February 2023

YASKAWA ELECTRIC CORPORATION
(TSE6506)

What is Yaskawa?

- **Turning motors for 100 years**
- **Helping to build systems supporting industries and societies**
- **Three globally competitive products;
Industrial robots/AC servo drives/AC drives**

**Industrial robots
MOTOMAN Series**

**AC servo drive
Σ-X Series**

**AC drives
New series**

- 1. Corporate Profile and Business Overview**
- 2. Long-term Business Plan “Vision 2025”,
Mid-term Business Plan “Challenge 25 Plus”**
- 3. Sustainability**
- 4. Solution Concept “i³-Mechatronics”**

1 . Corporate Profile and Business Overview

Yaskawa Principles

Founding Spirit

Our Company was founded by Daigoro Yasukawa in 1915 with the aim of "setting up an industry to repay the debt of gratitude to the State", an aspiration held by his father Keiichiro Yasukawa.

Keiichiro Yasukawa

Daigoro Yasukawa

Our Purpose

Yaskawa's mission is to contribute broadly to social development and human welfare through the execution of our business. To achieve the mission, our group has set the following three objectives and work hard to achieve them.

- 1. Quality** Always developing and improving world-class technologies with a focus on quality
- 2. Profit** Working to improve management efficiency and secure Profit necessary for the sustainable growth
- 3. Market** Serving the needs of our customers and pursuing customer satisfaction

Profile

(As of February 28, 2022)

*Consolidated fiscal year from March 1, 2021 to February 28, 2022

Corporate Name	YASKAWA Electric Corporation	Revenue	479.1 billion yen
Founded	July 16, 1915	Main Business	<ul style="list-style-type: none">• Motion Control (AC servos, controllers and AC drives)• Robotics• System Engineering
Head Office Location	2-1 KurosakiShiroishi, Yahatanishi-ku, Kitakyushu Fukuoka JAPAN		
Capital	30.6 billion yen		
Number of Employees	Consolidated 12,897		

Business History

Founder
Daigoro
Yasukawa

Representative Director,
President
(FY 2023 -)
Masahiro Ogawa
100 th anniversary
2015

Founded
1915

1950

1980

1990

2000

2015

Electric motors
(for coal mining)

1917 -
Commercialized "three-
phase induction motor".

1958 - Invention of
"Minertia Motor"

1977 - Debut of
Japan's first full
electric industrial robot

*"Mechatronics" is a combining word with mechanism
(mechanical engineering) and electronics (electronic
engineering), and Yaskawa has registered the trademark
in 1972.

Electric
systems

Steel, paper, film plants,
water supply plants and
sewage treatment plants

System Engineering

AC Drives

DC Servomotors

AC Servomotors

Industrial Robots

Shifted the focus on
Mechatronics
field

Semiconductor wafer
transfer robot

Environmental and
energy equipment

Medical and
welfare robots

Food and
agriculture

VISION 2025

**Factory
Automation
/ Optimization**

**Mechatronics
Applications**

Revenue Breakdown by Business Segment

System Engineering

Revenue 52.3 (B JPY)

Core products :

Electrical systems for steel plants
Electrical instrumentation systems for water supply plants and sewage treatment facilities
PV inverters
Large-scale wind power generator and converter

Continuous casting machine

PV inverter XGI1500

Large-scale wind turbine and converter

Robotics

Revenue 178.7 (B JPY)

Small robot
MOTOMAN-GP4

Arc-welding robot

Collaborative robot
MOTOMAN-HC30PL

Core products :

Industrial robots
(Welding robots, painting robots, FPD glass sheet transfer robots, Handling robots)
Semiconductor wafer transfer robots
Biomedical robots
Collaborative robots. etc.

Other

Revenue 20.9 (B JPY)

Core products

Logistics, etc.

Motion Control

Revenue 227.3 (B JPY)

➤ **AC servo and controller (63%)**

Target Markets :

Semiconductor and FPD manufacturing devices, chip mounters, machine tools, injection molding and metal forming machines, etc.

➤ **Drives (37%)**

Yaskawa AC drive new series

ECO PM motor

Matrix converter
U1000

Target Markets :

Elevators and escalators, HVAC, textile machines, port cranes, etc.

Revenue / Operating Profit (FY2012 – FY2021)

- Setting **operating profit** as the most important KGI
- Formulating mid-term business plan every three to four years

(Billions of yen)

〈Reference basis〉

Challenge
100

Realize 100

Dash 25

Challenge 25 Plus

Mid-term business plans

Note1: Data up to FY2017 are based on Japanese GAAP.

Note2: The data for FY2017 are made on a reference basis. (March 21, 2017 – March 20, 2018)

Shareholder Return (Dividends)

- The cash generated by business activities is effectively allocated in three directions: (1) growth investments (2) shareholder returns (3) return to employees
- The policy of shareholder returns is based on a payout ratio of 30% + α.

Dividends

Network in Japan

- **Head office** (Robot Village) / **Yaskawa Technology Center**
- **Yahata-nishi plant** (Robot Plant / Yaskawa Innovation Center)
- **Yahata-higashi Plant** (Motion Control Plant / Motor Plant)
- **Nakama plant** (Robot plant)

- **Iruma plant**
(Yaskawa Solution Factory / Motion Control Plant)

- **Yukuhashi plant**
(Drive Center / System Engineering Center)

