

Dell PowerConnect W-IAP100 Series Instant Access Point

Installation Guide

The Dell PowerConnect W-IAP104 and W-IAP105 wireless access points support the IEEE 802.11n standard for high-performance WLAN. This access point uses MIMO (Multiple-in, Multiple-out) technology and other high-throughput mode techniques to deliver high-performance, 802.11n 2.4 GHz and 5 GHz functionality while simultaneously supporting existing 802.11a/b/g wireless services.

The Dell PowerConnect W-IAP100 Series access points provide the following capabilities:

- Wireless transceiver
- Protocol-independent networking functionality
- IEEE 802.11a/b/g/n operation as a wireless access point
- IEEE 802.11a/b/g/n operation as a wireless air monitor
- Compatibility with IEEE 802.3af PoE
- Central management configuration and upgrades through a Dell PowerConnect W-Instant Virtual Controller

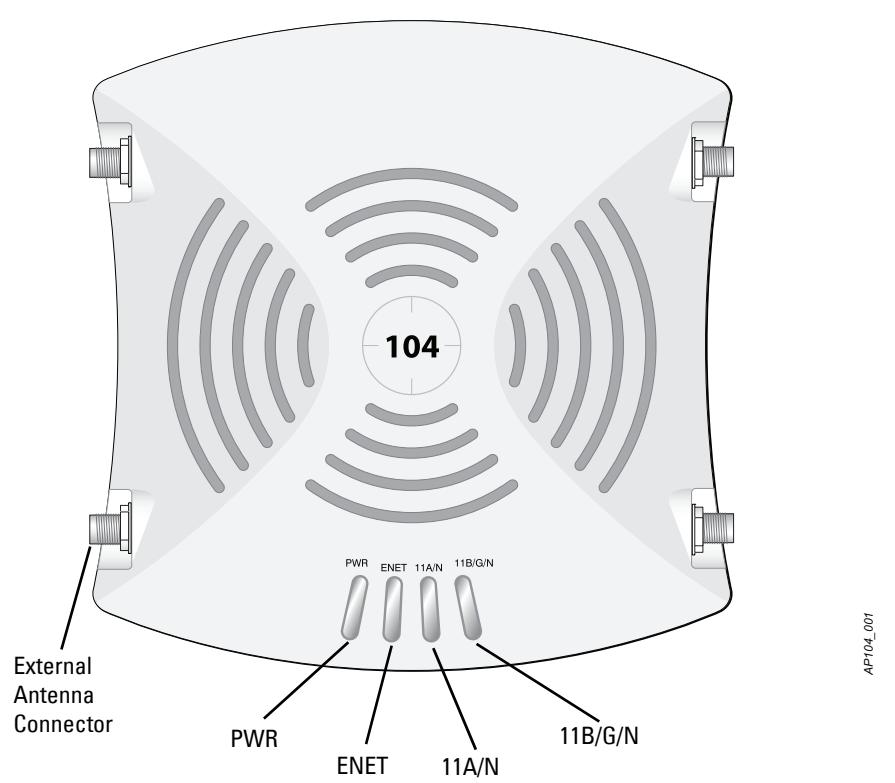

Package Contents

- W-IAP104 or W-IAP105 access point
- Installation guide (this document)
- Dell PowerConnect W-Instant Quick Start Guide
- Dell PowerConnect W-Series Safety, Environmental, and Regulatory Information document

Note: If you find any incorrect, missing, or damaged parts, inform your supplier if possible, retain the carton, including the original packing materials. Use these materials to repack and return the unit to the supplier if needed.

