against unauthorized use or are required to access some features. You can set your phone to ask for the PIN code when you switch it on.

If you forget the codes or they aren't supplied with your card, contact your network service provider.

If you type in the code incorrectly 3 times in a row, you need to unblock the code with the PUK or PUK2 code.

PUK or PUK2 codes

PUK or PUK2 codes are required to unblock a PIN or PIN2 code.

If the codes are not supplied with your SIM card, contact your network service provider.

Lock code

Also known as security code or password.

The lock code helps you protect your phone against unauthorized use. You can set your phone to ask for the lock code that you define. Keep the code secret and in a safe place, separate from your phone.

If you forget the code and your phone is locked, your phone will require service. Additional charges may apply, and all the personal data on your phone may be deleted. For more info, contact the nearest care point for your phone, or your phone dealer.

IMEI code

The IMEI code is used to identify phones in the network. You may also need to give the number to your care point services or phone dealer.

To view your IMEI number, dial *#06#.

For your safety

For your safety

Read these simple guidelines. Not following them may be dangerous or against local laws and regulations. For further info, read the complete user guide.

SWITCH OFF IN RESTRICTED AREAS

Switch the device off when mobile phone use is not allowed or when it may cause interference or danger, for example, in aircraft, in hospitals or near medical equipment, fuel, chemicals, or blasting areas. Obey all instructions in restricted areas.

ROAD SAFETY COMES FIRST

Obey all local laws. Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety.

INTERFERENCE

All wireless devices may be susceptible to interference, which could affect performance.

QUALIFIED SERVICE

Only qualified personnel may install or repair this product.

BATTERIES, CHARGERS, AND OTHER ACCESSORIES

Use only batteries, chargers, and other accessories approved by HMD Global Oy for use with this device. Do not connect incompatible products.

KEEP YOUR DEVICE DRY

Your device is not water-resistant. Keep it dry.

Read these simple guidelines. Not following them may be dangerous or against local laws and

GLASS PARTS

The device screen is made of glass. This glass can break if the device is dropped on a hard surface or receives a substantial impact. If the glass breaks, do not touch the glass parts of the device or attempt to remove the broken glass from the device. Stop using the device until the glass is replaced by qualified service personnel.

PROTECT YOUR HEARING

To prevent possible hearing damage, do not listen at high volume levels for long periods. Exercise caution when holding your device near your ear while the loudspeaker is in use.

SAR

This device meets RF exposure guidelines when used either in the normal use position against the ear or when positioned at least 0.2 inches (5 mm) away from the body. The specific maximum SAR values can be found in the Certification Information (SAR) section of this user guide. For more info, go to www.sar-tick.com.

When a carry case, belt clip or other form of device holder is used for body-worn operation, it should not contain metal and should provide at least the above-stated separation distance from the body. Note that mobile devices may be transmitting even if you are not making a voice call.

[Nokia 5 User Guide](#)

Network services and costs

Using some features and services, or downloading content, including free items, require a network connection. This may cause the transfer of large amounts of data, which may result in data costs. You may also need to subscribe to some features.

You can only use your device on the GSM 850/900/1800/1900; WCDMA 1/2/5/8; LTE 1/3/5/7/8/20/28/38/40 networks. You need a subscription with a service provider.

Important: 4G/LTE might not be supported by your network service provider or by the service provider you are using when traveling. In these cases, you may not be able to make or receive calls, send or receive messages or use mobile data connections. To make sure your device works seamlessly when full 4G/LTE service is not available, it is recommended that you change the highest connection speed from 4G to 3G. To do this, on the home screen, tap Settings > Mobile networks, and switch Preferred network type to 2G/3G.

Note: Using Wi-Fi may be restricted in some countries. For example, in the EU, you are only allowed to use 5150–5350 MHz Wi-Fi indoors, and in the USA and Canada, you are only allowed to use 5.15–5.25 GHz Wi-Fi indoors. For more info, contact your local authorities.

For more info, contact your network service provider.

[Nokia 5 User Guide](#)

Emergency calls

Important: Connections in all conditions cannot be guaranteed. Never rely solely on any wireless phone for essential communications like medical emergencies.

Before making the call:

- Switch the phone on.

- If the phone screen and keys are locked, unlock them.

- Move to a place with adequate signal strength.

On the home screen, tap phone

- Type in the official emergency number for your present location. Emergency call numbers vary by location.

- Tap phone.

- Give the necessary info as accurately as possible. Do not end the call until given permission to do so.

You may also need to do the following:

- Put a SIM card in the phone. If you don't have a SIM, on the lock screen, tap Emergency.

- If your phone asks for a PIN code, tap Emergency.