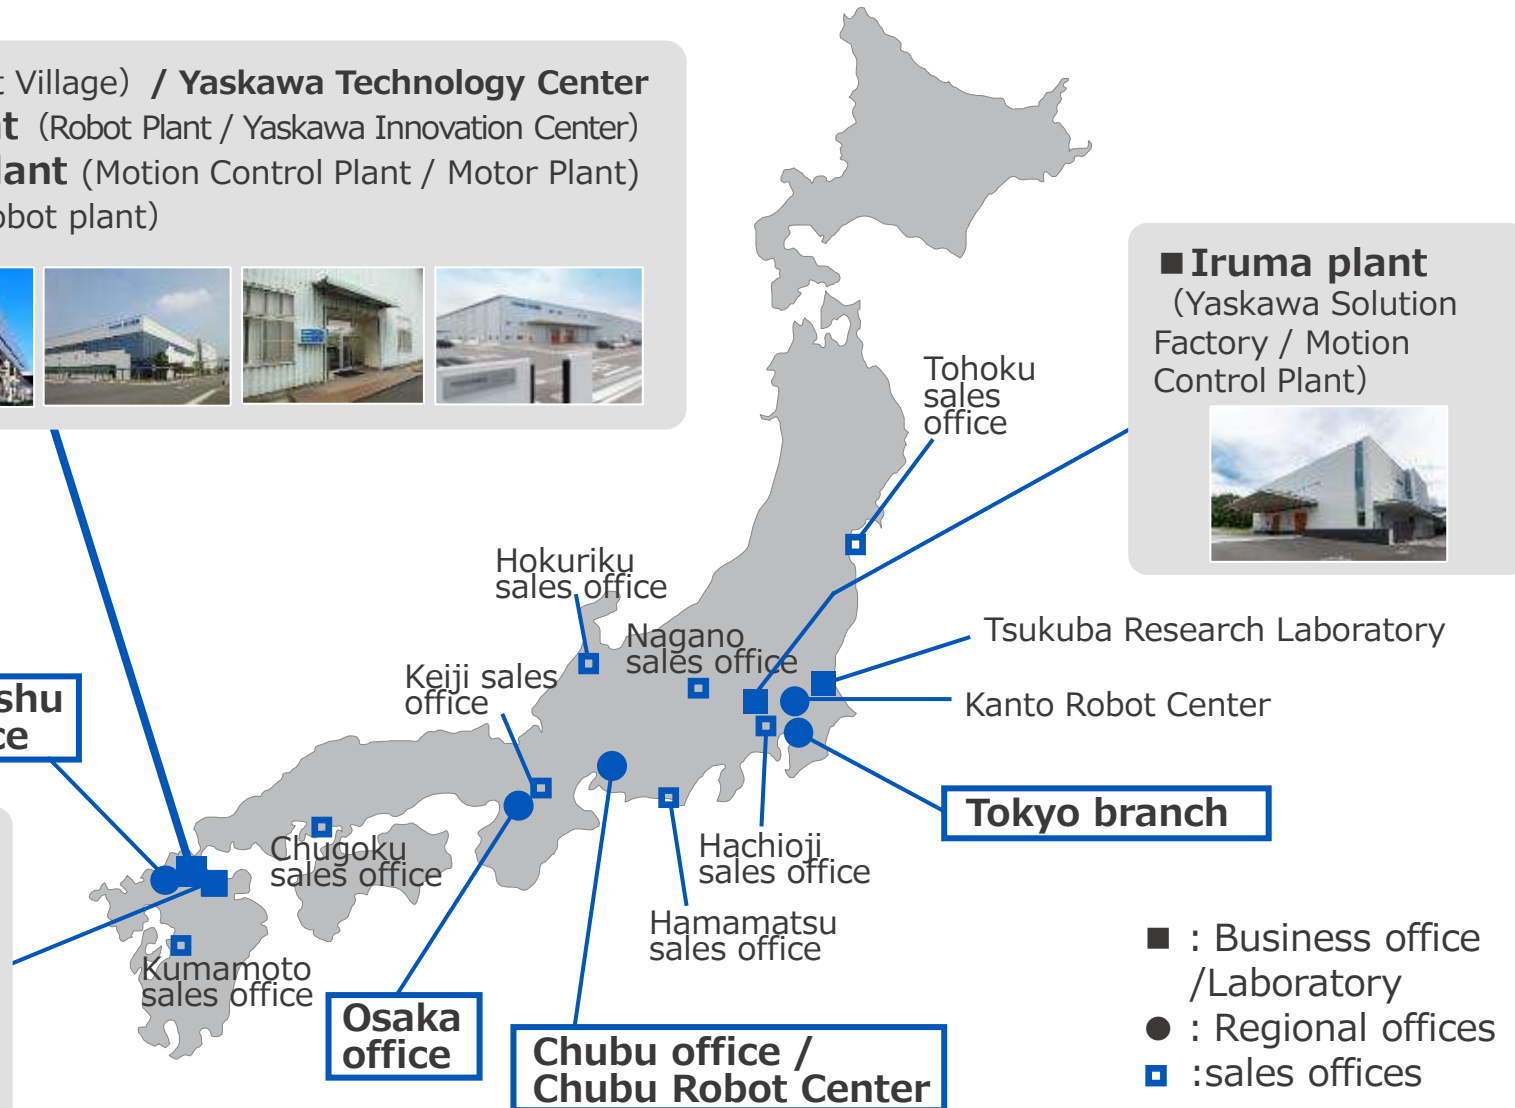

Kyushu office

Osaka office

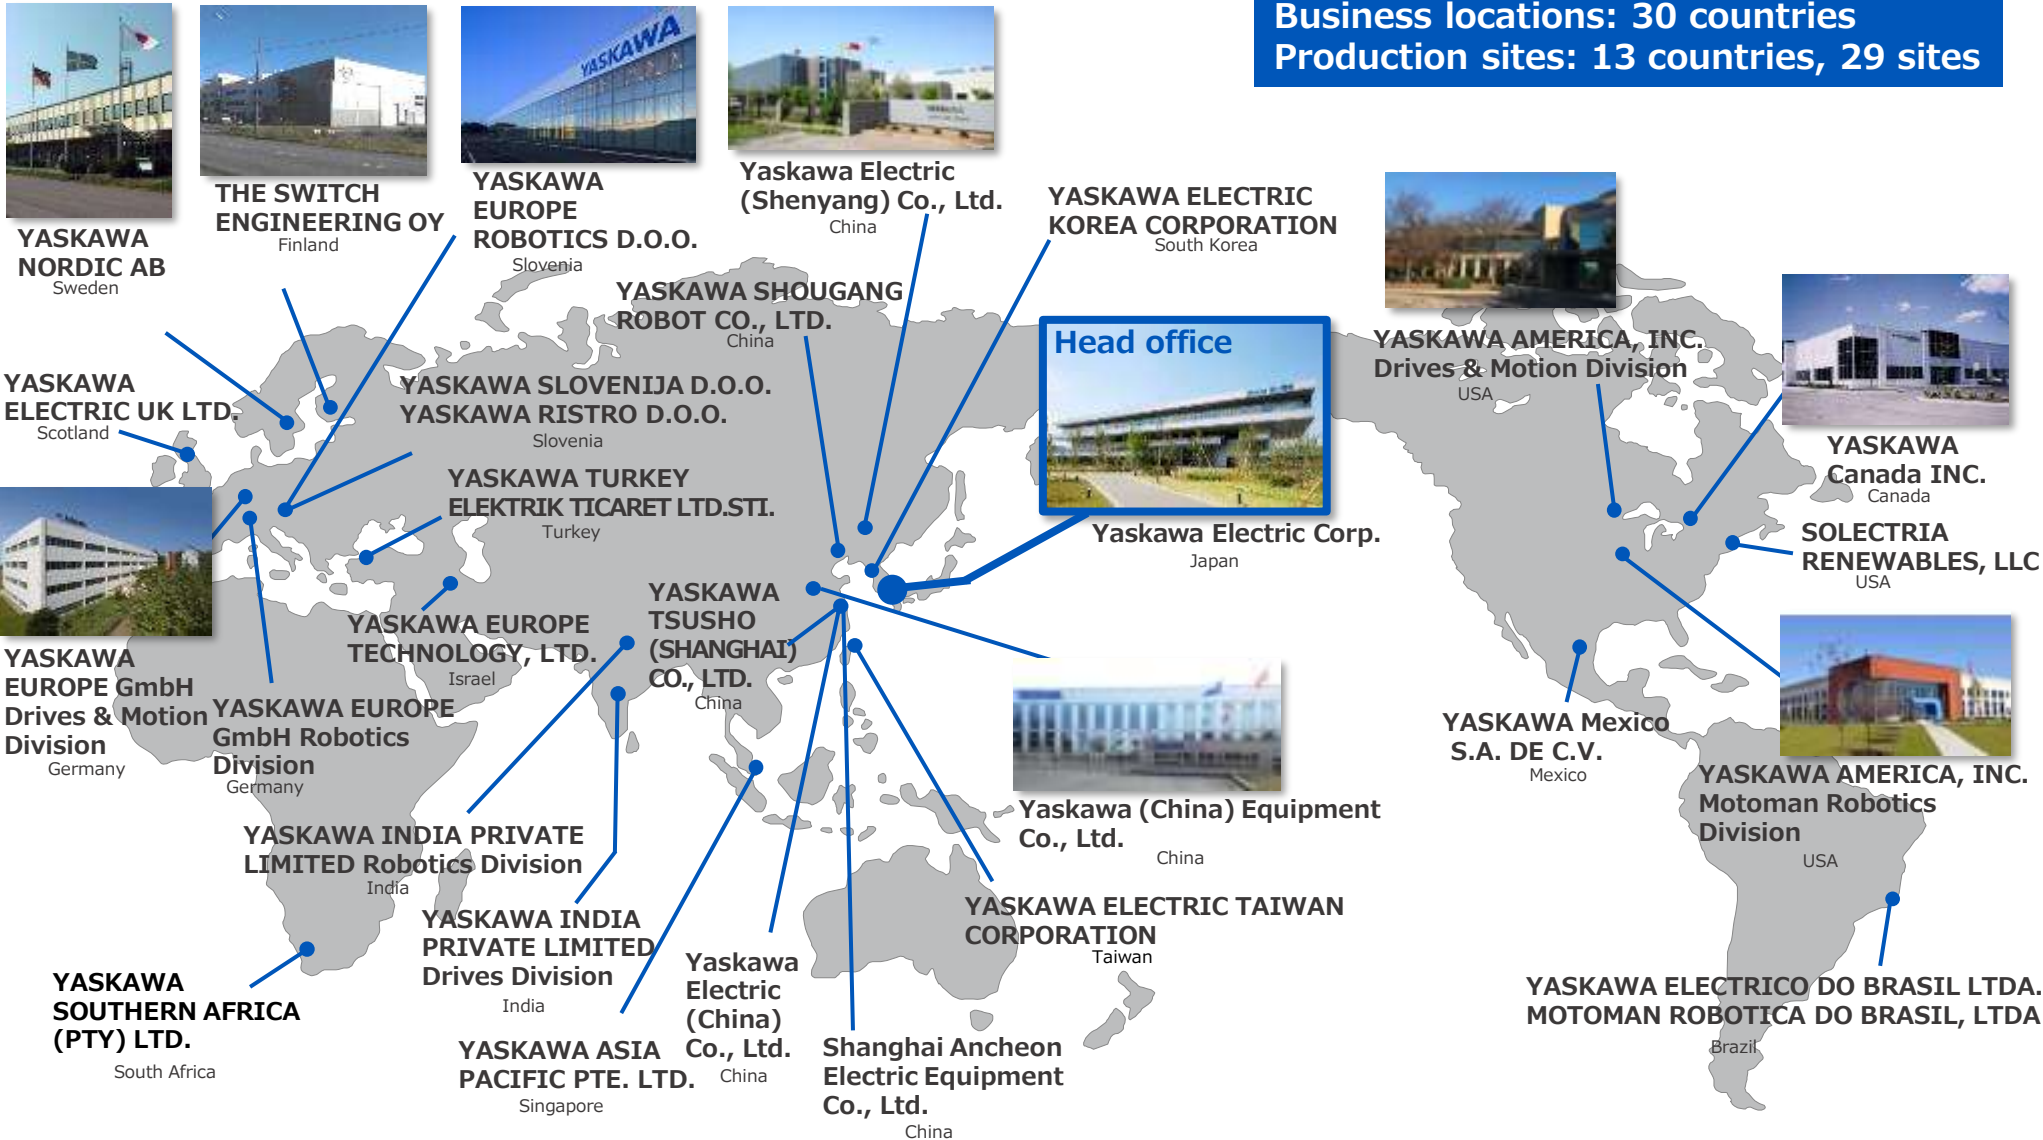

Chubu office / Chubu Robot Center

Tokyo branch

Global Network

Business locations: 30 countries