W-IAP100 Series Hardware Overview

Figure 1 W-IAP100 Series Front (W-IAP104 shown)

LEDs

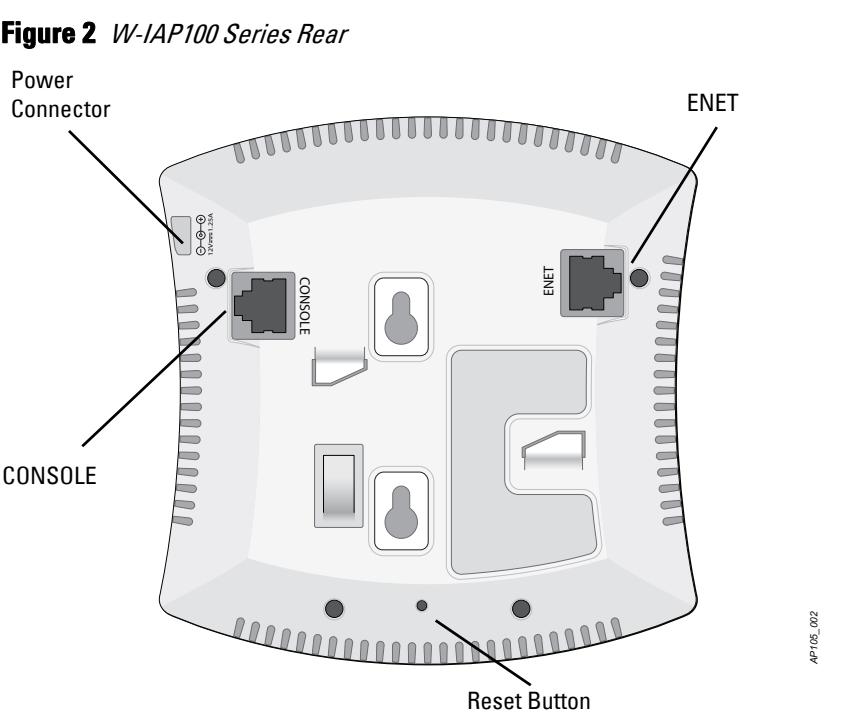

The W-IAP100 Series is equipped with four LEDs that indicate the status of the various components of the IAP.

- PWR: Indicates whether or not the W-IAP100 Series is powered-on
- ENET: Indicates the status of the W-IAP100 Series' Ethernet port
- 11A/N: Indicates the status of the 802.11a/n radio
- 11B/G/N: Indicates the status of the 802.11b/g/n radio

For information about the W-IAP100 Series' LED behavior, see [Table 1 on page 2](#).

External Antenna Connectors

The W-IAP104 is designed for use with external antennas and equipped with four external antenna connectors. The W-IAP105 is equipped with internal antennas.

Console Port

Use the console port to connect to a terminal for direct local management.

Ethernet Port

W-IAP100 Series is equipped with a single 10/100/1000Base-T (RJ-45) auto-sensing, MDI/MDX wired-network connectivity port. Supporting IEEE 802.3af Power over Ethernet (PoE). This port accepts 48VDC as a standard defined Powered Device (PD) from Power Sourcing Equipment (PSE) such as a PoE midspan injector, or network infrastructure that supports PoE.

DC Power Socket

If PoE is not available, an optional Dell power adapter kit (sold separately) can be used to power the W-IAP100 Series.

Reset Button

The reset button can be used to return the IAP to factory default settings. To reset the IAP:

1. Power off the IAP.
2. Press and hold the reset button using a small, narrow object, such as a paperclip.
3. Power-on the IAP without releasing the reset button. The power LED will flash within 5 seconds.
4. Release the reset button.

The power LED will flash again within 15 seconds indicating that the reset is completed. The IAP will now continue to boot with the factory default settings.

Note: If you have converted your W-IAP100 Series to a controller managed campus AP, resetting the device will convert it back into a factory default IAP.

Before You Begin

Caution: FCC Statement: Improper termination of access points installed in the United States configured to non-US model controllers will be in violation of the FCC grant of equipment authorization. Any such willful or intentional violation may result in a requirement by the FCC for immediate termination of operation and may be subject to forfeiture (47 CFR 1.80).