- Switch the call restrictions off in your phone, such as call barring, fixed dialling, or closed user group.

- If the mobile network is not available, you may also try making an internet call, if you can access the internet.

[Nokia 5 User Guide](#)

Take care of your device

Handle your device, battery, charger and accessories with care. The following suggestions help you keep your device operational.

Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that corrode electronic circuits.

Do not use or store the device in dusty or dirty areas.

Do not store the device in high temperatures. High temperatures may damage the device or battery.

Do not store the device in cold temperatures. When the device warms to its normal temperature, moisture can form inside the device and damage it.

Do not open the device other than as instructed in the user guide.

Unauthorized modifications may damage the device and violate regulations governing radio devices.

Do not drop, knock, or shake the device or the battery. Rough handling can break it.

Only use a soft, clean, dry cloth to clean the surface of the device.

Do not paint the device. Paint can prevent proper operation.

Keep the device away from magnets or magnetic fields.

To keep your important data safe, store it in at least two separate places, such as your device, memory card, or computer, or write down important info.

During extended operation, the device may feel warm. In most cases, this is normal. To avoid getting too warm, the device may automatically slow down, close apps, switch off charging, and if necessary, switch itself off. If the device is not working properly, take it to the nearest authorised service facility.

[Nokia 5 User Guide](#)

Recycle

icon_recycle.jpg

Always return your used electronic products, batteries, and packaging materials to dedicated collection points. This way you help prevent uncontrolled waste disposal and promote the recycling of materials. Electrical and electronic products contain a lot of valuable materials, including metals (such as copper, aluminum, steel, and magnesium) and precious metals (such as gold, silver, and palladium). All materials of the device can be recovered as materials and energy.

Crossed-out wheeled-bin symbol
icon_wheelie_bin.jpg

The crossed-out wheeled-bin symbol on your product, battery, literature, or packaging reminds you that all electrical and electronic products and batteries must be taken to separate collection at the end of their working life. Do not dispose of these products as unsorted municipal waste: take them for recycling. For info on your nearest recycling point, check with your local waste authority.

Battery and charger information Battery and charger info

To check if your phone has a removable or non-removable battery, see the Get started guide.

Devices with a removable battery Use your device only with an original rechargeable battery. The battery can be charged and discharged hundreds of times, but it will eventually wear out. When the talk and standby times are noticeably shorter than normal, replace the battery.

Devices with a non-removable battery Do not attempt to remove the battery, as you may damage the device. To replace the battery, take the device to the nearest authorised service facility.

The battery can be charged and discharged hundreds of times, but it will eventually wear out. When the talk and standby times are noticeably shorter than normal, to replace the battery, take the device to the nearest authorised service facility.

Use only batteries and chargers that comply with the CTIA Certification Requirements for Battery System Compliance (Standard IEEE 1725). Use of an unqualified battery or charger may present a risk of fire, explosion, leakage, or other hazard.

Charge your device with the provided charger. Charger plug type may vary. Third-party chargers that comply with the applicable CTIA requirements and bear the USB-IF logo, and can connect to your device USB connector, may also be compatible. Some of the accessories mentioned in this user guide, such as charger, headset, or data cable, may be sold separately.

Battery and charger safety info

When your charger is not in use, unplug it. If left unused, a fully charged battery will lose its charge over time.

Always keep the battery between 15°C and 25°C (59°F and 77°F) for optimal performance. Extreme temperatures reduce the capacity and lifetime of the battery. A device with a hot or cold battery may not work temporarily.

Do not dispose of batteries in a fire as they may explode. Obey local regulations. Recycle when possible. Do not dispose as household waste.

Do not dismantle, cut, crush, bend, puncture, or otherwise damage the battery in any way. If a battery leaks, do not let liquid touch skin or eyes. If this happens, immediately flush the affected areas with water, or seek medical help. Do not modify, attempt to insert foreign objects into the battery, or immerse or expose it to water or other liquids. Batteries may explode if damaged.

Use the battery and charger for their intended purposes only. Improper use, or use of unapproved or incompatible batteries or chargers may present a risk of fire, explosion, or other hazard, and may invalidate any approval or warranty. If you believe the battery or charger is damaged, take it to a service centre or your phone dealer before continuing to use it. Never use a damaged battery or charger.

[Nokia 5 Manual PDF](#)

[Nokia 5 User Guide](#)

Only use the charger indoors. Do not charge your device during a lightning storm.

Additionally, the following applies if your device has a removable battery:

Always switch the device off and unplug the charger before removing the battery. To unplug a charger or an accessory, hold and pull the plug, not the cord.

Accidental short-circuiting can happen when a metallic object touches the metal strips on the battery. This may damage the battery or the other object.