Production sites: 13 countries, 29 sites

2. Long-term Business Plan “Vision 2025” (FY2016-FY2025)

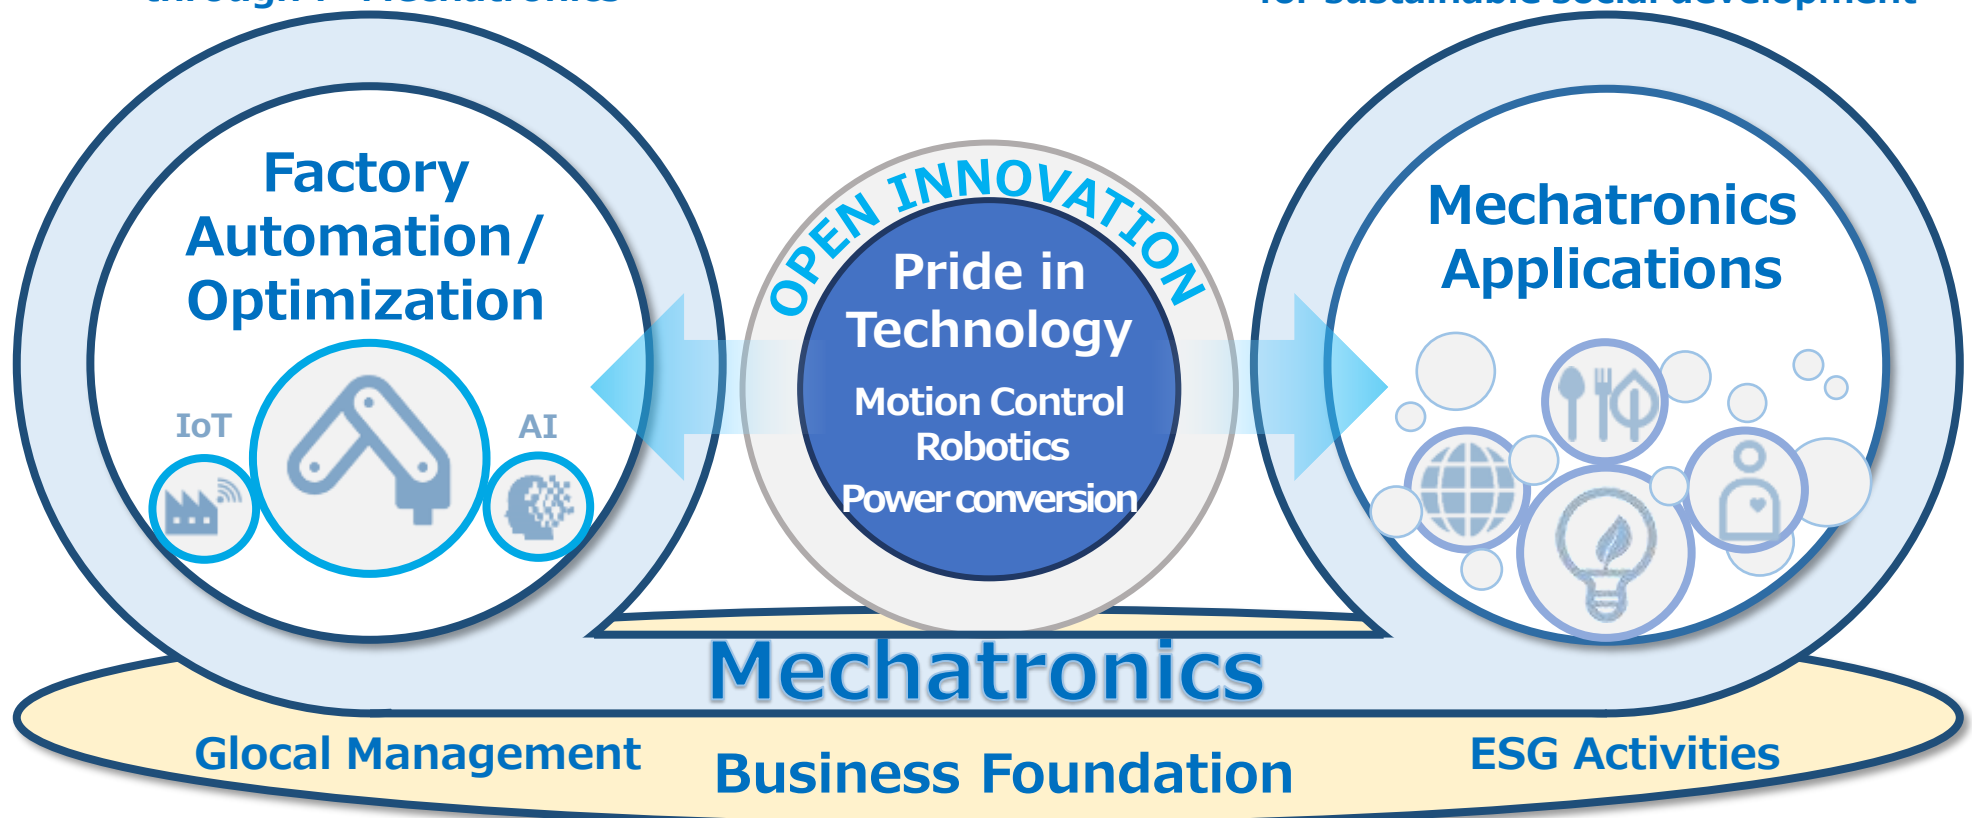

Mid-term Business Plan “Challenge 25 Plus” (FY2019-FY2022)

Yaskawa's Vision for 2025

We contribute to solving customers' management issues in addition to creating new added value to society, through evolution of core businesses, and expansion into new fields by applying mechatronics technology

