

IBM Endpoint Manager for Power Management

Version 9.2.0

Quick Start Guide

This guide describes a quick and easy way to install the product.

National Language Version: To obtain the Quick Start Guide in other languages, print the language-specific PDF from the installation media.

Product overview

IBM® Endpoint Manager, built on BigFix® technology, delivers endpoint lifecycle and security management through a single, lightweight, extensible infrastructure. This solution enables organizations to proactively manage their servers, desktops, and laptops. IBM Endpoint Manager provides a clear path for improving control and compliance with clear, accurate reporting, and easy integrations with adjacent management infrastructures. For details about IBM Endpoint Manager, see Getting Started.

Version 9.2.0 includes significant improvements to the capabilities in the individual applications built on the IBM Endpoint Manager platform:

- New role-based access controls to allow IBM Endpoint Manager administrators greater control over operator permissions.
- Expanded agent coverage for heterogeneous platform support. New platforms on UNIX and Linux include Red Hat Enterprise Linux (RHEL) 7, Power Linux (RHEL, big endian), and Ubuntu 14.

IBM Endpoint Manager for Power® Management V9.2.0 allows IT organizations to enforce conservation policies across the enterprise, while providing granularity that enables application of these policies to a single computer. For users, IBM Endpoint Manager for Power Management maximizes power policy deployment while minimizing usage impact through an optional "opt-in" approach. Granular controls also allow users to save their work before shutting the system down, ensuring no loss to productivity. IBM Endpoint Manager for Power Management can be used either as a stand-alone offering or integrated with IBM Endpoint Manager for Lifecycle Management and IBM Endpoint Manager for Security and Compliance.

1 Step 1: Access the software and documentation

The IBM Endpoint Manager software can be accessed from Passport Advantage® or from DVD.

If you download your product from Passport Advantage, follow the instructions in the download document available at <http://www.ibm.com/support/docview.wss?rs=1015&uid=swg21683421>.

The IBM Endpoint Manager package includes the following product DVDs:

- IBM Endpoint Manager Platform Install V9.2.0 for Multiplatforms
- IBM Endpoint Manager Platform Install V9.2.0 for Linux and DB2
- IBM DB2® Workgroup Server Edition 10.5 - Linux 64-bit - Limited Use

For complete documentation, see http://pic.dhe.ibm.com/infocenter/tivihelp/v26r1/index.jsp?topic=/com.ibm.tem.doc_9.1/welcome/welcome.html.

2 Step 2: Evaluate the hardware and system configuration

See the IBM Endpoint Manager System Requirements at <http://www-01.ibm.com/support/docview.wss?rs=1015&uid=swg21684809>.

3 Step 3: Get started and install IBM Endpoint Manager

A complete IBM Endpoint Manager installation is composed of installation and registration of the platform, followed by the configuration of the applications:

1. For an introduction to the product platform and applications, see Getting Started
2. To learn about the installation of the platform and the product components, see Installation Guide.
