

Quick Start Guide

This guide introduces IBM Maximo Spatial Asset Management version 7.6.0.4, provides a link to a list of prerequisite software, gets you started with a typical installation, and provides a roadmap to other important information.

National Language Version: To obtain the Quick Start Guide in other languages, print the language-specific PDF from the installation media.

Product overview

Asset and service managers use IBM® Maximo® Spatial Asset Management to visualize the spatial relationships among managed assets and other mapped features. Maximo Spatial Asset Management extends the capabilities by adding maps to IBM Maximo Asset Management applications.

1 Step 1: Access the software and documentation

Access the product software from IBM Passport Advantage®. To download your product from Passport Advantage, follow the instructions in the Maximo Spatial Asset Management 7.6.0.4 Download Document (<http://www.ibm.com/support/docview.wss?uid=ibm10715805>).

Before you install the product, read the IBM Maximo Spatial Asset Management 7.6.0.4 installation information. Review any existing release notes for this product (release notes). Release notes contain the latest information that is relevant to this product.

For complete documentation, including installation instructions, see the Maximo Spatial Asset Management Knowledge Center (http://www.ibm.com/support/knowledgecenter/SSG2D3_7.6.0.4/com.ibm.spl.doc/welcome.html).

2 Step 2: Plan the installation

Maximo Spatial Asset Management 7.6.0.4 requires Maximo Asset Management 7.6.1. Maximo Asset Management 7.6.1 is a full release. You must download the complete set of Maximo Asset Management 7.6.1 product packages from Passport Advantage, including middleware, and then deploy them in your environment.

After you deploy Maximo Asset Management 7.6.1, you must install Maximo Spatial Asset Management 7.6 before you can apply the Maximo Spatial Asset Management 7.6.0.4 feature pack.

Installing Maximo Spatial Asset Management requires system administrator rights and privileges.

You must have system administrator rights and privileges to install the product.

For information about the hardware, software, and network requirements for your product, see the System Requirements section in the Overview and Planning page on the Maximo Asset Management wiki (<https://www.ibm.com/developerworks/community/wikis/home?lang=en#!/wiki/IBM%20Maximo%20Asset%20Management/page/Overview%20and%20planning>)

3 Step 3: Install the product

To install Maximo Spatial Asset Management:

1. Review the software requirements.
2. Deploy Maximo Asset Management 7.6.1 in your environment. Refer to the Maximo Asset Management 7.6.1 knowledge center for more information.
3. Install Maximo Spatial Asset Management 7.6. Refer to the Maximo Spatial Asset Management 7.6 knowledge center for more information.
4. Install the Maximo Spatial Asset Management 7.6.0.4 feature pack using instructions in the readme file.
5. For Oracle WebLogic Server environments only: you must deploy the Enterprise Application Archive (EAR) files.
6. For the IBM WebSphere® Application Server environments: The EAR files are installed when you install the process automation engine. If this task was deferred during the Maximo Spatial Asset Management installation, deploy the EAR files.

More information

After you install the product, use the Knowledge Center to learn more about the product.