Automation and optimization of factories through i³-Mechatronics*

New fields of mechatronics application for sustainable social development

* **i³-Mechatronics**: Yaskawa's solution concept for realizing new industrial automation revolutions

Financial Targets for FY 2025

**We set operating profit as the most important KGI
to be achieved in FY 2025**

	FY2015 Actual (JPY)	FY2025 Targets (JPY)
Operating Profit	36.7 billion	Over 100 billion
ROE *1 ROIC *2	12.8% 11.3%	15.0% or more 15.0% or more
Divided Payout Ratio	23.6%	30.0% + α

***1 ROE:** Return on Equity (return on equity) = Net income attributable to owners of parent/Equity

***2 ROIC:** Return on Invested Capital (return on invested capital) = Net income attributable to owners of parent/Invested capital

Basic Policies of “Challenge 25 Plus”

Promote and strengthen businesses that contribute to the development of sustainable society and accelerate improvement of profitability by management efficiency through YDX*.

Basic Policy 1

Transform Business Model through i³-Mechatronics

Basic Policy 2

Maximize profitability in the growing market through i³-Mechatronics

Basic Policy 3

Expand new domains for building a sustainable society

Develop new technologies and business domains through open innovation

Strengthening the Management Foundation through YDX

Digital Management

Work style innovation

*YDX: YASKAWA Digital Transformation

Basic Policy 1. Transform Business Model through i³-Mechatronics

Contribute to solving customers' management issues through cross-business initiatives with evolution of manufacturing, sales and technology

Make Our Customers Win

Develop technologies/products to realize i³-Mechatronics

Develop technologies and products that accurately meets customer needs timely by integrated development functions

Strengthen sales capability to realize i³-Mechatronics

Offer optimal solutions through communication with customers including top management

Strengthen manufacturing functions to demonstrate i³-Mechatronics

Develop concept of "Yaskawa Solution Factory" that will transform manufacturing and business

Strengthen service businesses through demonstration of i³-Mechatronics

Develop new services that contribute to improving customers' production efficiency

Basic Policy 2. Maximize Profitability in the Growing Market through i³-Mechatronics

Business expansion by leveraging open innovation in the rapid growing “Robotics” market*¹

Strengthen creating market presence in China and Asia, centered on “**3C***²” “**New Infrastructure***³” market

Promote initiatives with car and parts manufacturers in “**Automotive**” market

Strengthen initiatives in the “**Semiconductor**” production equipment market

*¹ “**Robotics**” Market: Automation area including robots

*² **3C**: Abbreviations for consumer and digital communications equipment (from the acronyms Computer, Communication and Consumer Electronics)

*³ **New Infrastructure**: Digitization of industries in China, centered on 7 fields which includes the next-generation communications standard “5G”, “new-energy vehicles”, and “AI.”

Basic Policy 3. Expand New Domains for Building a Sustainable Society

Contribute to realizing sustainable society through world-class mechatronic technologies

Energy Saving

AC Drives
Improve machine performance through expanding products by application

High-efficiency motors
Expand application areas in combination with AC drives

Clean Power

Photovoltaic power generation
Focus on business in Japan and the U.S.

Wind power generation
Focus on business in Europe

Motor drive system for EV
Focus on business of joint ventures in China

SUSTAINABLE DEVELOPMENT GOALS

Food & Agri

Automatic vegetable production system
Stabilization of vegetable production which is not affected by climate change

Automation of food production processes
Securing a productive labor force and quality improvement in safety and health