Caution: EU Statement: Lower power radio LAN product operating in 2.4 GHz and 5 GHz bands. Please refer to the [Dell PowerConnect W-Instant User Guide](#) for details on restrictions. Produit réseau local radio basse puissance opérant dans la bande fréquence 2.4 GHz et 5 GHz. Merci de vous référer au [Dell PowerConnect W-Instant User Guide](#) pour les détails des restrictions.

Low Power FunkLAN Produkt, das im 2.4 GHz und im 5 GHz Band arbeitet. Weitere Informationen bezüglich Einschränkungen finden Sie im [Dell PowerConnect W-Instant User Guide](#).

Apparati Radio LAN a bassa Potenza, operanti a 2.4 GHz e 5 GHz. Fare riferimento alla [Dell PowerConnect W-Instant User Guide](#) per avere informazioni dettagliate sulle restrizioni.

IAP Pre-Installation Checklist

Before installing your W-IAP100 Series IAP, ensure that you have the following:

- CAT5 UTP cable of required length
- One of the following power sources:
 - IEEE 802.3af-compliant Power over Ethernet (PoE) source
 - The POE source can be any Power Source Equipment (PSE) controller or midspan PSE device
 - Dell power adapter kit (sold separately)

Summary of the Setup Process

Setup an W-IAP100 Series access point by following the five tasks listed below:

1. Verify pre-installation connectivity.
2. Identify the specific installation location for each IAP.
3. Install each IAP.
4. Verify post-installation connectivity.
5. Configure each IAP.

Note: Dell, in compliance with governmental requirements, has designed the W-IAP100 Series access points so that only authorized network administrators can change the settings. For more information about IAP configuration, refer to the [Dell PowerConnect W-Instant Quick Start Guide](#) and the [Dell PowerConnect W-Instant User Guide](#).

Caution: Access points are radio transmission devices and as such are subject to governmental regulation. Network administrators responsible for the configuration and operation of access points must comply with local broadcast regulations. Specifically, access points must use channel assignments appropriate to the location in which the access point will be used.

Identifying Specific Installation Locations

Caution: RF Radiation Exposure Statement: This equipment complies with FCC RF radiation exposure limits. This equipment should be installed and operated with a minimum distance of 13.78 inches (35 cm) between the radiator and your body for 2.4 GHz and 5 GHz operations. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. When operated in the 5.15 to 5.25 GHz frequency range, this device is restricted to indoor use to reduce the potential for harmful interference with co-channel Mobile Satellite Systems.

You can mount the W-IAP100 Series access point on a wall or on the ceiling. Use the IAP placement map generated by Dell's RF Plan software application to determine the proper installation location(s). Each location should be as close as possible to the center of the intended coverage area and should be free from obstructions or obvious sources of interference. These RF absorbers/reflections/interference sources will impact RF propagation and should have been accounted for during the planning phase and adjusted for in RF plan.

Identifying Known RF Absorbers/Reflectors/Interference Sources

Identifying known RF absorbers, reflectors, and interference sources while in the field during the installation phase is critical. Make sure that these sources are taken into consideration when you attach an IAP to its fixed location. Examples of sources that degrade RF performance include:

- Cement and brick
- Objects that contain water
- Metal
- Microwave ovens
- Wireless phones and headsets

Installing the IAP

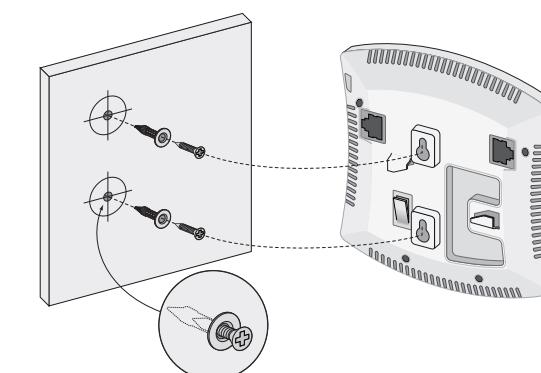

Caution: Installation and service of Dell PowerConnect W-Series products should be performed by trained service personnel only.