Small children

Your device and its accessories are not toys. They may contain small parts. Keep them out of the reach of small children.

Medical devices

Operation of radio transmitting equipment, including wireless phones, may interfere with inadequately shielded medical devices' function. Consult a physician or the medical device's manufacturer to determine if it is adequately shielded from external radio energy.

[Nokia 5 User Guide](#)

Implanted medical devices

To avoid potential interference, manufacturers of implanted medical devices recommend a minimum separation of 6 inches (15.3 centimetres) between a wireless device and the medical device. Persons who have such devices should:

Always keep the wireless device more than 6 inches (15.3 centimetres) from the medical device.

Not carry the wireless device in a breast pocket.

Hold the wireless device to the ear opposite the medical device.

Switch the wireless device off if there is any reason to suspect that interference is taking place.

Follow the manufacturer directions for the implanted medical device.

If you have any questions about using your wireless device with an implanted medical device, consult your health care provider.

Hearing

Warning: When you use the headset, your ability to hear outside sounds may be affected. Do not use the headset where it can endanger your safety.

Some wireless devices may interfere with some hearing aids.

[Nokia 5 User Guide](#)

Protect your device from harmful content

Your device may be exposed to viruses and other harmful content. Take the following precautions:

Be cautious when opening messages. They may contain malicious software or otherwise be harmful to your device or computer.

Be cautious when accepting connectivity requests, browsing the internet, or downloading content. Do not accept Bluetooth connections from sources you do not trust.

Only install and use services and software from sources that you trust and that offer adequate security and protection.

Install antivirus and other security software on your device and any connected computer. Only use one antivirus app at a time. Using more may affect performance and operation of the device and/or computer.

If you access preinstalled bookmarks and links to third party internet sites, take the appropriate precautions. HMD Global does not endorse or assume liability for such sites.

Vehicles

Radio signals may affect improperly installed or inadequately shielded electronic systems in vehicles. For more info, check with the manufacturer of your vehicle or its equipment. Only qualified personnel should install the device in a vehicle. Faulty installation may be dangerous and invalidate your warranty. Check regularly that all wireless device equipment in your vehicle is mounted and operating properly. Do not store or carry flammable or explosive materials in the same compartment as the device, its parts, or accessories. Do not place your device or accessories in the air bag deployment area.

Potentially explosive environments

Switch your device off in potentially explosive environments, such as near gasoline pumps. Sparks may cause an explosion or fire resulting in injury or death. Note restrictions in areas with fuel; chemical plants; or where blasting operations are in progress. Areas with a potentially explosive environment may not be clearly marked. These usually are areas where you are advised to switch your engine off, below deck on boats, chemical transfer or storage facilities, and where the air contains chemicals or particles. Check with the manufacturers of vehicles using liquefied petroleum gas (such as propane or butane) if this device can be safely used in their vicinity.

Certification information (SAR)

This mobile device meets guidelines for exposure to radio waves.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields), recommended by international guidelines from the independent scientific organization ICNIRP. These guidelines incorporate substantial safety margins that are intended to assure the protection of all persons regardless of age and health. The exposure guidelines are based on the Specific Absorption Rate (SAR), which is an expression of the amount of radio frequency (RF) power deposited in the head or body when the device is transmitting. The ICNIRP SAR limit for mobile devices is 2.0 W/kg averaged over 10 grams of tissue.

SAR tests are carried out with the device in standard operating positions, transmitting at its highest certified power level, in all its frequency bands.

This device meets RF exposure guidelines when used against the head or when positioned at least 5/8 inch (1.5 centimetres) away from the body. When a carry case, belt clip or other form of device holder is used for body-worn operation, it should not contain metal and should provide at least the above stated separation distance from the body.

To send data or messages, a good connection to the network is needed. Sending may be delayed until such a connection is available. Follow the separation distance instructions until the sending is finished.

During general use, the SAR values are usually well below the values stated above. This is because, for purposes of system efficiency and to minimise interference on the network, the operating power of your mobile is automatically decreased when full power is not needed for the call. The lower the power output, the lower the SAR value.

Device models may have different versions and more than one value. Component and design changes may occur over time and some changes could affect SAR values.

For more info, go to www.sar-tick.com. Note that mobile devices may be transmitting even if you are not making a voice call.

The World Health Organization (WHO) has stated that current scientific information does not indicate the need for any special precautions when using mobile devices. If you are interested in reducing your exposure, they recommend you limit your usage or use a hands-free kit to keep the device away from your head and body. For more information and explanations and discussions on RF exposure, go to the WHO website at www.who.int/peh-emf/en.