Humatronics*

Biomedical
Pre-process of cancer genome diagnostics
iPS cell culture

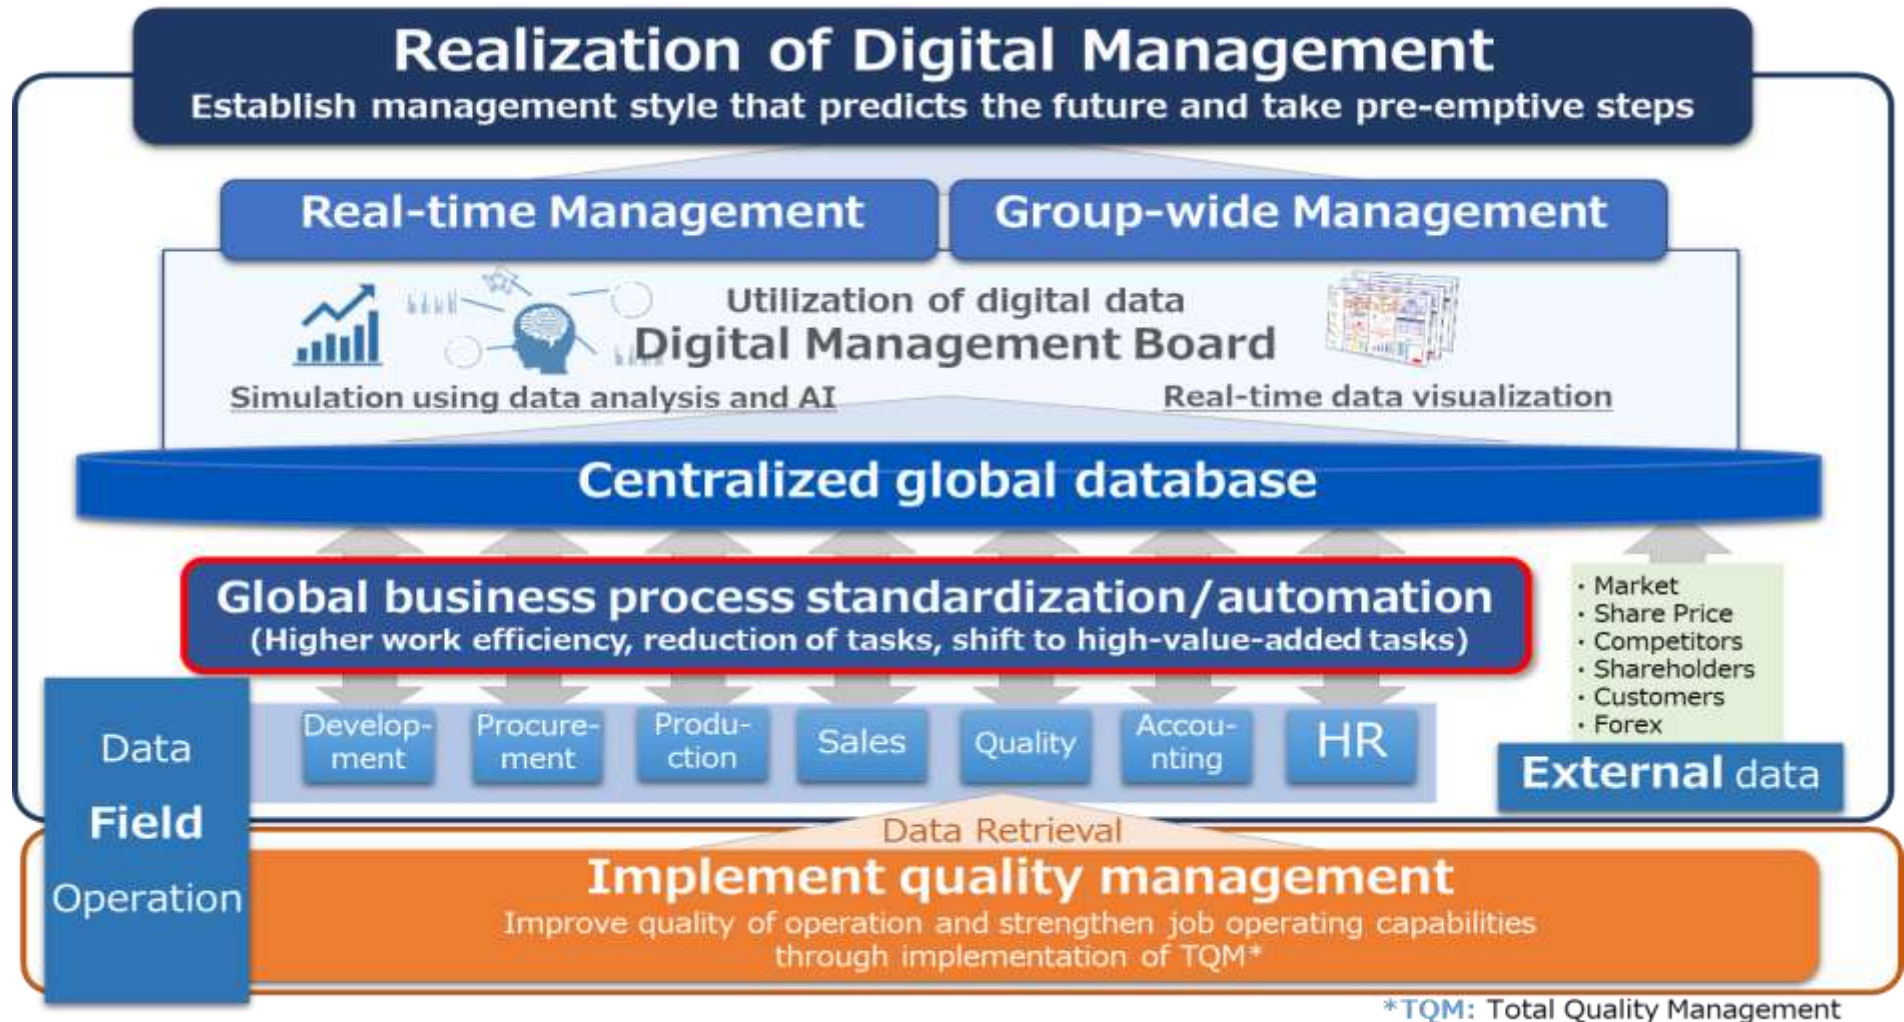

Rehabilitation
Collaboration with medical and rehabilitation equipment manufacturer

* a coined term combining Human and Mechatronics

Improve Management Efficiency through Digital and Quality Management

Strengthen integrated group management globally and expedite management decisions by unifying management data and standardizing business processes

Improve Management Efficiency through YDX

Promote “visualization of data” and “creation of a rewarding workplace” to improve our management structure that is resilient to market changes accelerated by COVID-19

■ Sophisticated business management

Enhancement of added value through visualization of management data

■ Improve productivity

Efficiency improvement through visualization of business data

■ Work style reform

Realizing flexible and diverse working styles

■ Awareness reform

Enhancing employee job satisfaction

Progress

We will continue to evolve our business through the i³-Mechatronics concept, and by contributing to the improvement of added value for our customers, we aim to achieve the goals of our vision by realizing the industrial automation revolution and improving profitability.

Challenge 25 Plus

3 . Sustainability

Promotion of Sustainability

Formulated the policy to strengthen initiatives to contribute to social sustainability

Sustainability Policy

We will strive to realize a sustainable society and increase corporate value through the implementation of the Yaskawa Group Principle of Management which is to leverage the pursuit of our business to contribute to the advancement of society and the well-being of humankind.

1. We will contribute to the value creation for customers and society through creating innovation by cutting-edge mechatronics technologies.
2. We will realize fair and transparent corporate management through communication and collaboration with stakeholders around the world.
3. We will work to resolve social issues globally with the aim of achieving SDGs as a universal goal.

Sustainability Promotion System

Yaskawa Group's Sustainability Challenges and Targets (Materiality)

Under newly formulated Sustainability Policy, identifying materiality and expanding initiatives to solve to the mid-term business plan.