Using the Integrated Wall-Mounting Slots

The keyhole-shaped slots on the back of the IAP can be used to attach the device upright to an indoor wall or shelf. When you choose the mounting location, allow additional space at the right of the unit for cables.

1. Since the ports are on the back of the device, make sure that you mount the IAP in such a way that there is a clear path to the Ethernet port, such as a pre-drilled hole in the mounting surface.
2. At the mounting location, install two screws on the wall or shelf, 1 7/8 inches (4.7 cm) apart. If you are attaching the device to drywall, it is recommended that using appropriate wall anchors (not included).
3. Align the mounting slots on the rear of the IAP over the screws and slide the unit into place (see [Figure 3](#)).

Figure 3 Installing the W-IAP100 Series Access Point on a Wall

AP105_003

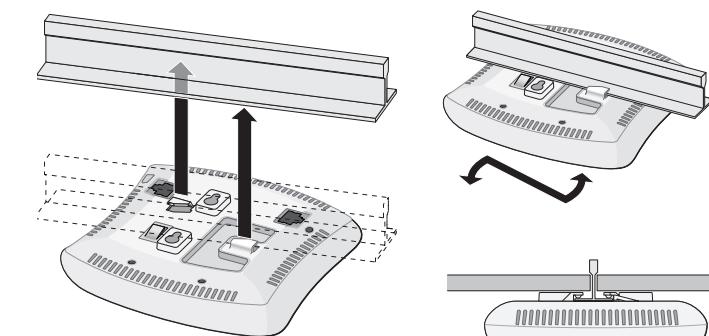

Using the Integrated Ceiling Tile Rail Mounting Slots

The snap-in tile rail slots on the rear of the IAP can be used to securely attach the device directly to a 15/16" wide, standard ceiling tile rail.

Caution: Make sure the IAP fits securely on the ceiling tile rail when hanging the device from the ceiling.

1. Pull the necessary cables through a prepared hole in the ceiling tile where the IAP will be placed.
2. If necessary, connect the console cable to the console port on the back of the IAP. Hold the IAP next to the ceiling tile rail with the mounting slots at approximately a 30-degree angle to the ceiling tile rail (see [Figure 4](#)). Make sure that any cable slack is above the ceiling tile.

Figure 4 Orienting the Ceiling Tile Rail Mounting Slots

AP105_004

3. Pushing toward the ceiling tile, rotate the IAP clockwise until the device clicks into place on the ceiling tile rail.

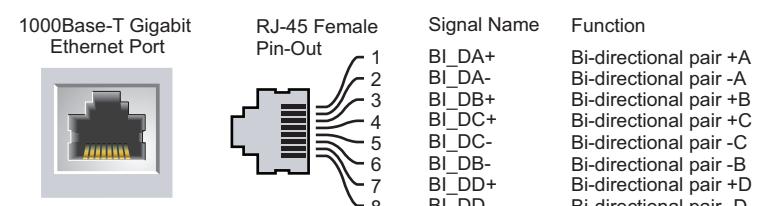

Connecting Required Cables

Install cables in accordance with all applicable local and national regulations and practices.

Ethernet Ports

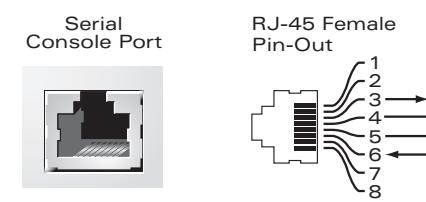

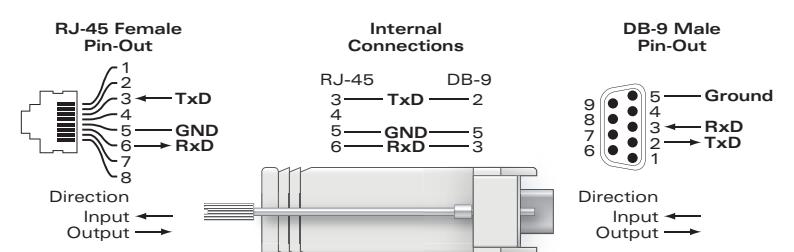

The RJ45 Ethernet port (ENET) supports 10/100/1000Base-T auto-sensing MDI/MDX connections. Use a 4- or 8-conductor, Category 5 UTP cable up to 100 m (325 feet) long.

