

CHLORINE-pH CONTROL PANEL

Simplified configuration for maintaining Recirculating Water Systems in Sanitizing and Disinfecting applications.

With pH control, the system maintains optimal efficacy of chlorine in the solution.

Dilution[™]
SOLUTIONS

FEATURES

- Chlorine electrode continuously monitors concentration to maintain desired set point
- Electric pump with integrated controller
- Auto shut-off if chemical container is empty
- Underload and overload alarm functionality
- Flush valves on strainers to maintain a clean sample water supply for analysis
- Proximity switch sets the system in standby mode when sample flow is interrupted

BENEFITS

- Automated system
- No manual pump operation
- No handling of harmful chemicals
- No titration required to maintain disinfectants
- Easy maintenance

Designed to minimize the potential spread of pathogens, such as *E. coli.* and *Listeria*, in vegetable and fruit washing through recirculating water.