Yaskawa Group's Materiality

Create Social Value and Solve Social Issues through Business Activities

Realize revolutionary industrial automation with our partners through "i³-Mechatronics"

Build clean social infrastructure and foundation for safe and comfortable living

Develop new technologies and business domains through open innovations

Strengthen Management Foundation that Contributes to Sustainable

Sustainable and productive manufacturing

Create a rewarding workplace and human resource development

Fair and transparent governance system

The Risks and Opportunities Identified in the TCFD Scenario Analysis

- The impact of climate change on business was examined.
- In terms of financial impact, **opportunities of revenue increase will be greater than risks of revenue decrease.**

Business impact on risk and opportunity factors

Risk/ Opportunity	Transition/ Physical	Factor	Impact	Evaluation
Risk	Transition	Carbon price	• Increased fuel and material procurement costs due to the introduction of carbon taxes by national governments.	Serious
		Government policies on carbon emissions	• Increased costs (e.g., purchasing clean energy) that accompany the introduction of emissions trading and the strengthening of emissions regulations.	Serious
		Transformation to energy savings and carbon reductions	• Production impacts due to price increases and procurement difficulties for reasons such as insufficient related materials from electrification and the transition to electric vehicles.	Serious
		Recycling regulations	• Increased costs from using substitute materials, etc., due to regulations such as those on plastics.	Minor
		Growth of low-carbon technologies	• Increased investment costs, such as R & D costs, due to increased competition in the energy saving performance of products against a background of increasing demands for energy savings.	Moderate
		Changing behavior of investors and customers	• Increased support costs due to investors and customers preferring companies that are more environmentally responsive. • Decreased company valuation and loss of business opportunities due to delayed responsiveness to environmental responsibility related to information disclosure and procurement.	Minor
	Physical	Increasing average temperatures	• Increased energy costs due increased air conditioning energy in our factories. • Need to move production sites where the risk of flooding exceeds tolerances due to sea rise.	Moderate
		Intensification of unusual weather	• Operation stoppages, reductions in production, and additional investment to restore equipment from typhoons, tornadoes, and flooding.	Serious
Opportunity	Transition	Transformation to energy savings and carbon reductions	• Increased demands for factory automation devices and industrial AC drives due to increased energy saving needs. • Expanded business opportunities for solutions that increase the productivity and energy saving performance of factories and equipment. • Expanded demand for solar power generators and wind power/geothermal power/biomass power generation equipment due to feed-in tariff incentives and so on. • Expanded business opportunities for electronics in electric vehicles as the electrification of automobiles progresses. • Expanded business opportunities for marine electronics due to increased demands for electric and hybrid ships.	Serious
		Changing behavior of investors and customers	• Increased investor valuation, increased ESG investment, and increased corporate value due to expansion of businesses that contribute to the environment.	Minor

2050 CARBON NEUTRAL CHALLENGE*¹ and Prospects for Achievement

- We will achieve net zero CO₂*² emissions from global business activities (Scope 1 + Scope 2*³) in 2050, and reduce the same CO₂ emissions by 51% from 2018 levels by 2030.(Announced in March 2021, revised in May 2022)
- We will actively invest in the environment to achieve this goal.

*1 Yaskawa Group's goal of achieving net-zero CO₂ emissions from its global business activities by 2050.

*2 Including carbon dioxide and other greenhouse gases (CFCs, etc.)

*3 Scope 1 is mainly emissions associated with fuel use (direct emissions). Scope 2 refers to emissions associated with the use of purchased electricity and heat (indirect emissions by electric power companies, etc.).

"CCE100" a Unique Environmental Indicator

- Promoting CCE100*, a target to increase the amount of CO₂ reduction contributed by Yaskawa products to 100 times or more of Yaskawa Group's CO₂ emissions by 2025
- Reducing the environmental impact of production activities (Green Processes) and contributing to reducing the environmental impact of customers around the world through Yaskawa products (Green Products)

* Abbreviation of Contribution to Cool Earth 100

CO₂ reduced through products
CO₂ emitted by the Group

≥100 : CCE100
Contributions of more than 100 times in 2025

CCE 100 Progress and Targets

Example for Green Products

4 . The Solution Concept i³-Mechatronics

i³-Mechatronics Concept

integrated

intelligent

innovative

Advances in Mechatronics
through digital data
management

Realize revolution of
industrial automation

i³-Mechatronics

Business Issues

Realizing Smart Factory

(Use of Robotics and Automation Technology/Use of AI and Big Data)

Variable-type and variable-quantity production

Reduced stock parts and in-process products

Reduced production lead time

Prevention of equipment failure

Elimination of dependency on individual skills in inspection process

Quality improvement (Identification of causes of defects)

i³-Mechatronics

Yaskawa has provided many solutions, such as automation with mechatronics technologies and products like AC servo drives, AC drives, and robots to meet our customer's demand for the higher productivity and higher quality on a daily basis.

We add digital data management to our automation solutions and contribute to solve business issues from the manufacturing field together with our customers by using *i³-Mechatronics*.