The 10/100/1000 Mbps Ethernet port is on the back of the IAP. The port has an RJ-45 female connector with the pin-outs shown in [Figure 5](#).

Figure 5 Gigabit Ethernet Port Pin-Out**Serial Console Port**

The serial console port (Console) allows you to connect the IAP to a serial terminal or a laptop for direct local management. This port is an RJ-45 female connector with the pinouts described in [Figure 6](#). Connect this port in one of the following ways:

- Connect it directly to a terminal or terminal server using an Ethernet cable.
- Use a modular adapter to convert the RJ-45 (female) connector on the IAP to a DB-9 (male) connector, and connect the adapter to a laptop using an RS-232 cable. See [Figure 7](#) for connector details of the adapter.

Figure 6 Serial Port Pin-Out**Figure 7** RJ-45 (Female) to DB-9 (Male) Modular Adapter Conversion**Power Connection**

The W-IAP100 Series has a single 12V DC power jack socket to support powering through an AC-to-DC power adapter.

Note: If both POE and DC power are available, the IAP uses POE even when there is not enough POE voltage available to power the IAP.

Verifying Post-Installation Connectivity

The integrated LEDs on the IAP can be used to verify that the IAP is receiving power and initializing successfully (see [Table 1](#)). Refer to the [Dell PowerConnect W-Series W-Instant Quick Start Guide](#) for further details on verifying post-installation network connectivity.

Table 1 W-IAP100 Series LED Behavior

LED	Color/State	Meaning
PWR	Off	No power to IAP
	Green flashing	System initializing
	Red steady	System failed to initialize, contact TAC
	Green steady	Power on, device ready
ENET (10/100/1000 Mbps)	Off	No link
	Green on	1000 Mbps link
	Amber on	10/100 Mbps link
	Green flashing	Ethernet link activity
11A/N	Off	5 GHz radio is disabled
	Amber	5 GHz radio enabled in WLAN mode
	Green	5 GHz radio enabled in 11n mode
	Green flashing	5 GHz Air Monitor or RF Protect mode
11B/G/N	Off	2.4 GHz radio disabled
	Amber	2.4 GHz radio enabled in WLAN mode
	Green	2.4 GHz radio enabled in 11n mode
	Green flashing	2.4 GHz Air Monitor or RF Protect mode

Product Specifications**Electrical**

- Ethernet:
 - 1 x 10/100/1000Base-T auto-sensing Ethernet RJ-45 Interfaces
 - MDI/MDX
 - IEEE 802.3 (10Base-T), IEEE 802.3u (100Base-T), IEEE 802.3ab (1000Base-T)
 - Power over Ethernet (IEEE 802.3af compliant), 48V DC/350mA

Power:

- 12 VDC power interface, supports powering through an AC-to-DC power adapter

Note: If a power adapter other than the one provided by Dell is used in the US or Canada, it should be cULus (NRTL) Listed, with an output rated 12 VDC, minimum 1.25A, marked "LPS" or "Class 2," and suitable for plugging into a standard power receptacle in the US and Canada.

For additional specifications on this product, please refer to the data sheet. The data sheet can be found at [dell.com/wireless](#).

Proper Disposal of Dell Equipment

For the most current information about Global Environmental Compliance and Dell products, see our website at [dell.com](#).

China RoHS

Dell products also comply with China environmental declaration requirements and are labeled with the "EFUP 10" label shown at the left.

This table shows where these substances may be found in the supply chain of electronic information products, as of the date of sale of the enclosed product.

