

IBM Security Directory Integrator

Version 7.2

Quick Start Guide

This guide describes a quick and easy way to install IBM Security Directory Integrator. You can perform a typical installation, or customize the installation as necessary.

National Language Version: The Quick Start Guide is available in other languages on the Quick Start CD. You can print the PDF from the Quick Start CD.

Product overview

IBM® Security Directory Integrator is an integrated development environment and runtime service for general-purpose, multi-format, multi-directional, real-time data movement, synchronization, and transformation.

There are two editions of IBM Security Directory Integrator Version 7.2:

- IBM Security Directory Integrator Version 7.2: General Purpose Edition
- IBM Security Directory Integrator Version 7.2: Identity Edition

This Quick Start Guide applies to both editions.

1 Step 1: Access the software

This document shows you how to install IBM Security Directory Integrator by using the product DVDs.

If you download your product from Passport Advantage®, follow the instructions in the download document available at: <http://www-01.ibm.com/support/docview.wss?uid=swg24035818>

This product offering includes:

- Quick Start CD
- IBM Security Directory Integrator Version 7.2
- IBM Security Directory Server Version 6.3.1
- IBM solidDB® 7.0

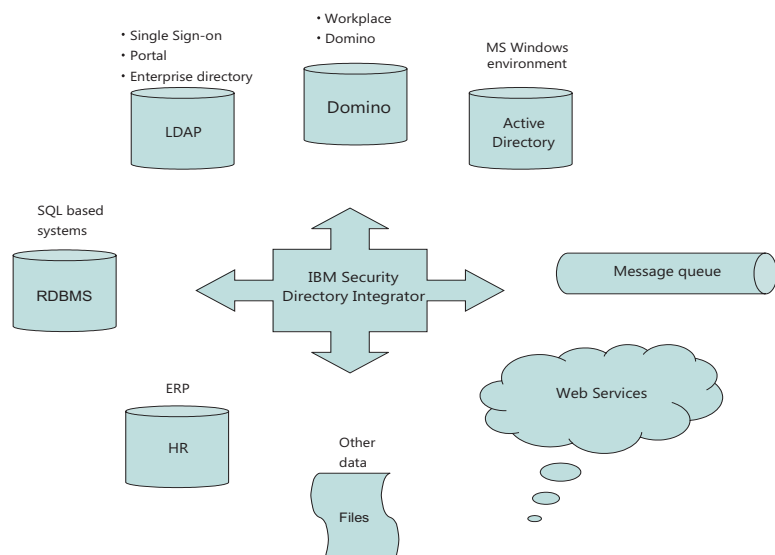

2 Step 2: Evaluate the hardware and system configuration

For information about system requirements, including the critical configuration settings that are required for installation, see the *System requirements* and *Installation instructions* sections in the IBM Security Directory Integrator documentation at http://pic.dhe.ibm.com/infocenter/tivihelp/v2r1/topic/com.ibm.IBMDI.doc_7.2/welcome.html.

3 Step 3: Review the base architecture

The following diagram illustrates the base architecture of IBM Security Directory Integrator.

4 Step 4: Access the installer from the IBM Security Directory Integrator Launchpad

On the server computer, access the installation executable file for your operating system and follow these steps:

1. Insert the product installation DVD. There is only one DVD for all supported operating systems. On Windows operating systems, the Launchpad launches automatically. For all other operating systems, run the IBM Security Directory Integrator Launchpad executable file. For example, `launchpad.sh`.
2. From the Launchpad menu, select **Install IBM Security Directory Integrator**.
3. On the installation panel, click **IBM Security Directory Integrator Installer** and follow the installation instructions.

5 Step 5: Install IBM Security Directory Integrator

Install IBM Security Directory Integrator by using a Typical or Custom installation:

- A Typical installation installs the Server, Configuration Editor, JavaDocs, the Administration and Monitoring Console (installed into the Integrated Solutions Console Standard Edition (ISC SE)), Action Manager, and examples.
- A Custom installation allows you to choose individual components to install.

Note: Password Synchronization Plug-ins are installed by using a custom installation with the standard installer.

For more information, see the *Installation instructions* section in the IBM Security Directory Integrator documentation at http://pic.dhe.ibm.com/infocenter/tivihelp/v2r1/topic/com.ibm.IBMDI.doc_7.2/welcome.html