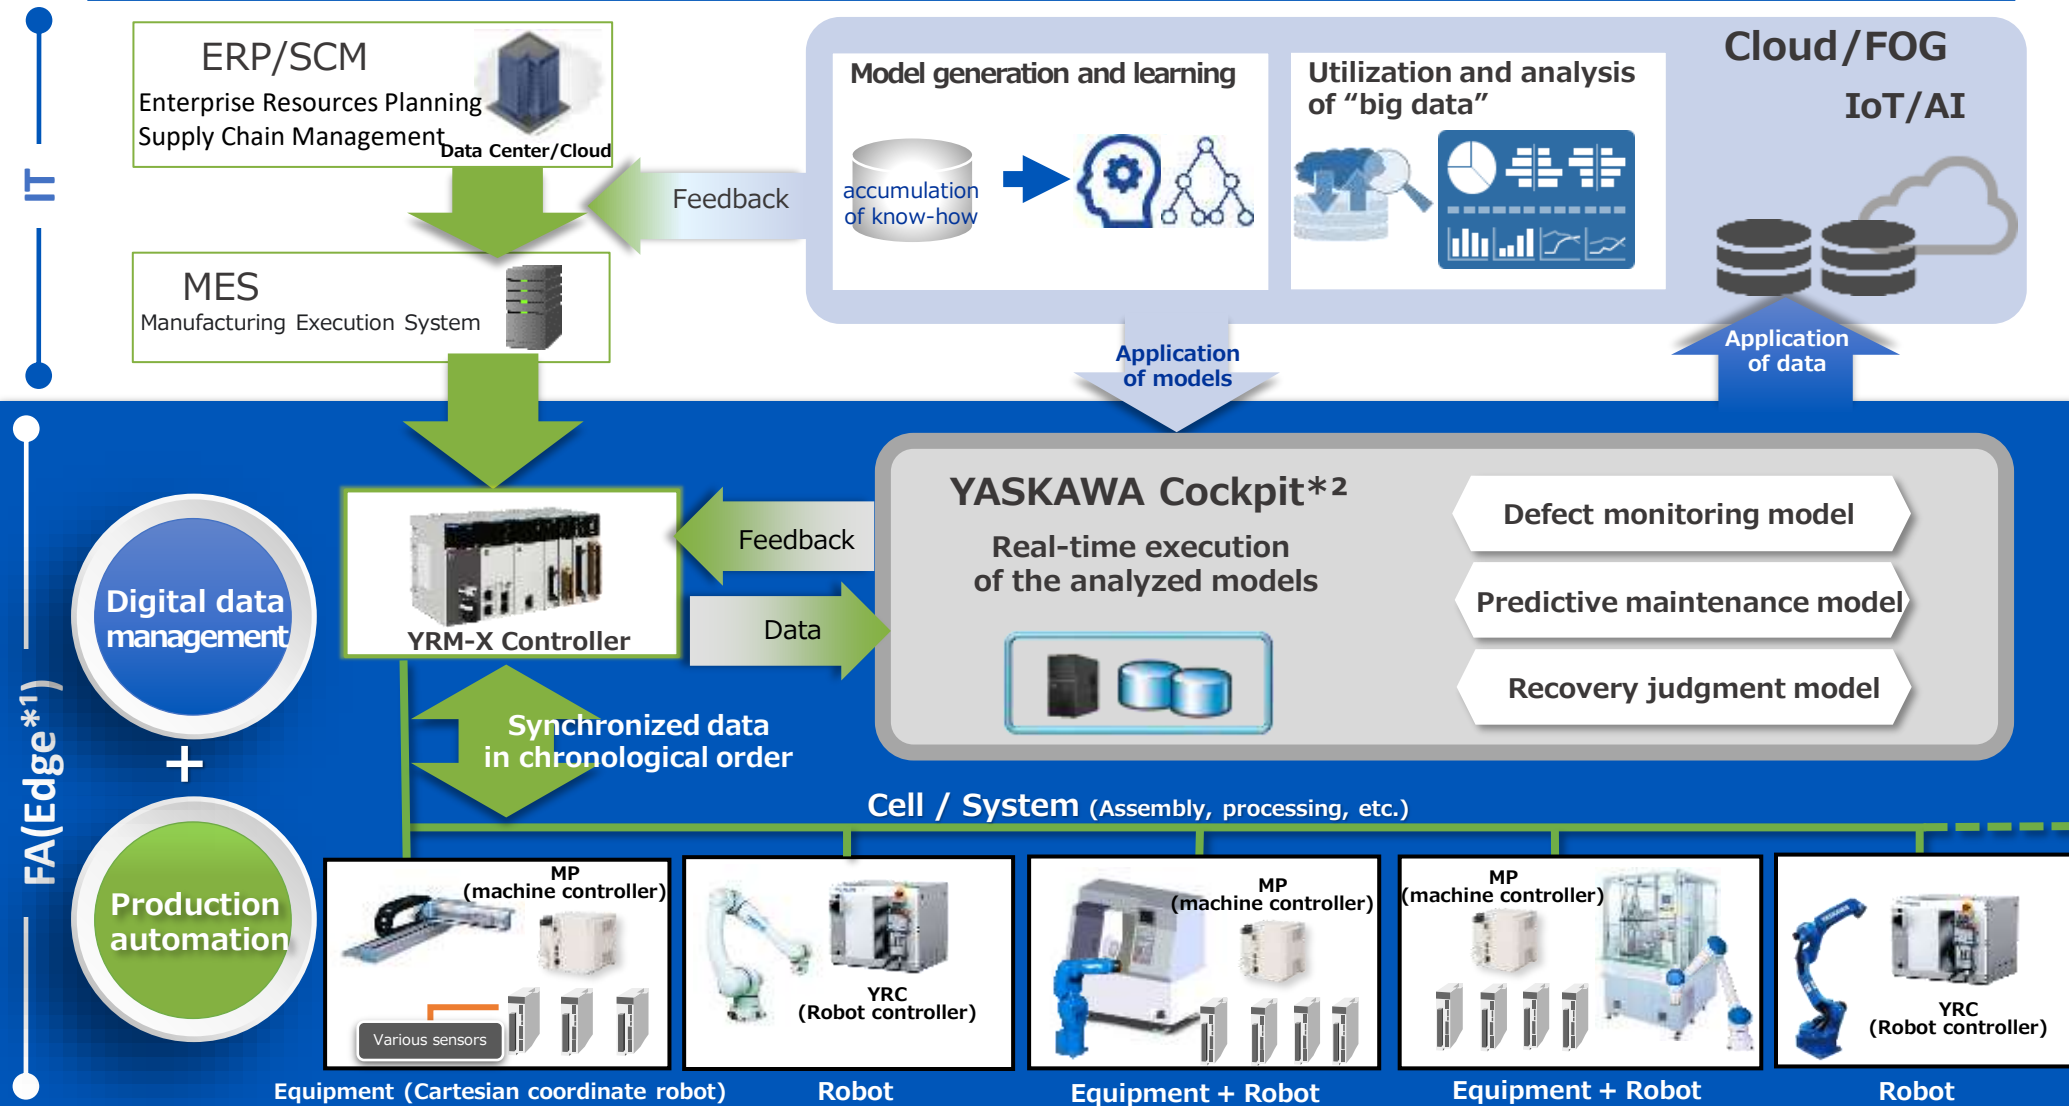

FA Solution

Motion&
Data

Data Solution

Factory where i³-Mechatronics is realized

*1: Edge is an information processing field for data analysis and feedback that require real-time performance at production sites or factories.

*2: A software that able to collect, store, and analyze real-time data on equipment and devices at production sites.

YASKAWA