此标志为针对所涉产品的环保使用期标志。某些零件会有一个不同的环保使用期。此环保使用期只适用于产品手册中所规定的条件下工作。The Environment-Friendly Use Period (EFUP) for all enclosed products and their parts are per the symbol shown here. The Environment-Friendly Use Period is valid only when the product is operated under the conditions defined in the product manual.

Waste of Electrical and Electronic Equipment

Dell products at end of life are subject to separate collection and treatment in the EU Member States, Norway, and Switzerland and therefore are marked with the symbol shown at the left (crossed-out wheelie bin). The treatment applied at end of life of these products in these countries shall comply with the applicable national laws of countries implementing Directive 2002/96/EC on Waste of Electrical and Electronic Equipment (WEEE).

European Union RoHS

RoHS Dell products also comply with the EU Restriction of Hazardous Substances Directive 2002/95/EC (RoHS). EU RoHS restricts the use of specific hazardous materials in the manufacture of electrical and electronic equipment. Specifically, restricted materials under the RoHS Directive are Lead (including Solder used in printed circuit assemblies), Cadmium, Mercury, Hexavalent Chromium, and Bromine. Some Dell products are subject to the exemptions listed in RoHS Directive Annex 7 (Lead in solder used in printed circuit assemblies). Products and packaging will be marked with the "RoHS" label shown at the left indicating conformance to this Directive.

Safety and Regulatory Compliance

Dell provides a multi-language document that contains country-specific restrictions and additional safety and regulatory information for all Dell hardware products. The [Dell PowerConnect W-Series Safety, Environmental, and Regulatory Information](#) document is included with this product.

The device is electronically labeled and the FCC ID will be displayed via the WebUI under the About menu.

Caution: RF Radiation Exposure Statement: This equipment complies with FCC RF radiation exposure limits. This equipment should be installed and operated with a minimum distance of 13.78 inches (35 cm) between the radiator and your body for 2.4 GHz and 5 GHz operations. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. When operated in the 5.15 to 5.25 GHz frequency range, this device is restricted to indoor use to reduce the potential for harmful interference with co-channel Mobile Satellite Systems.

EMC Compliance and Warning Statement

- IEC 60601-1-2: 2007
- EN 60601-1-2: 2007

The W-IAP105 has been tested and found to comply with the limits of the standard for medical devices, IEC 60601-1-2:2007. The unit also complies with the requirements of EN 60601-1-2:2007, providing the presumption of compliance to the European Union's Medical Device Directive 2007/47/EC. The limits are designed to

provide reasonable protection against harmful interference in a typical medical installation. This equipment generates, uses and can radiate radio frequency energy, and, if not installed and used in accordance with the manufacturer's instructions may cause harmful interference to other devices in the vicinity. However, there is no guarantee that interference will not occur in a particular installation. If this equipment causes interference with other devices, which may be determined by turning the equipment off and on, the user is encouraged to try and correct the interference by one or more of the following measures:

- Reorient or relocate the device receiving the interference.
- Increase the separation between the equipment.
- Connect the equipment into an outlet on a circuit different from that to which the other device(s) are connected.
- Consult the manufacturer or field service technician for help.

The Model W-IAP105 do not have an Applied Part as defined in IEC 60601-1. The protection against electric shock is Class II.

Device is not protected against ingress of liquids and has a protection class of IPX0 as defined by IEC 60601-1 and IEC 60529. Equipment not suitable for use in the presence of flammable mixtures.

The unit is considered "Continuous Operation" equipment as defined by IEC 60601-1.

Power Consumption – 48 VDC 802.3af power over Ethernet or 12VDC, 1.25A for external AC supplied power (adapter sold separately); Maximum power consumption – 12.5W.

Mechanical Dimensions: 132mm x 135mm x 45mm; 300g.

Environmental: Operating Temp: 0° C to +50° C (+32° F to +122° F); Humidity: 5 to 95% non-condensing. Storage Temp: -40° C to +70° C (-40° F to +158° F).
